VOL 42

INDEX

Federal Register

Index

April 1977

Volume 42—Numbers 63-83

Pages 17413-22123

This INDEX is based on a consolidation of contents entries appearing in this month's issues of the FEDERAL REGISTER together with broad subject references. It is published monthly, quarterly, and annually.

A general index to the entire Code of Federal Regulations, the CFR INDEX, is revised as of July 1 each year.

Numerical Finding Aids. A CUMULATIVE LIST OF CFR SECTIONS AFFECTED is published monthly and is cumulated for 12 months, keyed to the revision dates of the various CFR volumes.

All FEDERAL REGISTER publications are available for purchase from the Superintendent of Documents, U.S. Government Printing Office, Wash. D.C. 20402.

INQUIRIES may be made to the Finding Aids Unit at area code 202—523–5227.

SUGGESTIONS concerning this and other publications of the Office will be welcomed by Fred J. Emery, Director, Office of the Federal Register, National Archives and Records Service, Washington, D.C. 20408.

EDUCATION OF DISADVANTAGED CHILDREN, NATIONAL ADVISORY COUNCIL

NOTICES
Meetings, 20510

EDUCATION OFFICE

RULES
Community service and continuing education programs; financial assistance:
Proposed fiscal year 1977 funding priorities, 17889
Handicapped education, training personnel program; grants, application, 20300
Inflation impact statements, 17445, 19288, 20300
Neglected or delinquent children in institutions; grants to State agencies, 19288
School assistance in federally affected areas; State equalization programs payment; correction, 18279
Vocational education:
Research projects; applicant selection criteria, 17445

PROPOSED RULES
Basic educational opportunity grant program, 18738, 20803
College work-study program, 18738, 20803
Direct project grant and contract programs:
Public service education institutional grant program, 18864
Higher education, student assistance programs; limitation, suspension, or termination of institutional eligibility, 18743, 20803, 21821
Higher education and vocational students, low interest loans:
Vocational students, low-interest and direct loans; CFR redesignation, 18747
Higher education personnel training program, 18283
Inflation impact statements, 17704, 18283, 18284, 18739, 18744, 18748, 18750, 18864, 18866
National direct student loan program, 18738, 20803
Public service education fellowships, 18865
Public service education institutional grant program, 18864
School assistance in federally affected areas; State equalization programs payment; alternate standard; correction, 18282
State administered programs; State student financial assistance training programs, incentive grants, 18750, 20803
Student consumer information services, 18747, 20803
Student incentive grant program, State; fiscal year 1977 allotment and application procedures, 18407
Supplemental educational opportunity grant program, 18738, 20803
Veterans' cost-of-instruction payments to institutions of higher education, 18282
Vocational education:
Low-interest and direct loans; CFR redesignation, 18747
Vocational education programs, Commissioner's discretionary, 18542, 18584
Vocational education programs, State, 18542, 18584
Women's Educational Equity Act program, 17700, 19161, 21623

NOTICES
Accrediting and State approval agencies and associations, nationally recognized; list, 20507
Applications and proposals, closing dates:
Community service and continuing education programs, 21854
Emergency school aid, 19234, 21664
Public service fellowships, 18902
Public service institutional grants, 18903
State student financial assistance training program, 18663
State student incentive grant program, 18452
Veterans' cost-of-instruction program, 18311
Women's Educational Equity Act program, 17712
Audit appeals:
Utah, 20673
Committees; establishment, renewals, etc.:
Indian Education National Advisory Council, 19924
Guaranteed student loan program; special allowance for eligible loan holders, 20859
Information collection and data acquisition activity, description; inquiry, 17915, 19516, 20194, 21321
Interagency agreements, 21377
Meetings:
Accreditation and Institutional Eligibility Advisory Committee, 18130, 19234
Career Education National Advisory Council, 19923, 20859
Ethnic Heritage Studies National Advisory Council, 21854
Financial Aid to Students Advisory Council, 21663, 21664

ENERGY RESEARCH AND DEVELOPMENT ADMINISTRATION

RULES
Conduct standards; avoidance of conflicts of interest, 21778
Procurement, 21778

PROPOSED RULES
Electric and hybrid vehicle research, development, demonstration, and production; loan guaranties, 20831

NOTICES
Advisory committees review; inquiry, 17515
Meetings:
General Advisory Committee, 18884
Geothermal Energy Advisory Committee, 21508, 21639
Global Environmental Effects of Carbon Dioxide Study Group, 17515, 18883
Model code for energy conservation in new building construction, 21638
New building construction model code for energy conservation; meeting, 21638

ENGINEERS CORPS

PROPOSED RULES
Administrative procedures:
Commercial statistics, policy on release, 18863
Environmental quality:
Off-road vehicles; use on Army land, 21620
Inflation impact statements, 18863, 21301, 21620, 21623
Navigation regulations:
Cooper River, S.C., 21622
San Francisco Bay, Calif.; extension of time, 21300

ENVIRONMENTAL PROTECTION AGENCY

RULES
Air pollution control, new motor vehicles and engines:
High-altitude vehicles, sale; clarification of designated locations, 20464
Air quality implementation plans; preparation, adoption, and submittal:
Air pollutant emissions, information acquisition, 19862
Air quality implementation plans; various States, etc.:
Delaware, 17877
New Mexico, 20131
North Carolina, 20132, 20133
Oregon, 20132
Texas, 20131, 20463
Utah, 21472, 21474
Inflation impact statements, 20464
Pesticide chemicals in or on raw agricultural commodities; tolerances and exemptions, etc.:
N,N-Diethyl-2-(1-naphthalenyloxy)-propionamide, 17443
Water pollution; effluent guidelines for certain point source categories:
Coal mining, 21384
Inorganic chemicals manufacturing, 17444
Nonferrous metal manufacturing; extension of time, 17444

PROPOSED RULES
Air quality implementation plans; various States, etc.:
Arizona, 21820
California, 21488, 21819
District of Columbia, 17496
Louisiana, 17497
Massachusetts, 19359
Montana, 21819
New York, 21113
North Dakota, 20480
Virginia, 17498
Pesticide chemicals in or on raw agricultural commodities; tolerances and exemptions, etc.:
Oxytetracycline, 17499
Toxic substances:
Inventory reporting and general provisions, 19298
Rulemaking procedures, 20640
Water pollution control:
Pretreatment standards for existing and new sources; extension of time, 20314

NOTICES
Air pollution; ambient air monitoring reference and equivalent methods, 18298, 20490, 20652
Air pollution; standards of performance for new stationary sources:
Coal-fired steam generators; sulfur dioxide emissions, 18884
Air pollution control, new motor vehicles and engines:
California; hearing, 19372, 20494
Air quality implementation plans; various States, etc.:
Louisiana, 19378
Air quality maintenance areas, alternative; analysis procedures approvals:
Michigan, 18893
Wisconsin, 18893
Air quality models, guidelines; meeting, 20492
Air quality standard, National, lead; meeting; correction, 18425
Air quality standards; photochemical oxidant and hydrocarbon, review; inquiry, 20493
Committees; establishment, renewals, etc.:
Science Advisory Board, 17899
State-Federal FIFRA Implementation Advisory Committee, 20652
Environmental statements; availability, etc.:
Des Moines, Iowa, 208 Areawide Waste Treatment Management Plan, 20849
El Paso and Teller Counties, Colo., Water Quality Management Plan, 17516

Ohio, 19377
Pennsylvania, 20849
Utah, 18893
Pesticide chemicals; tolerances, exemptions, etc.; petitions:
Abbott Laboratories, 19374
Chevron Chemical Co. et al., 21640
Ciba-Geigy Corp., 18426
Conrel, 21837
FMC Corp., 21641
Monsanto Agricultural Products Co., 18424, 18425
Pesticide enforcement policy statements:
Aerial application of certain pesticides, 21496
Pesticide programs:
Amitraz, pesticide products containing; rebuttable presumption against registration and continued registation, 18299
Lindane, pesticide products containing; rebuttable presumption against registration and continued registration; extension of time, 20182
Packaging, special; standards; notification to Agriculture Department Secretary, 21312
Potassium arsenite, products containing; rebuttable presumption against registration and continued registration, 18893
Pesticide registration:
Applications, 18422, 19375
2(p-tert-Butylphenoxyl)-1-methylethyl-2'-chloroethyl sulfite, 19209
Chlordecone (kepone), 18885
Copper acetoarsenite, 18424, 21837
Copper arsenate, 18422
Endrin; hearings, 21641
GALLTROL-A, 21837
Heptachlor 5-G, denial, 20850

Pesticides; specific exemptions and experimental use permits:
Elanco Products Co. et al., 17897
Idaho State Agriculture Department, 20849
Mobil Chemical Co. et al., 19374, 21311
Monsanto Agricultural Products Co. et al., 19374
Stauffer Chemical Co. et al., 17898
Texas Department of Health Resources, 21642
Upjohn Co. et al., 19378
Washington State Department of Agriculture, 19926
Zoecon Corp. et al., 17899
Toxic substances control:
Chemicals, candidate list; availability, 21639
Water pollution control:
Cooling water intake and thermal structures, proposed technical guidance manual for evaluating; inquiry, 21642
Water pollution control; safe drinking water; public water systems designations:
Connecticut, 18298
Louisiana, 18426

ENVIRONMENTAL QUALITY, PRESIDENT'S COUNCIL

NOTICES
Meetings; Sunshine Act, 21899

ENVIRONMENTAL QUALITY COUNCIL

RULES
Sunshine Act; implementation, 20818

PROPOSED RULES
Environmental impact statements, preparation; guidelines, inquiry, 18111

NOTICES
Alaska natural gas transportation system alternatives, environmental impact; hearing, 17511
Environmental impact statement reform; hearing, 21836
Environmental statements; availability, etc., 17512, 18629, 19900, 20844, 21833
Meetings:
Priority Chemicals Testing, TSCA Interagency Committee, 21307

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

NOTICES
Meetings; Sunshine Act, 17580, 18921, 20880, 21898
Privacy Act; systems of records, 21644

FAIR HOUSING AND EQUAL OPPORTUNITY, OFFICE OF ASSISTANT SECRETARY

NOTICES
Fair housing and equal opportunity; voluntary affirmative marketing program, 21756

FARM CREDIT ADMINISTRATION

RULES
Definitions:
Loss sharing agreements, 20457
Loan policies and operations:
Loss sharing and guaranty agreements, 20457
Organization and functions:
Farm Credit System, 20617

PROPOSED RULES
District board policies, 19887
Funding and fiscal affairs; debt maturity policy and program, authority to issue, etc., 19887
Organization; terms of office of directors of Farm Credit associations, 19887

NOTICES
Authority delegations:
Deputy Governor, Credit and Operations, et al., 17516
Secretary to Governor et al., 17516

FARMERS HOME ADMINISTRATION

RULES
Drought stricken areas, special assistance, 19323
Loan and grant disbursement:
Policies governing disbursement of funds, 21604
Loan and grant programs (individual):
Development planning and performing; complaints, suspension, and debarment proceedings, 20284
Real estate and chattel properties:
Rural to nonrural, designation change, 21268
Rural housing loans and grants:
Policies, procedures and authorizations; interest payment loan funds, 21268

PROPOSED RULES
Development work, planning and performing:
Thermal performance standards, new and existing dwellings; establishment; extension of time, 20825
Rural housing loans and grants:
Rental housing, 20302

NOTICES
Disaster and emergency areas:
Colorado, 18112
Florida, 21302
Mississippi, 19500

FEDERAL AVIATION ADMINISTRATION

RULES
Air carriers certification and operations:
Air taxi and commercial operators of small aircraft; emergency evacuation, assistance, 18394
Air travel clubs using large airplanes, 18394
Domestic, flag, and supplemental air carriers and commercial operators of large aircraft; emergency evacuation, assistance, 18394
Air traffic operating and flight rules:
Balloons, unmanned free; CFR correction, 19478
Airmen certification:
Pilots, second-in-command qualifications, 18391
Airworthiness directives:
Avions Marcel Dassault/Brequet Aviation Falcon, 17865

Operator name, address, and status changes; information furnished, 20134
Systems; definition and creation of classes, 19345, 20135
FM broadcast stations; table of assignments (SEE ALSO Radio broadcast services):
Oklahoma, 18280
Texas, 18280
Wisconsin, 21109
Frequency allocations and radio treaty matters:
Aeronautical advisory and aeronautical multicom frequencies; utilization and assignment, 20471
Industrial radio services:
MHz band; general access pool, land mobile channels, 20264
Land transportation radio services:
MHz band; general access pool, land mobile channels, 20269
Maritime services, land and shipboard stations:
Alaska stations; public correspondence readiocommunications; classification and authorization, 19863
Great Lakes communication system, operation of very high frequency automated, multi-station radiocommunications system, 20137
Radiotelephone medium frequency requirements; vessels in Southern Calif. waters, 20301
Organization and functions:
Information copying fees, 20133
Land Mobile Spectrum Management Division; establishment, 21292
Public safety radio services:
MHz band; general access pool, land mobile channels, 20259
Radio broadcast services (SEE Cable television; FM stations; television stations):
Radio frequency devices:
Television broadcast receiver antennas, 20473
Television broadcast stations (SEE ALSO Radio broadcast services):
Antennas, circular or elliptical polarization; permission to use, 20823

PROPOSED RULES
Amateur radio service:
Licensing and operation of complex systems of stations and modification of repeater sub-bands; extension of time, 18103
Aviation services:
Station identification, 19498
Cable television (SEE ALSO Radio broadcast services):
Compliance certificate applications and Federal-State/local regulatory relationships; extension of time, 18103
Definition and creation of classes of systems, 19492
Frequency channeling requirements and restrictions, and signal leakage monitoring; extension of time, 17502
FM broadcast stations; table of assignments (SEE ALSO Radio broadcast services):
Illinois, 20153
Kansas, 20643, 21632
Maine, 20152
Maryland, 21627
North Carolina, 20644, 21632
Oregon, 21628
Tennessee, 21822
Texas, 18286
Utah, 20317
Wyoming, 19160
Maritime services, land and shipboard stations:
Radiotelegraph log entries; withdrawn, 18408
Radio broadcast services (SEE ALSO Cable television; FM stations; Television stations):
Multiple ownership of standard, FM and television stations; extension of time, 21630
Standard broadcast band; clear channel; inquiry; extension of time, 21301; 21629
Telephone companies:
Data processing services; inquiry; list of participants, 21626
Tariffs, interface of International Telex Service with Domestic Telex and TWX Services; extension of time, 21113
Telephone network, connection of terminal equipment:
Lamp and/or annunciator functions of systems, 20315
Television broadcast stations; table of assignments (SEE ALSO Radio broadcast services):
Arkansas, 19491
Oklahoma, 19491
Pennsylvania, 21630
South Dakota, 20319
Wisconsin, 21631
Television broadcast stations (SEE ALSO Radio broadcast services):
Prime-time access rule, effect of TV market rank changes; extension of time, 18287

NOTICES
Broadcast renewal applicant; comparative hearing process; policies, 19379
Broadcast stations and cable television systems; minority ownership conference, 18302
Canadian standard broadcast stations; notification list, 19208
Domestic public radio services; applications accepted for filing, 18634, 18636, 20182, 20850, 21838
FM broadcast stations; table of assignments:
Tennessee, 18427
Wisconsin, 21134
FM translator applications ready and available for processing, 18637
Meetings:
Broadcast stations and cable television systems; minority ownership, 18302
Marine Services Radio Technical Commission, 17518, 21647
Personal Use Radio Advisory Committee, 18125
Meetings; Sunshine Act, 17939, 20365, 20744, 21170, 21555

FEDERAL CONTRACT COMPLIANCE PROGRAMS OFFICE

RULES
Handicapped workers, affirmative action obligations of contractors and subcontractors; hearings procedures, 19146
Veterans, disabled, Vietnam; affirmative action obligations of contractors and subcontractors; hearings procedures, 19145

FEDERAL COUNCIL ON THE AGING

See Aging, Federal Council.

FEDERAL DEPOSIT INSURANCE CORPORATION

RULES
Bank clearing agencies; application for stay or review of actions, 19325
Interest on deposits:
Individual retirement accounts (IRA) and Keogh (H.R. 10) plans; maximum interest rates, 21273
"Noninsured banks" in Mass., 21101
Payment of time deposits before maturity; withdrawal penalty exception, 19325
Meetings:
Electric Utilities Advisory Committee, 285

PROPOSED RULES
Freedom of information, 19351
Information, disclosure, 19351
Interest on deposits:
Pooled time deposits; restricted payment; withdrawn, 21112

NOTICES
Meetings; Sunshine Act, 18341, 19569, 19570, 21719, 21720
Privacy Act; systems of records, 19209

FEDERAL DISASTER ASSISTANCE ADMINISTRATION

NOTICES
Disaster and emergency areas:
Alabama, 21322
Colorado, 21322
Iowa, 20198
Kentucky, 20197
Michigan, 21322
Minnesota, 21322
Utah, 21323
Virginia, 20197, 21323
Washington, 20197, 21323
West Virginia, 20197, 20198, 21323
Drought impact areas, emergency; various States, 21855

FEDERAL ELECTION COMMISSION

RULES
Corporate and labor organization activity, 19324
Examinations and audits; repayments, 19324
Political committees, registration and organization, 19324
Political committees and candidates, reports, 19324

NOTICES
Advisory opinion requests, 18243, 18303, 19313, 20773, 21597
Filers, candidate and committee index, 19616
Meetings; Sunshine Act, 18183, 19254, 20364, 21170, 21723

FEDERAL ENERGY ADMINISTRATION

RULES
Inflation impact statements, 21763
Oil import regulations; mandatory:
Allocations for period beginning May 1, 1977, 20814
Petroleum allocation regulations, mandatory:
Crude oil, domestic; small refiner bias under entitlements program, 21272
Strategic petroleum reserve; entitlements program to implement purchase authority, 21763

PROPOSED RULES
Energy conservation:
Energy audit procedures, 20012, 20557
Energy conservation plans, State:
Guidelines; supplemental plans; hearing changes, 20302
Energy conservation program, appliances:
Air conditioners, room; hearing cancelled, 19499
Clothes dryers, 21589
Refrigerators, refrigerator-freezers, and freezers, 21584
Television receivers, 21580
Water heaters, 21576
Inflation impact statements, 21792
Land uses; electric power transmission lines; rights-of-way, 21818
Oil import regulations:
Allocations for period beginning May 1, 1977; hearing cancelled, 17470
Petroleum allocation regulations, mandatory:
Crude oil, lower tier, Alaska and Calif.; installment obligation reductions; economic impact evaluation, availability, 19499
Gasoline, motor; adjustments to base period volumes, 20826
Strategic petroleum reserve; entitlements program to implement purchase authority; hearing, 21789
Petroleum price regulations, mandatory:
Crude oil, lower tier, Alaska and Calif.; installment obligation reductions; economic impact evaluation, availability, 19499
Strategic petroleum reserve; entitlements program to implement purchase authority; hearing, 21789
Weatherization assistance for low-income persons, 17470, 20476

NOTICES
Appeals and applications for exception, etc.; cases filed with Exceptions and Appeals Office:
List of applicants, etc., 18304, 18306, 18646, 20327, 20329, 20333, 20338, 21312, 21314
Committees; establishment, renewals, etc.:
Electric Utilities Advisory Committee, 18125
Consent orders:
Bridwell Oil Co., 20337
Crude oil, domestic, allocation program; 1977; entitlement notices:
February, 21406
Environmental statements; availability, etc.:
Ames Electric Utility's Ames Generating Station, 17900
Energy supply and environmental coordination, 19505
Savannah Electric & Power Co., 20494
Meetings:
Advisory Committees, 21509
Consumer Affairs/Special Impact Advisory Committee, 20185
East Coast natural gas distribution, 21134
Electric Utilities Advisory Committee, 20185
Environmental Advisory Committee, 18126
International Energy Agency Industry Advisory Board, 19505, 20343
International Energy Agency Industry Working Party, 19505
Natural Gas Advisory Committee, 21648
Petroleum price regulations, mandatory:
Crude oil, non-product cost increases, January 1, 1975 through January 31, 1976; applications for exception, 21315
Powerplants burning natural gas or petroleum products, prohibition orders:
Corn Belt Power Cooperative et al., 21981
Iowa Public Service Co., 21509
New England Electric System/New England Power Co. - Brayton Point, 21950
Philadelphia Electric Co., 21993
President's energy proposal advisory committee meetings, 21509

FEDERAL GRAIN INSPECTION SERVICE

NOTICES
Grain standards; inspection points:
California, 20645
Iowa, 18414
Louisiana, 19896, 20645
Michigan, 17935
Texas, 20165, 20645

FEDERAL HIGHWAY ADMINISTRATION

RULES
Motor carrier safety regulations:
Driver qualifications; settlement and hearing procedures, 18081
Forfeiture claims, collection and compromise; settlement and hearing procedures, 18077
Practice rules; settlement and hearing procedures, 18077
Organization and authority delegations:
Settlement and hearing procedures, 18081

PROPOSED RULES
Motor carrier safety regulations:
Hours of service; multi-day log use, 17891
Inspection, repair and maintenance of commercial vehicles, 18103
Traffic control devices, uniform, manual; metric standards; inquiry, 21487, 21827

FEDERAL HOME LOAN BANK BOARD

RULES

Federal savings and loan system:
- Accounting, records, and reoorts; operations, 21607

PROPOSED RULES

Federal home loan bank system:
- Savings accounts; limitations on rate of return, 18404

Federal Savings and Loan Insurance Corporation:
- Scheduled items definition, 17483

Federal savings and loan system:
- Loans in excess of 90 percent of value, 17483

NOTICES

Applications, etc.:
- Atwood Vacuum Machine Co., 20495
- Entex, Inc., 20495
- Peoples Financial Corp., 21134
- Perpetual Security Corp., 19390
- Skokie Federal Savings & Loan Association, Ill., 21510
- Union Federal Savings & Loan Association of Miami, 20495

Meetings; Sunshine Act, 17939, 18183, 18686, 19570, 19954, 20364, 20880, 21169

FEDERAL HOME LOAN MORTGAGE CORPORATION

NOTICES

Meetings; Sunshine Act, 18921, 19952, 20536

FEDERAL HOUSING COMMISSIONER—OFFICE OF ASSISTANT SECRETARY FOR HOUSING

RULES

Mortgage and loan insurance programs:
- Multifamily housing; debenture interest rates, 17452
- Mutual mortgage insurance; debenture interest rates, 17452
- Urban renewal and insured improvement loans; debenture interest rates, 17452

FEDERAL INSURANCE ADMINISTRATION

RULES

Flood Insurance Program, National:
- Communities eligible for sale of insurance, 19446, 19447, 19448, 19451, 19452, 19598, 19599, 19600, 20121
- Special hazard areas, 19601, 19604

PROPOSED RULES

Flood Insurance Program, National:
- Flood elevation determinations, etc., 17684, 17685, 17686, 17687, 17688, 17689, 17690, 17691, 17692, 17693, 17694, 17695, 17696, 17697, 18232, 18233, 18234, 18235, 18236, 18237, 18238, 18239, 18240

NOTICES

Flood Insurance Program, National:
- Communities with special hazard areas, subject to prohibition of Federal assistance; list, 20424

Insurance Development Program, National:
- Riots or civil disorders, reinsurance against losses from, 17720

Meetings:
- National Insurance Development Program Advisory Board, 17919

FEDERAL MARITIME COMMISSION

RULES

Reports, filing by common carriers in domestic offshore trade; rate base and income account; records and data submission requirements withdrawn, 21486

NOTICES

Casualty and nonperformance, certificates:
- Grueninger Travel Service, Inc., et al., 19505

Complaints filed:

FEDERAL PREVAILING RATE ADVISORY COMMITTEE

NOTICES
Meetings, 20345

FEDERAL RAILROAD ADMINISTRATION

PROPOSED RULES
Caboose cars; minimum safety requirements; inquiry, 19359
Operating rules:
Workmen, blue signal, protection, 20154

NOTICES
Petitions for exemptions, etc.:
South Carolina Public Railways Commission, 18916

FEDERAL REGISTER OFFICE

RULES
CFR checklist; 1976 and 1977 issuances, 17413

NOTICES
Carter Administration executive branch offials, special supplement to U.S. Government Manual, 17631
"Federal Register—what it is and how to use it", educational workshops:
Denver, Colo., 20208
Freedom of information index requirements; quarterly guide to agency material, 22002
Privacy Act:
Publications guidelines, 18760
Systems of records and agency rules; 1976 compilation, table of contents, 20560

FEDERAL RESERVE SYSTEM

RULES
Banks, State; membership, loans in flood-prone areas, 20815
Equal credit opportunity:
Official staff interpretations, 21605
Home mortgage disclosure requirements:
Parent depository institutions; separate disclosure for subsidiaries, and loss of exemption, 19123
Interest on deposits:
Individual retirement accounts and Keogh (H.R. 10) plans, 20286
Truth-in-lending:
Dealer participation, amount, disclosure, 19125
Official staff interpretations, 17865, 18056
Spanish language disclosures in Puerto Rico, 20455
Variable interest rate loans, disclosure, 20456

PROPOSED RULES
Banking institutions, State; membership:
Loans in flood-prone areas, 20477
Interest on deposits:
Time and savings; pooling of funds; withdrawn, 19350
Truth-in-lending:
Credit card plan requirements involving transaction-by-transaction billing and imposition of no finance charge, 20478

NOTICES
Board actions; applications and reports, 18447, 18659, 20190, 20665, 21152
Meetings; Sunshine Act, 17940, 18183, 18341, 18508, 18687, 19570, 19571, 19951, 20365, 20744, 20881, 20882, 21169, 21170, 21344, 21554, 21721, 21898

FEDERAL TRADE COMMISSION

RULES
Consumers' claims and defenses, preservation; two-party open and exemption in consumer credit contracts, 19490
Fair Packaging and Labeling Act; "Cents-off" representations, CFR correction, 18057
Prohibited trade practices:
American College of Radiology, 20287
BIC Pen Corp. et al., 20289
Bryson Implement Co., Inc., et al., 19480
Cezar, Ltd., et al., 18057
Everseal Waterproofing Corp. et al., 19480
G. & B. Textiles, Inc., et al., 19482
Idea Research and Development, Inc., et al., 19483
Matsushita Electric Corp. of America, 20290
National Meridian Services, Inc., et al., 20816
Paramedical Services, Inc., et al., 19485
Richard D. Jones Mortgage Services, Inc., et al., 20817
Uncle Ben's, Inc., et al., 19487
Walter Switzer, Inc., 21273
Trade practice rules, various industry guides:
Obsolete CFR Parts rescinded; blueprint and diazotype coaters, electrical contracting industry, etc., 19860
Warranties:
Settlement procedures; informal disputes; exemption, 20290

PROPOSED RULES
Vocational and home study schools, proprietary; advertising, disclosure, cooling-off and refund requirements; extension of time, 20303

NOTICES
Cigarette testing results; tar and nicotine content, 19925, 21155
Consent orders:
Astor-Scott, Inc., et al., 18899
Frito-Lay, Inc., 20346
Jetma Technical Institute et al., 19512
Men's Weat International, Inc., et al., 20668
Minnesota State Medical Association et al., 20669
Investigations, disclosure of; inquiry, 20502
Meetings; Sunshine Act, 18509, 19571, 20744, 20745, 21555

FINE ARTS COMMISSION

NOTICES
Advisory committee review; inquiry, 20169
Meetings, 19504

FIREARMS AND AMMUNITION

See Alcohol, Tobacco and Firearms Bureau.

FISCAL SERVICE

RULES
United States retirement plan bonds:
Operations transferred to Parkersburg Office, Transactions and Rulings Division, 21611

NOTICES
Surety companies acceptable on Federal bonds:
Global Surety & Insurance Co., 18917
Indiana Bonding & Surety Co., 21533

FISH, FISHING

See Fish and Wildlife Service.
Food and Drug Administration.
National Oceanic and Atmospheric Administration.
National Park Service.

FISH AND WILDLIFE SERVICE

RULES
Fishing:
Hillside National Wildlife Refuge, Miss., 20824
Pahranagat National Wildlife Refuge, Nev., et al., 20301
Ravalli National Refuge, Mont., 20824
Migratory bird hunting:
Steel shot, use of for waterfowl hunting in 1977 season, 21616
Organization and functions:
Wildlife permits; address change, 21110

PROPOSED RULES
Endangered and threatened species; fish, wildlife, and plants:
Crocodylia, 18287, 20644
Golden Coqui, 18106
Pine Barrens treefrog, 18109

NOTICES
Endangered and threatened species permits; applications, 17534, 17535, 17920, 18663, 18665, 18666, 18667, 18668, 19518, 19520, 19521, 19523, 19525, 20510, 20512, 20513, 20515, 20516, 21327, 21329
Pipeline applications:
Delta National Wildlife Refuge, Plaquemines Parish, La., 19238

FLOOD ASSISTANCE

See Engineers Corps.
Federal Disaster Assistance Administration.
Federal Insurance Administration.

FOOD AND DRUG ADMINISTRATION

RULES
Administrative practices and procedures:
Reorganization and republication; correction, 19127
Animal drugs, feeds, and related products:
Amprolium, ethopabate, and bacitracin methylene disalicylate; medicated premix, 21771
Antibiotics, nitrofuran, nitrofuran, and sulfonamides, 18614
Bambermycins, sponsor name change, 18060
Bambermycins, zoalene, and roxarsone, 20817
Butachlor, 18620
Chlorofluorocarbon propellants in self-pressurized containers; warning statements, 22033
Lenperone hydrochloride injection, 20817
Monensin, 19144
Nihydrazone; revocation, 18619
Nitrofurantoin oral suspension, 19143
Nitrofurantoin tablets and boluses; sponsor name change, 19861
Penicillin ointment, 19861
Poloxalene liquid feed supplement, 21281
Streptomycin and streptomycin-containing drugs, 21276
Tylosin, 18060
Zinc bacitracin; sponsor name change, 18060
Biological products:
Blood and blood product standards; cryoprecipitated antihemophilic factor (human), 21774
Recodification and editorial changes; correction, 19142
Cosmetics:
Chlorofluorocarbon propellants in self-pressurized containers; warning statements, 22033
Labeling; ingredient designation, 18061
Dietary foods; vitamin and mineral products, 20296
Environmental impact considerations:
Applicability; procedural changes, 19990
Food additives:
Adhesive coatings and components; resinous and polymeric coatings, 21771
Coatings; dodecyl benzenesulfonic acid; curing catalyst, 18610
Coatings; polyethylene-phthalate polymers; beverage-holding pouches, 18611
Food for human consumption:
Frozen desserts; ice cream, ice milk, sherbert, and water ices; identity standards, 19132
Frozen desserts; mellorine; identity standards, effective date confirmed, 19137
Hearings, public:
Reorganization and republication; correction, 19127
Human drugs:
Cefazolin sodium, sterile, 18059
Chlorofluorocarbon propellants in self-oressurized containers; warning statements, 22033
Neomycin sulfate, sterile, and polymyxin B sulfate solution, 18059
Over-the-counter drugs, testing of category III active ingredients, 19141
Recodification and editorial changes; correction, 19142
Streptomycin and streptomycin-containing drugs, 21275
Tests of antibiotics, streptococcus faecium, name change, 18058
Information, public:
Environmental impact considerations, 19989
Medical devices:
Chlorofluorocarbon propellants in self-pressurized containers; warning statements, 22034
Packagingg and labeling; food, drugs, cosmetics, and devices:
Chlorofluorocarbon propellants in self-pressurized containers; warning statements, 22033
Radiological health:
Electronic product reporting guidelines; data, reports, certification labels, etc., 18062

PROPOSED RULES
Animal drugs, feeds, and related products:
Saccharin and its salts, 19996, 20009
Sampling procedure; new drug applications; correction, 18621
Cosmetic products:
Saccharin and its salts, 19996, 20009
Food additives:
Polychlorinated biphenyls; reduction of temporary tolerances, 17487, 21816
Saccharin and its salts, 19996, 20009
Food for human consumption:
Saccharin and its salts, 19996, 20009
Fruit butters, jellies, preserves, etc.; saccharin and its salts, 19996/20009
Fruits, canned; saccharin and its salts, 19996, 20009
Human drugs:
Antibiotic drugs, certification; sampling procedure; correction, 18621
Antibiotic products, over-the-counter topical; monograph establishment, 17642, 21816
Hexachlorophene, 20313
Over-the-counter drugs; conditions for use and labeling of inactive ingredients, 19156
Saccharin and its salts, 19996, 20009
Inflation impact statements, 2009, 19996
Labeling:
Over-the-counter drugs; conditions for use and labeling of inactive ingredients, 19156
Milk, lowfat and skim; identity standards; use of stabilizers and emulsifiers; extension of time, 21295
Radiological health:
Laser products; performance standards, 17495
X-ray systems; performance standards, 17494

NOTICES
Animal drugs:
Furaltadone, 17526, 18660
Halocarbons; inquiry, 21843
Nihydrazone; approval withdrawn, 18660
Nitrofurazone-penicillin gel; approval withdrawn, 19922
Biological products:
Halocarbons; inquiry, 21843
Plasma, source (human); shipment without license, 18129
Cosmetics:
Halocarbons; inquiry, 21843
Food additives:
Acrylonitrile copolymers beverage containers; hearing and prehearing conference, 17529
Food additives, petitions filed or withdrawn:
Dow Chemical U.S.A., 20347
Food for human consumption:
Halocarbons; inquiry, 21843
Food labeling; manufacturers, packers, and distributors; mandatory uniform effective date for regulations, 19234
Food product inspection and grading; cooperative working arrangements; memorandum of agreement with Agricultural Marketing Service, 20350
GRAS or prior-sanctioned ingredients, hearings:
Glutamates, protein hydrolysates, caffeine, lard, and lard oil, 17526, 21322
GRAS status, petitions:
L-lysine monohydrochloride and DL-methionine, 20347
Lactase enzyme, 20348
Protein, partially hydrolyzed; withdrawal, 21853
Halocarbons in human food, drugs, biological products, cosmetics, animal feed and drugs, medical devices, and packaging; inquiry, 21843
Human drugs:
Halocarbons; inquiry, 21843
Oral reserpine dosage forms; approval withdrawn for over 1-milligram, 21844
Phenformin; hearing, 21845
Sulfonamides, system, 20857

INDEX

Thyrotropin for injection; hearing, 18661
X-Otag plus and orphengesic tablets; hearing, 21847
Medical devices:
Classification panels; voting and non-voting members, etc.; nominations requests, 20348, 20349
Halocarbons; inquiry, 21843
Meetings:
Advisory committees, panels, etc., 17530, 18659, 19917, 19922, 20856
Ultrasound sources; biological effects and characterizations, 20859
Packaging and labeling; halocarbons; inquiry, 21843
Radiological health; performance standard variances:
X-ray systems, diagnostic, 19921
Ultrasonic sources; biological effects and characterizations; meeting, 20859

FOOD AND NUTRITION SERVICE

RULES
Child nutrition programs:
Meals and milk in schools; free and reduced price, eligibility; Puerto Rico and Virgin Islands, 20810
Food stamp program:
Retail food stores, wholesale food concerns, etc., participation; applications, coupon redemption and violation charges, 20283
Nonfood assistance programs; child nutrition; New regional office; Mountain Plains Region; correction, 18587

FOOD SAFETY AND QUALITY SERVICE

PROPOSED RULES
Peaches, canned, clingstone; grade standards, 21746
Sirup, maple; grade standards, 21752
Strawberries (frozen); grade standards, 21742

NOTICES
Agency establishment, 20165

FOREIGN AID

See Agency for International Development.
State Department.

FOREIGN ASSETS CONTROL OFFICE

RULES
Rhodesian sanctions:
Import prohibitions; strategic and critical materials; ferrochromium and chromium steel products from any country, 18074

FOREIGN CLAIMS SETTLEMENT COMMISSION

NOTICES
Meetings; Sunshine Act, 17940, 18921, 21344, 21721

FOREIGN-TRADE ZONES BOARD

NOTICES
Foreign-trade zone applications:
Boston, Mass., 18901
New Bedford, Mass., 18901

FOREST SERVICE

RULES
Timber, sale and disposal, 17876, 21777

PROPOSED RULES
Land uses; electric power transmission lines; rights of way, 21818

NOTICES
Environmental statements; availability, etc.:
Clearwater National Forest, seral brushfields burning for big game habitat improvement, Idaho, 18292
DeSoto National Forest, DeSoto Timber Management Plan, Miss., 21302
Eldorado National Forest, Sierra Ski Ranch Expansion, Calif., 18414

Aging National Advisory Council, 19404
Allergy and Infectious Diseases National Advisory Council, 19403
Allergy and Infectious Diseases National Institute, Board of Scientific Counselors, 20505
Animal Resources Advisory Committee, 20504
Arthritis, Metabolism, and Digestive Diseases National Advisory Council, 20506
Arthritis National Advisory Board, 20351, 21663
Artificial Kidney-Chronic Uremia Advisory Committee, 19402
Blood Diseases and Resources Advisory Committee, 20504
Breast Cancer Diagnosis Committee et al., 19400
Cancer communications conference, National, 17530
Cancer Control and Rehabilitation Advisory Committee et al., 19401, 21520
Cancer Panel, President's, et al., 21853
Cancer Treatment Division, 21520
Cardiac and Vascular Disease in Relation to Diabetes Mellitus, Current Research, Workshop, 19402
Cellular and Molecular Basis of Disease Review Committee, 17914
Child Health and Human Development National Advisory Council, 19404
Clinical Trials Review Committee, 20505, 21521
Communicative Disorders Review Committee, 20505
Contraceptive Evaluation Research Contract Review Committee, 19402
Coordinate Toxicology and Related Programs DHEW Committee, 20351
Dental Caries Program Advisory Committee, 19403
Dental Research Institutes and Special Programs Advisory Committee, 20506
Dental Research National Advisory Council, 20506
Diabetes National Advisory Board, 17915, 21521, 21853
Digestive Diseases National Commission, 21521
Drug Development Committee et al., 19402
Environmental Health Sciences National Advisory Council, 19404
Eye Institute, National, Board of Scientific Counselors, 20505
Eye National Advisory Council, 17914
General Medical Sciences National Advisory Council, 19404
Infectious Disease Committee, 17914
Insect Endocrine Systems Workshop, 20506
Mammalian Cell Lines Committee, 21521
Maternal and Child Health Research Committee, 19403
National Library of Medicine, Board of Regents, 19404
Neurological and Communicative Disorders and Stroke National Advisory Council, 17915
Neurological Disorders Program, A and B Review Committees, 20506, 20507
Population Research Committee, 20507
Primate Research Centers Advisory Committee, 21522
Recombinant DNA Molecule Program Advisory Committee, 17530, 21522
Research Resources National Advisory Council, 19403
Scientific Counselors Board, 21853
Recombinant DNA Molecule Program Advisory Committee workshop, 21522

NATIONAL LABOR RELATIONS BOARD

NOTICES
Meetings; Sunshine Act, 18922

NATIONAL OCCUPATIONAL INFORMATION COORDINATING COMMITTEE

See Occupational Information Coordinating National Committee.

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION

RULES
Coastal zone management programs:
Development grants, 22041
Interstate grants, 19856
Fishery conservation and management:
Atlantic haddock, cod, yellowtail flounder; extension of emergency regulations, 21784
Foreign fishing, allocations; correction, 18607
Salmon fishery, 21412
Inflation impact statements, 19856

PROPOSED RULES
Financial aid to fisheries:
Fishing vessel obligation guarantee program procedures, 21489
Fishery conservation and management:
Atlantic haddock, cod, yellowtail flounder; inquiry, 20156
Tuna, Atlantic fisheries, 21825

NOTICES
Endangered species parts or products; certificates of exemption, 18411
Endangered species permits; applications, 20484
Environmental statements and fishery management plans; availability, etc.:
Atlantic herring fishery, Northwestern Atlantic; hearing, 18119
California coastal management program, 19169
Commercial and recreational salmon fisheries, Wash., Oreg., and Calif., 21415
Fishery management plans and conservation activities; annual report of Secretary of Commerce; correction, 18883
Fishing by foreign vessels in U.S. waters: Observer program, 17895
Marine mammal permit applications, etc.:
American Tunaboat Association, 20484
Aquatic Mammals Enterprises, 17510
Como Park Zoo, 18882
Fisherman's Marketing Association of Washington et al., 17509
Gulf World, Inc., 21306
Japan Salmon Fisheries Cooperative Associations, 20485
Milwaukee County Zoo, 21132
Mystic Marine life Aquarium, 21306
New Steel Pier, 20485
Sovrybflot, 17509
Sparky's School of Seals, 21133
Meetings:
Atlantic Herring Fishery, Northwestern Atlantic; fishery management plan, 18119
Coastal Zone Management Advisory Committee, 19170
Gulf of Mexico Fishery Management Council, 19365, 20168
Mid-Atlantic Fishery Management Council, 20168, 20169
New England Fishery Management Council, 18298, 19366, 21307
North Pacific Fishery Management Council; 19171
Pacific Fishery Management Council, 18120, 19366, 20649
South Atlantic Fishery Management Council, 18120
State fish and wildlife directors, 19365
Weather Modification Advisory Board, 19171
Western Pacific Fishery Management Council, 19899
Meetings, Sunshine Act, 19171

NATIONAL PARK SERVICE

RULES
Devils Tower National Monument, Wyo.; climbing restrictions, 20462
Pet restrictions; dogs, cats, etc.:
Isle Royale National Park, Mich., 21777

NOTICES
Authority delegations:
Archeology and Historic Preservation Office, Chief, 20682
Denver Service Center, Manager, 18456
Denver Service Center, Saudi Arabia Project Manager, 20863
Concession permits, etc.:
Cape Hatteras National Seashore, Oregon Inlet, 18906
Katmai National Monument, 18906
Mall area, etc., Washington, D.C., etc., 21857
Environmental statements; availability, etc.:
Gulf Islands National Seashore, Fla. and Miss., et al., 20353
Stones River National Battlefield, Tenn., 20353
Historic Places National Register; additions, deletions, etc., 18144, 18152, 19238, 20352, 21333
Indiana Dunes National Lakeshore; special study of adjacent areas; hearings, etc., 18669
Meetings:
Boston National Historical Park Advisory Commission, 21667
Canaveral National Seashore Advisory Commission, 19930
Cuyahoga Valley National Recreation Area Advisory Commission, 19931
Gateway National Recreation Area Advisory Commission, 21858
Midwest Regional Advisory Committee, 21858
Southwest Regional Advisory Committee, 18312
Mining plan of operations; availability, etc.:
Death Valley National Monument, Calif., 18669
Park planning process, public involvement guidelines; availability, 21334

NATIONAL RAILROAD PASSENGER CORPORATION

NOTICES
Meetings; Sunshine Act, 19952, 20746
Sunshine Act; implementation, 18908

NATIONAL SCIENCE FOUNDATION

RULES
National Science Board; Sunshine Act; implementation; correction, 17447
Sunshine Act; implementation; correction, 17447

NOTICES
Meetings:
Chemistry Advisory Panel, 18674
Computer Science and Engineering Advisory Panel, 18674
Earth Sciences Advisory Panel, 20866
Ecological Sciences Advisory Panel, 21874
Electrical Sciences and Analysis Advisory Panel, 19240
Human Cell Biology Advisory Panel, 20866
Physics Advisory Panel, 20866
Science and technical information managers, Federal, 18674
Science Applications Task Force, 19925
Science Education Projects Advisory Panel, 21875
Science for Citizens Advisory Committee, 20685
Science Information Activities Task Force, 17542, 19240
Scientific and technical information managers, Federal, 21875
Meetings; Sunshine Act, 19952
Scientific and technical information managers, Federal; meeting, 21875

NATIONAL TECHNICAL INFORMATION SERVICE

NOTICES
Inventions, Government-owned; availability for licensing, 19366, 19367, 19368, 19369, 19371, 20485, 20486, 20487, 21504
Products and services, sales; position availability:
Spain, 19372

NATIONAL TRANSPORTATION SAFETY BOARD

RULES
Air safety proceedings, rules of practice:
Ex parte communications, 21613
Merchant Marine appeals, rules of procedure:
Ex parte communications, 21614
Sunshine Act; implementation, 21613

PROPOSED RULES
Sunshine Act; implementation, 21632

NOTICES
Meetings; Sunshine Act, 18509, 20744, 21722
Safety recommendations and accident reports; availability, responses, etc., 18467, 19537, 20692, 21676

NAVY DEPARTMENT

RULES
Personnel:
Correction of Naval Records Board; requests for reconsideration, etc., 18277
Naval Discharge Review Board, 18590

PROPOSED RULES
Privacy Act; implementation, 21817

NOTICES
Environmental statements; availability, etc.:
Petroleum Reserve No. 1, Calif., pipeline routes, 21637
Seafarer ELF Communications System, Sawyer AFB, Mich.; hearing, 18632, 19173, 19901, 20489
Meetings:
CNO Executive Panel Advisory Committee, 17897
Naval War College, Board of Advisors to President, 21836
Patent licenses, exclusive:
O'Brien, D. G., Inc., 20489
Privacy Act; systems of records, 20847

NUCLEAR MATERIALS

See Energy Research and Development Administration.
Environmental Protection Agency.
Nuclear Regulatory Commission.

NUCLEAR REGULATORY COMMISSION

RULES
Byproduct material licensing:
Selenium-75, radionuclides, 21604
Conduct standards:
Editorial changes, 20138
Environmental protection; licensing and regulatory policy and procedures:
Gaseous radiological effluents; technical changes, 18387
Financial protection requirements and indemnity agreements:
Indemnified licensees requirements; primary layer increase, 20140
Production and utilization facilities; licensing:
Editorial changes, 20139
Radiation protection standards:
Editorial changes, 20138

PROPOSED RULES
Freedom of information; fee reduction waiver; extension of time, 20145

NOTICES
Abnormal occurrence reports; policy statement on Energy Reorganization Act of 1974 implementation; radiography incident, 21120
Contractor organizational conflicts of interest, avoidance of; policy statement, 21673
Environmental statements; availability, etc.:
North Anna Power Station, 21672
Northern States Power Co. of Minnesota et al., 21670
Oxide fuels, mixed; prehearing conference, 18458, 19531
Public Service Co. of Oklahoma et al., 21675
Puerto Rico Water Resources Authority, 21672
Puget Sound Power & Light Co. et al., 21671
Environmental survey of reprocessing and waste management portions of LWR fuel cycle; availability of public comments and responses, 17543, 17923
General Electric Co. Safety Analysis Report; safety evaluation and preliminary design approval; availability, etc., 20202
International Atomic Energy Agency codes of practice and safety guides; availability of drafts, 18462

Meetings:
Medical Uses of Isotopes Advisory Committee et al., 20691
Reactor Safeguards Advisory Committee, 18465, 18466, 18467, 18675, 18909, 19531, 20203, 20204, 20206, 20207, 20691
Meetings; Sunshine Act, 17940, 18507, 18509, 18510, 18922, 19571, 19572, 20216, 20746, 21171, 21722, 21723
Privacy Act; systems of records, 18462
Regulatory guides; issuance and availability, 18464, 18910, 19531, 20690, 21121
Seismic intensity and other physical parameters; peak ground acceleration correlation; availability of report, 21121
Applications, etc.:
Arkansas Power & Light Co., 20200, 21121
Atlantic Research Corp., 19532
Babcock & Wilcox Co., 18456, 18467, 20204
Boston Edison Co. et al., 18458, 21121, 21674
Carolina Power & Light Co., 18909, 19532, 21674
Columbia University, 21120

would you like to know

if any changes have been made in certain titles of the CODE OF FEDERAL REGULATIONS without reading the Federal Register every day? If so, you may wish to subscribe to the "Cumulative List of CFR Sections Affected," the "Federal Register Index," or both.

Cumulative List of CFR Sections Affected
$10.00
per year

The "Cumulative List of CFR Sections Affected" is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register, and is issued monthly in cumulative form. Entries indicate the nature of the changes.

Federal Register Index $8.00
per year

Indexes covering the contents of the daily Federal Register are issued monthly, quarterly, and annually. Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references.

A finding aid is included in each publication which lists Federal Register page numbers with the date of publication in the Federal Register.

Note to FR Subscribers: FR Indexes and the "Cumulative List of CFR Sections Affected" will continue to be mailed free of charge to regular FR subscribers.

Mail order form to:
Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402

CODE

UMI

CUMULATIVE LIST OF CFR SECTIONS AFFECTED

The CUMULATIVE LIST OF CFR SECTIONS AFFECTED is designed to lead users of the Code of Federal Regulations (CFR) to amendatory actions published in the Federal Register (FR). It should be shelved with current CFR volumes. Entries are by CFR title, chapter, part, and section. Proposed rules are listed at the end of appropriate titles, except for Title 41, in which proposed rules follow each chapter.

HOW TO USE THIS FINDING AID

The CFR is revised annually according to the following schedule:

Titles 1–16—as of Jan. 1
17–27—as of April 1
28–41—as of July 1
42–50—as of Oct. 1

To bring these regulations up to date, consult this CUMULATIVE LIST OF CFR SECTIONS AFFECTED for any changes, additions, or deletions published after the revision date of the volume you are using. Then check the CUMULATIVE LIST OF PARTS AFFECTED appearing at the front of the latest Federal Register for less detailed but timely changes published after the final date included in this publication.

Cite a page reference from this publication as 41 FR for 1976 page numbers and 42 FR for 1977 page numbers. Example: Page 5678 cite as 42 FR 5678 if it is a 1977 page number.

ISSUES TO BE SAVED

There is no single annual issue of the CUMULATIVE LIST OF CFR SECTIONS AFFECTED. Four publications must be saved: the DECEMBER issue is the annual for Titles 1–16; the MARCH issue is the annual for Titles 17–27; the JUNE issue is the annual for Titles 28–41; the SEPTEMBER issue is the annual for Titles 42–50.

PARALLEL TABLE OF STATUTORY AUTHORITIES AND RULES

A table is included after Title 50 which contains references to the U.S. Code sections cited as authority for CFR regulations added or revised since January 2, 1976.

TABLE OF FEDERAL REGISTER ISSUE PAGES AND DATES

A table is included at the end of this publication which identifies the inclusive page numbers and corresponding dates for the period covered.

INDEXES

An INDEX to the daily Federal Register is published monthly, quarterly, and annually for the calendar year. A separate volume, the CFR INDEX to the entire Code of Federal Regulations, is revised as of July 1 each year.

INQUIRIES AND SUGGESTIONS

This publication was prepared under the editorial direction of Rose Steinman, with Carol Blanchard and Loren Myers as Chief Editors. INQUIRIES, telephone 202–523–5227.

SUGGESTIONS concerning this and other publications of the Office will be welcomed by Fred J. Emery, Director, Office of the Federal Register, National Archives and Records Service, Washington, D.C. 20408.

CODE

PARALLEL TABLE OF STATUTORY AUTHORITIES AND RULES

(Additions to CFR Finding Aids Volume, Table 1; January 1976 through April 1977)

This table lists the sections of the U.S. Code and U.S. Statutes at Large which are being added to Table 1 of the CFR Finding Aids Volume as a result of authority citations carried in the *Federal Register* from January 1976 through April 1977. Recent legislation not yet assigned within the U.S. Code is carried by public law number at the end of the list.

In order to determine the *Federal Register* page numbers of the parallel CFR citations, consult the Cumulative List of CFR Sections Affected above.

List of Public Laws

NOTE: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's LIST OF PUBLIC LAWS.

The six-month trial period ended August 6. The program is being continued on a voluntary basis (see OFR notice, 41 FR 32914, August 6, 1976). The following agencies have agreed to remain in the program:

Monday	Tuesday	Wednesday	Thursday	Friday
NRC	USDA/ASCS		NRC	USDA/ASCS
DOT/COAST GUARD	USDA/APHIS		DOT/COAST GUARD	USDA/APHIS
DOT/NHTSA	USDA/FNS		DOT/NHTSA	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/OHMO	CSC		DOT/OHMO	CSC
DOT/OPSO	LABOR		DOT/OPSO	LABOR
	HEW/FDA			HEW/FDA

Documents normally scheduled on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: For questions, corrections, or requests for information please see the list of telephone numbers appearing on opposite page.

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

FEDERAL REGISTER PAGES AND DATES—APRIL

Pages	*Date*
17413–17864	Apr. 1

V 42 63 APR 1 77 UMI

Table of Effective Dates and Time Periods—April 1977

This table is for use in computing dates certain in connection with documents which are published in the FEDERAL REGISTER subject to advance notice requirements or which impose time limits on public response.

Federal Agencies using this table in calculating time requirements for submissions must allow sufficient extra time for FEDERAL REGISTER scheduling procedures.

In computing dates certain, the day after publication counts as one. All succeeding days are counted except that when a date certain falls on a weekend or holiday, it is moved forward to the next Federal business day. (See 1 CFR 18.17)

A new table will be published monthly in the first issue of each month.

Dates of FR publication	15 days after publication	30 days after publication	45 days after publication	60 days after publication	90 days after publication
April 1	April 18	May 2	May 16	May 31	June 30

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 1—General Provisions

CHAPTER I—ADMINISTRATIVE COMMITTEE OF THE FEDERAL REGISTER

CFR CHECKLIST

1976 Issuances

This checklist, prepared by the Office of the Federal Register, is published in the first issue of each month. It is arranged in the order of CFR titles, and shows the revision date and price of the volumes of the Code of Federal Regulations issued to date for 1976 and 1977. New units issued during the month are announced on the back cover of the daily FEDERAL REGISTER as they become available.

For a Checklist of current CFR volumes comprising a complete CFR set, see the latest issue of the Cumulative List of CFR Sections Affected, which is revised monthly.

The rate for subscription service to all revised volumes issued for 1977 is $350 domestic, $75 additional for foreign mailing.

Order from Superintendent of Documents, Government Printing Office, Washington, D.C. 20402.

Title 5—Administrative Personnel

CHAPTER I—CIVIL SERVICE COMMISSION

PART 213—EXCEPTED SERVICE

Department of Agriculture

AGENCY: Civil Service Commission.

ACTION: Final Rule.

SUMMARY: This amendment excepts from the competitive service under Schedule A § 213.3113(f)(6) intermittent positions of agricultural commodity grader (dairy) and agricultural commodity grader (poultry) at GS–9 and below in the Agricultural Marketing Service because it is not practicable to examine for these positions.

EFFECTIVE DATE: April 1, 1977.

FOR FURTHER INFORMATION CONTACT:

Bill Bohling,
202–632–4533.

Accordingly, 5 CFR 213.3113(f)(6) is amended to read as follows:

§ 213.3113 **Department of Agriculture.**

* * * * * * *

(f) *Agricultural Marketing Service.*

* * *

V 4263 APR 1 77 UMI

(6) Temporary and intermittent positions of agricultural commodity grader (dairy) and agricultural commodity grader (poultry) at grade GS–9 and below. Employment under this authority may not exceed 1280 hours a year.

(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954–1958 Comp., p. 218.)

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc.77-9834 Filed 3-31-77;8:45 am]

PART 213—EXCEPTED SERVICE

Department of State

AGENCY: Civil Service Commission.

ACTION: Final Rule.

SUMMARY: This amendment excepts from the competitive service under Schedule C one position of Secretary (Stenography) to the Counselor because of the confidential nature of the position.

EFFECTIVE DATE: April 1, 1977.

FOR FURTHER INFORMATION CONTACT:

Bill Bohling,
202–632–4533.

Accordingly, 5 CFR 213.3304(u)(1) is amended to read as follows:

§ 213.3304 Department of State.

* * * * * * *

(u) *Office of the Counselor.* * * *

(1) One Secretary (Stenography) to the Counselor.

(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954–1958 Comp., p. 218.)

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc.77-9835 Filed 3-31-77;8:45 am]

Title 7—Agriculture

CHAPTER VII—AGRICULTURAL STABILIZATION AND CONSERVATION SERVICE (AGRICULTURAL ADJUSTMENT), DEPARTMENT OF AGRICULTURE

SUBCHAPTER B—FARM MARKETING QUOTAS AND ACREAGE ALLOTMENTS

[Amdt. 3]

PART 722—COTTON

Upland Cotton Program for 1974 and Succeeding Crops

1977 CROP ESTABLISHED PRICE AND DISASTER PAYMENT RATE

On July 30, 1976, a notice of proposed rulemaking regarding certain determinations with respect to the 1977 crop of upland cotton was published in the FEDERAL REGISTER (41 FR 31848). Interested persons were invited to submit written data, views, and recommendations regarding the determinations. No comments were received regarding the established price.

This amendment is issued pursuant to the Agricultural Act of 1949, as amended by the Agricultural Act of 1970. (Pub. L. 91–524, 84 Stat. 1358) and the Agriculture and Consumer Protection Act of 1973 (Pub. L. 93–86, 87 Stat. 233). The purposes of this amendment are to determine and announce the established price and the disaster payment rate for the 1977 crop of upland cotton.

Section 103(e)(2) of the Agricultural Act of 1949, as amended, requires that the established price for the 1977 crop of upland cotton be 43.20 cents per pound adjusted to reflect any change during the calendar year 1976 in the index of prices paid by farmers for production items, interest, taxes, and wage rates (herein referred to as the PPI); *Provided*, that any increase that would otherwise be made in the established price to reflect a change in the PPI shall be further adjusted to reflect any changes in the national average yield per acre of cotton for the three calendar years 1974–76 over the national average yield for the three calendar years 1973–75.

In determining the change in the PPI during calendar year 1976, the average of the monthly PPI's for the 1976 calendar year was compared with the average of the monthly PPI's for the 1975 calendar year. The 1976 average was 709 and the 1975 average was 665. Thus, the adjustment resulting from the increase in the PPI during calendar year 1976 is 6.62 percent.

The 1974–76 average yield per acre of cotton was 452 pounds. The 1973–75 average was 471 pounds. The 1974–76 average is 4.03 percent below the 1973–75 average.

The total adjustment is, therefore, 10.65 percent (6.62–(–4.03)). Thus, the established price for the 1977 crop of upland cotton is 47.80 cents per pound (43.20 cents times 1.1065).

Since farmers need to know the established price for the 1977 crop as soon as possible so that they may make plans for their 1977 farming operations, it is hereby found and determined that compliance with the 30-day effective date requirement of 5 U.S.C. 553 is impracticable and contrary to the public interest. Accordingly, this amendment shall be effective on March 31, 1977.

Section 722.805 of the Upland Cotton Program for 1974 and Succeeding Crops Regulations, 7 CFR §§ 722.801–722.819, is amended by adding a new sentence at the end of paragraph (b)(1) and by revising paragraph (b)(2) to read as follows:

§ 722.805 Farm yield and payment rates.

* * * * *

(b) * * *

(1) * * * The established price for the 1977 crop is 47.80 cents per pound.

(2) *Disaster payment rate.* The per pound rate for upland cotton shall be equal to the larger of the deficiency payment rate or one-third of the established price. Disaster payment rate for: (i) 1974 is 12.7 cents per pound, (ii) 1975 is 12.7 cents per pound, (iii) 1976 is 14.4 cents per pound, and (iv) 1977 is 15.9 cents per pound.

* * * * *

(Sec. 103, 84 Stat. 1374, 87 Stat. 233 (7 U.S.C. 1444)).

Effective date: This amendment becomes effective on March 31, 1977.

Signed at Washington, D.C. on March 25, 1977.

VICTOR A. SENECHAL,
Acting Administrator, Agricultural Stabilization and Conservation Service.

[FR Doc.77-9610 Filed 3-31-77;8:45 am]

PART 723—CIGAR-FILLER (TYPE 41) AND MARYLAND TOBACCOS

Cigar—Filler (Type 41) and Maryland Tobacco Allotment Regulations, 1977–78 Marketing Year

These regulations govern the establishment of farm acreage allotments and normal yields for the 1977 crops of cigar-filler (type 41) and Maryland (type 32) tobaccos pursuant to the Agricultural Adjustment Act of 1938, as amended, (7 U.S.C. 1281 et seq.). Since preparations are now being made to determine farm acreage allotments and normal yields for the 1977 crop, it is essential that these regulations be made effective as soon as possible. Accordingly, it is hereby found and determined that compliance with the notice, public participation procedure and effective date provisions of 5 U.S.C. 553 is impracticable and contrary to the public interest. Accordingly, these regulations are being made effective without compliance with such procedure.

The changes that are being made at this time update the references to marketing years and waive the witnessing requirement for signatures when Form ASCS–375 is mailed for required signature.

The regulations, 7 CFR 723.51–66, and the title of the subpart are revised to read as follows:

Subpart—Cigar Filler (Type 41) and Maryland Tobacco Allotment Regulations, 1977–78 Marketing Year

723.66 Lease and transfer of tobacco acreage allotments.

AUTHORITY: Sec. 301, 312, 216, 317, 363, 375, 377, 378, 52 Stat. 38, as amended; secs. 601, 602, 79 Stat. 1206, 1028; 7 U.S.C. 1301, 1313, 1314b, 1314c, 1363, 1375, 1378, 1801 note, 1938.

Subpart—Cigar Filler (Type 41) and Maryland Tobacco Allotment Regulations, 1977–78 Marketing Year

GENERAL

§ 723.51 Basis and purpose.

The regulations contained in §§ 723.51 through 723.66 are issued pursuant to the Agricultural Adjustment Act of 1938, as amended, and govern the establishment of farm acreage allotments and normal yields for Cigar-filler (type 41) and Maryland tobacco for the 1977–78 marketing year. The material previously appearing in these sections under Subpart—Cigar-Filler (Type 41) and Maryland Tobacco Allotment Regulations, 1974–75 marketing year remain in full force and effect for the crop to which it was applicable.

§ 723.52 Definitions.

As used in this subpart and in all instructions, forms, and documents in connection therewith, the words and phrases defined in this section shall have the meanings herein assigned to them unless the context or subject matter otherwise requires. References contained herein to other parts of this chapter or title shall be construed as references to such parts and amendments now in effect or later issued.

(a) The provisions of Parts 718 and 719 of this chapter, including definitions, are hereby incorporated in the regulations of this part unless the context or subject matter or the provisions of the regulations of this part otherwise require.

(b) "Base period" means the five calendar years immediately proceeding the year for which farm acreage allotments are currently being established.

(c) "Current year" means the calendar year for which acreage allotments are being established, or tobacco history acreage and normal yields are being determined.

(d) "New farm" means a farm for which a tobacco allotment is established in the current year and for which there is no tobacco history acreage in the base period.

(e) "Old farm" means a farm for which there was tobacco history acreage in one or more years of the base period.

(f) "Tobacco" means each one or both, as indicated by the context, of the kinds of tobacco listed in this paragraph, as classified in Service and Regulatory Announcement No. 118 (Part 30 of this title) of the former Bureau of Agricultural Economics of the United States Department of Agriculture.

(1) Maryland tobacco, type 32.

(2) Cigar-filler tobacco, type 41.

§ 723.53 Extent of determinations, computations and rule for rounding fractions.

Farm acreage allotments shall be rounded to hundredths of acres in accordance with the provisions of Part 793 of this chapter.

§ 723.54 Instructions and forms.

The Director, Program Operations Division, shall cause to be prepared and issued such forms as are necessary, and shall cause to be prepared such instructions with respect to internal management as are necessary, for carrying out the regulations in this part. The forms and instructions shall be approved by and the instructions shall be issued by the Deputy Administrator, Programs, Agricultural Stablization and Conservation Service.

TOBACCO HISTORY ACREAGE, ACREAGE ALLOTMENTS, AND NORMAL YIELDS FOR OLD FARMS

§ 723.55 Determination of tobacco history acreage for old farms.

(a) The county committee shall determine from the best available data the tobacco history acreage on each old tobacco farm for each of the five years 1972–76. Data for making such determinations shall be taken from county office records, producers' records, producers' reports, estimates of other persons having knowledge of the tobacco production on the farm, and any other source available.

(b) For the year 1974, the 1974 tobacco history acreage shall be the same as the 1974 allotment if as much as 75 percent of the 1974 allotment was planted (or considered planted under conservation programs or conservation practices (Part 719 of this chapter)). If less than 75 percent of the 1974 allotment was planted or considered planted, the 1974 history acreage shall be the acreage planted or considered planted. The tobacco history acreage for 1974 shall be zero for a farm for which no 1974 tobacco acreage allotment was determined.

(c) For years for which no allotments were established for either of such kinds of tobacco, the tobacco history acreage shall consist of (1) the acreage planted to tobacco on the farm, plus (2) the acreage considered planted to tobacco on the farm. The acreage considered planted to tobacco on the farm shall consist of (i) the allotment acreage pooled under Part 719 of this chapter and (ii) tobacco acreage diverted under conservation programs or practices (if a farm was under a cropland adjustment program agreement during any year of the base period for which no tobacco acreage allotment was established, the tobacco history acreage for such year shall be the larger of: (*a*) The planted acreage, or (*b*) the nonallotment base acreage under Part 751 of this chapter designated under agreement not to exceed any tobacco acreage as determined or computed for the farm for the year immediately preceding the year of the cropland adjustment program agreement).

(d) In determining the tobacco history acreage for each year of the base period, the county committee shall make due allowances for drought, flood, hail, and other abnormal weather conditions and plant bed and other diseases.

§ 723.56 Determination of preliminary acreage allotments for all farms.

(a) The preliminary allotment for an old farm shall be the larger of the following:

(1) The average tobacco history acreage on the farm during the base period (1972–76), or

(2) The average tobacco history acreage on the farm in the three preceding years (1974–76).

(b) Notwithstanding the foregoing provisions of this section, no 1977 farm tobacco preliminary allotment (or 1977 farm tobacco acreage allotment) shall be determined for any land which the county committee determines has become devoted to commercial or residential development or other nonagricultural purposes, and was not and could not have been acquired under the right of eminent domain by the person or agency that did acquire it, and is retired from agricultural production. *Provided*, That this paragraph shall not preclude the determination of a preliminary acreage allotment (or allotment) for (1) an old farm returned to agricultural production if the allotment for the retired land was not allocated to other land in the farm of which the retired land was a part, or (2) a farm for which an acreage allotment may be determined under the provisions of § 723.59: *And provided further*, That the provisions of this paragraph shall not preclude the allocation of the allotment for the retired land to other land contained in the farm of which the retired land was a part pursuant to Part 719 of this chapter.

§ 723.57 Old farm tobacco acreage allotment.

The preliminary allotments calculated for all old farms pursuant to §723.56, and including those under §723.59(a), shall be adjusted uniformly so that the total of such allotments plus the acreage available pursuant to §§ 723.58 and 723.62 shall not exceed the national acreage allotment: *Provided*, That for Cigar-filler (type 41) tobacco if the acreage allotment determined for any farm (except farms operated, controlled, or directed by a person who also operates, controls, or directs another farm on which tobacco is produced) is less than that acreage which, with the normal yield for the farm, would produce, 2,400 pounds of tobacco, then such acreage allotment shall be increased to the smaller of (a) 120 percent thereof, or (b) that acreage which, with the normal yield for the farm, would produce 2,400 pounds of tobacco.

V42163 APR 1 77 UMI

§ 723.58 Correction of errors and adjusting inequities in acreage allotments for old farms.

(a) Notwithstanding the limitations contained in any other section of this subpart, the farm acreage allotment for each kind of tobacco established for an old farm may be increased to correct an error or adjust an inequity if the county committee determines, with the approval of a representative of the State committee, that the increase is necessary to establish an allotment for such farm which is fair and equitable in relation to the allotment for other old farms in the county in which the farm is located. An acreage not to exceed one percent of the national acreage allotment for each kind of tobacco minus that part of the national reserve set aside for establishing new farm allotments shall be made available for adjusting inequities and for correcting errors. The amount of the national reserve acreage available for correcting errors and for adjusting inequities will be announced at the same time the national quota is proclaimed. The reserve acreage for old farms will be allocated to each State based on the relation of the preliminary acreage allotment in that State to the national preliminary allotment.

(b) Acreage increases to adjust inequities in acreage allotments shall be made on the basis of the past farm acreage and past farm acreage allotments of tobacco, making due allowances for drought, flood, hail, other abnormal weather conditions, plant bed and other diseases; land, labor, and equipment available for the production of tobacco; crop rotation practices; and the soil and other physical factors affecting the production of tobacco. The total of all adjustments in old farm allotments under this paragraph shall not exceed the acreage allocated for such purpose.

(c) The allotment for a farm under a cropland conversion program agreement or land under a cropland adjustment agreement shall be given the same consideration under this section as the allotment for any other old farm.

(d) Acreage approved for a farm under this section becomes a part of the farm acreage allotment.

§ 723.59 Reallocation and release and reapportionment of allotments determined for farms acquired by an agency having the right of eminent domain.

(a) The determination of allotments for farms acquired by an agency having the right of eminent domain, the transfer of such allotment to a pool and reallocation from the pool shall be administered as provided in Part 719 of this chapter. The normal yield for each farm to which a reallocation is made as provided in this paragraph shall be determined as provided in § 723.61. For a farm for which allotment acreage was placed in a pool, the allotment remaining in the pool shall be the 1977 preliminary allotment.

(b) The displaced owner of a farm may, not later than May 1 of the current year, release in writing to the county committee for the year 1977 all or part of the acreage for the farm in a pool under Part 719 of this chapter for reapportionment for 1977 by the county committee to other farms in the county having allotments for the same kind of tobacco. The county committee may reapportion, not later than June 1 of the current year, the released acreage or any part thereof to other farms in the county on the basis of the past farm acreage and past farm acreage allotments of the same kind of tobacco, land, labor, equipment available for the production of such kind of tobacco, crop rotation practices, and soil and other physical factors affecting the production of such kind of tobacco. The allotment acreage released shall, for tobacco acreage history and future allotment purposes, be considered to have remained in the pool as though it had not been released therefrom. The acreage reapportioned to a farm under this paragraph shall be reduced, where applicable, so as not to exceed the acreage by which the 1977 final tobacco acreage on the farm, determined pursuant to Part 718 of this chapter, exceeds the 1977 allotment prior to being increased by reapportionment.

§ 723.60 Farms divided or combined.

Allotments for farms reconstituted for 1977 shall be determined in accordance with Part 719 of this chapter.

§ 723.61 Determination of normal yields for old farms.

The normal yield for any old farm shall be that yield which the county committee determines is normal for the farm taking into consideration (a) the yields obtained on the farm during the period, not less than the base period, for which data are available; (b) the soil and other physical factors affecting the production of tobacco on the farm; and (c) the yields obtained on other farms in the locality which are similar with respect to such factors.

ACREAGE ALLOTMENTS AND NORMAL YIELDS FOR NEW FARMS

§ 723.62 Determination of acreage allotments for new farms.

The acreage allotment, other than an allotment made under § 723.59(a), for a new farm shall be that acreage which the county committee, with approval of the State committee determines is fair and reasonable for the farm, taking into consideration the past tobacco experience of the farm operator, the land, labor, and equipment available for the production of tobacco; crop rotation practices; and the soil and other physical factors affecting the production of tobacco: *Provided*, That, the acreage allotment so determined shall not exceed 50 percent of the average of the acreage allotments established for two or more but not more than five old farms which are similar with respect to land, labor, and equipment available for the production of tobacco, crop rotation practices, and the soil and other physical factors affecting the production of tobacco: *And provided further*, That, if the acreage planted to tobacco on a new tobacco farm is less than 75 percent of the tobacco acreage allotment otherwise established for the farm pursuant to this section, such allotment shall be automatically reduced to the sum of the tobacco planted acreage and the prevented planted tobacco acreage as determined under Part 718 of this chapter for the farm.

(a) *Written application.* The farm operator must file an application for a new farm allotment at the office of the county committee where the farm is administratively located on or before February 15 of the year for which the new farm alloment is requested.

(b) *Eligibility requirements for operator.* A new farm allotment may be established if each of the following conditions is met:

(1) *Owner and operator of the farm.* The operator shall be the sole owner of the farm. For the purpose of applying this subparagraph (1) a person who owns only part of a farm cannot be considered the owner of the farm except that both husband and wife shall be considered the owner and operator of a farm which they jointly own.

(2) *Interest in another farm.* The farm operator shall not own or operate any other farm in the United States for which a tobacco allotment or quota is established for the current year.

(3) *Availability of equipment and facilities.* The operator must own, or have readily available, adequate equipment and any other facilities of production necessary to the production of tobacco on the farm.

(4) *Income requirement.* The operator must expect to obtain during the current year more than 50 percent of his income from the production of agricultural commodities or products.

(i) *Computing operator's income.* The following shall be considered in computing operator's income:

(*a*) *Income from farming.* Income from farming shall include the estimated return from home gardens, livestock and livestock products, poultry, or other agricultural products produced for home consumption or other use on the farm(s). The estimated return from the production of the requested new farm allotment shall not be included.

(*b*) *Income from nonfarming.* Nonfarming income shall include but shall not be limited to salaries, commissions, pensions, social security payments, and unemployment compensations.

(c) *Spouse's income.* The spouse's farm and nonfarm income shall be used in the computation.

(ii) *Operator a partnership.* If the operator is a partnership, each partner must expect to obtain more than 50 percent of his current year income from farming.

(iii) *Operator a corporation.* If the operator is a corporation, it must have no major corporate purpose other than ownership or operation of the farm(s). Farming must provide its officers and general manager with more than 50 percent of their expected income. Salaries and dividends from the corporation shall be considered as income from farming.

(iv) *Special provision for low-income farmers.* The county committee may waive the income provisions in this section provided they determine that the farm operator's income, from both farm and nonfarm sources, is so low that it will not provide a reasonable standard of living for the operator and his family, and a State committee representative approves such action. In waiving the income provisions the county committee must exercise good judgment to see that their determination is reasonable in the light of all pertinent factors, and that this special provision is made applicable only to those who qualify. In making their determination, the county committee shall consider such factors as size and type of farming operations, estimated net worth, estimated gross family income, estimated family off-farm income, number of dependents, and other factors affecting the individual's ability to provide a reasonable standard of living for himself and his family.

(5) *Experience.* Operator must have had experience in producing, harvesting, and marketing the kind of tobacco requested. Such experience must have been gained: by being a sharecropper, tenant, or farm operator (bona fide tobacco production experience gained by a person as a member of a partnership shall be accepted as experience gained in meeting this requirement) during at least two of the five years immediately preceeding the year for which the new farm allotment is requested. If the operator was in the armed services during the five-year period, the period shall be extended one year for each year of military service during the five years. The experience must have been gained on a farm having a tobacco allotment for such years for the kind of tobacco requested in the application.

(c) *Eligibility requirements for the farm.* A new farm allotment may be established if each of the following conditions is met:

(1) *Current allotment or quota.* The farm must not have on the date of approval of a new farm acreage allotment an allotment or quota for any kind of tobacco.

(2) *Available land, type of soil, and topography.* The available land, type of soil, and topography of the land on the farm must be suitable for tobacco production. Also continuous production of tobacco must not result in an undue erosion hazard.

(3) *Downward adjustment.* The acreage allotment established as provided in this section for each kind of tobacco shall be subject to such downward adjustment as is necessary to bring such allotments in line with the total acreage available for allotment to all new farms.

(4) *False information.* Any new farm acreage allotment which was determined by the county committee on the basis of incomplete or inaccurate information knowingly furnished by the applicant shall be canceled by the county committee as of the date the allotment was established. When incomplete or inaccurate information was unknowingly furnished by the applicant, the allotment shall be canceled effective for the current crop year except where the provisions of § 723.64(d) apply.

§ 723.63 Determination of normal yields for new farms.

The normal yield for a new farm shall be that yield per acre which the county committee determines is normal for the farm as compared with yields for other farms in the locality on which the soil and other physical factors affecting the production of tobacco are similar.

MISCELLANEOUS

§ 723.64 Approval of determinations made under §§ 723.51 through 723.63 and notices of farm acreage allotment.

(a) All farm acreage allotments and yields shall be determined by the county committee of the county in which the farm is located and shall be reviewed by a representative of the State committee. The State committee may revise or require revision of any determination made under §§ 723.51 through 723.63. All acreage allotments and yields shall be approved by a representative of the State committee, and no official notice of acreage allotment shall be mailed to a farm operator until such allotment has been so approved, except that revised acreage allotment notices without such prior approval may be mailed in cases resulting from reconstitutions that do not involve the use of additional acreage.

(b) An official notice of the farm acreage allotment and marketing quota shall be mailed to the operator of each farm shown by the records of the county committee to be entitled to an allotment. The notice to the operator of the farm shall constitute notice to all persons who as operator, landlord, tenant, or sharecropper are interested in the farm for which the allotment is established. Insofar as practical, all allotment notices shall be mailed in time to be received prior to the date of any tobacco marketing quota referendum. A copy of such notice containing thereon the date of mailing, shall be maintained for not less than 30 days in a conspicuous place in the county office and shall thereafter be kept available for public inspection in the office of the county committee. A copy of such notice certified as true and correct shall be furnished without charge to any person interested in the farm for which the allotment is established.

(c) If the records of the county committee indicate that the allotment established for any farm may be changed because of (1) removal of the farm from agricultural production, (2) division of the farm, or (3) combination of the farm, the mailing of the notice of such allotment may be delayed: *Provided*, That the notice of allotment for any farm shall be mailed no later than May 1 of the current year.

(d) If the county committee determines with the approval of the State executive director, that (1) the official written notice of the farm acreage allotment issued for any farm erroneously stated the acreage allotment to be larger than the correct allotment, and (2) the error was not so gross as to place the operator on notice thereof, and that the operator, relying upon such notice and acting in good faith (i) materially changed his position to enable him to produce the allotment crop (for example obligated expenditures of funds for land preparation, additional equipment and labor) or (ii) has planted an acreage of tobacco in excess of the correct farm acreage allotment the acreage allotment shown on the erroneous notice shall be deemed to be the tobacco acreage allotment for the farm for all purposes in connection with the tobacco marketing quota program for the current year.

§ 723.65 Application for review.

Any producer who is dissatisfied with the farm acreage allotment and marketing quota established for his farm may, within 15 days after mailing of the official notice of the farm acreage allotment and marketing quota, file application in writing with the county ASCS office to have such allotment reviewed by a review committee. The procedure governing the review of farm acreage allotments and marketing quotas is contained in Part 711 of this chapter.

§ 723.66 Lease and transfer of tobacco acreage allotments.

(a) *Farms eligible.* Subject to the limitations provided in this section, the owner and operator (acting together if different persons) of any farm for which an old farm tobacco acreage allotment is established for the current year may lease and transfer all or any part of the farm acreage allotment established for such farm to any other owner or operator of a farm in the same county with a current year's allotment (old or new farm) for the same kind of tobacco for use on such farm. The lease and transfer of an acreage allotment shall be recognized and considered valid by the county committee subject to the conditions set forth in this section.

(b) *Maximum period.* Transfer of allotments by lease shall not exceed five years.

(c) *Filing and approval of transfer agreement*—(1) *Filing transfer agreement.* The lease and transfer of any allotment or any part thereof from the farm for which the allotment was established to another tobacco farm shall not become effective until a copy of the transfer agreement, determined by the county committee to be in compliance with the provisions of this section, is filed with the county committee not later than June 1, except that a lease shall be effective if the county committee, with the approval of a State committee representative, finds that the producer was prevented from timely filing the transfer agreement due to reasons beyond his control. The county committee may redelegate authority to approve leasing agreements to the county executive director. The filing of a properly executed Form ASCS–375, Record of Transfer of Allotment or Quota, will be considered

V 42 63 APR 1 77 UMI

to meet the requirements of this paragraph (c)(1).

(2) *Record of transfer on ASCS-375.* No lease and transfer of any allotment under this section shall become effective until a record of the transfer has been executed on Form ASCS-375 and filed with the county committee by the parties to the transfer. If the owner and operator of the farm from which transfer by lease is to be made are different persons, both owner and operator shall execute the record of transfer; however, only the owner or operator of the receiving farm is required to sign the transfer. A county committee member or employee must witness the signature of either the owner or operator of the transferring farm and the owner or operator of the receiving farm. If such signatures cannot be witnessed in the county office where the farm is administratively located, they may be witnessed in any county office convenient to the owner's or operator's residence. The requirement that signatures be witnessed for producers who are ill, infirm, reside in distant areas, or are in similar hardship situations or may be unduly inconvenienced may be waived provided the county office mails Form ASCS-375 for the required signature.

(d) *Normal yields.* The county committee shall determine a normal yield per acre, in accordance with the provisions of § 723.61 in the case of old farms, and, in the case of new farms, § 723.63 for each farm from which, and for each farm to which a, tobacco acreage allotment or any part thereof is leased. If the normal yield determined by the county committee for the farm to which the allotment acreage is transferred does not exceed the normal yield determined by the county committee for the farm from which the allotment acreage is transferred by more than 10 percent, the lease and transfer shall be approved acre for acre. If the normal yield determined by the county committee for the farm to which the allotment acreage is transferred exceeds the normal yield for the farm from which the allotment is transferred by more than 10 percent, the county committee shall make a downward adjustment in the amount of the allotment acreage transferred by multiplying the normal yield established for the farm from which the allotment acreage is transferred by the acreage being transferred and dividing the result by the normal yield established for the farm to which the allotment acreage is transferred. In the case of transfers of allotments for two or more years, the productivity adjustment and amount of allotment so transferred shall be redetermined by the county committee each year the transfer remains in effect.

(e) *Allotment acreage considered fully planted.* The amount of allotment acreage which is leased from a farm (prior to any reduction made under this section) shall be considered for the purpose of determining future allotments (and tobacco history acreage) to have been planted to tobacco on such farm. The amount of allotment acreage which is leased and transferred to a farm shall not be taken into account in establishing allotments for subsequent years for such farms.

(f) *Limit on acreage transferred.* The total acreage allotted to any farm after the transfer by lease of tobacco acreage allotment to the farm (the sum of its own allotment and acreage leased and transferred to it after any adjustment in normal yield) shall not exceed 50 percent of the acreage of cropland in the farm.

(g) *New farm allotment.* A new farm allotment shall not be leased or transferred.

(h) *Farms under long-term land-use programs.* A transfer of an allotment to or from a farm covered by a Cropland Adjustment Program agreement shall not be approved if the transferring or receiving farm has the allotment base designated under such program agreement.

(i) *Transfer from the pool.* Allotments in a pool pursuant to Part 719 of this chapter may be eligible for lease and transfer during the three-year life of the pooled allotment. An agreement to lease and transfer shall not serve to extend the life of such pooled allotment.

(j) *Subleasing and limitation on lease and transfer to and from a farm*—(1) *No subleasing.* No transfer shall be made from a farm receiving allotment under a transfer agreement for the term of the transfer agreement.

(2) *Limitation on lease and transfer to and from a farm for the same crop year.* If a lease and transfer agreement is in effect for any farm, no transfer of allotment shall be made (i) from such farm receiving allotment by transfer or, (ii) to such farm which had allotment transferred from it.

(k) *Revised notices.* A form ASCS-375 showing the allotment acreage after lease and transfer shall be issued by the county committee to each of the operators of all farms from which or to which a tobacco allotment acreage is leased under this section.

(l) *Tobacco acreage allotment.* Except with respect to the erroneous allotment notice provisions in § 723.64 and the provisions for review in § 723.65, the term "tobacco acreage allotment" as used herein shall mean the allotment without regard to the application of the provisions of this section.

(m) *Zero allotment farm.* If the allotment for a farm for the current year is reduced to zero, no tobacco allotment acreage for such kind of tobacco may be leased to such farm for the current year.

(n) *Approval after review period.* No lease shall be approved by the county committee for any farm involved in a lease and transfer of allotment acreage until the time of filing an application for review, as shown on the original allotment notice for the farm, has expired. If an application for review is filed for a farm involved in a lease and transfer agreement, such agreement shall not be approved by the county committee until the allotment for such farm is finally determined pursuant to Part 711 of this chapter.

(o) *Acreage allotment after lease and transfer.* The acreage allotment finally determined (after lease and transfer) for a farm under the provisions of this section shall be the allotment for such farm for the current year only for the purpose of determining (1) excess acreage, (2) the amount of penalty to be collected on marketings of excess tobacco including absorption of carryover penalty tobacco, (3) eligibility for price support, and (4) the farm marketing quota and the percentage reduction for a violation in the allotment for the farm.

(p) *Cancellation, dissolution, or revision of transfer*—(1) *Cancellation.* Any transfer of allotment under this section which was approved by the county committee in error or on the basis of incorrect information furnished by the parties to the agreement shall be cancelled by the county committee. Such cancellation shall be effective as of the date of approval for purposes of determining eligibility for price support and marketing were not notified of the cancellation before the tobacco was planted. The provisions of this paragraph (p)(1) shall not preclude application of the erroneous notice provisions under § 723.64 where such provisions are applicable.

(2) *Dissolution or revision.* A transfer agreement may be dissolved or minor revisions made where a request by all parties to the agreement is made in writing to the county committees. Such written notification shall be filed prior to planting the tobacco. A late filed request to dissolve or revise the transfer may be effective for the current year if the county committee with approval of a State committee representative determines that the producer was prevented from timely filing for reasons beyond his control.

(q) *Reconstituted farm.* The allotment for a farm being divided or combined in the current year shall be the allotment after lease and transfer has been made. Notwithstanding the above, in the case of a division, the county committee shall allocate the acreage that was transferred by lease to the tracts involved in the division as the parent farm owners and operators designate in writing. In the absence of such designation, the county committee shall apportion the leased acreage.

(r) *Consent of lienholder.* No transfer of allotment other than by annual lease shall be made from a farm subject to a mortgage or other lien unless the transfer is agreed to in writing by the lienholder.

Signed at Washington, D.C., on March 24, 1977.

VICTOR A. SENECHAL,
Acting Administrator, Agricultural Stabilization and Conservation Service.

[Amdt. 4]

PART 728—WHEAT

Wheat Program for Crop Years 1975–1977

1977 CROP ESTABLISHED PRICE AND DISASTER PAYMENT RATE

This amendment is issued pursuant to the Agricultural Act of 1949, as amended by the Agricultural Act of 1970 (Pub. L. 91-524, 84 Stat. 1358), by the Agriculture and Consumer Protection Act of 1973 (Pub. L. 93-86, 87 Stat. 224), and by Pub. L. 93-228, 87 Stat. 944. The purposes of this amendment are to determine and announce the established price and the disaster payment rate for the 1977 crop of wheat.

Section 107(c) of the Agricultural Act of 1949, as amended, requires that the established price for the 1977 crop of wheat be $2.29 per bushel adjusted to reflect any change during the calendar year 1976 in the index of prices paid by farmers for production items, interest, taxes, and wage rates (herein referred to as the PPI); *Provided*, That any increase that would otherwise be made in the established price to reflect a change in the PPI shall be further adjusted to reflect any change in the national average yield per acre of wheat for the three calendar years 1974–1976 over the national average yield for the three calendar years 1973–1975.

In determining the change in the PPI during calendar year 1976, the average of the monthly PPI's for the 1976 calendar year was compared with the average of the monthly PPI's for the 1975 calendar year. The 1976 average was 709 and the 1975 average was 665. Thus, the adjustment resulting from the increase in the PPI during calendar year 1976 is 6.62 percent.

The 1974–1976 average yield per acre of wheat was 29.5 bushels. The 1973–1975 average was 29.9 bushels. The 1974–1976 average is 1.34 percent below the 1973–1975 average.

The total adjustment is, therefore, 7.96 percent (6.62-(—1.34)). Thus the established price for the 1977 crop of wheat is $2.47 per bushel ($2.29 times 1.0796).

Since farmers need to know the established price for the 1977 crop as soon as possible so that they may make plans for their 1977 farming operations, it is hereby found and determined that compliance with the notice and public procedure provisions of 5 U.S.C. 553 is impracticable and contrary to the public interest. Accordingly, this amendment shall be effective March 31, 1977.

Section 728.10 of the Wheat Program for Crop Years 1975–1977 Regulations, 7 CFR §§ 728.1–728.26, is amended to read as follows:

§ 728.10 Payment rates.

Payment rates shall be established separately for deficiency payments and for disaster payments.

(a) *Deficiency payment rates.* The per bushel deficiency payment rate for each crop of wheat shall be the amount by which the higher of:

(1) The national weighted average market price received by farmers for wheat during the first five months of the marketing year for such crop beginning June 1 or

(2) The national average loan rate established for such crop is less than the established price of $2.05 per bushel in the case of the 1975 crop, $2.29 per bushel in the case of the 1976 crop, and $2.47 per bushel in the case of the 1977 crop.

(b) *Disaster payment rates.* The per bushel disaster payment rate shall be equal to the larger of the deficiency payment rate or one-third of the established price. The disaster payment rate for the 1975 program year is $.68 per bushel. The disaster payment rate for the 1976 program year is $.76 per bushel. The disaster payment rate for the 1977 program year is $.82 per bushel.

(Sec. 107, 84 Stat 1358, 87 Stat. 224, 87 Stat. 944 (7 U.S.C. 1445a))

Effective date: This amendment becomes effective on March 31, 1977.

Signed at Washington, D.C. on March 25, 1977.

VICTOR A. SENECHAL,
Acting Administrator, Agricultural Stabilization and Conservation Service.

[FR Doc.77-9611 Filed 3-31-77;8:45 am]

PART 729—PEANUTS

Subpart—1977 Crop of Peanuts: Acreage Allotments and Marketing Quotas

INCREASE IN VALENCIA TYPE ACREAGE ALLOTMENTS

Basis and purpose. The provisions of 7 CFR 729.106 are issued pursuant to section 358(c)(2) of the Agricultural Adjustment Act of 1938, as amended (7 U.S.C. 1358(c)(2)). The purpose of § 729.106 is to make a determination on the basis of the average yield per acre of Valencia type peanuts during the five-year period 1972–76, adjusted for trends in yields and abnormal conditions of production affecting yields, that the supply of Valencia type peanuts for the 1977–78 marketing year will be insufficient to meet estimated demand for cleaning and shelling purposes at prices at which the Commodity Credit Corporation may sell for such purposes peanuts owned or controlled by CCC. The State allotments for States producing Valencia type peanuts are increased in order to meet such demand. The latest available statistics of the Federal Government were used in making these determinations.

Notice that a determination would be made with respect to the supply of Valencia type peanuts under section 358(c)(2) of the act was published in accordance with 5 U.S.C. 553 (80 Stat. 383) in the FEDERAL REGISTER of February 25, 1977 (42 FR 11015). The overwhelming majority of the recommendations received related to production in New Mexico, for which they recommended a minimum of 4,312 acres. Such recommendations received in response to the notice were duly considered within the limits of the Agricultural Adjustment Act of 1938, as amended. In order that peanut farmers may be notified as soon as possible of any increases of farm allotment for the 1977 crop, it is essential that § 729.106 be made effective as soon as possible. Accordingly, it is hereby determined and found that compliance with 30-day effective date requirement of 5 U.S.C. 553 is impracticable and contrary to the public interest and § 729.106 shall be effective upon filing of this document with the Director, Office of the Federal Register.

7 CFR Part 729 is amended by revising § 729.106 to read as follows:

§ 729.106 Additional allotment for Valencia type peanuts of the 1977 crop.

(a) *Determination of short supply.* The term "Valencia type peanuts" means Valencia type peanuts as defined in § 729.7(c) of the Allotment and Marketing Quota Regulations for Peanuts of the 1972 and Subsequent Crops (37 FR 2645, 3629). It is hereby determined that the supply of Valencia type peanuts for the 1977–78 marketing year (August 1, 1977 through July 31, 1978) determined in accordance with section 358(c)(2) of the Agricultural Adjustment Act of 1938, as amended, will be insufficient to meet the estimated demand for Valencia type peanuts for cleaning and shelling purposes at prices at which the Commodity Credit Corporation may sell for such purposes peanuts owned or controlled by it.

(b) *State allotment increases for 1977 crop.* The State allotment for peanuts of the 1977 crop for States which produced Valencia type peanuts during any one or more of the years 1974, 1975 and 1976 shall be increased in the aggregate by 4,236 acres which is determined to be the additional acreage required to meet the estimated demand for Valencia type peanuts for cleaning and shelling purposes at the price at which CCC may sell for such purposes peanuts owned or controlled by it.

(c) *Apportionment of allotment increase to States for 1977 crop.* The aggregate of State allotment increases in the amount of 4,236 acres established under paragraph (b) of this section is hereby apportioned to States on the basis of the average acreage of Valencia type peanuts in each State in 1974, 1975 and 1976. The apportionment of additional allotment under this paragraph does not increase the State allotment for any State above the 1947 harvested acreage of peanuts for such State. The following table sets forth the apportionment to States.

V 4263 APR 1 77 UMI

	1947 harvested acreage of peanuts	1974–76 average harvested acreage of Valencia peanuts [1]	1977 increase in Basic State allotment for Valencia-type peanuts	1977 previous State allotment	1977 revised State allotment
	Acres				
Alabama	463,000			216,641	216,641
Arizona		2	1	761	762
Arkansas	8,000			4,238	4,238
California				930	930
Florida	105,000	2	1	55,572	55,573
Georgia	1,124,000			529,884	529,884
Louisiana	4,000			1,945	1,945
Mississippi	13,000	85	63	7,492	7,555
Missouri				247	247
New Mexico	14,000	5,373	4,000	5,787	9,787
North Carolina	292,000	3	2	167,879	167,881
Oklahoma	325,000	16	12	138,290	138,302
South Carolina	26,000	3	2	13,891	13,893
Tennessee	5,000	3	2	3,552	3,554
Texas	836,000	206	153	358,063	358,216
Virginia	162,000			104,828	104,828
U.S. total	3,377,000	5,693	4,236	1,610,000	1,614,236

[1] Less increase in State allotment for Valencia short supply.

(d) *No credit for future allotments.* The additional allotment apportioned under this section is in addition to the national acreage allotment, the production from such acreage is in addition to the national marketing quota and such additional allotment shall not be considered in establishing future State, county, or farm acreage allotments.

(Sec. 358(c)(2), 65 Stat. 29, as amended (7 U.S.C. 1358(c)(2)); Sec. 375, 52 Stat. 66, as amended (7 U.S.C. 1375).)

Effective date: This amendment takes effect on March 29, 1977.

Signed at Washington, D.C., on March 29, 1977.

VICTOR A. SENECHAL,
Acting Administrator, Agricultural Stabilization and Conservation Service.

[Amdt. 4]

PART 755—FEED GRAINS

Feed Grain Program for Crop Years 1975–1977

1977 CROP ESTABLISHED PRICES AND DISASTER PAYMENT RATES

This amendment is issued pursuant to the Agricultural Act of 1949, as amended by the Agricultural Act of 1970 (Pub. L. 91-524, 84 Stat. 1358), by the Agriculture and Consumer Protection Act of 1973 (Pub. L. 93-86, 87 Stat. 230), and by Pub. L. 93-228, 87 Stat. 944. The purposes of this amendment are to determine and announce the established prices and the disaster payment rates for the 1977 crop of corn, grain sorghum and barley.

Section 105(b) of the Agricultural Act of 1949, as amended, requires that the established price for the 1977 crop of corn be $1.57 per bushel adjusted to reflect any change during the calendar year 1976 in the index of prices paid by farmers for production items, interest, taxes, and wage rates (herein referred to as the PPI); *Provided*, That any increase that would otherwise be made in the established price to reflect a change in the PPI shall be further adjusted to reflect any change in the national average yield per acre of feed grains for the three calendar years 1974–1976 over the national average yield for the three calendar years 1973–1975.

In determining the change in the PPI during calendar year 1976, the average of the monthly PPI's for the 1976 calendar year was compared with the average of the monthly PPI's for the 1975 calendar year. The 1976 average was 709 and the 1975 average was 665. Thus, the adjustment resulting from the increase in the PPI during calendar year 1976 is 6.62 percent.

The 1974–1976 average yield per acre of corn was 81.7 bushels. The 1973–1975 average was 82.9 bushels. The 1974–1976 average is 1.45 percent below the 1973–1975 average.

The total adjustments is, therefore, 8.07 percent (6.62–(–1.45)). Thus, the established price for the 1977 crop of corn is $1.70 per bushel ($1.57 times 1.0807).

Section 105(b) of the Agricultural Act of 1949, as amended, requires that the payment rate for grain sorghums and, if designated by the Secretary, barley, shall be such rate as the Secretary determines fair and reasonable in relation to the rate at which payments are made available for corn.

The established price for the 1977 crop of grain sorghum is $1.62 per bushel and for barley $1.39 per bushel determined on the basis of the feeding value relationship to corn of 95 percent. (Sorghum, $1.70×.95; barley, $1.70×.95÷56 pounds corn per bushel ×48 pounds barley per bushel.)

Since farmers need to know the established price for the 1977 crop as soon as possible so that they may make plans for their 1977 farming operations, it is hereby found and determined that compliance with the notice and public procedure provisions of 5 U.S.C. 553 is impracticable and contrary to the public interest. Accordingly, the amendment shall be effective on March 31, 1977.

Section 775.10 of the Feed Grain Program for Crop Years 1975–1977 Regulations, 7 CFR §§ 775.1–775.26, is amended to read as follows:

§ 775.10 **Payment rates.**

Payment rates shall be established separately for deficiency payments and for disaster payments.

(a) *Deficiency payment rates.* The per bushel deficiency payment rate for each crop of corn shall be the amount by which the higher of: (1) The national weighted average market price received by farmers for corn during the first five months of the marketing year for such crop beginning October 1, or

(2) The national average loan rate established for such crop is less than the the established price of $1.38 per bushel in the case of the 1975 crop, $1.57 per bushel in the case of the 1976 crop, and $1.70 per bushel in the case of the 1977 crop.

Per bushel rates shall be established in like manner for grain sorghum and barley based on marketing years beginning October 1 for grain sorghum and June 1 for barley, and on the established prices determined each program year. The established prices for grain sorghum and barley are based on a feeding value relationship to corn of 95 percent. The established prices for the 1975 program year are $1.31 per bushel for grain sorghum and $1.13 per bushel for barley. The established prices for the 1976 program year are $1.49 per bushel for grain sorghum and $1.28 per bushel for barley. The established prices for the 1977 program year are $1.62 per bushel for grain sorghum and $1.39 per bushel for barley.

(b) *Disaster payment rates.* The per bushel disaster payment rate for each feed grain shall be equal to the larger of the deficiency payment rate or one-third of the established price. Disaster payment rates for the 1975 program year are $.46 per bushel for corn, $.44 per bushel for grain sorghums, and $.38 per bushel for barley. Disaster payment rates for the 1976 program year are $.52 per bushel for corn, $.50 per bushel for grain sorghum and $.43 per bushel for barley. Disaster payment rates for the 1977 program year are $.57 per bushel for corn, $.54 per bushel for grain sorghum and $.46 per bushel for barley.

(Sec. 107, 84 Stat. 1358, 87 Stat. 230, 87 Stat. 944 (7 U.S.C. 1441).)

Effective date: This amendment becomes effective on March 31, 1977.

Signed at Washington, D.C. on March 25, 1977.

VICTOR A. SENECHAL,
Acting Administrator, Agricultural Stabilization and Conservation Service.

[FR Doc.77-9612 Filed 3-31-77;8:45 am]

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Lemon Reg. 86]

PART 910—LEMONS GROWN IN CALIFORNIA AND ARIZONA

Limitation of Handling

(R) Editorial changes shall be

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation establishes the quantity of California-Arizona lemons that may be shipped to fresh market during the weekly regulation period April 3–9, 1977. It is issued under the Agricultural Marketing Agreement Act of 1937, as amended, and Marketing Order No. 910. This regulation is needed to provide for orderly marketing of fresh lemons, because of the production and marketing situation confronting the lemon industry. The regulation will tend to assure an adequate supply of lemons throughout the marketing season to the benefit of producers and consumers.

DATES: Weekly regulation period April 3–9, 1977.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250, (202) 447-3545.

SUPPLEMENTARY INFORMATION: (a) *Findings.* (1) Pursuant to the amended marketing agreement and Order No. 910, as amended (7 CFR Part 910), regulating the handling of lemons grown in California and Arizona, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and upon the basis of the recommendations and information submitted by the Lemon Administrative Committee, established under the amended marketing agreement and order, and upon other available information, it is found that the limitation of handling of such lemons, as provided in this section will tend to effectuate the declared policy of the act.

(2) The need for this section to limit the quantity of lemons that may be marketed during the specified week stems from the production and marketing situation confronting the lemon industry.

(i) The committee has submitted its recommendation for the quantity of lemons it considers advisable to be handled during the specified week. The recommendation resulted from consideration of the factors covered in the order. The committee further reports the demand for lemons is improved this week. Average f.o.b. price was $5.53 per carton the week ended March 26, 1977 compared to $5.50 per carton the previous week. Track and rolling supplies at 110 cars were down 10 cars from last week.

(ii) Having considered the recommendation and information submitted by the committee, and other available information, the Secretary finds that the quantity of lemons which may be handled should be established as provided in this section.

(3) It is further found that it is impracticable and is contrary to the public interest to give preliminary notice, engage in public rulemaking procedure, and postpone the effective date until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553), because the time intervening between the date when information upon which this section is based became available and the time when it must become effective to effectuate the declared policy of the act is insufficient. A reasonable time is permitted, for preparation for the effective time; and good cause exists for making the regulation effective as specified. The committee held an open meeting during the current week, after giving due notice, to consider supply and market conditions for lemons and the need for regulation. Interested persons were afforded an opportunity to submit information and views at this meeting. The recommendation and supporting information for regulation during the period specified were promptly submitted to the Secretary after the meeting was held, and information concerning the provisions and effective time has been provided to handlers of lemons. It is necessary, to effectuate the declared policy of the act, to make this regulation effective as specified. The committee meeting was held on March 29, 1977.

§ 910.386 **Lemon Regulation 86.**

* * * * *

(b) *Order.* (1) The quantity of lemons grown in California and Arizona which may be handled during the period April 3, 1977, through April 9, 1977, is established at 230,000 cartons.

(2) As used in this section, "handled", and "carton(s)" have the same meaning as when used in the amended marketing agreement and order.

(Secs. 1–19, 48 Stat. 31, as amended; (7 U.S.C. 601–674))

Dated: March 30, 1977.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.77-10029 Filed 3-31-77;11:29 am]

CHAPTER VII—AGRICULTURAL STABILIZATION AND CONSERVATION SERVICE (AGRICULTURAL ADJUSTMENT), DEPARTMENT OF AGRICULTURE

SUBCHAPTER D—PROVISIONS COMMON TO MORE THAN ONE PROGRAM

[Amdt. 1]

PART 794—DIVISION OF PAYMENTS

Miscellaneous Provisions

The following changes are being made in the provisions of 7 CFR Part 794 which govern division of payments in order to conform with the provisions of the individual program regulations:

1. The form on which payment shares are recorded is identified as a "payment form" instead of an "intention form".

2. Program payments will normally be shared in the same manner as the crop is shared from allotment acreage on the farm or other participating unit or would have been shared had the crop been produced.

3. Approval of a different division of payments as determined by the county committee to be fair and equitable must have the concurrence of a representative of the State committee only when one or more producers do not agree to the division.

The regulations at 7 CFR Part 794 are amended as follows:

1. Section 794.2 is amended by revising paragraphs (a) and (b) to read as follows:

§ 794.2 **Division of program payments.**

(a) *General.* Each person on a participating farm, or other participating unit as approved by the Deputy Administrator, shall be given the opportunity to participate in the program in proportion to his interest in the program crops on allotment acreage or the interest he would have had if the crops had been produced. The name of such person shall be listed on a form which is approved by the Deputy Administrator for recording payment shares, herein called "payment form." If such person refuses or fails to sign the payment form, the share of the payment to which he would otherwise be entitled shall nevertheless be shown on the form. Federal agencies can earn no program payments but any shares to which such agencies would otherwise be entitled shall also be shown on the form as though the agencies were earning them. The sum of the percentage shares of the program payment shall equal 100 percent.

(b) *Division of program payment.* Each producer's share of the farm program payment for a crop shall be based on the following:

(1) His share of the crop from allotment, acreage, or the proceeds thereof, or

(2) If no crop is produced, the share which he would have otherwise received had the crop been produced.

Notwithstanding the foregoing sentence, except in the case of a small farm payment under the upland cotton program, a different division of payments which is fair and equitable may be approved by the county committee if all of the producers who would otherwise share in the payment agree to the different division in writing. Such different division of payments may also be approved by the county committee, with the concurrence of a representative of the State committee, even though all of the producers cannot agree on the division. In addition, a different division of payments may be approved by the county committee when required by the applicable program regulations which relate to successors-in-interest.

* * * * *

§ 794.3 [Amended]

2. Section 794.3 is amended as follows:

(a) By deleting the first three words "An intention form" in paragraph (a) and substituting the word "Payment".

(b) By revising the second sentence in paragraph (a)(4) to read as follows: "If any of such conditions occur or are discovered after payments have been made all, or any such part of the payments as the State committee may determine, shall be refunded to the Commodity Credit Corporation."

V4263 APR 1 77 UMI

(c) By deleting the words "the crop covered by the intention form" in paragraph (b) and substituting the words "the program crop".

(Sec. 103, 87 Stat. 233; sec. 105, 87 Stat. 230; sec. 107, 87 Stat. 224 (7 U.S.C. 1444, 7 U.S.C. 1441 note, 7 U.S.C. 1445a).)

Since these changes are necessary to conform with current program provisions, it is hereby found and determined that compliance with the notice and public procedure provisions of 5 U.S.C. 553 is impracticable and contrary to the public interest.

Effective date: These regulations shall become effective on March 25, 1977.

Signed at Washington, D.C. on March 24, 1977.

VICTOR A. SENECHAL,
Acting Administrator, Agricultural Stabilization and Conservation Service.

[FR Doc.77-9485 Filed 3-25-77;2:39 p.m.]

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

PART 928—PAPAYAS GROWN IN HAWAII

Rules and Regulations

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final Rule.

SUMMARY: This amendment revises the provisions allowing the handling of immature papayas. It was recommended by the Papaya Administrative Committee. This amendment will continue to make available, under revised terms and conditions, supplies of immature papayas which are used in cooking.

EFFECTIVE DATE: April 1, 1977.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250, (202) 447-3545.

SUPPLEMENTARY INFORMATION: The rules and regulations (Subpart—Rules and Regulations; 7 CFR 928.141–928.160) are effective pursuant to the applicable provisions of the marketing agreement, and Order No. 928 (7 CFR Part 928) regulating the handling of papayas grown in Hawaii, hereinafter referred to as the "order". This regulatory program is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674).

The amendment was unanimously recommended by the Papaya Administrative Committee, established under the order as the agency to administer its terms and provisions. As amended, the rules and regulations would specify revised terms and conditions with respect to the handling of immature papayas under § 928.152. Handlers who wish to handle immature papayas must apply to and be approved by the committee prior to such handling. Containers of immature papayas will be required to be properly marked "Off-Grade—Immature" or "Immature" depending on destination. In addition, immature papayas, regardless of destination, will be required to be individually stamped or labeled in a uniform manner approved by the committee indicating immaturity. Immature papayas are used in cooking by certain ethnic groups. The labeling requirements are safeguard designed to prevent immature papayas from being represented as mature fruit or diverted to markets which require mature papayas.

After consideration of all relevant matter presented, including the recommendations of the committee and other available information, it is found that amendment of the rules and regulations, as provided herein, will tend to effectuate the declared policy of the act.

It is further found that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice, engage in public rulemaking procedure, and postpone the effective date of this amendment until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553) in that the time intervening between the date when information upon which this amendment is based became available and the time when it must become effective in order to effectuate the declared policy of the act is insufficient; and this amendment relieves restrictions on the handling of papayas.

Therefore, § 928.152 is amended to read as follows:

§ 928.152 Maturity exemption.

(a) An immature papaya is one which has not reached the stage of maturity wherein the lower or blossom end half of the papaya shows a definite tinge of yellow.

(b) The handling of immature papayas shall be limited to papaya handlers whose name appears on the committee's current list of approved immature papaya handlers established pursuant to paragraph (c) of this section. Such papayas so handled shall be exempt from grade, size, quality, and maturity regulations issued pursuant to §§ 928.52 and 928.53.

(c) Any handler who desires to handle immature papayas shall, prior thereto, file with the committee an application and agreement therefor on PAC Form 7, which shall contain the following information: (1) Name and address of the applicant; (2) an agreement that containers of immature papayas handled to destinations within the State of Hawaii shall be clearly marked "Off-Grade—Immature" in letters not less than one-half inch in height and containers of such fruit handled in export shall be clearly marked "Off-Grade—Immature" or "Immature" in letters not less than one-half inch in height and further that each immature papaya, regardless of destination, shall be stamped or labeled in a uniform manner approved by the committee indicating immaturity; and (3) an agreement to promptly submit such reports on immature papayas handled at such times as may be required by the committee. The application shall be signed by the applicant or an authorized employee of the applicant and filed with the committee.

(d) If approved by the committee, the applicant's name shall be placed on the committee's list of approved immature papaya handlers. The applicant shall be notified of the committee's action.

(e) The committee may reject an application for just cause, such as a handler's past failure to comply with the requirements for the handling of immature papayas or his past failure to promptly submit reports as may be required under subparagraph (3) of paragraph (c) of this section and may also, for like causes, immediately suspend upon written notice, authorization previously granted a handler to handle immature papayas and remove his name from the list of approved immature papaya handlers.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.)

Dated March 29, 1977, to become effective April 1, 1977.

CHARLES R. BRADER,
Acting Director, Fruit and Vegetable Division, Agricultural Marketing Service.

CHAPTER X—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; MILK), DEPARTMENT OF AGRICULTURE

MILK IN THE IOWA MARKETING AREA

Order Amending and Merging Orders

7 CFR Part	Marketing area	Docket No.
1079	Des Moines, Iowa	AO-295-A32
1070	Cedar Rapids and Iowa City.	AO-229-A32
1078	North Central Iowa	AO-272-A27
1063	Quad Cities and Dubuque	AO-105-A43

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This final order merges the four Federal milk marketing orders mentioned above into a single order, which will be known as the "Iowa" order. The marketing area of the new order will include the marketing areas of the four individual orders, plus 22 Iowa counties that were previously unregulated.

As required by statute, the proposed Iowa order has been approved by at least two-thirds of the dairy farmers whose milk would be marketed under the order.

DATE: The Iowa order will become effective May 1, 1977.

FOR FURTHER INFORMATION CONTACT:

Clayton H. Plumb, Marketing Specialist, Dairy Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250 (202–447–2132).

SUPPLEMENTARY INFORMATION: Prior dockets in this proceeding: Notice of Hearing: Issued March 9, 1976; published March 12, 1976 (41 FR 10612). Recommended Decision: Issued December 29, 1976; published January 6, 1977 (42 FR 1356). Final Decision: Issued March 16, 1977; published March 23, 1977 (42 FR 15841)

FINDINGS AND DETERMINATIONS

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of each of the aforesaid orders and of the previously issued amendments thereto; and all of the said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreements and to the orders regulating the handling of milk in the aforesaid marketing areas.

Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The Iowa order, which amends and merges the aforesaid orders, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to Section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the Iowa marketing area, and the minimum prices specified in the Iowa order are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest;

(3) The Iowa order regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, the marketing agreements upon which a hearing has been held;

(4) All milk and milk products handled by handlers, as defined in the Iowa order, are in the current of interstate commerce or directly burden, obstruct, or affect interstate commerce in milk or its products; and

(5) It is hereby found that the necessary expense of the market administrator for the maintenance and functioning of such agency will require the payment by each handler, as his pro rata share of such expense, of 4 cents per hundredweight or such lesser amount as the Secretary may prescribe, with respect to milk specified in § 1079.85.

(b) *Determinations.* It is hereby determined that:

(1) The refusal or failure of handlers (excluding cooperative associations specified in Sec. 8c(9) of the Act) of more than 50 percent of the milk which is marketed within the Iowa marketing area to sign a proposed marketing agreement tends to prevent the effectuation of the declared policy of the Act;

(2) The issuance of the Iowa order, which amends and merges the aforesaid orders, is the only practical means pursuant to the declared policy of the Act of advancing the interests of producers as defined in the Iowa order; and

(3) The issuance of the Iowa order is approved or favored by at least two-thirds of the producers who during the determined representative period were engaged in the production of milk for sale in the marketing area.

ORDER RELATIVE TO HANDLING

It is therefore ordered, That on and after the effective date hereof, the orders regulating the handling of milk in the Des Moines, Iowa, Cedar Rapids-Iowa City, North Central Iowa, and Quad Cities-Dubuque marketing areas (Parts 1079, 1070, 1078, and 1063, respectively) shall be amended and merged into one order. Parts 1063, 1070, and 1078 are thereby superseded, and such vacated part designations shall be reserved for future assignment. The handling of milk in the merged marketing area, to be designated as the "Iowa Marketing Area" (Part 1079), shall be in conformity to and in compliance with the terms and conditions of the following attached order:

PART 1063—MILK IN QUAD CITIES-DUBUQUE MARKETING AREA [REVOKED]

PART 1070—MILK IN THE CEDAR RAPIDS-IOWA CITY MARKETING AREA [REVOKED]

PART 1078—MILK IN NORTH CENTRAL IOWA MARKETING AREA [REVOKED]

PART 1079—MILK IN THE IOWA MARKETING AREA

Subpart—Order Regulating Handling

GENERAL PROVISIONS

Sec.
1079.1 General provisions.

DEFINITIONS

1079.2 Iowa marketing area.
1079.3 Route disposition.
1079.4 Plant.
1079.5 [Reserved]
1079.6 [Reserved]
1079.7 Pool plant.
1079.8 Nonpool plant.
1079.9 Handler.
1079.10 Producer-handler.
1079.11 [Reserved]
1079.12 Producer.
1079.13 Producer milk.
1079.14 Other source milk.
1079.15 Fluid milk product.
1079.16 Fluid cream product.
1079.17 Filled milk.
1079.18 Cooperative association.

HANDLER REPORTS

1079.30 Reports of receipts and utilization.
1079.31 Payroll reports.
1079.32 Other reports.

CLASSIFICATION OF MILK

1079.40 Classes of utilization.
1079.41 Shrinkage.
1079.42 Classification of transfers and diversions.
1079.43 General classification rules.
1079.44 Classification of producer milk.
1079.45 Market administrator's reports and announcements concerning classification.

CLASS PRICES

1079.50 Class prices.
1079.51 Basic formula price.
1079.52 Plant location adjustments for handlers.
1079.53 Announcement of class prices.
1079.54 Equivalent price.

UNIFORM PRICE

1079.60 Handler's value of milk for computing uniform price.
1079.81 Computation of uniform price.
1079.82 Announcement of uniform price and butterfat differential.

PAYMENTS FOR MILK

1079.70 Producer-settlement fund.
1079.71 Payments to the producer-settlement fund.
1079.72 Payments from the producer-settlement fund.
1079.73 Payments to producers and to cooperative associations.
1079.74 Butterfat differential.
1079.75 Plant location adjustments for producers and on nonpool milk.
1079.76 Payments by handler operating a partially regulated distributing plant.
1079.77 Adjustment of accounts.
1079.78 Charges on overdue accounts.

ADMINISTRATIVE ASSESSMENT AND MARKETING SERVICE DEDUCTION

1079.85 Assessment for order administration.
1079.86 Deduction for marketing services.

AUTHORITY: Sec. 1–19, 48 Stat. 31, as amended (7 U.S.C. 601–674).

GENERAL PROVISIONS

§ 1079.1 General provisions.

The terms, definitions, and provisions in Part 1000 of this chapter are hereby incorporated by reference and made a part of this order.

DEFINITIONS

§ 1079.2 Iowa marketing area.

"Iowa marketing area" (referred to in this part as the "marketing area") aries listed below, including all territory that is now, or in the future, occupied by government (municipal, State, or Federal) reservations, installations, institutions, or other similar establishments if any part of such territory is within the designated geographical limits of the marketing area:

V4263 APR 1 77 UMI

(a) The Iowa counties of:

Adair	Humboldt
Adams	Iowa
Allamakee	Jackson
Appanoose	Jasper
Audubon	Jefferson
Benton	Johnson
Black Hawk	Jones
Boone	Keokuk
Bremer	Linn
Buchanan	Louisa
Butler	Lucas
Calhoun	Madison
Carroll	Mahaska
Cedar	Marion
Cerro Gordo	Marshall
Chickasaw	Monroe
Clarke	Muscatine
Clayton	Pocahontas
Clinton	Polk
Dallas	Poweshiek
Davis	Ringgold
Decatur	Scott
Delaware	Story
Dubuque	Tama
Fayette	Taylor
Floyd	Union
Franklin	Wapello
Greene	Warren
Grundy	Washington
Guthrie	Wayne
Hamilton	Webster
Hancock	Wright
Hardin	

and the city of Osage in Mitchell County.

(b) The Illinois counties of:

Henry	Rock Island
Mercer	

and the city of East Dubuque in Jo Daviess County.

§ 1079.3 Route disposition.

"Route disposition" means any delivery (including any delivery by a vendor or disposition at a plant store) of a fluid milk product classified as Class I milk, other than bulk fluid milk products transferred to other plants.

§ 1079.4 Plant.

"Plant" means the land, buildings, facilities, and equipment constituting a single operating unit or establishment at which milk or milk products (including filled milk) are received, processed, or packaged. Separate facilities used only as a distribution point for storing packaged fluid milk products in transit or separate facilities at which milk is only reloaded from one tank truck to another for transshipment shall not be a "plant" under this definition.

§ 1079.5 [Reserved]

§ 1079.6 [Reserved]

§ 1079.7 Pool plant.

Except as provided in paragraph (d) of this section, "pool plant" means:

(a) Any plant (which, if qualified pursuant to this paragraph, shall be known as a "pool distributing plant") that is approved by a duly constituted regulatory agency for the processing or packaging of Grade A milk and from which during the month:

(1) The total route disposition (excluding packaged fluid milk products received from other plants and filled milk) as a percent of the total Grade A fluid milk products received in bulk form at such plant or diverted therefrom by the plant operator is equal to 40 percent or more during each of the months of September through November and 35 percent or more during all other months; and

(2) Not less than 15 percent of such receipts are disposed of as route disposition (except filled milk) in the marketing area.

(b) Any plant (which, if qualified pursuant to this paragraph, shall be known as a "pool supply plant") that is approved by a duly constituted regulatory agency for the handling of Grade A milk and from which during the month the volume of bulk fluid milk products transferred to pool distributing plants during each of the months of September through November is 35 percent or more and during each of the months of December through August is 20 percent or more of the total Grade A milk received at the plant from dairy farmers and handlers described in § 1079.9(c), including milk diverted therefrom by the plant operator pursuant to § 1079.13. For plants located within the States of Iowa, Minnesota, Wisconsin, or that portion of Illinois north of Interstate 80, the shipping requirements of this paragraph may also be met in the following ways:

(1) A cooperative association that operates a supply plant may include as qualifying shipments its deliveries to pool distributing plants directly from farms of producers pursuant to § 1079.9 (c);

(2) A proprietary handler may include as qualifying shipments milk diverted pursuant to § 1079.13(d) to pool distributing plants;

(3) The operator of a supply plant may include as qualifying shipments transfers of fluid milk products to distributing plants regulated under other Federal orders, except that credit for such transfers shall be limited to the amount of milk, including milk shipped directly from producers' farms, delivered to pool distributing plants under this order; and

(4) Two or more supply plants operated by the same handler or by one or more cooperative associations may qualify for pooling as a unit by meeting the applicable percentage requirements of this paragraph in the same manner as a single plant if the handler submits a written request to the market administrator prior to the first day of September requesting that such plants qualify as a unit for the period September through August of the following year. (Units may form on the effective date of the merged order. Such units may continue in effect through August 1977.) The request shall list the plants to be included in the unit in the sequence in which they shall qualify for pool plant status based on the minimum deliveries required. If the deliveries made are insufficient to qualify the entire unit for pooling, the plant last on the list shall be excluded from the unit, followed by the plant next-to-last on the list, and continuing in this sequence until the remaining plants on the list have met the minimum shipping requirements. Each plant that qualifies as a pool plant within a unit shall continue each month as a plant in the unit through the following August unless the plant fails subsequently to qualify for pooling or the handler submits a written request to the market administrator prior to the first day of the month that the plant be deleted from the unit or that the unit be discontinued. Any plant that has been so deleted from the unit, or that has failed to qualify in any month, will not be part of the unit for the remaining months through August. No plant may be added in any subsequent month through the following August to a unit that qualifies in September.

(c) Any plant, except a plant included in a unit, that qualified as a pool plant in each of the immediately preceding three months on the basis of performance standards described in paragraph (a) or (b) of this section.

(d) The term "pool plant" shall not apply to the following plants:

(1) A producer-handler plant;

(2) A governmental agency plant;

(3) A plant qualified as a pool plant pursuant to this section if the conditions of paragraph (d)(3) (i) and (ii) of this section are met. Such plant shall be exempt from the provisions of this part except for reports that may be required pursuant to § 1079.30(d) and verification of such reports by the market administrator in accordance with § 1000.5 of this chapter:

(i) The Secretary determines that a greater quantity of fluid milk products in fluid form is disposed of from such plant to a regulated marketing area as defined in another order issued pursuant to the Act either as route disposition, excluding filled milk, or to other order plants qualified on the basis of route disposition, than is disposed of from such plant in the Iowa marketing area either as route disposition, excluding filled milk, or to pool plants qualified on the basis of route disposition; and

(ii) Such milk would be subject to the class price and producer payment provisions of the other order upon being made exempt from this part; and

(4) That portion of a plant that is physically separated from the Grade A portion of such plant, is operated separately, and is not approved by any regulatory agency for the receiving, processing, or packaging of any fluid milk product for Grade A disposition.

§ 1079.8 Nonpool plant.

"Nonpool plant" means any milk or filled milk receiving, manufacturing, or processing plant other than a pool plant. The following categories of nonpool plants are further defined as follows:

(a) "Other order plant" means a plant that is fully subject to the pricing and pooling provisions of another order issued pursuant to the Act.

(b) "Producer-handler plant" means a plant operated by a producer-handler as defined in any order (including this part) issued pursuant to the Act.

(c) "Partially regulated distributing plant" means a nonpool plant that is not an other order plant, a producer-handler plant, or a governmental agency plant, from which Grade A milk or filled milk is disposed of as route disposition in the marketing area during the month.

(d) "Unregulated supply plant" means a nonpool plant that is not an other order plant, a producer-handler plant, or a governmental agency plant from which fluid milk products are shipped during the month to a pool plant.

(e) "Governmental agency plant" means a plant that is operated by a government institution and from which fluid milk products are distributed in the marketing area. Such plant shall be exempt from all provisions of this part.

§ 1079.9 Handler.

"Handler" means:

(a) Any person in his capacity as the operator of a pool plant;

(b) Any cooperative association with respect to milk of a producer that is diverted for the account of the cooperative association from a pool plant of another handler in accordance with §1079.13;

(c) Any cooperative association with respect to milk that it receives for its account from the farm of a producer for delivery to a pool plant of another handler in a tank truck owned and operated by, or under the control of, such cooperative association, unless both the cooperative association and the operator of the pool plant notify the market administrator prior to the time that such milk is delivered to the pool plant that the plant operator will be the handler for such milk and will purchase such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples. Milk for which the cooperative association is the handler pursuant to this paragraph shall be deemed to have been received by the cooperative association at the location of the pool plant to which such milk is delivered;

(d) Any person who operates a partially regulated distributing plant;

(e) Any person who is a producer-handler;

(f) Any person who operates an other order plant described in § 1079.7(d); and

(g) Any person who operates an unregulated supply plant.

§ 1079.10 Producer-handler.

"Producer-handler" means any person who meets all of the following conditions:

(a) Operates a dairy farm and a distributing plant at which Grade A milk of his own production is processed and packaged, and from which there is route disposition in the marketing area;

(b) Receives no milk or fluid milk products at his plant (or at any distribution facility, including routes, operated by him, an affiliate, or any person who controls or is controlled by him) from the farms of other dairy farmers nor from any other source, except receipts of not more than 50,000 pounds of fluid milk products during the month from pool plants or from other order plants;

(c) Receives no nonfluid milk products from any source for use in reconstituting fluid milk products; and

(d) Provides proof satisfactory to the market administrator that the care and management of the dairy animals and other resources necessary for his own farm production and the operation of the processing and packaging business are the personal enterprise and risk of such person.

§ 1079.11 [Reserved]

§ 1079.12 Producer.

(a) Except as provided in paragraph (b) of this section, "producer" means any person who produces milk approved by a duly constituted regulatory agency for disposition as Grade A milk and whose milk is:

(1) Received at a pool plant directly from such person;

(2) Received by a handler described in § 1079.9(c); or

(3) Diverted from a pool plant in accordance with § 1079.13.

(b) "Producer" shall not include:

(1) A producer-handler as defined in any order (including this part) issued pursuant to the Act;

(2) Any person with respect to milk produced by him that is diverted to a pool plant from an other order plant if the other order designates such person as a producer under that order and such milk is allocated to Class II or Class III utilization pursuant to § 1079.44 (a)(8) (iii) and the corresponding step of § 1079.44 (b);

(3) Any person with respect to milk produced by him that is reported as diverted to an other order plant if any portion of such person's milk so moved is assigned to Class I under the provisions of such other order; and

(4) Any government institution which produces milk in conjunction with the operation of a plant exempt from all provisions of this Part pursuant to § 1079.8(e).

§ 1079.13 Producer milk.

"Producer milk" means the skim milk and butterfat in milk of a producer that is:

(a) Received at a pool plant directly from such producer by the operator of the plant;

(b) Received by a handler described in § 1079.9(c);

(c) Picked up from the producer's farm tank in a tank truck owned and operated by, or under the control of, the operator of a pool plant but which is not received at a plant until the following month. Such milk shall be considered as having been received by the handler during the month in which it is picked up at the producer's farm and shall be priced at the location of the plant where it is physically received in the following month. This paragraph shall apply in like manner to milk received by the operator of a pool plant who, in accordance with § 1079.9(c), is the handler for such milk;

(d) Diverted from the pool plant of a proprietary handler for the account of the handler operating such plant to another pool plant or diverted from a pool plant to a nonpool plant (other than a producer-handler plant) for the account of the handler operating such pool plant or for the account of a handler described in § 1079.9(b), subject to the following conditions:

(1) Milk of a dairy farmer shall not be eligible for diversion under this section unless during the month at least one day's production of milk of such dairy farmer is physically received as producer milk at a pool plant;

(2) The total quantity of milk diverted by a cooperative association during the month may not exceed 50 percent in the months of September through November and 70 percent in other months, of the producer milk that the cooperative association causes to be delivered to or diverted from pool plants during the month;

(3) The operator of a pool plant (other than a cooperative association) may divert for his account any milk that is not under the control of a cooperative association that diverts milk during the month pursuant to paragraph (d)(2) of this section. The total quantity so diverted during the month may not exceed 50 percent in the months of September through November, and 70 percent in other months, of the milk received at or diverted from such pool plant during the month that is eligible to be diverted by the plant operator;

(4) Any milk diverted in excess of the limits prescribed in paragraph (d)(2) and (3) of this section shall not be producer milk. The diverting handler may designate the dairy farmers whose diverted milk will not be producer milk, otherwise the milk last diverted—in lots of an entire day's production—shall be excluded first in determining which milk should not be producer milk; and

(5) Diverted milk shall be priced at the location of the plant to which diverted.

§ 1079.14 Other source milk.

"Other source milk" means all skim milk and butterfat contained in or represented by:

(a) Receipts of fluid milk products and bulk products specified in § 1079.40(b)(1) from any source other than producers, handlers described in § 1079.9(c), or pool plants;

(b) Receipts in packaged form from other plants of products specified in § 1079.40(b)(1);

(c) Products (other than fluid milk products, products specified in § 1079.40(b)(1), and products produced at the plant during the same month) from any source which are reprocessed, converted into, or combined with another product in the plant during the month; and

(d) Receipts of any milk product (other than a fluid milk product or a product specified in § 1079.40(b)(1) for which the handler fails to establish a disposition.

§ 1079.15 Fluid milk product.

(a) Except as provided in paragraph (b) of this section, "fluid milk product" means any of the following products in fluid or frozen form: Milk, skim milk,

V4263 APR 1 77 UMI

lowfat milk, milk drinks, buttermilk, filled milk, and milkshake and ice milk mixes containing less than 20 percent total solids, including any such products that are flavored, cultured, modified with added nonfat milk solids, concentrated (if in a consumer-type package), or reconstituted.

(b) The term "fluid milk product" shall not include:

(1) Evaporated or condensed milk (plain or sweetened), evaporated or condensed skim milk (plain or sweetened), formulas especially prepared for infant feeding or dietary use that are packaged in hermetically sealed glass or all-metal containers, any product that contains by weight less than 6.5 percent nonfat milk solids, and whey; and

(2) The quantity of skim milk in any modified product specified in paragraph (a) of this section that is in excess of the quantity of skim milk in an equal volume of an unmodified product of the same nature and butterfat content.

§ 1079.16 Fluid cream product.

"Fluid cream product" means cream (other than plastic cream or frozen cream), sour cream, or a mixture (including a cultured mixture) of cream and milk or skim milk containing 9 percent or more butterfat, with or without the addition of other ingredients.

§ 1079.17 Filled milk.

"Filled milk" means any combination of nonmilk fat (or oil) with skim milk (whether fresh, cultured, reconstituted, or modified by the addition of nonfat milk solids), with or without milk fat, so that the product (including stabilizers, emulsifiers, or flavoring) resembles milk or any other fluid milk product, and contains less than 6 percent nonmilk fat (or oil).

§ 1079.18 Cooperative association.

"Cooperative association" means any cooperative marketing association of producers which the Secretary determines, after application by the association:

(a) Is qualified under the provisions of the Act of Congress of February 18, 1922, as amended, known as the "Capper-Volstead Act;"

(b) Has full authority in the sale of milk of its members and is engaged in making collective sales of or marketing milk or its products for its members; and

(c) Has its entire activities under the control of its members.

HANDLER REPORTS

§ 1079.30 Reports of receipts and utilization.

On or before the 8th day after the end of each month, each handler shall report for such month to the market administrator, in the detail and on the forms prescribed by the market administrator, as follows:

(a) Each handler, with respect to each of his pool plants, shall report the quantities of skim milk and butterfat contained in or represented by:

(1) Receipts of producer milk, including producer milk diverted by the handler from the pool plant to other plants;

(2) Receipts of milk from handlers described in § 1079.9(c);

(3) Receipts of fluid milk products and bulk fluid cream products from other pool plants;

(4) Receipts of other source milk;

(5) Inventories at the beginning and end of the month of fluid milk products and products specified in § 1079.40(b)(1); and

(6) The utilization or disposition of all milk, filled milk, and milk products required to be reported pursuant to this paragraph.

(b) Each handler operating a partially regulated distributing plant shall report with respect to such plant in the same manner as prescribed for reports required by paragraph (a) of this section. Receipts of milk that would have been producer milk if the plant had been fully regulated shall be reported in lieu of producer milk. Such report shall show also the quantity of any reconstituted skim milk in route disposition in the marketing area.

(c) Each handler described in § 1079.9(b) and (c) shall report:

(1) The quantities of all skim milk and butterfat contained in receipts of milk from producers; and

(2) The utilization or disposition of all such receipts.

(d) Each handler not specified in paragraphs (a) through (c) of this section shall report with respect to his receipts and utilization of milk, filled milk, and milk products in such manner as the market administrator may prescribe.

§ 1079.31 Payroll reports.

(a) On or before the 22nd day of each month, each handler described in § 1079.9 (a), (b), and (c) shall report to the market administrator his producer payroll for the preceding month, in the detail prescribed by the market administrator, which shall show:

(1) The name and address of each producer;

(2) The total pounds of milk received from such producer;

(3) The average butterfat content of such milk; and

(4) If the handler pays individual producers pursuant to § 1079.73 (a)(4) and (c)(3), the price per hundredweight, the gross amount due, the amount and nature of any deductions, and the amount paid; or, if the handler pays a cooperative association pursuant to § 1079.73 (a)(2) and (c)(1) or (a)(3) and (c)(2), the aggregate amount paid to the cooperative association.

(b) Each handler operating a partially regulated distributing plant who elects to make payment pursuant to § 1079.76(b) shall report for each dairy farmer who would have been a producer if the plant had been fully regulated in the same manner as prescribed for reports required by paragraph (a) of this section.

§ 1079.32 Other reports.

In addition to the reports required pursuant to §§ 1079.30 and 1079.31, each handler shall report such other information as the market administrator deems necessary to verify or establish such handler's obligation under the order.

CLASSIFICATION OF MILK

§ 1079.40 Classes of utilization.

Except as provided in § 1079.42, all skim milk and butterfat required to be reported by a handler pursuant to § 1079.30 shall be classified as follows:

(a) *Class I milk.* Class I milk shall be all skim milk and butterfat:

(1) Disposed of in the form of a fluid milk product, except as otherwise provided in paragraphs (b) and (c) of this section; and

(2) Not specifically accounted for as Class II or Class III milk.

(b) *Class II milk.* Class II milk shall be all skim milk and butterfat:

(1) Disposed of in the form of a fluid cream product, eggnog, yogurt, and any product containing 6 percent or more nonmilk fat (or oil) that resembles a fluid cream product, eggnog, or yogurt, except as otherwise provided in paragraph (c) of this section;

(2) In packaged inventory at the end of the month of the products specified in paragraph (b)(1) of this section;

(3) In bulk fluid milk products and bulk fluid cream products disposed of to any commercial food processing establishment (other than a milk or filled milk plant) at which food products (other than milk products and filled milk) are processed and from which there is no disposition of fluid milk products or fluid cream products other than those received in consumer-type packages; and

(4) Used to produce:

(i) Cottage cheese, lowfat cottage cheese, and dry curd cottage cheese;

(ii) Milkshake and ice milk mixes (or bases) containing 20 percent or more total solids, frozen desserts, and frozen dessert mixes;

(iii) Any concentrated milk product in bulk, fluid form other than that specified in paragraph (c)(1)(iv) of this section;

(iv) Plastic cream, frozen cream, and anhydrous milkfat;

(v) Custards, puddings, and pancake mixes; and

(vi) Formulas especially prepared for infant feeding or dietary use that are packaged in hermetically sealed glass or all-metal containers.

(c) *Class III milk.* Class III milk shall be all skim milk and butterfat:

(1) Used to produce:

(i) Cheese (other than cottage cheese, lowfat cottage cheese, and dry curd cottage cheese);

(ii) Butter;

(iii) Any milk product in dry form;

(iv) Any concentrated milk product in bulk, fluid form that is used to produce a Class III product;

(v) Evaporated or condensed milk (plain or sweetened) in a consumer-type package and evaporated or condensed skim milk (plain or sweetened) in a consumer-type package; and

(vi) Any product not otherwise specified in this section;

(2) In inventory at the end of the month of fluid milk products in bulk or

packaged form and products specified in paragraph (b)(1) of this section in bulk form;

(3) In fluid milk products and products specified in paragraph (b)(1) of this section that are disposed of by a handler for animal feed;

(4) In fluid milk products and products specified in paragraph (b)(1) of this section that are dumped by a handler if the market administrator is notified of such dumping in advance and is given the opportunity to verify such disposition;

(5) In fluid milk products destroyed or lost under extraordinary circumstances;

(6) In skim milk in any modified fluid milk product that is in excess of the quantity of skim milk in such product that was included within the fluid milk product definition pursuant to § 1079.15; and

(7) In shrinkage assigned pursuant to § 1079.41(a) to the receipts specified in § 1079.41(a)(2) and in shrinkage specified in § 1079.41 (b) and (c).

§ 1079.41 Shrinkage.

For purposes of classifying all skim milk and butterfat to be reported by a handler pursuant to § 1079.30, the market administrator shall determine the following:

(a) The pro rata assignment of shrinkage of skim milk and butterfat, respectively, at each pool plant to the respective quantities of skim milk and butterfat:

(1) In the receipts specified in paragraph (b)(1) through (6) of this section on which shrinkage is allowed pursuant to such paragraph; and

(2) In other source milk not specified in paragraph (b)(1) through (6) of this section which was received in the form of a bulk fluid milk product or a bulk fluid cream product;

(b) The shrinkage of skim milk and butterfat, respectively, assigned pursuant to paragraph (a) of this section to the receipts specified in paragraph (a)(1) of this section that is not in excess of:

(1) Two percent of the skim milk and butterfat, respectively, in producer milk (excluding milk diverted by the plant operator to another plant);

(2) Plus 1.5 percent of the skim milk and butterfat, respectively, in milk received from a handler described in § 1079.9(c) and in milk diverted to such plant from another pool plant, except that, in either case, if the operator of the plant to which the milk is delivered purchases such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples, the applicable percentage shall be 2 percent;

(3) Plus 0.5 percent of the skim milk and butterfat, respectively, in producer milk diverted from such plant by the plant operator to another plant, except that, if the operator of the plant to which the milk is delivered purchases such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples, the applicable percentage shall be zero;

(4) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received by transfer from other pool plants;

(5) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received by transfer from other order plants, excluding the quantity for which Class II or Class III classification is requested by the operators of both plants;

(6) Plus 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products received from unregulated supply plants, excluding the quantity for which Class II or Class III classification is requested by the handler; and

(7) Less 1.5 percent of the skim milk and butterfat, respectively, in bulk fluid milk products transferred to other plants that is not in excess of the respective amounts of skim milk and butterfat to which percentages are applied in paragraph (b)(1), (2), (4), (5) and (6) of this section; and

(c) The quantity of skim milk and butterfat, respectively, in shrinkage of milk from producers for which a cooperative association is the handler pursuant to § 1079.9 (b) or (c), but not in excess of 0.5 percent of the skim milk and butterfat, respectively, in such milk. If the operator of the plant to which the milk is delivered purchases such milk on the basis of weights determined from its measurement at the farm and butterfat tests determined from farm bulk tank samples, the applicable percentage under this paragraph for the cooperative association shall be zero.

§ 1079.42 Classification of transfers and diversions.

(a) *Transfers and diversions to pool plants.* Skim milk or butterfat transferred or diverted in the form of a fluid milk product or a bulk fluid cream product from a pool plant to another pool plant shall be classified as Class I milk unless both handlers request the same classification in another class. In either case, the classification of such transfers or diversions shall be subject to the following conditions:

(1) The skim milk or butterfat classified in each class shall be limited to the amount of skim milk and butterfat, respectively, remaining in such class at the transferee-plant or divertee-plant after the computations pursuant to § 1079.44 (a)(12) and the corresponding step of § 1079.44(b);

(2) If the transferor-plant or divertor-plant received during the month other source milk to be allocated pursuant to § 1079.44(a)(7) or the corresponding step of § 1079.44(b), the skim milk or butterfat so transferred or diverted shall be classified so as to allocate the least possible Class I utilization to such other source milk; and

(3) If the transferor-handler or divertor-handler received during the month other source milk to be allocated pursuant to § 1079.44(a)(11) or (12) or the corresponding steps of § 1079.44(b), the skim milk or butterfat so transferred or diverted, up to the total of the skim milk and butterfat, respectively, in such receipts of other source milk, shall not be classified as Class I milk to a greater extent than would be the case if the other source milk had been received at the transferee-plant or divertee-plant.

(b) *Transfers and diversions to other order plants.* Skim milk or butterfat transferred or diverted in the form of a fluid milk product or a bulk fluid cream product from a pool plant to an other order plant shall be classified in the following manner. Such classification shall apply only to the skim milk or butterfat that is in excess of any receipts at the pool plant from the other order plant of skim milk and butterfat, respectively, in fluid milk products and bulk fluid cream products, respectively, that are in the same category as described in paragraph (b)(1), (2), or (3) of this section:

(1) If transferred as packaged fluid milk products, classification shall be in the classes to which allocated as a fluid milk product under the other order;

(2) If transferred in bulk form, classification shall be in the classes to which allocated under the other order (including allocation under the conditions set forth in paragraph (b)(3) of this section);

(3) If the operators of both plants so request in their reports of receipts and utilization filed with their respective market administrators, transfers or diversions in bulk form shall be classified as Class II or Class III milk to the extent of such utilization available for such classification pursuant to the allocation provisions of the other order;

(4) If information concerning the classes to which such transfers or diversions were allocated under the other order is not available to the market administrator for the purpose of establishing classification under this paragraph, classification shall be as Class I, subject to adjustment when such information is available;

(5) For purposes of this paragraph, if the other order provides for a different number of classes of utilization than is provided for under this part, skim milk or butterfat allocated to a class consisting primarily of fluid milk products shall be classified as Class I milk, and skim milk or butterfat allocated to the other classes shall be classified as Class III milk; and

(6) If the form in which any fluid milk product that is transferred to an other order plant is not defined as a fluid milk product under such other order, classification under this paragraph shall be in accordance with the provisions of § 1079.40.

(c) *Transfers to producer-handlers and transfers and diversions to governmental agency plants.* Skim milk or butterfat transferred in the following forms from a pool plant to a producer-handler under this or any other Federal order or transferred or diverted to a governmental agency plant shall be classified:

(1) As Class I milk, if transferred or diverted in the form of a fluid milk product; and

V 4263 APR 1 77 UMI

(2) In accordance with the utilization assigned to it by the market administrator, if transferred in the form of a bulk fluid cream product. For this purpose, the producer-handler's utilization of skim milk and butterfat in each class, in series beginning with Class III, shall be assigned to the extent possible to his receipts of skim milk and butterfat, respectively, in bulk fluid cream products, pro rata to each source.

(d) *Transfers and diversions to other nonpool plants.* Skim milk or butterfat transferred or diverted in the following forms from a pool plant to a nonpool plant that is not an other order plant, a producer-handler plant, or a governmental agency plant shall be classified:

(1) As Class I milk, if transferred in the form of a packaged fluid milk product; and

(2) As Class I milk, if transferred or diverted in the form of a bulk fluid milk product or a bulk fluid cream product, unless the following conditions apply:

(i) If the conditions described in paragraph (d)(2)(i) (*a*) and (*b*) of this section are met, transfers or diversions in bulk form shall be classified on the basis of the assignment of the nonpool plant's utilization to its receipts as set forth in paragraph (d)(2) (ii) through (viii) of this section:

(*a*) The transferor-handler or diverter-handler claims such classification in his report of receipts and utilization filed pursuant to § 1079.30 for the month within which such transaction occurred; and

(*b*) The nonpool plant operator maintains books and records showing the utilization of all skim milk and butterfat received at such plant which are made available for verification purposes if requested by the market administrator;

(ii) Route dispostion in the marketing area of each Federal milk order from the nonpool plant and transfers of packaged fluid milk products from such nonpool plant to plants fully regulated thereunder shall be assigned to the extent possible in the following sequence:

(*a*) Pro rata to receipts of packaged fluid milk products at such nonpool plant from pool plants;

(*b*) Pro rata to any remaining unassigned receipts of packaged fluid milk products at such nonpool plant from other order plants;

(*c*) Pro rata to receipts of bulk fluid milk products at such nonpool plant from pool plants; and

(*d*) Pro rata to any remaining unassigned receipts of bulk fluid milk products at such nonpool plant from other order plants;

(iii) Any remaining Class I disposition of packaged fluid milk products from the nonpool plant shall be assigned to the extent possible pro rata to any remaining unassigned receipts of packaged fluid milk products at such nonpool plant from pool plants and other order plants;

(iv) Transfers of bulk fluid milk products from the nonpool plant to a plant fully regulated under any Federal milk order, to the extent that such transfers to the regulated plant exceed receipts of fluid milk products from such plant and are allocated to Class I at the transferee-plant, shall be assigned to the extent possible in the following sequence:

(*a*) Pro rata to receipts of fluid milk products at such nonpool plant from pool plants; and

(*b*) Pro rata to any remaining unassigned receipts of fluid milk products at such nonpool plant from other order plants;

(v) Any remaining unassigned Class I disposition from the nonpool plant shall be assigned to the extent possible in the following sequence:

(*a*) To such nonpool plant's receipts from dairy farmers who the market administrator determines constitute regular sources of Grade A milk for such nonpool plant; and

(*b*) To such nonpool plant's receipts of Grade A milk from plants not fully regulated under any Federal milk order which the market administrator determines constitute regular sources of Grade A milk for such nonpool plant;

(vi) Any remaining unassigned receipts of bulk fluid milk products at the nonpool plant from pool plants and other order plants shall be assigned, pro rata among such plants, to the extent possible first to any remaining Class I utilization, then to Class III utilization, and then to Class II utilization at such nonpool plant;

(vii) Receipts of bulk fluid cream products at the nonpool plant from pool plants and other order plants shall be assigned, pro rata among such plants, to the extent possible first to any remaining Class III utilization, then to any remaining Class II utilization, and then to Class I utilization at such nonpool plant; and

(viii) In determining the nonpool plant's utilization for purposes of this subparagraph, any fluid milk products and bulk fluid cream products transferred from such nonpool plant to a plant not fully regulated under any Federal milk order shall be classified on the basis of the second plant's utilization using the same assignment priorities at the second plant that are set forth in paragraph (d)(2) of this section.

(e) *Transfers by a handler described in § 1079.9(c) to pool plants.* Skim milk and butterfat transferred in the form of bulk milk by a handler described in § 1079.9(c) to another handler's pool plant shall be classified pursuant to § 1079.44 pro rata with producer milk received at the transferee-handler's plant.

§ 1079.43 General classification rules.

In determining the classification of producer milk, the following rules shall apply:

(a) Each month the market administrator shall correct for mathematical and other obvious errors all reports filed pursuant to § 1079.30 and shall compute separately for each pool plant, and for each cooperative association with respect to milk for which it is the handler pursuant to § 1079.9 (b) or (c) that was not received at a pool plant, the pounds of skim milk and butterfat, respectively, in each class in accordance with §§ 1079.40, 1079.41, and 1079.42. The combined pounds of skim milk and butterfat so determined in each class for a handler described in § 1079.9 (b) or (c) shall be such handler's classification of producer milk;

(b) If any of the water contained in the milk from which a product is made is removed before the product is utilized or disposed of by a handler, the pounds of skim milk in such product that are to be considered under this part as used or disposed of by the handler shall be an amount equivalent to the nonfat milk solids contained in such product plus all of the water originally associated with such solids; and

(c) The classification of producer milk for which a cooperative association is the handler pursuant to § 1079.9 (b) or (c) shall be determined separately from the operations of any pool plant operated by such cooperative association.

§ 1079.44 Classification of producer milk.

For each month the market administrator shall determine for each handler described in § 1079.9(a) for each of his separate pool plants the classification of producer milk and milk received from a handler described in § 1079.9(c) by allocating the handler's receipts of skim milk and butterfat to his utilization as follows:

(a) Skim milk shall be allocated in the following manner:

(1) Subtract from the total pounds of skim milk in Class III the pounds of skim milk in shrinkage specified in § 1079.41 (b);

(2) Subtract from the total pounds of skim milk in Class I the pounds of skim milk in receipts of packaged fluid milk products from an unregulated supply plant to the extent that an equivalent amount of skim milk disposed of to such plant by handlers fully regulated under any Federal milk order is classified and priced as Class I milk and is not used as an offset for any other payment obligation under any order;

(3) Subtract from the pounds of skim milk remaining in each class the pounds of skim milk in fluid milk products received in packaged form from an other order plant, except that to be subtracted pursuant to paragraph (a)(7)(vi) of this section, as follows:

(i) From Class III milk, the lesser of the pounds remaining or 2 percent of such receipts; and

(ii) From Class I milk, the remainder of such receipts;

(4) Subtract from the pounds of skim milk in Class II the pounds of skim milk in products specified in § 1079.40(b)(1) that were received in packaged form from other plants, but not in excess of the pounds of skim milk remaining in Class II;

(5) For a pool plant that was subject to § 1079.40(b)(1) or comparable provisions of another Federal order in the immediately preceding month, subtract from the remaining pounds of skim milk in Class II the pounds of skim milk in products specified in § 1079.40(b)(1) that were in inventory at the beginning of the month in packaged form, but not in excess of the pounds of skim milk remaining in Class II;

(6) Subtract from the remaining pounds of skim milk in Class II the pounds of skim milk in other source milk (except that received in the form of a fluid milk product or a fluid cream product) that is used to produce, or added to, any product specified in § 1079.40(b), but not in excess of the pounds of skim milk remaining in Class II;

(7) Subtract in the order specified below from the pounds of skim milk remaining in each class, in series beginning with Class III, the pounds of skim milk in each of the following:

(i) Other source milk (except that received in the form of a fluid milk product) and, if paragraph (a)(5) of this section applies, packaged inventory at the beginning of the month of products specified in § 1079.40(b)(1) that was not subtracted pursuant to paragraphs (a)(4), (5), and (6) of this section;

(ii) Receipts of fluid milk products (except filled milk) for which Grade A certification is not established;

(iii) Receipts of fluid milk products from unidentified sources;

(iv) Receipts of fluid milk products from a producer-handler as defined under this or any other Federal milk order and from a governmental agency plant;

(v) Receipts of reconstituted skim milk in filled milk from an unregulated supply plant that were not subtracted pursuant to paragraph (a)(2) of this section; and

(vi) Receipts of reconstituted skim milk in filled milk from an other order plant that is regulated under any Federal milk order providing for individual-handler pooling, to the extent that reconstituted skim milk is allocated to Class I at the transferor-plant;

(8) Subtract in the order specified below from the pounds of skim milk remaining in Class II and Class III, in sequence beginning with Class III:

(i) The pounds of skim milk in receipts of fluid milk products from an unregulated supply plant that were not subtracted pursuant to paragraphs (a)(2) and (7)(v) of this section for which the handler requests a classification other than Class I, but not in excess of the pounds of skim milk remaining in Class II and Class III combined;

(ii) The pounds of skim milk in receipts of fluid milk products from an unregulated supply plant that were not subtracted pursuant to paragraphs (a)(2), (7)(v), and (8)(i) of this section which are in excess of the pounds of skim milk determined pursuant to paragraph (a)(8)(ii) (*a*) through (*c*) of this section. Should the pounds of skim milk to be subtracted from Class II and Class III combined exceed the pounds of skim milk remaining in such classes, the pounds of skim milk in Class II and Class III combined shall be increased (increasing as necessary Class III and then Class II) to the extent of available utilization in such classes at the nearest other pool plant of the handler, and then at each successively more distant pool plant of the handler) by an amount equal to such excess quantity to be subtracted, and the pounds of skim milk in Class I shall be decreased by a like amount. In such case, the pounds of skim milk remaining in each class at this allocation step at all pool plants of the handler (excluding any duplication of Class I utilization resulting from reported Class I transfers between pool plants of the handler);

(*b*) Subtract from the above result the sum of the pounds of skim milk in receipts at all pool plants of the handler of producer milk, milk from a handler described in § 1079.9(c), fluid milk products from pool plants of other handlers, and bulk fluid milk products from other order plants that were not subtracted pursuant to paragraph (a)(7)(vi) of this section; and

(*c*) Multiply any plus quantity resulting above by the percentage that the receipts of skim milk in fluid milk products from unregulated supply plants that remain at this pool plant is of all such receipts remaining at this allocation step at all pool plants of the handler; and

(iii) The pounds of skim milk in receipts of bulk fluid milk products from an other order plant that are in excess of bulk fluid milk products transferred or diverted to such plant and that were not subtracted pursuant to paragraph (a)(7)(vi) of this section, if Class II or Class III classification is requested by the operator of the other order plant and the handler, but not in excess of the pounds of skim milk remaining in Class II and Class III combined;

(9) Subtract from the pounds of skim milk remaining in each class, in series beginning with Class III, the pounds of skim milk in fluid milk products and products specified in § 1079.40(b)(1) in inventory at the beginning of the month that were not subtracted pursuant to paragraph (a)(5) and (7)(i) of this section;

(10) Add to the remaining pounds of skim milk in Class III the pounds of skim milk subtracted pursuant to paragraph (a)(1) of this section;

(11) Subject to the provisions of paragraph (a)(11) (i) and (ii) of this section, subtract from the pounds of skim milk remaining in each class at the plant pro rata to the total pounds of skim milk remaining in Class I and in Class II and Class III combined at this allocation step at all pool plants of the handler (excluding any duplication of utilization in each class resulting from transfers between pool plants of the handler), with the quantity prorated to Class II and Class III combined being subtracted first from Class III and then from Class II, the pounds of skim milk in receipts of fluid milk products from an unregulated supply plant that were not subtracted pursuant to paragraphs (a)(2), (7)(v), and (8)(i) and (ii) of this section and that were not offset by transfers or diversions of fluid milk products to the same unregulated supply plant from which fluid milk products to be allocated at this step were received:

(i) Should the pounds of skim milk to be subtracted from Class II and Class III combined pursuant to paragraph (a)(11) of this section exceed the pounds of skim milk remaining in such classes, the pounds of skim milk in Class II and Class III combined shall be increased (increasing as necessary Class III and then Class II to the extent of available utilization in such classes at the nearest other pool plant of the handler, and then at each successively more distant pool plant of the handler) by an amount equal to such excess quantity to be subtracted, and the pounds of skim milk in Class I shall be decreased by a like amount. In such case, the pounds of skim milk remaining in each class at this allocation step at the handler's other pool plants shall be adjusted in the reverse direction by a like amount; and

(ii) Should the pounds of skim milk to be subtracted from Class I pursuant to paragraph (a)(11) of this section exceed the pounds of skim milk remaining in such class, the pounds of skim milk in Class I shall be increased by an amount equal to such excess quantity to be subtracted, and the pounds of skim milk in Class II and Class III combined shall be decreased by a like amount (decreasing as necessary Class III and then Class II). In such case, the pounds of skim milk remaining in each class at this allocation step at the handler's other pool plants shall be adjusted in the reverse direction by a like amount, beginning with the nearest plant at which Class I utilization is available;

(12) Subtract in the manner specified below from the pounds of skim milk remaining in each class the pounds of skim milk in receipts of bulk fluid milk products from an other order plant that are in excess of bulk fluid milk products transferred or diverted to such plant and that were not subtracted pursuant to paragraphs (a)(7)(vi) and (a)(8)(iii) of this section:

(i) Subject to the provisions of paragraphs (a)(12) (ii), (iii), and (iv) of this section, such subtraction shall be pro rata to the pounds of skim milk in Class I and in Class II and Class III combined, with the quantity prorated to Class II and Class III combined being subtracted first from Class III and then from Class II, with respect to whichever of the following quantities represents the lower proportion of Class I milk:

(*a*) The estimated utilization of skim milk of all handlers in each class as announced for the month pursuant to § 1079.45(a); or

(*b*) The total pounds of skim milk remaining in each class at this allocation step at all pool plants of the handler (excluding any duplication of utilization in each class resulting from transfers between pool plants of the handler);

(ii) Should the proration pursuant to paragraph (a)(12)(i) of this section result in the total pounds of skim milk at all pool plants of the handler that are to

V 4263 APR 1 77 UMI

be subtracted at this allocation step from Class II and Class III combined exceeding the pounds of skim milk remaining in Class II and Class III at all such plants, the pounds of such excess shall be subtracted from the pounds of skim milk remaining in Class I after such proration at the pool plants at which such other source milk was received;

(iii) Except as provided in paragraph (a)(12)(ii) of this section, should the computations pursuant to paragraph (a)(12)(i) or (ii) of this section result in a quantity of skim milk to be subtracted from Class II and Class III combined that exceeds the pounds of skim milk remaining in such classes, the pounds of skim milk in Class II and Class III combined shall be increased (increasing as necessary Class III and then Class II to the extent of available utilization in such classes at the nearest other pool plant of the handler, and then at each successively more distant pool plant of the handler) by an amount equal to such excess quantity to be subtracted, and the pounds of skim milk in Class I shall be decreased by a like amount. In such case, the pounds of skim milk remaining in each class at this allocation step at the handler's other pool plants shall be adjusted in the reverse direction by a like amount; and

(iv) Except as provided in paragraph (a)(12)(ii) of this section, should the computation pursuant to paragraph (a)(12)(i) or (ii) of this section result in a quantity of skim milk to be subtracted from Class I that exceeds the pounds of skim milk remaining in such class, the pounds of skim milk in Class I shall be increased by an amount equal to such excess quantity to be subtracted, and the pounds of skim milk in Class II and Class III combined shall be decreased by a like amount (decreasing as necessary Class III and then Class II). In such case, the pounds of skim milk remaining in each class at this allocation step at the handler's other pool plants shall be adjusted in the reverse direction by a like amount beginning with the nearest plant at which Class I utilization is available;

(13) Subtract from the pounds of skim milk remaining in each class the pounds of skim milk in receipts of fluid milk products and bulk fluid cream products from another pool plant according to the classification of such products pursuant to § 1079.42(a); and

(14) If the total pounds of skim milk remaining in all classes exceed the pounds of skim milk in producer milk, and milk received from a handler described in § 1079.9(c), subtract such excess from the pounds of skim milk remaining in each class in series beginning with Class III. Any amount so subtracted shall be known as "overage";

(b) Butterfat shall be allocated in accordance with the procedure outlined for skim milk in paragraph (a) of this section; and

(c) The quantity of producer milk and milk received from a handler described in § 1079.9(c) in each class shall be the combined pounds of skim milk and butterfat remaining in each class after the computations pursuant to paragraph (a)(14) of this section and the corresponding step of paragraph (b) of this section.

§ 1079.45 Market administrator's reports and announcements concerning classification.

The market administrator shall make the following reports and announcements concerning classification:

(a) Whenever required for the purpose of allocating receipts from other order plants pursuant to § 1079.44(a)(12) and the corresponding step of § 1079.44(b), estimate and publicly announce on or before the 12th day of the month the Class I utilization (to the nearest whole percentage) during the previous month of skim milk and butterfat, respectively, in producer milk of all handlers. Such estimate shall be based upon the most current available data and shall be final for such purpose.

(b) Report to the market administrator of the other order, as soon as possible after the report of receipts and utilization for the month is received from a handler who has received fluid milk products or bulk fluid cream products from an other order plant, the class to which such receipts are allocated pursuant to § 1079.44 on the basis of such report, and thereafter, any change in such allocation required to correct errors disclosed in the verification of such report.

(c) Furnish to each handler operating a pool plant who has shipped fluid milk products or bulk fluid cream products to an other order plant the class to which such shipments were allocated by the market administrator of the other order on the basis of the report by the receiving handler, and, as necessary, any changes in such allocation arising from the verification of such report.

(d) On or before the 14th day after the end of each month, report to each cooperative association which so requests, the class utilization of producer milk received by each handler from a cooperative association or from members of the association. For the purpose of this report, the milk caused to be delivered by an association shall be prorated to each class in the proportion that the total receipts of milk received from producers by such handler were used in each class.

Class Prices

§ 1079.50 Class prices.

Subject to the provisions of § 1079.52, the class prices for the month per hundredweight of milk shall be as follows:

(a) *Class I price.* The Class I price shall be the basic formula price for the second preceding month plus $1.40.

(b) *Class II price.* The Class II price shall be the basic formula price for the month plus 10 cents.

(c) *Class III price.* The Class III price shall be the basic formula price for the month.

§ 1079.51 Basic formula price.

The "basic formula price" shall be the average price per hundredweight for manufacturing grade milk, f.o.b. plants in Minnesota and Wisconsin, as reported by the Department for the month, adjusted to a 3.5 percent butterfat basis and rounded to the nearest cent. For such adjustment, the butterfat differential (rounded to the nearest one-tenth cent) per one-tenth percent butterfat shall be 0.12 times the simple average of the wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk butter per pound at Chicago, as reported by the Department for the month. For the purpose of computing the Class I price, the resulting price shall be not less than $4.33.

§ 1079.52 Plant location adjustments for handlers.

(a) The following zones are defined for the purpose of determining location adjustments:

(1) Zone 1 shall include that territory both inside and outside the marketing area, not included in Zones 2 and 3.

(2) Zone 2 shall include:

(i) The Iowa counties of Benton, Cedar, Clinton, Iowa, Johnson, Jones, Keokuk, Linn, Louisa, Marshall, Muscatine, Poweshiek, Scott, Tama, and Washington; and

(ii) The Illinois counties of Henry, Mercer, and Rock Island.

(3) Zone 3 shall include:

(i) The Iowa counties of Alamakee, Black Hawk, Bremer, Buchanan, Butler, Cerro Gordo, Chickasaw, Clay, Clayton, Delaware, Dickinson, Dubuque, Emmet, Fayette, Floyd, Franklin, Grundy, Hamilton, Hancock, Hardin, Howard, Humboldt, Jackson, Kossuth, Mitchell, Palo Alto, Pocahontas, Webster, Winnebago, Winneshiek, Worth and Wright; and

(ii) The States of Minnesota and Wisconsin and that portion of Illinois that is north of Interstate 80.

(b) For milk received at a plant from producers or from a handler described in § 1079.9(c) and which is classified as Class I milk without movement in bulk form to a pool plant at which a higher Class I price applies, the price specified in § 1079.50(a) shall be adjusted as follows:

(1) In Zone 1, no adjustment;

(2) In Zone 2, minus 7 cents; and

(3) In Zone 3, the price shall be reduced by 7 cents and by an additional 1.5 cents for each 10 miles or fraction thereof (by shortest hard-surfaced highway distance as measured by the market administrator) that such plant is located from the nearer of the Post Offices of Ames, Marshalltown, or Cedar Rapids, Iowa.

(c) The Class I price applicable to other source milk shall be adjusted by the amounts set forth in paragraph (b) of this section, except that the adjusted Class I price shall not be less than the Class III price.

(d) For fluid milk products transferred in bulk from a pool plant to another pool plant at which a higher Class I price applies and which is classified as Class I, the price shall be the Class I price applicable at the location of the transferee-plant subject to a location adjustment credit for the transferor-plant determined by the market administrator as follows:

(1) Subtract from the pounds of Class I milk remaining at the transferor-plant after the computations pursuant to § 1079.44(a)(12) and (b) the pounds of packaged fluid milk products from other pool plants;

(2) Multiply the remaining pounds of milk by 110 percent;

(3) Subtract the pounds of bulk fluid milk products physically received at the transferee-plant from the following sources:

(i) Producers;

(ii) Handlers described in § 1079.9(c);

(iii) Pool plants at which the same or a higher Class I price applies; and

(iv) Receipts of diverted milk from pool plants;

(4) Assign any pounds remaining pro rata to bulk receipts of fluid milk products from each transferor-plant at which a lower Class I price applies; and

(5) Multiply the pounds computed for each transferor-plant in paragraph (d)(4) of this section by the difference in the Class I prices applicable at the transferee-plant and transferor-plant.

§ 1079.53 Announcement of class prices.

The market administrator shall announce publicly on or before the fifth day of each month the Class I price for the following month and the Class II and III prices for the preceding month.

§ 1079.54 Equivalent price.

If for any reason a price or pricing constituent required by this part for computing class prices or for other purposes is not available as prescribed in this part, the market administrator shall use a price or pricing constituent determined by the Secretary to be equivalent to the price or pricing constituent that is required.

Uniform Price

§ 1079.60 Handler's value of milk for computing uniform price.

For the purpose of computing the uniform price, the market administrator shall determine for each month the value of milk of each handler with respect to each of his pool plants and of each handler described in § 1079.9 (b) and (c), with respect to milk that was not received at a pool plant as follows:

(a) Multiply the pounds of producer milk and milk received from a handler described in § 1079.9(c) in each class as determined pursuant to § 1079.43(a) and § 1079.44(c) by the applicable class prices and add the resulting amounts;

(b) Add the amounts obtained from multiplying the pounds of overage subtracted from each class pursuant to § 1079.44(a)(14) and the corresponding step of § 1079.44(b) by the respective class prices, as adjusted by the butterfat differential specified in § 1079.74, that are applicable at the location of the pool plant;

(c) Add the amount obtained from multiplying the difference between the Class III price for the preceding month and the Class I price applicable at the location of the pool plant or the Class II price, as the case may be, for the current month by the hundredweight of skim milk and butterfat subtracted from Class I and Class II pursuant to § 1079.44(a)(9) and the corresponding step of § 1079.44(b);

(d) Add the amount obtained from multiplying the difference between the Class I price applicable at the location of the pool plant and the Class III price by the hundredweight of skim milk and butterfat subtracted from Class I pursuant to §1079.44(a)(7)(i) through (iv) and the corresponding step of § 1079.44(b), excluding receipts of bulk fluid cream products from another order plant;

(e) Add the amount obtained from multiplying the difference between the Class I price applicable at the location of the transferor-plant and the Class III price by the hundredweight of skim milk and butterfat subtracted from Class I pursuant to § 1079.44(a)(7)(v) and (vi) and the corresponding step of § 1079.44(b); and

(f) Add the amount obtained from multiplying the Class I price applicable at the location of the nearest unregulated supply plants from which an equivalent volume was received by the pounds of skim milk and butterfat subtracted from Class I pursuant to § 1079.44(a)(11) and the corresponding step of § 1079.44(b), excluding such skim milk and butterfat in receipts of bulk fluid milk products from an unregulated supply plant to the extent that an equivalent amount of skim milk or butterfat disposed of to such plant by handlers fully regulated under any Federal milk order is classified and priced as Class I milk and is not used as an offset for any other payment obligation under any order; and

(g) Subtract, for a handler described in § 1079.9(c), the amount obtained from multiplying the Class III price for the preceding month by the hundredweight of skim milk and butterfat contained in inventory at the beginning of the month that was delivered to another handler's pool plant during the month.

§ 1079.61 Computation of uniform price.

For each month the market administrator shall compute the uniform price per hundredweight of producer milk of 3.5 percent butterfat content at plants in Zone 1 pursuant to paragraphs (a) through (e) of this section. If the unreserved cash balance in the producer-settlement fund to be included in the computation is less than 2 cents per hundredweight of producer milk on all reports, the report of any handler who has not made the payments required pursuant to § 1079.71 for the preceding month shall not be included in the computation of the uniform price. The report of such handler shall not be included in the computation for succeeding months until he has made full payment of outstanding monthly obligations. Subject to the aforementioned conditions, the market administrator shall compute the uniform price in the following manner:

(a) Combine into one total the values computed pursuant to § 1079.60 for all handlers;

(b) Add an amount equal to the sum of the location adjustments computed pursuant to § 1079.75;

(c) Add an amount equal to not less than one-half of the unobligated balance in the producer-settlement fund;

(d) Divide the resulting amount by the sum of the following for all handlers included in these computations:

(1) The total hundredweight of producer milk; and

(2) The total hundredweight of milk for which a value is computed pursuant to § 1079.60(f); and

(e) Subtract not less than 4 cents nor more than 5 cents from the price computed pursuant to paragraph (d) of this section. The result shall be known as the uniform price for milk received from producers.

§ 1079.62 Announcement of uniform price and butterfat differential.

The market administrator shall announce publicly on or before:

(a) The fifth day after the end of each month the butterfat differential for such month; and

(b) The 12th day after the end of each month the uniform price for such month.

Payments for Milk

§ 1079.70 Producer-settlement fund.

The market administrator shall establish and maintain a separate fund known as the "producer-settlement fund" into which he shall deposit all payments made by handlers pursuant to §§ 1079.71, 1079.76, and 1079.77 and out of which he shall make all payments due handlers pursuant to §§ 1079.72 and 1079.77: *Provided*, That the market administrator shall offset any payments due any handler against payments due from such handler.

§ 1079.71 Payments to the producer-settlement fund.

(a) On or before the 15th day after the end of the month, each handler shall pay to the market administrator the amount, if any, by which the amount specified in paragraph (a)(1) of this section exceeds the amount specified in paragraph (a)(2) of this section:

(1) The total value of milk of the handler for such month as determined pursuant to § 1079.60.

(2) The sum of:

(i) The value at the uniform price, as adjusted pursuant to § 1079.75, of such handler's receipts of producer milk and milk received from a handler described in § 1079.9(c). In the case of a handler described in § 1079.9(c), less the amount due from other handlers pursuant to § 1079.73, exclusive of differential butterfat values; and

(ii) The value at the uniform price applicable at the location of the plant from which received of other source milk for which a value is computed pursuant to § 1079.60(f).

V 4 2 1 6 3 APR 1 7 7 UMI

§ 1079.72 Payments from the producer-settlement fund.

On or before the 17th day after the end of the month, the market administrator shall pay to each handler the amount, if any, by which the amount computed pursuant to § 1079.71(a)(2) exceeds the amount computed pursuant to § 1079.71(a)(1): *Provided*, That if the balance in the producer-settlement fund is insufficient to make all payments pursuant to this section, the market administrator shall reduce uniformly such payments and shall complete such payments as soon as the necessary funds become available.

§ 1079.73 Payments to producers and to cooperative associations.

(a) On or before the last day of the month, each handler shall pay for milk received from producers and cooperative associations during the first 15 days of the month as follows:

(1) If received from a cooperative association that is a handler pursuant to § 1079.9(a), at not less than the uniform price at the transferee plant location for the preceding month, adjusted by the butterfat differential for the preceding month;

(2) If received from a cooperative association that is a handler pursuant to § 1079.9(c), at not less than the uniform price for the preceding month, adjusted by the location adjustments specified in § 1079.75;

(3) If received from a cooperative association that is not a handler but which is authorized to collect payment on behalf of its member producers and has requested that payment be made to it in aggregate, at not less than the uniform price for the preceding month, adjusted by the location adjustments specified in § 1079.75; and

(4) If received from a producer for whom payment is not being made pursuant to paragraph (a) (2) or (3) of this section and who has not discontinued shipping to such handler, at not less than the uniform price for the preceding month, adjusted by the location adjustments specified in § 1079.75.

(b) On or before the 18th day after the end of the month, each handler shall pay for milk received during the month from a cooperative association which is a handler pursuant to § 1079.9(a) at not less than the value of such milk computed at the applicable class prices for the month, as adjusted by the butterfat differential specified in § 1079.74 and plant location adjustments specified in § 1079.52, less the partial payment pursuant to paragraph (a) of this section.

(c) On or before the 18th day after the end of the month, each handler shall make a final payment for milk received during the month from producers and cooperative associations that were not handlers for such milk pursuant to § 1079.9(a). The amount of such payment shall be computed by multiplying the hundredweight of milk received from the producer or cooperative association by not less than the uniform price for the month (as adjusted by the butterfat differential specified in § 1079.74 and the location adjustments specified in § 1079.75) and by subtracting from this product any payment made to such producer or cooperative pursuant to paragraph (a) of this section. Those producers and cooperative associations covered by this paragraph include:

(1) A cooperative association that is a handler pursuant to § 1079.9(c);

(2) A cooperative association that is not a handler but which is authorized to collect payment on behalf of its member producers and has requested that payment be made to it in aggregate; and

(3) A producer for whom payment is not being made pursuant to paragraph (c)(1) or (2) of this section.

(d) In making payments pursuant to paragraph (a)(3) and (4) and (c)(2) and (3) of this section, deductions may be made for marketing service pursuant to § 1079.86 and for any proper deductions authorized in writing by the producer. In the event a handler has not received full payment from the market administrator pursuant to § 1079.72 by the 18th day of the month, he may reduce pro rata his payments to producers pursuant to paragraph (c) of this section by not more than the amount of such underpayment. Following receipt of the balance due from the market administrator, the handler shall complete payments to producers not later than the next payment date provided under this section.

(e) In making payment to individual producers as required by this section, each handler shall furnish each producer from whom he received milk a supporting statement, in such form that it may be retained by the producer, which shall show:

(1) The month involved, and the identity of the handler and of the producer;

(2) The total pounds and the average butterfat content of the milk received from the producer;

(3) The minimum rate at which payment to the producer is required pursuant to this section;

(4) The rate used in making the payment, if such rate is other than the applicable minimum;

(5) The amount (or rate) per hundredweight of each deduction claimed by the handler, including any deduction claimed under § 1079.86, together with a description of the respective deductions; and

(6) The net amount of the payment to the producer.

§ 1079.74 Butterfat differential.

For milk containing more or less than 3.5 percent butterfat, the uniform price shall be increased or decreased, respectively, for each one-tenth percent butterfat variation from 3.5 percent by a butterfat differential, rounded to the nearest one-tenth cent, which shall be 0.115 times the simple average of the wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk butter per pound at Chicago, as reported by the Department for the month.

§ 1079.75 Plant location adjustments for producers and on nonpool milk.

(a) The uniform price for producer milk received at a pool plant or diverted from a pool plant shall be adjusted according to the location of the plant of actual receipt at the rates set forth in § 1079.52.

(b) The uniform price applicable to other source milk shall be reduced at the rates set forth in § 1079.52, except that the adjusted uniform price shall not be less than the Class III price.

§ 1079.76 Payments by handler operating a partially regulated distributing plant.

Each handler who operates a partially regulated distributing plant shall pay on or before the 25th day after the end of the month to the market administrator for the producer-settlement fund the amount computed pursuant to paragraph (a) of this section. If the handler submits pursuant to §§ 1079.30(b) and 1079.31(b) the information necessary for making the computations, such handler may elect to pay in lieu of such payment the amount computed pursuant to paragraph (b) of this section:

(a) The payment under this paragraph shall be the amount resulting from the following computations:

(1) Determine the pounds of route disposition of fluid milk products in the marketing area from the partially regulated distributing plant;

(2) Subtract the pounds of fluid milk products received at the partially regulated distributing plant:

(i) As Class I milk from pool plants and other order plants, except that subtracted under a similar provision of another Federal milk order; and

(ii) From another nonpool plant that is not an other order plant to the extent that an equivalent amount of fluid milk products disposed of to such nonpool plant by handlers fully regulated under any Federal milk order is classified and priced as Class I milk and is not used as an offset for any other payment obligation under any order;

(3) Subtract the pounds of reconstituted skim milk in route disposition of fluid milk products in the marketing area from the partially regulated distributing plant;

(4) Multiply the remaining pounds by the difference between the Class I price and the uniform price, both prices to be applicable at the location of the partially regulated distributing plant (but not to be less than the Class III price); and

(5) Add the amount obtained from multiplying the pounds of reconstituted skim milk specified in paragraph (a)(3) of this section by the difference between the Class I price applicable at the location of the partially regulated distributing plant (but not less than the Class III price) and the Class III price.

(b) The payment under this paragraph shall be the amount resulting from the following computations:

(1) Determine the value that would have been computed pursuant to § 1079.60 for the partially regulated distributing plant if the plant had been a pool plant, subject to the following modifications:

(i) Fluid milk products and bulk fluid cream products received at the partially regulated distributing plant from a pool plant or an other order plant shall be allocated at the partially regulated distributing plant to the same class in which such products were classified at the fully regulated plant;

(ii) Fluid milk products and bulk fluid cream products transferred from the partially regulated distributing plant to a pool plant or an other order plant shall be classified at the partially regulated distributing plant in the class to which allocated at the fully regulated plant. Such transfers shall be allocated to the extent possible to those receipts at the partially regulated distributing plant from pool plants and other order plants that are classified in the corresponding class pursuant to paragraph (b)(1)(i) of this section. Any such transfers remaining after the above allocation which are classified in Class I and for which a value is computed for the handler operating the partially regulated distributing plant pursuant to § 1079.60 shall be priced at the uniform price (or at the weighted average price if such is provided) of the respective order regulating the handling of milk at the transferee-plant, with such uniform price adjusted to the location of the nonpool plant (but not to be less than the lowest class price of the respective order), except that transfers of reconstituted skim milk in filled milk shall be priced at the lowest class price of the respective orders; and

(iii) If the operator of the partially regulated distributing plant so requests, the value of milk determined pursuant to § 1079.60 for such handler shall include, in lieu of the value of other source milk specified in § 1079.60(f) less the value of such other source milk specified in § 1079.71(a)(2)(ii), a value of milk determined pursuant to § 1079.60 for each nonpool plant that is not an other order plant which serves as a supply plant for such partially regulated distributing plant by making shipments to the partially regulated distributing plant during the month equivalent to the requirements of § 1079.7(b) subject to the following conditions:

(a) The operator of the partially regulated distributing plant submits with his reports filed pursuant to §§ 1079.30(b) and 1079.31(b) similar reports for each such nonpool supply plant;

(b) The operator of such nonpool supply plant maintains books and records showing the utilization of all skim milk and butterfat received at such plant which are made available if requested by the market administrator for verification purposes; and

(c) The value of milk determined pursuant to § 1079.60 for such nonpool supply plant shall be determined in the same manner prescribed for computing the obligation of such partially regulated distributing plant; and

(2) From the partially regulated distributing plant's value of milk computed pursuant to paragraph (b)(1) of this section, subtract:

(i) The gross payments by the operator of such partially regulated distributing plant, adjusted to a 3.5 percent butterfat basis by the butterfat differential specified in § 1079.74, for milk received at the plant during the month that would have been producer milk if the plant had been fully regulated;

(ii) If paragraph (b)(1)(iii) of this section applies, the gross payments by the operator of such nonpool supply plant, adjusted to a 3.5 percent butterfat basis by the butterfat differential specified in § 1079.74, for milk received at the plant during the month that would have been producer milk of the plant had been fully regulated; and

(iii) The payments by the operator of the partially regulated distributing plant to the producer-settlement fund of another order under which such plant is also a partially regulated distributing plant and like payments by the operator of the nonpool supply plant if paragraph (b)(1)(iii) of this section applies.

§ 1079.77 Adjustment of accounts.

(a) Whenever verification by the market administrator of reports or payments by any handler discloses errors in payments pursuant to §§ 1079.71, 1079.85 and 1079.86, the market administrator shall promptly bill such handler for any unpaid amount and such handler shall, within 5 days of such billing, make payment to the market administrator of the amount so billed. Whenever verification discloses that payment is due from the market administrator to any handler, the market administrator shall, within 5 days, make payments to such handler.

(b) Whenever verification by the market administrator of the payments by a handler to any producer or cooperative association discloses payment of less than is required by § 1079.73, the handler shall pay the balance due such producer or cooperative association not later than the time for making payments next following such disclosure.

§ 1079.78 Charges on overdue accounts.

Any unpaid obligation of a handler pursuant to §§ 1079.71, 1079.76, 1079.77 (a), 1079.85, and 1079.86, for which remittance has not been made (or, if mailed, postmarked) by the date specified for such payment, shall be increased three-fourths of 1 percent, and any remaining amount due shall be increased at a similar rate on the corresponding day of each month thereafter until paid. The amounts payable pursuant to this section shall be computed monthly on each unpaid obligation, which shall include unpaid charges previously made pursuant to this section; and for the purpose of this section any obligation that was determined at a date later than prescribed by the order because of a handler's failure to submit a report to the market administrator when due shall be considered to have been payable by the date it would have been due if the report had been filed when due.

ADMINISTRATIVE ASSESSMENT AND MARKETING SERVICE DEDUCTION

§ 1079.85 Assessment for order administration.

As his pro rata share of the expense of administration of the order, each handler shall pay to the market administrator on or before the 15th day after the end of the month 4 cents per hundredweight, or such lesser amount as the Secretary may prescribe, with respect to:

(a) Receipts of producer milk (including such handler's own production) other than:

(1) Receipts of producer milk by a handler described in § 1079.9(c) that were delivered to pool plants of other handlers; and

(2) Receipts of producer milk that were transferred to pool plants of other handlers by a cooperative association in its capacity as a handler pursuant to § 1079.9(a);

(b) Receipts from a handler described in § 1079.9(c);

(c) Receipts from a cooperative association in its capacity as a handler pursuant to § 1079.9(a);

(d) Other source milk allocated to Class I pursuant to § 1079.44(a)(7) and (11) and the corresponding steps of § 1079.44(b), except such other source milk that is excluded from the computations pursuant to § 1079.60 (d) and (f); and

(e) Route dispostion in the marketing area from a partially regulated distributing plant that exceeds the skim milk and butterfat specified in § 1079.76(a)(2).

§ 1079.86 Deduction for marketing services.

(a) Except as set forth in paragraph (b) of this section, each handler, in making payments directly to producers (other than himself) pursuant to § 1079.73, shall deduct 6 cents per hundredweight, or such lesser amount as the Secretary may prescribe with respect to all milk received from producers' farms during the month, and shall pay such deductions to the market administrator on or before the 15th day after the end of such month. Such moneys shall be expended by the market administrator to provide for market information and to verify the weights, samples, and tests of milk of producers who are not receiving such services from a cooperative association.

(b) In the case of producers for whom a cooperative association is actually performing the services set forth in paragraph (a) of this section, each handler shall make, in lieu of the deduction specified in paragraph (a) of this section, such deductions from the payments to be made to such producers as may be authorized by the membership agreement or marketing contract between such cooperative association and such producers and on or before the 15th day after the end of each month shall pay such deductions to the cooperative association rendering such services, accompanied by a statement showing the quan-

V4263 APR 1 77 UMI

tity of milk for which a deduction was computed for each producer.

(Secs. 1–19, 48 Stat. 31, as amended, 7 U.S.C. 601–674.)

Effective date: May 1, 1977.

Signed at Washington, D.C. on March 29, 1977.

BOB BERGLAND,
Secretary.

Title 9—Animals and Animal Products

CHAPTER I—ANIMAL AND PLANT HEALTH INSPECTION SERVICE, DEPARTMENT OF AGRICULTURE

SUBCHAPTER C—INTERSTATE TRANSPORTATION OF ANIMALS (INCLUDING POULTRY) AND ANIMAL PRODUCTS

PART 78—BRUCELLOSIS

Designation of Brucellosis Areas, Specifically Approved Stockyards, and Slaughtering Establishments; Brucellosis Areas

The amendments delete the following areas from the list of Certified Brucellosis-Free Areas in § 78.20 and add such areas to the list designated as Noncertified Areas in § 78.22 because it has been determined that they no longer come within the definition of a Certified Brucellosis-Free Area in § 78.1(l): Montgomery County in Iowa.

The amendments delete the following areas from the list of Certified Brucellosis-Free Areas in § 78.20 and add such areas to the list designated as Modified Certified Brucellosis Areas in § 78.21 because it has been determined that they now come within the definition of a Modified Certified Brucellosis Area in § 78.1 (m): Etowah County in Alabama; and Jerome County in Idaho.

Accordingly, §§ 78.20, 78.21 and 78.22 of Part 78, Title 9, Code of Federal Regulations, designating Certified Brucellosis-Free Areas, Modified Certified Brucellosis Areas, and Noncertified Areas, respectively, are amended to read as follows:

§ 78.20 Certified Brucellosis-Free Areas.

The following States, or specified portions thereof, are hereby designated as Certified Brucellosis-Free Areas:

(a) *Entire States.*

Arizona, California, Connecticut, Delaware, Hawaii, Indiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Montana, Nevada, New Hampshire, New Jersey, New York, North Carolina, North Dakota, Ohio, Oregon, Pennsylvania, Rhode Island, South Carolina, Vermont, Virginia, Washington, West Virginia, Wisconsin, Virgin Islands.

(b) *Specific Counties Within States.*

Alabama. Dale, Geneva, Henry, Lee.

Arkansas. Baxter, Benton, Boone, Bradley, Calhoun, Carroll, Clay, Cleveland, Columbia, Dallas, Drew, Fulton, Garland, Grant, Greene, Jackson, Johnson, Lafayette, Madison, Marion, Monroe, Montgomery, Newton, Ouachita, Perry, Pike, Polk, Prairie, Searcy, Sharp, Stone, Union, Woodruff.

Colorado. Adams, Alamosa, Araphoe, Archuleta, Baca, Bent, Boulder, Chaffee, Cheyenne, Clear Creek, Conejos, Costilla, Crowley, Custer, Delta, Denver, Dolores, Douglas, Eagle, Elbert, El Paso, Fremont, Garfield, Gilpin, Grand, Gunnison, Hinsdale, Huerfano, Jackson, Jefferson, Kiowa, Kit Carson, Lake, La Plata, Larimer, Las Animas, Lincoln, Logan, Mineral, Moffat, Montezuma, Montrose, Morgan, Otero, Ouray, Park, Phillips, Pitkin, Prowers, Pueblo, Rio Blanco, Rio Grande, Routt, Saguache, San Juan, San Miguel, Sedgwick, Summit, Teller, Washington, Weld.

Florida. Baker, Bay, Brevard, Calhoun, Dade, Dixie, Escambia, Franklin, Gadsden, Gulf, Hamilton, Holmes, Jackson, Leon, Liberty, Monroe, Okaloosa, Orange, Pasco, Santa Rosa, Seminole, Sumter, Taylor, Wakulla, Walton, Washington.

Georgia. Appling, Atkinson, Bacon, Banks, Brantley, Bryan, Bulloch, Burke, Butts, Camden, Candler, Charlton, Chatham, Chattahoochee, Clarke, Clayton, Cook, Crawford, Dawson, De Kalb, Echols, Effingham, Evans, Fannin, Franklin, Glascock, Glynn, Greene, Habersham, Henry, Jeff Davis, Johnson, Jones, Lanier, Laurens, Liberty, Long, McIntosh, Monroe, Peach, Rabun, Richmond, Schley, Screven, Stephens, Taylor, Telfair, Toombs, Treutlen, Twiggs, Upson, Ware, Washington, Wayne, Wheeler, White, Wilkinson.

Idaho. Ada, Adams, Bear Lake, Benewah, Blaine, Boise, Bonner, Boundary, Camas, Canyon, Caribou, Clearwater, Custer, Idaho, Kootenai, Latah, Lemhi, Lewis, Nez Perce, Oneida, Owyhee, Payette, Power, Shoshone, Valley, Washington, Yellowstone National Park.

Illinois. Adams, Alexander, Bond, Boone, Brown, Bureau, Calhoun, Carroll, Cass, Champaign, Christian, Clark, Clay, Clinton, Coles, Cook, Crawford, Cumberland, De Kalb, De Witt, Douglas, Du Page, Edgar, Edwards, Effingham, Fayette, Ford, Franklin, Fulton, Gallatin, Greene, Grundy, Hamilton, Hancock, Hardin, Henderson, Henry, Iroquois, Jackson, Jasper, Jefferson, Jersey, Jo Daviess, Johnson, Kane, Kankakee, Kendall, Knox, Lake, La Salle, Lawrence, Lee, Livingston, Logan, Macon, Macoupin, Madison, Marion, Marshall, Mason, Massac, McDonough, McHenry, McLean, Menard, Mercer, Monroe, Montgomery, Morgan, Moultrie, Ogle, Peoria, Perry, Piatt, Pike, Pulaski, Putnam, Randolph, Richland, Rock Island, St. Clair, Saline, Sangamon, Schuyler, Scott, Shelby, Stark, Stephenson, Tazewell, Union, Vermilion, Wabash, Warren, Washington, Wayne, White, Whiteside, Will, Winnebago, Woodford.

Iowa. Adair, Adams, Audubon, Benton, Black Hawk, Boone, Bremer, Buchanan, Buena Vista, Butler, Calhoun, Carroll, Cass, Cedar, Cherokee, Chickasaw, Clarke, Clay, Clayton, Clinton, Dallas, Davis, Des Moines, Dickinson, Dubuque, Emmet, Fayette, Floyd, Franklin, Fremont, Greene, Grundy, Hamilton, Hancock, Hardin, Henry, Howard, Humboldt, Ida, Iowa, Jackson, Johnson, Keokuk, Kossuth, Lee, Linn, Louisa, Lucas, Lyon, Madison, Mahaska, Marion, Marshall, Mills, Mitchell, Monona, Muscatine, O'Brien, Osceola, Page, Palo Alto, Pocahontas, Polk, Pottawattamie, Poweshiek, Plymouth, Scott, Shelby, Tama, Taylor, Van Buren, Wapello, Warren, Washington, Webster, Winnebago, Winneshiek, Woodbury, Worth, Wright.

Kansas. Comanche, Doniphan, Ford, Gove, Graham, Greeley, Haskell, Hodgeman, Johnson, Lane, Logan, Marshall, Pawnee, Phillips, Riley, Scott, Sheridan, Thomas, Trego, Wallace, Washington.

Kentucky. Bell, Breathitt, Campbell, Clay, Edmonson, Floyd, Harlan, Jackson, Johnson, Kenton, Knott, Knox, Lawrence, Lee, Leslie, Letcher, Lewis, Magoffin, Martin, McCreary, Menifee, Morgan, Owsley, Pendleton, Perry, Pike, Robertson, Trimble, Whitley, Wolfe.

Mississippi. Alcorn, Hancock, Harrison, Jackson, Stone, Tishomingo.

Missouri. Audrain, Dallas, Douglas, Dunklin, Franklin, Gasconade, Hickory, Iron, Jackson, Laclede, Lewis, Miller, Moniteau, Montgomery, Perry, Platte, Pulaski, St. Louis, Schuyler, Shelby.

New Mexico. Bernalillo, Catron, Colfax, Dona Ana, Grant, Harding, Hidalgo, Lincoln, Los Alamos, Luna, McKinley, Otero, Rio Arriba, Sandoval, San Juan, Santa Fe, Sierra, Socorro, Taos, Torrance.

South Dakota. Aurora, Beadle, Bennett, Bon Homme, Brookings, Brown, Brule, Buffalo, Butte, Campbell, Charles Mix, Clark, Clay, Codington, Corson, Custer, Davison, Day, Deuel, Dewey, Douglas, Edmunds, Fall River, Faulk, Grant, Gregory, Haakon, Hamlin, Hand, Hanson, Harding, Hughes, Hutchinson, Hyde, Jackson, Jerauld, Kingsbury, Lake, Lawrence, Lincoln, Lyman, Marshall, McCook, McPherson, Meade, Mellette, Miner, Minnehaha, Moody, Pennington, Perkins, Potter, Roberts, Sanborn, Shannon, Spink, Sully, Todd, Tripp, Turner, Union, Walworth, Washabaugh, Yankton, Ziebach.

Tennessee. Anderson, Blount, Campbell, Carter, Cheatham, Claiborne, Davidson, Decatur, Dickson, Fentress, Grainger, Greene, Grundy, Hancock, Hardin, Jefferson, Johnson, Knox, Lake, Meigs, Morgan, Polk, Roane, Robertson, Rutherford, Scott, Sequatchie, Sevier, Sullivan, Unicoi, Union, Warren, White.

Texas. Brewster, Childress, Comal, Crane, Ector, Gray, Hansford, Hartley, Hemphill, Irion, Jeff Davis, Kerr, Kimble, Lipscomb, Llano, Loving, Mason, Newton, Pecos, Reagan, Roberts, Sterling, Terrell, Val Verde, Ward, Winkler.

Utah. Beaver, Carbon, Daggett, Davis, Duchesne, Emery, Garfield, Grand, Iron, Juab, Kane, Millard, Morgan, Piute, Rich, Salt Lake, San Juan, Sanpete,

Sevier, Summit, Tooele, Uintah, Utah, Wasatch, Washington, Wayne, Weber.

Wyoming. Albany, Big Horn, Campbell, Carbon, Converse, Crook, Fremont, Goshen, Hot Springs, Johnson, Laramie, Natrona, Niobrara, Park, Platte, Sheridan, Sublette, Sweetwater, Teton, Uinta, Washakie, Weston.

Puerto Rico. Adjuntas, Aguada, Aguadilla, Aguas Buenas, Aibonito, Anasco, Arroyo, Barceloneta, Barranquitas, Bayamon, Cabo Rojo, Caguas, Camuy, Canovanas (Loiza), Catano, Cayey, Ceiba, Ciales, Cidra, Coamo, Comerio, Corozal, Culebra, Dorado, Fajardo, Guanica, Guayama, Guaynabo, Guayanilla, Gurabo, Hormigueros, Humacao, Isabela, Jayuya, Juana Diaz, Juncos, Lajas, Lares, Las Marias, Luquillo, Manati, Maricao, Maunabo, Mayaguez, Moca, Morovis, Naranjito, Orocovis, Patillas, Penuelas, Ponce, Quebradillas, Rincon, Rio Grande, Rio Piedras, Sabana Grande, Salinas, San German, San Juan, San Lorenzo, San Sebastian, Santa Isabel, Toa Alta, Toa Baja, Trujillo Alto, Utuado, Vega Alta, Vega Baja, Villalba, Yabucoa, Yauco.

§ 78.21 Modified certified brucellosis areas.

The following States, or specified portions thereof, are hereby designated as Modified Certified Brucellosis Areas:

(a) *Entire States.*

Alaska, Louisiana, Nebraska, Oklahoma.

(b) *Specific Counties Within States.*

Alabama. Autauga, Baldwin, Barbour, Bibb, Blount, Bullock, Butler, Calhoun, Chambers, Cherokee, Chilton, Choctaw, Clarke, Clay, Cleburne, Coffee, Colbert, Conecuh, Coosa, Covington, Crenshaw, Cullman, Dallas, De Kalb, Elmore, Etowah, Escambia, Fayette, Franklin, Greene, Hale, Houston, Jackson, Jefferson, Lamar, Lauderdale, Lawrence, Limestone, Lowndes, Macon, Madison, Marengo, Marion, Marshall, Mobile, Monroe, Montgomery, Morgan, Perry, Pickens, Pike, Randolph, Russell, St. Clair, Shelby, Sumter, Talladega, Tallapoosa, Tuscaloosa, Walker, Washington, Wilcox, Winston.

Arkansas. Arkansas, Ashley, Chicot, Clark, Cleburne, Conway, Craighead, Crawford, Crittenden, Cross, Desha, Faulkner, Franklin, Hempstead, Hot Spring, Howard, Independence, Izard, Jefferson, Lawrence, Lee, Lincoln, Little River, Logan, Lonoke, Miller, Mississippi, Nevada, Phillips, Poinsett, Pope, Pulaski, Randolph, Saline, Scott, St. Francis, Sebastian, Sevier, Van Buren, Washington, White, Yell.

Colorado. Mesa, Yuma.

Florida. Alachua, Bradford, Broward, Charlotte, Citrus, Clay, Collier, Columbia, De Soto, Duval, Flagler, Gilchrist, Glades, Hardee, Hendry, Hernando, Highlands, Hillsborough, Indian River, Jefferson, Lafayette, Lake, Lee, Levy, Madison, Manatee, Marion, Martin, Nassau, Okeechobee, Osceola, Palm Beach, Pinellas, Polk, Putnam, St. Johns, St. Lucie, Sarasota, Suwanee, Union, Volusia.

Georgia. Baker, Baldwin, Barrow, Bartow, Ben Hill, Berrien, Bibb, Bleckley, Brooks, Calhoun, Carroll, Catoosa, Chattooga, Cherokee, Clay, Clinch, Cobb, Coffee, Colquitt, Columbia, Coweta, Crisp, Dade, Decatur, Dodge, Dooly, Dougherty, Douglas, Early, Elbert, Emanuel, Fayette, Floyd, Forsyth, Fulton, Gilmer, Gordon, Grady, Gwinnett, Hall, Hancock, Haralson, Harris, Hart, Heard, Houston, Irwin, Jackon, Jasper, Jefferson, Jenkins, Lamar, Lee, Lincoln, Lowndes, Lumpkin, Macon, Madison, Marion, McDuffie, Meriwether, Miller, Mitchell, Montgomery, Morgan, Murray, Muscogee, Newton, Oconee, Oglethorpe, Paulding, Pickens, Pierce, Pike, Polk, Pulaski, Putnam, Quitman, Randolph, Rockdale, Seminole, Spalding, Stewart, Sumter, Talbot, Taliaferro, Tattnall, Terrell, Thomas, Tift, Towns, Troup, Turner, Union, Walker, Walton, Warren, Webster, Whitfield, Wilcox, Wilkes, Worth.

Idaho. Bannock, Bingham, Bonneville, Butte, Cassia, Clark, Elmore, Franklin, Fremont, Gem, Gooding, Jefferson, Jerome, Lincoln, Madison, Minidoka, Teton, Twin Falls.

Illinois. Pope, Williamson.

Iowa. Allamakee, Appanoose, Cerro Gordo, Crawford, Decatur, Delaware, Guthrie, Harrison, Jasper, Jefferson, Jones, Monroe, Ringgold, Sac, Sioux, Story, Union, Wayne.

Kansas. Allen, Anderson, Atchison, Barber, Barton, Bourbon, Brown, Butler, Chase, Chautauqua, Cherokee, Cheyenne, Clark, Clay, Cloud, Coffey, Cowley, Crawford, Decatur, Dickinson, Douglas, Edwards, Elk, Ellis, Ellsworth, Finney, Franklin, Geary, Grant, Gray, Greenwood, Hamilton, Harper, Harvey, Jackson, Jefferson, Jewell, Kearny, Kingman, Kiowa, Labette, Leavenworth, Lincoln, Linn, Lyon, Marion, McPherson, Meade, Miami, Mitchell, Montgomery, Morris, Morton, Nemaha, Neosho, Ness, Norton, Osage, Osborne, Ottawa, Pottawatomie, Pratt, Rawlins, Reno, Republic, Rice, Rooks, Rush, Russell, Saline, Sedgwick, Seward, Shawnee, Sherman, Smith, Stafford, Stanton, Stevens, Sumner, Wabaunsee, Wichita, Wilson, Woodson, Wyandotte.

Kentucky. Adair, Allen, Anderson, Ballard, Barren, Bath, Boone, Bourbon, Boyd, Boyle, Bracken, Breckinridge, Bullitt, Butler, Caldwell, Calloway, Carlisle, Carroll, Carter, Casey, Christian, Clark, Clinton, Crittenden, Cumberland, Daviess, Elliott, Estill, Fayette, Fleming, Franklin, Fulton, Gallatin, Garrard, Grant, Graves, Grayson, Green, Greenup, Hancock, Hardin, Harrison, Hart, Henderson, Henry, Hickman, Hopkins, Jefferson, Jessamine, Larue, Laurel, Lincoln, Livingston, Logan, Lyon, Madison, Marion, Marshall, Mason, McCracken, McLean, Meade, Mercer, Metcalfe, Monroe, Montgomery, Muhlenberg, Nelson, Nicholas, Ohio, Oldham, Owen, Powell, Pulaski, Rockcastle, Rowan, Russell, Scott, Shelby, Simpson, Spencer, Taylor, Todd, Trigg, Union, Warren, Washington, Wayne, Webster, Woodford.

Mississippi. Adams, Amite, Attala, Benton, Bolivar, Calhoun, Carroll, Chickasaw, Choctaw, Claiborne, Clarke, Clay, Coahoma, Copiah, Covington, De Soto, Forrest, Franklin, George, Greene, Grenada, Hinds, Holmes, Humphreys, Issaquena, Itawamba, Jasper, Jefferson, Jefferson Davis, Jones, Kemper, Lafayette, Lamar, Lauderdale, Lawrence, Leake, Lee, LeFlore, Lincoln, Lowndes, Madison, Marion, Marshall, Monroe, Montgomery, Neshoba, Newton, Noxubee, Oktibbeha, Panola, Pearl River, Perry, Pike, Pontotoc, Prentiss, Quitman, Rankin, Scott, Sharkey, Simpson, Smith, Sunflower, Tallahatchie, Tate, Tippah, Tunica, Union, Walthall, Warren, Washington, Wayne, Webster, Wilkinson, Winston, Yalobusha, Yazoo.

Missouri. Adair, Andrew, Atchison, Barry, Barton, Bates, Benton, Bollinger, Boone, Buchanan, Butler, Caldwell, Callaway, Camden, Cape Girardeau, Carroll, Carter, Cass, Cedar, Chariton, Christian, Clark, Clay, Clinton, Cole, Cooper, Crawford, Dade, Daviess, De Kalb, Dent, Gentry, Greene, Grundy, Harrison, Henry, Holt, Howard, Howell, Jasper, Jefferson, Johnson, Knox, Lafayette, Lawrence, Lincoln, Linn, Livingston, Macon, Madison, Maries, Marion, McDonald, Mercer, Mississippi, Monroe, New Madrid, Newton, Nodaway, Oregon, Osage, Ozark, Pemiscot, Pettis, Phelps, Pike, Polk, Putnam, Ralls, Randolph, Ray, Reynolds, Ripley, St. Charles, St. Clair, St. Francois, St. Genevieve, Saline, Scotland, Scott, Shannon, Stoddard, Stone, Sullivan, Taney, Texas, Vernon, Warren, Washington, Wayne, Webster, Worth, Wright.

New Mexico. Chaves, Curry, De Baca, Eddy, Guadalupe, Lea, Mora, Quay, Roosevelt, San Miguel, Union, Valencia.

South Dakota. Jones, Stanley.

Tennessee. Bedford, Benton, Bledsoe, Bradley, Cannon, Carroll, Chester, Clay, Cocke, Coffee, Crockett, Cumberland, DeKalb, Dyer, Fayette, Franklin, Gibson, Giles, Hamblen, Hamilton, Hardeman, Hawkins, Haywood, Henderson, Henry, Hickman, Houston, Humphreys, Jackson, Lauderdale, Lawrence, Lewis, Lincoln, Loudon, Macon, Madison, Marion, Marshall, Maury, McMinn, McNairy, Monroe, Montgomery, Moore, Obion, Overton, Perry, Pickett, Putnam, Rhea, Shelby, Smith, Stewart, Sumner, Tipton, Trousdale, Van Buren, Washington, Wayne, Weakley, Williamson, Wilson.

Texas. Anderson, Andrews, Angelina, Aransas, Archer, Armstrong, Atascosa, Austin, Bailey, Bandera, Bastrop, Baylor, Bee, Bell, Bexar, Blanco, Borden, Bosque, Bowie, Brazoria, Brazos, Briscoe, Brooks, Brown, Burleson, Burnet, Caldwell, Calhoun, Callahan, Cameron, Camp, Carson, Cass, Castro, Chambers, Cherokee, Clay, Cochran, Coke, Coleman, Collin, Collingsworth, Colorado, Comanche, Concho, Cooke, Coryell, Cottle, Crockett, Crosby, Culberson, Dallam, Dallas, Dawson, Deaf Smith, Delta, Denton, De Witt, Dickens, Dimmit, Donley, Duval, Eastland, Edwards, Ellis, El Paso, Erath, Falls, Fannin, Fayette, Fisher, Floyd, Foard, Fort Bend, Franklin, Freestone, Frio, Gaines, Gal-

veston, Garza, Gillespie, Glasscock, Goliad, Gonzales, Grayson, Gregg, Grimes, Guadalupe, Hale, Hall, Hamilton, Hardeman, Hardin, Harris, Harrison, Haskell, Hays, Henderson, Hidalgo, Hill, Hockley, Hood, Hopkins, Houston, Howard, Hudspeth, Hunt, Hutchinson, Jack, Jackson, Jasper, Jefferson, Jim Hogg, Jim Wells, Johnson, Jones, Karnes, Kaufman, Kendall, Kenedy, Kent, King, Kinney, Kleberg, Knox, Lamar, Lamb, Lampasas, La Salle, Lavaca, Lee, Leon, Liberty, Limestone, Live Oak, Lubbock, Lynn, McCulloch, McLennan, McMullen, Madison, Marion, Martin, Matagorda, Maverick, Medina, Menard, Midland, Milam, Mills, Mitchell, Montague, Montgomery, Moore, Morris, Motley, Nacogdoches, Navarro, Nolan, Nueces, Ochiltree, Oldham, Orange, Palo Pinto, Panola, Parker, Parmer, Polk, Potter, Presidio, Rains, Randall, Real, Red River, Reeves, Refugio, Robertson, Rockwall, Runnels, Rusk, Sabine, San Augustine, San Jacinto, San Patricio, San Saba, Schleicher, Scurry, Shackleford, Shelby, Sherman, Smith, Somervell, Starr, Stephens, Stonewall, Sutton, Swisher, Tarrant, Taylor, Terry, Throckmorton, Titus, Tom Green, Travis, Trinity, Tyler, Upshur, Upton, Uvalde, Van Zandt, Victoria, Walker, Waller, Washington, Webb, Wharton, Wheeler, Wichita, Wilbarger, Willacy, Williamson, Wilson, Wise, Wood, Yoakum, Young, Zapata, Zavala.

Utah. Box Elder, Cache.

Wyoming. Lincoln.

Puerto Rico. Arecibo, Carolina, Hatillo, Las Piedras, Naguabo.

§ 78.22 **Noncertified areas.**

The following States, or specified portions thereof, are hereby designated as Noncertified Brucellosis Areas:

(a) *Entire States.*

(b) *Specific Counties With States.*

Missouri. Morgan.

Iowa. Montgomery.

Puerto Rico. Vieques.

(Sec. 4–7, 23 Stat. 32, as amended; secs. 1 and 2, 32 Stat. 791–792, as amended; sec. 3, 33 Stat. 1265, as amended; sec. 2, 65 Stat. 693, and secs. 3 and 11, 76 Stat. 130, 132, 21 U.S.C 111–113, 114a–1, 115, 117, 120, 121, 125, 134b, 134f; 37 FR 28464, 28477; 38 FR 19141, 9 CFR 78.25.)

Effective date: The foregoing amendments shall become effective April 1, 1977.

The amendments impose certain restrictions necessary to prevent the spread of brucellosis in cattle and relieve certain restrictions presently imposed. They should be made effective promptly in order to accomplish their purpose in the public interest and to be of maximum benefit to persons subject to the restrictions which are relieved. It does not appear that public participation in this rulemaking proceeding would make additional relevant information available to the Department.

Accordingly, under the administrative procedure provisions of 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to the amendments are impracticable, unnecessary, and contrary to the public interest, and good cause is found for making them effective less than 30 days after publication in the FEDERAL REGISTER.

Done at Washington, D.C., this 28th day of March 1977.

NOTE.—The Animal and Plant Health Inspection Service has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A–107.

R. P. JONES,
Deputy Administrator,
Veterinary Services.

[FR Doc. 77-9716 Filed 3-31-77;8:45 am]

Title 14—Aeronautics and Space

CHAPTER II—CIVIL AERONAUTICS BOARD

[Regulation PR 166; Docket 29626]

PART 300—RULES OF CONDUCT IN BOARD PROCEEDINGS

AGENCY: Civil Aeronautics Board.

ACTION: Final rule.

SUMMARY: This issuance establishes rules of conduct in Board proceedings, including among others the areas of communications with Board employees and conflicts of interest. It makes final, with some changes in response to several comment stages, the interim rule that has been in effect. The rule is intended to make sure that Board activities are conducted fairly and efficiently, without improper influences, and that the public has free and equal access to the materials on which decisions are based.

DATES: Effective April 11, 1977. Because this issuance relieves restrictions, and imposes no significant burdens beyond those of the existing rule, it is found for good cause that an effective date earlier than 30 days after issuance is in the public interest.

Adopted: March 29, 1977.

FOR FURTHER INFORMATION CONTACT:

James C. Schultz, 202–673–5233.

SUPPLEMENTARY INFORMATION:

RECENT NOTICES

A series of notices has been issued recently on this subject:

PR–154, 41 FR 34587, August 16, 1976: Part 300 reissued as an interim regulation effective September 30, 1976, with opportunity to comment on urgent matters before September 15, 1976.

PDR–41, 41 FR 34650, August 16, 1976: Notice proposing that the interim rule become the permanent rule, with comment period to December 29, 1976.

PR–158, 41 FR 43715, October 5, 1976: PR–159, 41 FR 48119, November 2, 1976: Effectiveness of interim regulation postponed until October 25, 1976.

PR–160, 41 FR 48116, November 2, 1976: Interim regulation amended in response to initial round of comments.

PDR–41A, 41 FR 48129, November 2, 1976: Notice requesting comments on the changes in interim regulation.

PDR–41B, 41 FR 51036, November 19, 1976: Supplemental notice requesting comment on constitutional issues raised by earlier comments.

PR–162, 42 FR 5346, January 28, 1977: Amendment concerning improper influence, in response to comments on constitutional issues.

This issuance follows specifically the notices of proposed rulemaking PDR–41 and PDR–41A, cited above. It includes a rewrite of the rule for clarity, and some substantive changes from the interim rule on the Board's initiative.

DISCUSSION OF COMMENTS

Two comments were filed, one by the member carriers of the National Air Carrier Association (NACA), and one by Reuben Robertson and the Aviation Consumer Action Project (ACAP).

NACA's comment was directed to the rule against unauthorized communication. It objected to limiting language in an exception in the area of intergovernmental negotiations about international aviation matters, claiming that anything "pertinent to" those subjects should be excepted, rather than only materials "directly and unavoidably involved in" the negotiations.

Partly in response to that comment, but also to define the exceptions more clearly, the areas of intergovernmental negotiation, foreign policy, and international aviation matters have been combined in the rewritten rule. As now issued, the rule allows, in nonhearing cases, unregulated communications relating to national defense or foreign policy. In cases where a hearing is required or ordered, the rule permits unregulated communications on those subjects if the communicator's position with respect to intergovernmental negotiations cannot otherwise be fairly presented, but such communications are excluded from the record for decision in the hearing matter. The Board has found that prohibitive rules of communication can be a serious problem where international aviation is involved, since these matters often concern negotiations with foreign governments, are often of some urgency, and tend to require confidential treatment. As authorized by section 802 of the Federal Aviation Act, the Board has for many years advised the executive branch on such matters, and this course of action has received Congressional recognition. S. Rep. No. 1875, 84th Cong., 2d Sess. (1956). The exclusion from a hearing record of such communications should be a sufficient safeguard against their influencing a decision.

ACAP commented that the new Part 300 "appears to permit some ex parte communications that may be prohibited by the Sunshine Act." The comment did not give examples. Part 300 has been carefully reviewed with respect to the new Sunshine Act provisions, and as now drafted the Board finds that it conforms to them. The main prohibition of unauthorized communication has been changed from the interim rule to cover communications by, as well as to, Board employees. The exceptions to the rule correspond to the provisions of the Sunshine Act. The exception for national defense and foreign policy matters conforms to a similar exception in the Administrative Procedure Act, 5 U.S.C. 554 (a)(4). The exception for status and expedition requests corresponds to the exclusion of "status reports" in the statute's definition of ex parte communications. The Board considers that status and expedition requests are generally indistinguishable, and intends the exception in the rule to be coextensive with that in the statute. Exceptions for emergency conditions (§ 300.2(c)(5)), cases to be decided within 30 days (§ 300.2(c)(7)), enforcement investigations (§ 300.2(c)(3)), and mediation efforts (§ 300.2(c)(4)) do not relate to cases that have been noticed for hearing, which are the ones covered by the ex parte provisions of the Sunshine Act. Settlement discussions (§ 300.2(c)(4)), communications between counsel (§ 300.2(c)(1)), and communications with Board employees in an advocacy role (§ 300.2(c)(2)) do not involve employees involved in the decisional process, another limit to the Sunshine Act's application.

ACAP also questioned the wisdom of extending the scope of these rules to areas beyond formal hearing matters. The Board recognizes that the scope of Part 300 is broader than comparable rules in many other agencies, and broader than the law requires. These objections appear to be based, however, on a misapprehension of the nature of the regulation, in part based on an oversimplified view of it as an extension of "ex parte" rules to such areas as rulemaking and tariff matters. Part 300 in fact does not use the term or the concept of "ex parte," as it appears, for example, in the Sunshine Act, referring to a communication that is not on the record and not communicated to all "parties." Part 300 basically requires that in certain defined "public proceedings" communication that could influence Board decisions must proceed according to established rules, in the broad sense. It does not state what those rules are. Part 302, for example, sets forth many of the governing rules in hearing cases and other types of Board proceedings.

Obviously the rules for communication with the Board in a rulemaking proceeding, for example, which is legislative in nature, must be different from those in an adjudicatory hearing case. In the order that constitutes a notice of proposed rulemaking, the Board customarily invites all interested persons to comment in writing, either formally or informally. Any written communications that are received after that invitation are considered to be in response to the order, even if received after the comment closing date, the deadline for comments the Board will definitely consider before taking final action. Thus, such written communications in a rulemaking case are not in any sense a violation of Part 300, although similar ones might be in other types of cases where the applicable rule must be stricter. Of course, there is no assurance that comments received after the closing date will be considered in connection with that stage of rulemaking, and late-filing parties who want such an assurance should file a motion to that effect under Rule 17 (14 CFR 302.17). The chief need in the area covered by Part 300 is to make clear what are the proper materials to be considered when the Board makes a decision. The prohibiting of certain communications, it should be noted, does not necessarily imply ethical disapproval of them.

The Board is acting in this area in response to higher public expectations of openness and fairness in all types of proceedings, as exemplified by the recent amendments of the Freedom of Information Act, and the Government in the Sunshine Act. Thus, this issuance is not directed at making the applicable rules for communication in public proceedings stricter than they are at present, and certainly not at making them the same for all types of proceedings. Its aim is rather to declare that whatever the rules are for these proceedings, they should be observed, and that nonconforming communications will be disclosed and segregated from the decisional process.

CHANGES FROM THE INTERIM RULE

Several substantive changes have been made from the interim rule, other than those already discussed. The basic starting point for regulating communications has been changed. Instead of depending on the filing of papers to which a response is authorized, a new concept of a "public proceeding" has been used. The term is defined to mean one of the following: (1) a hearing case, after the filing of the initiating document or the Board orders a hearing, (2) a rulemaking proceeding, after the publication of a notice requesting public comment, (3) a tariff filing, after an investigation has been ordered or a complaint has been docketed, or (4) any other proceeding initiated by a docket filing, after the filing of an opposing document. The restriction on unauthorized communication applies to these situations until the point of final disposition. In these cases the rule forbids "substantive communication" (which could influence the decision) with "concerned employees" (those involved in the decisional process). The main effect of this change is to eliminate certain situations in which a communication is permitted but must be recorded. It was found in connection with the interim rule that the multi-layered scheme, with an early point at which communication was permitted but must be recorded, then a later one at which it was prohibited but must still be recorded, was too complex to be generally understood by the interested public and Board employees. Ease of application of these rules is an important objective.

A corollary of this change is that the rules for reporting communications will be the same for Members and Board staff in most cases. The exception is status or expedition inquiries, other than those on national defense or foreign policy subjects, which must be reported only in cases where a response is given by a Member.

The provision (§ 300.4(c) of the interim rule) concerning insertion in a preamble of a notice or advance notice of proposed rulemaking, or in the docket, of a summary of any communication, not more than 6 months before issuance, that was one of the reasons for the issuance has been deleted. This change is not intended to relax the practice regarding the content of preambles. It is made in light of the facts that the 6-month period is arbitrary, and that good practice today, as illustrated by newly issued FEDERAL REGISTER regulations on the subject (1 CFR 18.12, 41 FR 56623, December 29, 1976), requires that any background information be discussed.

A new exception has been added for information provided at the request of Board employees in tariff matters after filing of a complaint but before any investigation order, or in rulemaking proceedings. It has been found that there is occasionally a need for Board employees to obtain information in these types of matters. As long as the request and the data furnished are publicly filed in the docket, as required by § 300.3, the Board finds that there will be no significant danger of abuse in this area.

The provision in the interim rule (§ 300.5(d)) requiring reporting to the Managing Director any request for information that has not been made publicly available has also been revoked. The provision is not needed as a restraint, since the subject of disclosing information is covered, as far as employees are concerned, by 14 CFR Part 370, Employee Responsibilities and Conduct, and requests for information from persons outside the Board are not considered improper. The Board has decided that the burden of reporting such information exceeds any benefits that might be gained from it.

In PR–160, the Board revoked § 300.7 of the interim rule, in response to comments received. That section provided that a party to a proceeding might be required to report its attempts to obtain the support of other government agencies. The Board called for comment on this action in PDR–41A, but no comments were submitted. The Board has decided to omit the provision from the final regulation. The Board considers, however, that it has power to enact such a provision, and either an administrative law judge or the Board may require such reports on an ad hoc basis.

This rule deals with the matter of pre-CAB (§§ 300.9 and .10) and post-CAB (§§ 300.13 and .14) employment primarily by reference to existing criminal statutory provisions. These provisions may or may not be regarded as only a minimum, and the Board does not in this issuance consider the question whether more restrictive rules are appropriate for this agency. It is the Board's intention to reexamine the area of pre- and post-governmental employment as a separate matter, guided by

V4263 APR 1 77 UMI

whatever proposals the Administration may offer.

In §§ 300.9 and 300.10, the rule prohibiting Board employees from disclosing confidential information gained through prior employment has been revoked. The use of confidential information in proper channels of a U.S. Government agency, whose actions are governed by strict rules of conduct and procedure and by overriding concern for the public interest, cannot be construed as intrinsically improper. The propriety of such disclosures will depend on the circumstances of each case, and is not subject to a general rule. Such a situation differs materially from the ones governed by 18 U.S.C. 207, in which a Board employee leaves the agency to work in the private sector, and the danger is disclosure of information gained through official duties with the government.

In § 300.15, dealing with opinions by the General Counsel on the application of Part 300, opinions given to Board employees have been deleted from application of the section. Informal interpretation of Part 300 is necessary as continuing guidance to Board staff, and formal filing and review procedures are inappropriate for this internal function.

Accordingly, 14 CFR Part 300, Rules of Conduct in Board Proceedings, is reissued as set forth below.

Sec.

300.0 Applicability.
300.1 Judicial standards of practice.
300.2 Prohibited communications.
300.3 Reporting of communications.
300.4 Separation of functions.
300.5 Prohibited conduct.
300.6 Practitioners' standards of conduct.
300.7 Conciseness.
300.8 Gifts and unusual hospitality and other conduct affecting Board employees.
300.9 Permanent disqualification of Board Members and employees in matters in which they personally participated before joining the Board.
300.10 Temporary disqualification of Board Members and employees in matters in which they had official responsibility before joining the Board.
300.11 Disqualification of Government officers and employees.
300.12 Practice of special Government employees permitted.
300.13 Permanent disqualification of former Board Members and employees in matters in which they personally participated.
300.14 Temporary disqualification of former Board Members and employees in matters formerly under their official responsibility.
300.15 Opinions or rulings by the General Counsel.
300.16 Waivers.
300.17 Disqualification of partners of Board Members and employees.
300.18 [Reserved].
300.19 Use of confidential information.
300.20 Violations.

AUTHORITY: Secs. 204 and 1001 of the Federal Aviation Act of 1958 as amended, 72 Stat. 743, 788, 49 U.S.C. 1324, 1481.

§ 300.0 Applicability.

The rules of conduct set forth in this part shall govern the conduct of parties and their representatives, and the relationships between the Members of the Board, Board employees, and all other persons in all Board matters, except as otherwise provided in this or any other Board regulation. For purposes of this part, the terms "Board employee(s)" shall refer to all persons employed by the Board, including Board Members, personal staff of Members, regular employees, special Government employees, consultants or experts under contract with the Board, and administrative law judges.

§ 300.1 Judicial standards of practice.

The Board is a quasi-judicial agency, and as such certain of its functions are similar to those of a court, and parties to cases before the Board and those who represent such parties are expected—in fact and in appearance—to conduct themselves with honor and dignity as they would before a court. By the same token, the Members of the Board and Board employees who may be making recommendations to the Board Members or advising them are expected to conduct themselves with the same fidelity to appropriate standards of propriety that characterize a court and its staff. The standing and effectiveness of the Board are in direct relation to the observance by the Board, Board employees, and the parties and attorneys appearing before the Board of the highest standards of judicial and professional ethics. The rules of conduct set forth in this part are to be interpreted in light of those standards.

§ 300.2 Prohibited communications.

(a) *Basic requirement.* Except as provided in paragraphs (c), (d), and (e) of this section, there shall be no substantive communication in either direction between any concerned Board employee and any person who is not a Board employee, concerning a public proceeding, until after final disposition of the proceeding, other than as provided by Federal statute or published Board rule or order.

(b) *Definitions.* For purposes of this part:

(1) A "substantive communication" is any written or oral statement that could influence a decision on any significant issue, of procedure or on the merits, in a public proceeding.

(2) A "concerned Board employee" is a Board employee who is or may reasonably be expected to be involved in the decisional process in a public proceeding.

(3) A "public proceeding" is one of the following:

(i) A proceeding for which a Federal statute requires a hearing, after the filing of the document initiating the proceeding, or a matter on which the Board has ordered a hearing at which an employee presides at the taking of evidence, after the issuance of the order. (Such a proceeding is referred to as a "hearing case," with any other proceeding sometimes referred to as a "nonhearing case.")

(ii) A rulemaking proceeding, after the issuance by the Board of a notice requesting public comment.

(iii) A tariff filing, after the Board has ordered an investigation or a complaint has been filed and docketed.

(iv) Any other proceeding initiated by a docket filing, after the filing in the docket of an identifiable written opposition to the initiating document.

(c) *General exceptions.* Paragraph (a) of this section shall not apply to the following:

(1) Informal communications between legal counsel, including discussions about stipulations and other communications considered proper in Federal court proceedings.

(2) Information given to a Board employee who is participating in a hearing case on behalf of a bureau or office that is a party, to another Board employee who is reviewing that work, or to his supervisors within that bureau or office.

(3) Communications made in the course of an investigation to determine whether formal enforcement action should be begun.

(4) Settlement discussions and mediation efforts.

(5) Information given at the request of a Board employee acting upon a specific direction of the Board, in a nonhearing case, where the Board has decided that emergency conditions exist and this rule would otherwise prevent the obtaining of needed information in a timely manner.

(6) Information given at the request of a Board employee in a tariff matter after a complaint is filed but before an investigation is ordered, or in a rulemaking proceeding.

(7) Nonhearing cases that are to be decided within 30 days after the filing of the initiating document.

(d) *Status and expedition requests.* Paragraph (a) of this section shall not apply to oral or written communications asking about the status, or requesting expeditious treatment, of a public proceeding. However, any request for expeditious treatment should be made in accordance with the Rules of Practice, particularly Rules 14 and 18, §§ 302.14 and 302.18 of this chapter.

(e) *National defense and foreign policy.* In nonhearing cases, paragraph (a) of this section shall not apply to communications concerning national defense or foreign policy matters, including international aviation matters. In hearing cases, any communications on those subjects to or from Board employees involved in intergovernmental negotiations that would be barred by paragraph (a) are permitted if the communicator's position with respect to those negotiations cannot otherwise be fairly presented, but those communications shall not be considered as part of the record on which decisions must be made.

(f) *Communications not considered.* A communication in violation of this section shall not be considered part of a record, or included as available material, for decision in any proceeding.

§ 300.3 Reporting of communications.

(a) *General.* The following types of substantive communication shall be reported as specified in paragraph (b) of this section:

(1) Any communication in violation of § 300.2(a) of this chapter.

(2) Information given upon determination of an emergency under § 300.2(c)(5) of this chapter.

(3) Information given at the request of a Board employee in a rulemaking or tariff matter under § 300.2(c)(6) of this chapter.

(4) Communications in nonhearing cases to be decided within 30 days under § 300.2(c)(7) of this chapter.

(b) *Public filing.*—(1) A written communication shall be put into the correspondence or other appropriate file of the proceeding, which shall be available for inspection and copying during business hours in the Docket Section or other appropriate office.

(2) An oral communication shall be summarized by the Board employee receiving it. One copy shall be put into a public file as described in paragraph (b)(1) of this section, and another copy shall be mailed to the communicator.

(3) In addition, copies of written communications and oral summaries shall be filed in chronological order in a "Part 300" file maintained in the Public Reference Room.

(c) *Status and expedition requests.* A Board Member who receives a communication asking about the status or requesting expeditious treatment of a public proceeding, other than a communication concerning national defense or foreign policy (including international aviation), shall either:

(1) Refer the communicator to the Office of the Managing Director or the Office of the General Counsel; or

(2) If the Member responds by advising on the status, put a memorandum describing the exchange in the public file as described in paragraph (b)(1) of this section.

§ 300.4 Separation of functions.

A Board employee who is participating in a hearing case on behalf of a bureau or office that is a party, another Board employee who is reviewing that work, or his supervisors within that bureau or office, shall have no substantive communication with any Board Member, administrative law judge in the case, or other Board employee advising them, with respect to that or any factually related hearing case.

§ 300.5 Prohibited conduct.

No person shall: (a) Attempt to influence the judgment of a Board employee by any unlawful means such as deception or the payment of money or other consideration; or

(b) Disrupt or interfere with the fair and orderly disposition of a Board proceeding.

§ 300.6 Practitioners' standards of conduct.

Every person representing a client in matters before the Board, in all contacts with Board employees, should:

(a) Strictly observe the standards of professional conduct;

(b) Refrain from statements or other actions designed to mislead the Board or to cause unwarranted delay;

(c) Avoid offensive or intemperate behavior;

(d) Advise all clients to avoid improprieties and to obey the law as the attorney believes it to be; and

(e) Terminate the professional relationship with any client who persists in improprieties in proceedings before the Board.

§ 300.7 Conciseness.

Every oral or written statement made in a Board proceding shall be a concise as possible. Verbose or redundant presentations may be rejected.

§ 300.8 Gifts and hospitality and other conduct affecting board employees.

(a) No person, otherwise than as provided by law for the proper discharge of official duty, shall directly or indirectly give, offer, or promise anything of value to any Board Member or Board employee for or because of any official act performed or to be performed by such Board Member or Board employee (18 U.S.C. 201).

(b) Subject to Part 370 of the Board's Special Regulations, it is improper for persons interested in the business of the Board to provide hospitality, gifts, entertainment, or favors to any Board Member or Board employee.

(c) Persons interested in the business of the Board should familiarize themselves with Part 370 of the Board's Special Regulations—Employee Responsibilities and Conduct (14 CFR Part 370), in order that they shall not encourage or cause any violation of the provisions of Part 370 by any Board Member or Board employee.

§ 300.9 Permanent disqualification of board members and employees in matters in which they personally participated before joining the board.

Any Board Member or any Board employee shall permanently disqualify himself from participation in every matter before the Board in which he previously personally and substantially participated for an interested person or entity, including other agencies of the U.S. Government, before joining the Board. Such disqualification shall be applicable also if a person closely related to the Board or Board employee as partner, associate, employer, or the like, personally and substantially participated in a matter before the Board prior to the Member's or employee's employment by the Board and the circumstances were such that the Board's Member's or employee's subsequent participation in the matter as a Board Member or employee could fairly be said to create the appearance that his participation would be affected by his prior relationship. Notwithstanding the foregoing, apart from a Member, the disqualification of any Board employee, including any member of a Board Member's personal staff or a special Government employee, whose prior personal and substantial participation in a Board proceeding or whose relationship to one who so participated occurred on behalf of another agency of the U.S. Government shall only be applicable with respect to issues on which the prior governmental employer took a position in the proceeding unless participation could fairly be said to create the appearance that his participation would be affected by his prior relationship.

§ 300.10 Temporary disqualification of board members and employees in matters in which they had official responsibility before joining the board.

Any Board Member and any Board employee shall temporarily disqualify himself from participation in any matter before the Board if he represented, was associated with or was employed by an interested person or entity including other agencies of the United States Government before joining the Board, and, although he did not personally and substantially participate in the matter, the matter was within his "official responsibility," as that term is defined in § 300.14 of this chapter except that the action referred to therein shall be private action as well as "Government" action. Such disqualification shall be applicable also if a person closely related to the Board employee as partner, associate, employer, or the like, who, while not personally and substantially participating in the matter, had it within his "official responsibility" as that term is defined in § 300.14 of this chapter, and modified above, and the circumstances are such that the Board employee's subsequent participation in the matter as a Board employee could fairly be said to create the appearance that his participation would be affected by his prior relationship. Notwithstanding the foregoing, apart from a Board Member, the disqualification of any Board employee whose prior "official responsibility" or relationship to one with such responsibility occurred on behalf of another agency of the United States Government shall only be applicable with respect to issues on which the prior governmental employer took a position in the proceeding. The temporary disqualification shall run for a period of one year from the date of the termination of the representation, association, or employment with the interested person or entity.

§ 300.11 Disqualification of Government officers and employees.

No officer or employee of the Federal Government, other than a "special government employee" as defined in 18 U.S.C. 202, shall represent anyone, otherwise than in the proper discharge of his official duties, in any Board proceeding or matter in which the United States is a party or has a direct and substantial interest. (18 U.S.C. 205.)

§ 300.12 Practice of special Government employees permitted.

A special Government employee, who qualifies as such under the provisions of 18 U.S.C. 202(a), may participate in Board proceedings only to the extent and in the manner specified in 18 U.S.C. 205.

V 42 63 APR 1 77 UMI

§ 300.13 Permanent disqualification of former board members and employees in matters in which they personally participated.

No former Board Member or Board employee shall act as agent or attorney before the Board for anyone other than the United States in connection with any proceeding, application, request for a ruling or other determination, contract, claim, controversy, charge, accusation, or other particular matter involving a specific party or parties in which the United States is a party or has a direct and substantial interest and in which he participated personally and substantially through decision, approval, disapproval, recommendation, rendering of advice, investigation, or otherwise as a Board Member or employee. (18 U.S.C. 207(a).)

§ 300.14 Temporary disqualification of former board members and employees in matters formerly under their official responsibility.

Within one year after termination of employment with the Board, no former Board Member or Board employee shall appear personally before the Board on behalf of any person other than the United States in any Board proceeding or matter in which the United States is a party or has a direct and substantial interest and which was under his official responsibility at any time within one year preceding termination of such responsibility. The term "official responsibility" means the direct administrative or operating authority, whether intermediate or final, and either exercisable alone or with others, and either personally or through subordinates, to approve, disapprove, or otherwise direct Government action (18 U.S.C. 202(b), 207(b)).

§ 300.15 Opinions or rulings by the General Counsel.

(a) The Board's General Counsel is authorized to render opinions or rulings to the public on the application of the provisions of this part. When written request is made for such opinions and rulings, they shall be transmitted to the Board and shall be available to the public in the Public Reference Room after any appeal to or review by the Board has been completed or after the time for review has expired. Identifying details shall normally be stricken from copies available to the public unless the public interest requires disclosure of such details. Absent review by the Board, any opinion or ruling of the General Counsel is not binding on the Board or any future General Counsel.

(b) If any person is disqualified from a particular proceeding under the provisions of §§ 300.9, 300.10, 300.13, 300.14, and 300.17 of this chapter by a ruling of the General Counsel, or by such person's own action, such disqualification shall be memorialized in a writing filed in the appropriate file of the matter by the General Counsel or such person.

(c) The Board may review any opinion or ruling of the General Counsel at its discretion within 25 days from the issuance of such opinion or ruling. Any person affected by an opinion or ruling may file an appeal to the Board within ten days after issuance of such opinion or ruling. Decisions of the Board on review or appeal shall be available to the public. Identifying details shall normally be stricken from copies available to the public unless the public interest requires disclosure of such details.

§ 300.16 Waivers.

(a) A former Board Member or Board employee with outstanding scientific or technological qualifications who is disqualified from acting in a representative capacity under the provisions of §§ 300.13 or 300.14 of this chapter may nevertheless participate in a proceeding in a scientific or technological field pursuant to the terms of a certificate issued in compliance with the proviso following 18 U.S.C. 207 (a) and (b).

(b) An employee who believes his prior employment relationships will not affect the integrity of his services may request that the prohibition of §§ 300.9 or 300.10 of this chapter be waived in accordance with the procedures set forth in § 370.735–14 of this chapter.

§ 300.17 Disqualification of partners of board members and employees.

No partner of a Board Member or of a Board employee shall act as agent or attorney for anyone other than the United States in any Board proceeding or matter in which such member or employee participates or has participated personally and substantially through decision, approval, disapproval, recommendation, rendering advice, investigation, or otherwise, or which is the subject of his official responsibility. (18 U.S.C. 207(c).)

§ 300.18 [Reserved]

§ 300.19 Use of confidential information.

No former Board Member or employee, or any person associated with him, shall ever use or undertake to use in any Board proceeding or matter any confidential facts or information which came into the possession of such Member or employee or to his attention by reason of his employment with the Board without first applying for and obtaining the consent of the Board for the use of such facts or information.

§ 300.20 Violations.

(a) The Board may disqualify, and deny temporarily or permanently the privilege of appearing or practicing before it in any way to, any person who is found by the Board after written notice of charges and hearing to have engaged in unethical or improper professional conduct. Any violation of this part shall be deemed to be such conduct.

(b) When appropriate in the public interest, the Board may deny any application or other request of a party in a proceeding subject to this part where the Board finds after hearing that such party has, in connection with any Board proceeding, violated any of the provisions of this part or any of the provisions of Chapter 11 of Title 18 of the United States Code. The Board may also condition its further consideration of such party's application or other request or the effectiveness of any order granting such application or other request upon such party's first taking such action as the Board may deem necessary or appropriate to remedy the violation of this part or Chapter 11 of Title 18 of the United States Code to prevent or deter any repetition of such violation. The Board may in addition issue a cease and desist order against any repetition of such or similar misconduct.

(c) The actions authorized by this section may take place within the framework of the matter during or concerning which the violations occur or in a separate matter, as the Board or the presiding administrative law judge may direct. A complaint alleging that a violation has occurred in the course of a matter shall be filed in the docket or appropriate public file of such matter unless such complaint is made after the Board's decision of the matter has become final, in which event such complaint may be filed pursuant to Part 302, Subpart B of the Rules of Practice. A violation in the course of a matter which may be attributable to or affect the fitness of a party will ordinarily either be disposed of within the framework of such matter or be considered within the context of any subsequent matter involving the interests of such party. Other violations will ordinarily be disposed of in a separate proceeding.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

Title 20—Employees' Benefits

CHAPTER III—SOCIAL SECURITY ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

[Reg. No. 16]

PART 416—SUPPLEMENTAL SECURITY INCOME FOR THE AGED, BLIND, AND DISABLED

Income and Exclusions

EXCEPTION TO THE ONE-THIRD REDUCTION PROVISION AND INCOME EXCLUSIONS WHEN AN INDIVIDUAL IS AFFECTED BY A MAJOR DISASTER; INTERIM REGULATIONS

Notice is hereby given, pursuant to the Administrative Procedure Act (5 U.S.C. 553), that the Interim Regulations set forth in tentative form below are proposed by the Commissioner of Social Security with approval of the Secretary of Health, Education, and Welfare. The proposed amendments to Sub part K of Part 416 Title 20 of the Code of Federal Regulations (20 CFR), which do not have major program significance, concern the treatment of Federal assistence received by supplemental security income applicants or recipients because of a catastrophe declared by the President to be a major disaster for purposes of the Disaster Relief Act of 1974 (Pub. L. 93–288) or certain support and maintenance (e.g., room and board) received by supplemental security income applicants or recipients when forced from their own households because of such catastrophe. Interested parties will have 45 days after publication to submit their views and comments.

The purpose of these amendments to the regulations is to reflect the provisions of Sections 2 and 4 of Pub. L. 94–331 enacted June 30, 1976, and Section 2125 of Pub. L. 94–455 enacted October 4, 1976. Section 2 of Pub. L. 94–331, which adds Section 1612(b)(11) to the Social Security Act, excludes from income, for purposes of determining eligibility for and amount of supplemental security income benefits, assistance received under the Disaster Relief Act of 1974 or other assistance provided under a Federal statute on account of a catastrophe declared by the President to be a major disaster for purposes of the Disaster Relief Act of 1974. Section 4 of Pub. L. 94–331 and Section 2125 of Pub. L. 94–455, which amend Section 1612(a)(2)(A) of the Social Security Act, provide that any individual (and eligible spouse, if any) who ceases to reside in his own household because of a catastrophe declared by the President to be a major disaster, for purposes of the Disaster Relief Act of 1974, will not have his eligibility for supplemental security income benefits denied or the amount of such benefits reduced on account of any support and maintenance received while living in a residential facility, including the household of another person, if such individual begins living there within 30 days after the disaster occurred. Since under Section 4 of Pub. L. 94–331, the support and maintenance received from any source will not be considered as income, the proposed amendments provide that the one-third reduction provision for individuals living in another person's household, currently in Interim Regulations (see § 416.1125(b) at 40 FR 48937), will not apply until the last day of the seventeenth month after the month in which the individual (or individual and eligible spouse) begins to receive such support and maintenance. In accordance with Section 2 of Pub. L. 94–331, the proposed amendments provide that the assistance received pursuant to the Disaster Relief Act of 1974 or other assistance provided pursuant to Federal statutes on account of a catastrophe which is declared to be a major disaster by the President is not countable income. In accordance with the provisions of Sections 2 and 4 of Pub. L. 94–331, the proposed amendments are effective only with respect to major disasters which occur on or after June 1, 1976, and before December 31, 1976.

These amendments to the regulations are being published with interim effectiveness because they are substantive rules which grant exclusions of certain income effective only with respect to major disasters occurring on or after June 1, 1976, and before December 31, 1976, as required by Sections 2 and 4 of Pub. L. 94–331 and Section 2125 of Pub. L. 94–455. Thus, the Notice of Proposed Rule Making is being dispensed with because a delay in implementing these amendments would be impractical, unnecessary, and contrary to the public interest (5 U.S.C. 553(b)(3)(B)).

If there are any questions concerning these regulations, you may contact Henry D. Lerner, Legal Assistant, 6401 Security Boulevard, Baltimore, Maryland 21235, telephone (301) 594–7336.

Prior to final adoption of these proposed Interim Regulations, consideration will be given to any data, views, or arguments pertaining thereto which are submitted in writing to the Commissioner of Social Security, Department of Health, Education, and Welfare, P.O. Box 1585, Baltimore, Maryland 21203, by May 16, 1977.

Copies of all comments received in response to this notice will be available for public inspection during regular business hours at the Washington Inquiries Section, Office of Information, Social Security Administration, Department of Health, Education, and Welfare, North Building, Room 4146, 330 Independence Avenue, SW., Washington, D.C. 20201.

The Interim Regulations are to be issued under the authority contained in Sections 1102, 1612, and 1631 of the Social Security Act, 49 Stat. 647, as amended, 86 Stat. 1468 and 1475; 42 U.S.C. 1302, 1382a and 1383; Secs. 2 and 4 of Pub. L. 94–331, 90 Stat. 781 and 782, and Sec. 2125 of Pub. L. 94–455, 90 Stat. 1920.

(Catalog of Federal Domestic Assistance Program No. 13.807, Supplemental Security Income Program.)

NOTE.—The Social Security Administration has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A–107.

Dated: February 16, 1977.

J. B. CARDWELL,
Commissioner of Social Security.

Approved: March 28, 1977.

JOSEPH A. CALIFANO, Jr.,
Secretary of Health, Education, and Welfare.

Part 416 of Chapter III of Title 20 of the Code of Federal Regulations is amended as follows:

1. Section 416.1126 is added to read as follows:

§ 416.1126 Unearned income; individuals affected by a major disaster.

The reduction in the payment standard for living in the household of another (as defined in § 416.1125) will not apply in the case of an eligible individual (or eligible individual and eligible spouse) who receives support and maintenance while living in a residential facility (including a private household) maintained by another person, because of a catastrophe which is declared by the President of the United States to be a major disaster for purposes of the Disaster Relief Act of 1974, *Provided:*

(a) The individual (or eligible individual and eligible spouse) was residing in a household maintained by such individual (or by the individual and another person) as his (or their) own household at the time of the disaster;

(b) The disaster occurred on or after June 1, 1976, and before December 31, 1976, within the area in which such household was located;

(c) The individual (or eligible individual and eligible spouse) ceased living in his (or their) own household because of such catastrophe and, within 30 days after the catastrophe, began receiving support and maintenance (as defined in § 416.1125(a)) while living in a residential facility (or private home) maintained by another person; and

(d) The period for which support and maintenance is excluded from income begins no earlier than the month in which the individual (or eligible individual and eligible spouse) began receiving the support and maintenance and ends no later than the earlier of the following dates:

(1) The last day of the month in which the individual (or eligible indlvidual and eligible spouse) ceased to receive such support and maintenance; or

(2) The last day of the seventeenth month following the month in which receipt of such support and maintenance began as described in paragraph (c) of this section.

2. Section 416.1145 is amended by adding paragraph (b)(4–a) to read as follows:

§ 416.1145 Exclusion from income; order of application.

* * * * * *

(b) For the purpose of determining countable income in accordance with § 416.1115, the following income shall be excluded after income described in paragraph (a) of this section:

* * * * * *

(4–a) Disaster relief assistance under the provisions of § 416.1156.

* * * * * *

3. Section 416.1156 is added to read as follows:

§ 416.1156 Assistance received on account of major disaster.

Assistance received under the Disaster Relief Act of 1974 (P.L. 93–288) or other assistance provided under a Federal statute because of a catastrophe which occurred on or after June 1, 1976, and before December 31, 1976, and which is declared to be a major disaster by the President of the United States, shall not be considered in determining countable income under § 416.1115.

Title 32—National Defense

CHAPTER V—DEPARTMENT OF THE ARMY

PART 581—PERSONNEL REVIEW BOARDS

Army Board for Correction of Military Records; Rules of Procedure

AGENCY: Department of the Army, Board for Correction of Military Records.

ACTION: Final Rule.

V4263 APR 1 77 UMI

SUMMARY: (i) The rules of procedure governing the Army Board for Correction of Military Records, 32 CFR 581.3 are amended.

(ii) These changes are made in compliance with the Stipulation of Dismissal in the case of *Urban Law Institute, et al. v. Secretary of Defense, et al.*, U.S.D.C., D.C. Civil Action No. 76-0530, dated 31 January 1977.

(iii) These changes require the Correction Board to prepare a statement of grounds for denial in every case in which the complete relief requested is denied; to furnish such statement to applicant and counsel together with any staff advisory opinions considered by the Board, along with any dissenting opinions; the votes of Board Members to be furnished or made available upon request; all decisions of the Board and/or Secretary will be indexed; the indexed decisions of the Board, after deletion of identifying details of the applicant and other individuals, will be made available at a public reading room on the Concourse of the Pentagon Building.

EFFECTIVE DATE: The amended Rules are effective 1 April 1977 and will apply to all applications pending before the ABCMR on such date as well as to new appeals.

ADDRESS: Army Board for Correction of Military Records, Room 1E-517, The Pentagon, Washington, D.C. 20310.

FOR FURTHER INFORMATION CONTACT:

Raymond J. Williams, Executive Secretary, OX 7-4254.

Dated: March 28, 1977.

RAYMOND J. WILLIAMS,
Executive Secretary, Board for Correction of Military Records.

In consideration of the foregoing and for reasons given by authority of 10 U.S.C. 1552, the rules of procedures of the Army Board for Correction of Military Records, 32 CFR Part 581 is amended by revising §§ 581.3(c)(5)(iii); 581.3(f)(1)(i)(c); 581.3(f)(2) and (f)(3)(ii) and by adding new §§ 581.3(c)(5)(iv thru vi); 581.3(f)(3)(ii)(*a*) and (*b*) and 581.3(h)(4) as follows:

§ 581.3 Army Board for Correction of Military Records.

* * * * * *

(c) * * *

(5) * * *

(iii) All requests for further consideration may be initially screened by the staff of the Board to determine whether any evidence or other matter (including, but not limited to, any factual allegations or any arguments why the relief should be granted) has been submitted by the applicant that was not in the record at the time of any prior Board consideration. If such evidence or other matter has been submitted, the request will be forwarded to the Board for a determination in accordance with this paragraph. If no such evidence or other matter has been submitted, the applicant will be informed that his/her request was not considered by the Board because it did not contain any evidence or other matter that was not in the record at the time of any previous Board consideration.

(iv) When an original application or a request for further consideration of a previously denied application is denied without a hearing, the Board's determination shall be made in writing and include a brief statement of the grounds for denial.

(v) The brief statement of the grounds for denial shall include the reasons for the determination that relief should not be granted, including the applicant's claims of constitutional, statutory and/or regulatory violations rejected, together with all essential facts upon which the denial is based, including, if applicable, factors required by regulation to be considered for determination of the character of and reasons for a discharge. Attached to the statement shall be any advisory staff opinions considered by the Board not fully set forth in the statement and any minority opinions. Counsel and applicant will be informed that the name and final vote of Board members will be furnished or made available upon request.

(vi) The brief statement of the grounds for denial, together with all attachments, shall be furnished promptly to applicant and counsel. Classified or privileged material contained in or attached to the statement of grounds for denial may be deleted only if a written statement of the basis for the deletion is provided the applicant and counsel.

* * * * * *

(f) *Action on applications*—(1) *Actions by the Board*—

(i) * * *

(c) Following a hearing, the Board will make written findings, conclusions, and recommendations. The name and final vote of each Board member will be recorded. A majority vote of the members present on any matter before the Board will constitute the action of the Board and will be so recorded.

* * * * * *

(2) *Action by Secretary of Army.* The record of proceedings of the Board, except in cases finalized by the Board under authority delegated in paragraph (f)(1)(v) of this section or those denied the Board without a hearing, will be forwarded to the Secretary of the Army who will direct such action in each case as he determines to be appropriate, which may include the return of the record to the Board for further consideration when deemed necessary. If the Secretary's decision is to deny relief, such decision shall be in writing and, unless he expressly adopts in whole or in part the findings, conclusions and recommendation of the Board, shall include a brief statement of the grounds for denial. See paragraph (c)(5)(v) of this section.

(3) *Staff action.* (i) * * *

(ii) Upon receipt of the record of proceedings after final action by the Secretary of the Army, or by the Board acting under the authority contained in paragraph (f)(1)(v) of this section, the Board will communicate the decision to the applicant and counsel.

(*a*) If the recommendation of the Board was to deny relief or if the final decision of the Secretary or the Board was to deny relief, the following material will be made available to the applicant and counsel:

(*1*) a statement of the findings, conclusions and recommendations made by the Board;

(*2*) any advisory staff opinions considered by the Board or the reviewing authority;

(*3*) the name and final vote of each Board member;

(*4*) any minority reports; and

(*5*) any material prepared by the Secretary of the Army as required in paragraph (f)(2) of this section. To the extent that any of the above material consists of classified or otherwise priviledged matters, deletions may be made only if a written statement of the basis therefore is provided the applicant and counsel.

(*b*) If the final decision was other than to deny relief, the applicant and counsel are entitled, upon request, to receive a copy of the Board's findings, conclusions and recommendations.

* * * * * *

(h) *Miscellaneous.* * * *

(4) *Index of Cases.* Documents sent to each applicant and counsel in accordance with paragraph (c)(5)(v) and (f)(3) of this section, together with the record of the votes of board members and all other statements of findings, conclusions and recommendations made on final determination of an application by the Board or the Secretary of the Army will be indexed and promptly made available for public inspection and copying at a reading room within the Washington, D.C. metropolitan area.

(i) The index prepared shall be in a usable and concise form so as to indicate the grounds for which the Board and/or Secretary granted or denied relief. This index shall be published quarterly and shall be distributed by sale or otherwise. In addition, it shall be available for inspection and distribution at the reading room in the Washington, D.C. area.

(ii) Deletions. To the extent necessary to prevent a clearly unwarranted invasion of personal privacy, identifying details of the applicant and other persons will be deleted from the documents made available for public inspection and copying. Names, addresses, social security numbers and military service numbers must be deleted. Deletions of other information which may result in a clearly unwarranted invasion of personal privacy or which is privileged or classified may be made only if a written statement of the basis for such deletion is made available for public inspection.

Title 39—Postal Service

CHAPTER I—U.S. POSTAL SERVICE

PART 232—POSTAL LOSSES AND OFFENSES

Conduct With Regard to Meetings of the Board of Governors

AGENCY: United States Postal Service.

ACTION: Final Rule.

SUMMARY: This notice announces the amendment of Postal Service regulations to establish rules of conduct with regard to meetings of the Board of Governors of the Postal Service. Opening meetings of the Board to public observation under the Government in the Sunshine Act makes it necessary to establish rules governing decorum at Board meetings, as well as penalties for persons who violate those rules.

DATES: Effective date: April 1, 1977.

ADDRESSES: Secretary of the Board of Governors, U.S. Postal Service, Room 9150, 475 L'Enfant Plaza West, S.W., Washington, D.C. 20260.

FOR FURTHER INFORMATION CONTACT:

James French, (202) 245-4601.

SUPPLEMENTAL INFORMATION: On February 23, 1977, the Postal Service published for public comment in the FEDERAL REGISTER (42 FR 10699) a notice of proposed rulemaking adding a new paragraph (n) to 39 CFR 232.6 which would specifically prohibit certain types of conduct with regard to meetings of the Postal Service Board of Governors. Members of the public were invited to submit comments concerning the proposed regulation.

Subsequent to publication of this proposed rule, the Postal Service reconsidered the matter of electronic recording by the public during Board meetings and concluded that it was unnecessary and impracticable to forbid members of the public to record or photograph portions of meetings of the Board which are open to public observation. Accordingly, paragraph (n)(1) was revised to permit members of the public to record or photograph meetings as long as that action does not impede or disturb the Board or individuals attending a meeting. The one comment from the public also suggested this amendment.

In view of the considerations discussed, the Postal Service hereby adopts, as amended, the following amendment to title 39, Code of Federal Regulations, effective April 1, 1977:

In 39 CFR 232.6, redesignate paragraphs (n) and (o) as "o" and "(p)" respectively, and insert new paragraph (n) as follows:

§ 232.6 Conduct on postal property.

* * * * * *

(n) *Conduct with regard to meetings of the Board of Governors.* (1) Without the permission of the chairman no person may participate in, film, televise, or broadcast any portion of any meeting of the Board or any subdivision or committee of the Board. Any person may electronically record or photograph a meeting, as long as that action does not tend to impede or disturb the members of the Board in the performance of their duties, or members of the public while attempting to attend or observe a meeting.

(2) Disorderly conduct, or conduct which creates loud or unusual noise, obstructs the ordinary use of entrances, foyers, corridors, offices, meeting rooms, elevators, stairways, or parking lots, or otherwise tends to impede or disturb the members of the Board in the performance of their duties, or members of the public while attempting to attend or observe a meeting of the Board or of any subdivision, or committee of the Board, is prohibited.

(3) Any person who violates paragraph (n)(1) or (2) of this section may, in addition to being subject to the penalties prescribed in paragraph (o) of this section, be removed from and barred from reentering postal property during the meeting with respect to which the violation occurred.

(4) A copy of the rules of this section governing conduct on postal property, including the rules of this paragraph appropriately highlighted, shall be posted in prominent locations at the public entrances to postal property and outside the meeting room at any meeting of the Board of Governors or of any subdivision or committee of the Board.

* * * * * *

(39 U.S.C. 401; 40 U.S.C. 318, 318a, 318b, 318c.)

LOUIS A. COX,
General Counsel.

[FR Doc.77-9751 Filed 3-31-77;8:45 am]

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

SUBCHAPTER E—PESTICIDE PROGRAMS

[OPP-260026; FRL 707-2]

PART 180—TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

Update and Editorial Amendments

AGENCY: Office of Pesticide Programs, Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rulemaking document changes the title of a section heading and editorially revises a current regulation.

EFFECTIVE DATE: April 1, 1977.

FOR FURTHER INFORMATION CONTACT:

Jan D. Wine, Federal Register Section, Technical Services Division (WH-569), Office of Pesticide Programs, EPA, 401 M St. SW., Washington, D.C. 20460 (202/755-4854).

SUPPLEMENTARY INFORMATION: As announced on October 27, 1976 (41 FR 47076), the EPA is reformatting the pesticide tolerance regulations contained in 40 CFR Part 180. The current narrative paragraphs are being put into alphabetized columar listings for the purpose of providing orderly development of and/or amendments to the regulations, furnishing ample room for expansion in the years ahead, and providing the public and affected parties with regulations that are easier to read. In addition to editorial revisions, certain sections are being amended by substituting acceptable common names for antiquated and unacceptable pesticide chemical names where appropriate, and the regulations are being updated and corrected where necessary.

Section 180.328 is being amended at this time. The chemical name used in the section title and the body of the regulation is being revised to reflect the most universally acceptable name (i.e., formerly (2-*a*-Haphthoxy)-*N*,*N*-diethylpropionamide, now, N,N-Diethyl-2-(1-naphthalenyloxy) propionamide). The safety of the negligible residues in the current regulation has been demonstrated in 90-day dog and rat feeding studies. Since the current tolerances are not supported by long-term data, the negligible residue designators cannot be removed at this time.

Since these changes are nonsubstantive in nature and merely reflect the corrected and updated record, notice and public rulemaking procedures pursuant to the Administrative Procedure Act [5 U.S.C. 553(b)(B)] are not prerequisite to the promulgation of this regulation. Therefore, effective on April 1, 1977, 40 CFR 180.328 is amended by revising the section in its entirety to read as set forth below.

Dated: March 25, 1977.

EDWIN L. JOHNSON,
Deputy Assistant Administrator for Pesticide Programs.

§ 180.328 N,N - Diethyl-2-(1-naphthalenyloxy)-propionamide; tolerances for residues.

Tolerances are established for negligible residues (N) of the herbicide N,N-Diethyl-2-(1-naphthalenyloxy) propionamide in or on the following raw agricultural commodities:

Commodity:	Parts per million
Almonds, hulls	0.1 (N)
Figs	0.1 (N)
Fruits, citrus	0.1 (N)
Fruits, pome	0.1 (N)
Fruits, small	0.1 (N)
Fruits, stone	0.1 (N)
Nuts	0.1 (N)
Vegetables, fruiting	0.1 (N)

* * * * * *

SUBCHAPTER N—EFFLUENT GUIDELINES AND STANDARDS

[FRL 707-4]

PART 415—INORGANIC CHEMICALS MANUFACTURING POINT SOURCE CATEGORY

Specialized Definitions; Suspension

On Tuesday, November 23, 1976, regulations were published in the FEDERAL REGISTER establishing interim final specialized definitions for the Inorganic Chemicals Manufacturing Point Source

V4263 APR 1 77 UMI

Category (41 FR 51598). These regulations were published in partial response to a remand of certain of the regulations applicable to the Category in *DuPont* v. *Train*, 541 F. 2d 1018 (4th Cir. 1976); aff'd in part, rev'd in part, *DuPont* v. *Train*, — U.S. —, No. 75–978 (February 23, 1977).

The specialized definitions promulgated by the Agency were to be applicable to the 11 subcategories remanded by the Court. However, EPA has not completed its review of technical and other material necessary to promulgate revised effluent limitations for those subcategories. Accordingly, commenters have recommended that EPA not make the specialized definitions effective until effluent limitations can be promulgated along with them. In that way, the definitions can be evaluated in the context of the substantive regulations to which they pertain. Several commenters have filed a petition for review of the definitions in the United States Court of Appeals for the Fourth Circuit. *DuPont, et al.* v. *Quarles*, No. 77–1206.

EPA agrees with these commenters. The Agency will proceed as quickly as practicable to gather the information necessary to promulgate revised regulations for the remanded subcategories. Until such promulgation, however, the specialized definitions should be suspended.

In consideration of the foregoing, 40 CFR Part 415 is hereby amended as set forth below.

Date: March 24, 1977.

DOUGLAS M. COSTLE,
Administrator.

Subpart F—Chlorine and Sodium or Potassium Hydroxide Production Subcategory

§ 415.61 [Amended]

1. In § 415.61, paragraphs (e), (f), (g), and (h) are suspended.

Subpart G—Hydrochloric Acid Production Subcategory

§ 415.71 [Amended]

2. In § 415.71 paragraphs (b), (c), (d), and (e) are suspended.

Subpart H—Hydrofluoric Acid Production Subcategory

§ 415.81 [Amended]

3. In § 415.81, paragraphs (b), (c), (d), and (e) are suspended.

Subpart I—Hydrogen Peroxide Production Subcategory

§ 415.91 [Amended]

4. In § 415.91, paragraphs (d), (e), (f), and (g) are suspended.

Subpart J—Nitric Acid Production Subcategory

§ 415.101 [Amended]

5. In § 415.101, paragraphs (b), (c), (d), and (e) are suspended.

Subpart O—Sodium Carbonate Production Subcategory

§ 415.151 [Amended]

6. In § 415.151, paragraphs (c), (d), (e), and (f) are suspended.

Subpart Q—Sodium Dichromate and Sodium Sulfate Production Subcategory

§ 415.171 [Amended]

7. In § 415.171, paragraphs (e), (f), (g), and (h) are suspended.

Subpart R—Sodium Metal Production Subcategory

§ 415.18 [Amended]

8. In § 415.181, paragraphs (c), (d), (e), and (f) are suspended.

Subpart S—Sodium Silicate Production Subcategory

§ 415.191 [Amended]

9. In § 415.191, paragraphs (c), (d), (e), and (f) are suspended.

Subpart U—Sulfuric Acid Production Subcategory

§ 415.211 [Amended]

10. In § 415.211, paragraphs (b), (c), (d), and (e) are suspended.

Subpart V—Titanium Dioxide Production Subcategory

§ 415.221 [Amended]

11. In § 415.221, paragraphs (d), (e), (f), and (g) are suspended.

[FR Doc.77–9684 Filed 3–31–77;8:45 am]

[FRL 708–1]

PART 421—NONFERROUS METALS MANUFACTURING POINT SOURCE CATEGORY

Extension of Comment Period and Notice of Availability

On December 15, 1976 the Environmental Protection Agency published a notice of interim final rulemaking (41 FR 54850) establishing pretreatment standards for existing sources for the nonferrous metals manufacturing point source category, based upon use of best practicable pretreatment technology. The due date for comments provided in the notice was February 14, 1977.

The Agency anticipated that the documents entitled "Supplemental for Pretreatment to the Development Document for the Secondary Aluminum Segment of the Nonferrous Metals Manufacturing Point Source Category," and "Supplemental for Pretreatment to the Development Document for the Secondary Copper Segment of the Nonferrous Metals Manufacturing Point Source Category," which contain information on the analysis undertaken in support of the regulation would be available to the public throughout the comment period. Production difficulties delayed the availability of these documents. Copies of the documents are now available and have been forwarded to those persons having submitted written requests to the Environmental Protection Agency. A limited number of additional copies are available for distribution from the Environmental Protection Agency, Effluent Guidelines Division, Washington, D.C. 20460, Attention: Distribution Officer, WH–552.

Accordingly, the date for submission of comments is hereby extended to May 31, 1977.

Dated: March 22, 1977.

ANDREW W. BREIDENBACH,
Assistant Administrator for Water and Hazardous Materials.

[FR Doc.77–9833 Filed 3–31–77;8:45 am]

Title 45—Public Welfare

CHAPTER I—OFFICE OF EDUCATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

PART 103—RESEARCH AND TRAINING, EXEMPLARY AND CURRICULUM DEVELOPMENT PROGRAMS IN VOCATIONAL EDUCATION

Vocational Education Research; Additional Criteria

On November 30, 1976, a notice of proposed rulemaking was published in the FEDERAL REGISTER at 41 FR 52540–52543 which set forth additional criteria for the selection of applicants for fiscal year 1977 under Part C of the Vocational Education Act, as amended, 20 U.S.C. 1231(a). The additional criteria were set forth in a revision of Appendix B to Part 103. The General Provisions Regulations (45 CFR Part 100a), published in the FEDERAL REGISTER on November 6, 1973 at 38 FR 30654 and effective December 6, 1973, are also applicable to these grants.

Interested persons were given 45 days after November 30, 1976 to submit comments, suggestions, or objections to the proposed criteria. One letter was received during the 45 day comment period.

COMMENT

The commenter suggested inclusion of specific statements into each of the eight proposed priority areas regarding the concern for girls and women, and sex-bias and sex-role stereotyping. Also, the commenter suggested that signed assurances of compliance should be required under Titles VI and IX of the Department of Health, Education, and Welfare regulations.

RESPONSE

No change is made regarding the recommendation that additional specific phrases relating to girls and women and elimination of sex-bias and sex-role stereotyping be added to each of the eight proposed priority areas for the following reasons. First, one of the eight priority areas is concerned directly with sex-bias and sex-role stereotyping. Second, the proposed regulations indicate that applications in each of the eight priority areas must effectively demonstrate plans to eliminate sex-bias in all aspects of the proposed work. Third, the application Review Criteria include a weighted criterion which is concerned with sex-bias and sex-role stereotyping. Fourth, each proposed priority area contained a statement indicating that the specific topics listed under each priority area were only examples of the type of activities that might be addressed by applicants; an applicant has the prerogative of proposing projects that are concerned with reducing sex-bias and sex-role stereotyping within each of the proposed priority areas. Consequently, it would be redundant to incorporate such statements into each of the eight proposed priority areas. The application package for the Vocational Education Research Program contains an assurance form which must be completed by each applicant under the regulations of Title VI of the Civil Rights Act of 1964. However, the Department of Health, Education, and Welfare did not have the assurance of compliance forms available for Title IX at the time that the Vocational Education Research program application package was approved by the Office of Management and Budget. While all applicants will not be asked to sign the Title IX form, successful applicants will be required to sign the Title IX form as part of the negotiation of award process.

For further information, contact Dr. Glenn C. Boerrigter, Bureau of Occupational and Adult Education, Division of Research and Demonstration, Room 5018, Regional Office Building No. 3, 7th and D Streets, SW., Washington, D.C. 20202 (202–245–2467).

EFFECTIVE DATE

Pursuant to section 431(d) of the General Education Provisions Act, as amended, (20 U.S.C. 1232(d)) these regulations have been transmitted to Congress concurrently with the publication in the FEDERAL REGISTER. That section provides that regulations subject thereto shall become effective on the forty-fifth day following the date of such transmission, subject to the provisions therein concerning Congressional action and adjournment.

NOTE.—The Office of Education has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A–107.

(Catalog of Federal Domestic Assistance No. 13.498; Vocational Education Research.)

Dated: February 17, 1977.

WILLIAM F. PIERCE,
Acting U.S. Commissioner of Education.

Approved: March 28, 1977.

JOSEPH A. CALIFANO, Jr.
Secretary of Health, Education, and Welfare.

APPENDIX B—RESEARCH PROJECTS IN VOCATIONAL EDUCATION ADDITIONAL CRITERIA FOR THE FISCAL YEAR 1977

In awarding grants in fiscal year 1977 from funds available under section 131(a) of Part C of the Vocational Education Act, the Commissioner of Education will give consideration to applications concerned with the substance of vocational education as defined in the Act which rank high on the basis of the criteria in 45 CFR 100a.26(a), with priority consideration to those applications which propose research, development, and dissemination projects in the priorities described below.

Each priority area is considered of equal importance irrespective of its place in the following list. The Commissioner of Education may give consideration to projects of national, regional, or interstate significance in the following priority areas.

The Commissioner of Education is interested in disseminating the results of projects that show effectiveness after being rigorously conducted and tested in controlled settings. Applications should include a plan for wide dissemination of proposed project results, products or outcomes. Provisions should be made for effective dissemination of the results, products, and outcomes during the proposed project duration.

In those instances where the results, products, or outcomes cannot be disseminated during the life of the proposed project, the project results, products, and outcomes should be prepared in a format that is conducive to wide dissemination. This format should include data regarding the validity and reliability of the results, products or outcomes.

Applications in each of the following eight priority areas must effectively demonstrate plants to eliminate sex bias in all aspects of the proposed work.

(a) *Equal access and opportunities.* Equal access and opportunity in vocational education should be provided for all youth and adults who have a need or desire for such education. Strategies and programs that facilitate equal access and opportunity need to be developed or improved and barriers which retard equal access and opportunity.

The Commissioner of Education is interested in supporting applied studies and development projects that document the effectiveness of the results, products or outcomes of the projects. Equal access and opportunities for vocational education is especially important for persons of limited English speaking ability, the disadvantaged, the handicapped, and minority populations in rural and urban areas. The items listed below are examples of activities that may be addressed by applicants.

(1) Identify, describe, and evaluate existing strategies, or design, develop, and test new strategies for increasing equal access and opportunities for students seeking vocational education programs, and

(2) Identify, describe, and evaluate existing strategies, or design, develop, and test new strategies both within and outside of educational institutions that will attract groups that have not previously sought vocational education opportunities.

(b) *Sex role stereotyping and sex bias.* Continuing inequities, public concern, and national legislation have emphasized the need to eliminate sex role stereotyping and sex bias in vocational education at the secondary, postsecondary and adult education levels. Strategies and programs that facilitate the elimination of sex role stereotyping and sex bias in vocational education need to be developed or improved, and a better understanding of the barriers and constraints which retard the elimination of sex role stereotyping and sex bias in vocational education is needed.

The Commissioner of Education is interested in supporting applied studies and development projects that document the effectiveness of the results, products, or outcomes of the projects. The items listed below are examples of activities that may be addressed by applicants.

(1) Identify, describe, and evaluate existing elements of vocational education programs and their related services that facilitate the elimination of sex role stereotyping and sex bias in these programs.

(2) Identify, describe, and evaluate existing instruments or design, develop, and test new instruments that can be used by teachers in identifying sex bias and sex role stereotyping in curriculum and instructional materials, and

(3) Identify, describe, and evaluate existing strategies, or design, develop, and test new strategies that facilitate the reentry of persons, especially women; into vocational education programs.

(c) *Education and work programs.* Education and work programs are being more widely utilized across the nation to facilitate the transition of learners to the world of work. Those who are designing, developing and installing education and work programs need more information, options, and tested strategies in order to better utilize and coordinate the resources of business, labor, industry, education, and government.

The Commissioner of Education is interested in supporting applied studies and development projects that document the effectiveness of the results, products, or outcomes of the projects. The items listed below are examples of activities that may be addressed by applicants.

(1) Identify, describe, and evaluate existing education and work programs, or design, develop, and test new education and work programs,

(2) Identify, describe, and analyze the barriers to student observation of occupations that are included as hazardous occupations under the Child Labor provisions of the Fair Labor Standards Act in existing education and work programs, or design, develop, and test new strategies for students 14–18 years of age to observe these hazardous occupations in education and work programs.

(3) Identify and describe the skill and knowledge requirements for coordinators of non-paid education and work programs, and design, develop, and test preservice and in-service training materials for use in training the coordinators for these programs, and

(4) Identify, describe, and evaluate the assumptions and benefits of education and work programs to the sectors that are involved in these programs.

(d) *Adult and postsecondary vocational education.* Adult and postsecondary vocational education programs have been increasing in size and scope. There is need to improve these programs and to better serve the vocational needs of adults.

The Commissioner of Education is interested in supporting applied projects that document the effectiveness of the results, products or outcomes of the projects. The items listed below are examples of activities that may be addressed by applicants.

(1) Identify, describe, and evaluate existing competency based vocational training materials for adults in occupational areas where there is significant labor demand, or develop and test new training materials that are competency based, intensive, and of short duration,

(2) Identify, describe, and evaluate existing vocational education programs that are coordinated with the adult performance level competency based approach, or develop and test new vocational education programs that utilize the adult performance level competency based approach,

(3) Identify, describe, and evaluate existing vocational education programs that are designed to help under educated adults who desire mid-career occupational changes, or develop and test new programs that are designed to help under educated adults with mid-career occupational changes,

(4) Identify, describe, and evaluate existing methods of linking vocational education at the post-secondary level with CETA programs, business, industry, labor, and adult education, or develop and test new vocational education programs that link voca-

V42163 APR 1 77 UMI

tional education at the post-secondary level with CETA programs, business, industry, labor, and adult education programs, and

(5) Identify, describe, and evaluate existing curriculums concerned with environmental quality and energy conservation, or develop new competency based curriculum and instructional materials for use in post-secondary vocational and education programs that are concerned with environmental quality and energy conservation.

(e) *Curriculum management and instructional materials.* Curriculum management and instructional materials are an especially important component of vocational education. A better understanding of curriculum management, the use of instructional materials, and methods of developing instructional materials is needed.

The Commissioner of Education is interested in supporting applied studies and development projects that document the effectiveness of the results, products or outcomes of the projects. The items listed below are examples of activities that may be addressed by applicants.

(1) Identify, describe, and evaluate existing methods of utilizing teacher and other professional input into the planning, development, and testing of curriculum and instructional materials, or develop and test new strategies for utilizing teacher and other professional inputs into planning, developing, and testing curriculum and instructional materials,

(2) Identify, describe, and evaluate existing methods of teacher selection of instructional materials or develop and test new methods of teacher selection of instructional materials,

(3) Identify, describe, and evaluate existing standards for developing curriculum and instructional materials or design, develop, and test new standards for developing quality curriculum and instructional materials,

(4) Identify, describe, and evaluate existing strategies for developing and testing curriculum and instructional materials on a cost effective basis, or design, develop and test new strategies for developing and testing curriculum and instructional materials on a cost effective basis, and

(5) Identify, describe, and evaluate existing curriculum management practices at the State and local levels, or design, develop, and test new curriculum management practices at the State and local levels.

(f) *Personnel development for vocational education.* While there is a surplus of educational personnel in the nation, vocational education continues to have shortages of trained personnel in many occupational areas. Strategies are needed to improve the competencies and increase the numbers of available vocational education teachers.

The Commissioner of Education is interested in supporting applied studies and development projects that document the effectiveness of the results, products, or outcomes of the projects. The items listed below are examples of activities that may be addressed by applicants.

(1) Identify, describe, and evaluate existing strategies for recruiting, selecting, and training non-vocational teachers in occupational areas where teacher shortages exist, or design, develop and test new strategies for recruiting, selecting and training non-vocational teachers for occupational areas where teacher shortages exist,

(2) Identify, describe, and evaluate existing strategies for recruiting, selecting, and training vocational education teachers from occupational areas where a surplus of teachers exists for occupational areas where teachers shortages exist, or design, develop, and test new strategies for recruiting, selecting and training such teachers,

(3) Identify, describe, and evaluate existing instruments that measure the effectiveness of preservice field experiences for vocational teachers at the secondary or postsecondary levels, or design, develop and test new instruments for measuring the effectiveness of preservice education field experience for vocational teachers at the secondary or post-secondary levels, and

(4) Identify, describe, and evaluate existing preservice vocational teacher education and training programs in terms of teacher needs in contrast to the training being received, or design, develop, and test new preservice teacher training programs that meet current teacher needs.

(g) *Comprehensive systems of guidance, counseling, placement, and follow-through.* Comprehensive systems of guidance, counseling, placement, and follow-through, are needed to meet career development, vocational education and employment needs of students, out-of-school youth, and adults. Further refinements, development, and evaluation are needed to improve comprehensive systems of guidance, counseling, placement, and follow-through services for vocational education.

The Commissioner of Education is interested in supporting applied studies and development projects that document the effectiveness of the results, products, or outcomes of the projects. The items listed below are examples of activities that may be addressed by applicants.

(1) Identify, describe, and evaluate existing community based, guidance, counseling, placement, and follow-through centers that augment existing guidance, counseling, placement, and follow-through services in vocational programs at the secondary and postsecondary levels, or design, develop, and test the educational specifications for community based guidance, counseling, placement, and follow-through centers that provide services to out-of-school youth and adults as a means of augmenting existing school based services. The design and specification should include staff qualifications, center operations, numbers to be served, assumptions for such centers, coordination and utilization of community resources, and projected cost for both developing and operating such centers,

(2) Identify, describe, and evaluate existing methods and models for upgrading on a continuous basis the required knowledge and competencies of those who participate in the conceptualization, planning, implementation, conduct, and evaluation of comprehensive systems of guidance, counseling, placement, and follow-through activities, or develop and test new methods and models for upgrading on a continuous basis the required knowledge and competencies of those who participate in the conceptualization, planning, implementation, conduct, and evaluation of comprehensive systems of guidance, counseling, placement and follow-through activities. The models should include relationships to differentiated staff utilization and certification standards.

(3) Identify, describe, and evaluate existing standards, criteria, procedures, and instruments for evaluating the effectiveness of comprehensive systems of guidance, counseling, placement and follow-through, or develop and test new standards, criteria, procedures, and instruments for evaluating the effectiveness of comprehensive systems of guidance, counseling, placement and follow-through, and

(4) Identify, describe, and evaluate existing State and local planning models for comprehensive systems of guidance, counseling, placement, and follow-through which foster their inclusion and implementation in broad plans for elementary, secondary, post-secondary, and adult levels, or develop and test new State and local planning models for comprehensive systems of guidance, counseling, placement and follow-through services.

(h) *Administration of vocational education at the State and local levels.* Administrators of vocational education at the State and local levels are confronted with increasingly complex issues. There is a need to improve preservice and inservice training for these administrators and to develop better administrative tools for their use.

The Commissioner of Education is interested in supporting applied studies and development projects that document the effectiveness of the results, products or outcomes of the projects. The items listed below are examples of activities that may be addressed by applicants.

(1) Identify, describe, and evaluate existing inservice or preservice training programs that are designed to improve the administrative competencies for those persons who use management information systems for decision making, policy analyses, and planning purposes.

(2) Identify, describe, and evaluate existing inservice or preservice training programs that are designed to improve the competencies of administrators to work more effectively with the vocational needs of members of minority groups, females, persons in correctional systems, and persons of limited English speaking ability, or develop and test new inservice and preservice training programs that are competency oriented and are designed to improve the administrators' skills in working more effectively with the vocational needs of members of minority groups, females, persons in correctional institutions, and persons with limited English speaking ability, and

(3) Identify, describe and evaluate existing needs assessment instruments and procedures for use by State or local vocational education administrators, or design, develop, and test new needs assessment instruments and procedures for use by State or local vocational education administrators.

APPLICATION REVIEW CRITEREA

The following criteria will be utilized in reviewing formally transmitted applications. These criteria are consistent with § 100a.26, review of Applications, in the Office of Education General Provisions for Programs, published in the FEDERAL REGISTER on November 6, 1973. A segment or segments of an application should address each criterion. Each criterion is weighted and includes the maximum score that can be given to an application in relation to the criterion. The maximum score for the criteria total 100 points and the maximum weight for each criterion is listed below.

Applications that receive less than 40 points will not be funded. Applications that do not addrss the previously described priority areas are eligible for consideration in this competition, if the substance of the application is within the definition of the Vocational Education Act of 1963, as amended.

1. *Priority area.* (Maximum 10 points)

The application is adequately focused on the need of the priority area as announced in the FEDERAL REGISTER and the application further delineates the priority area or component of a priority area.

2. *Literature review.* (Maximum 6 points)

The literature review is sufficiently comprehensive to:

(a) Establish the basis for the problem;

(b) Describe the problem in contrast to the symptoms of the problem;

(c) Provide a strong conceptual framework for the proposed objectives and proposed plan, including the general design and specific procedures of the proposed plan, along with the management, evaluation, dissemination, and training procedures (when appropriate); and

(d) Describe what has been done previously to alleviate the problem and point out the gaps that will be alleviated by this specific proposed work.

3. *Need and problem.* (Maximum 10 points)

The need and problem section follows the literature review and clearly:

(a) Describes the need in vocational education for the proposed project;

(b) Provides specific evidence of the need;

(c) Indicates specifically who or what will be helped;

(d) Describes the problem rather than symptoms of the problem; and

(e) Describes, where appropriate, ongoing and planned activities in the community relative to the need and problem.

4. *Objectives.* (Maximum 5 points)

The objectives flow from the description of the problem and are:

(a) Significant for vocational education;

(b) Clearly describe proposed project outcomes;

(c) Capable of being attained; and

(d) Measurable.

5. *Plan.* (Maximum 20 points)

The plan clearly describes how the objectives will be accomplished by:

(a) The overall design for the proposed project;

(b) The specific procedures of each segment of the design in terms of how each objective will be undertaken and accomplished. Normally, the plan will include:

(1) Precise definition of terms;

(2) Description of the characteristics and number of subjects;

(3) Sampling procedures and control groups;

(4) Instrumentation; and

(5) Statistical and analytical procedures.

6. *Management plan.* (Maximum 8 points)

The management plan adequately describes how and when personnel and resources will be utilized to accomplish each objective, the overall design, and each major procedure.

7. *Evaluation plan.* (Maximum 10 points)

The plan includes valid instruments and rigorous procedures for assessing and documenting the impact of project results and end products or outcomes in terms of the achievement of project goals and objectives.

8. *Results, end products, outcomes and dissemination.* (Maximum 10 points)

The application clearly describes:

(a) What will be delivered to the government;

(b) The format in which the results, products, or outcomes will be delivered to the government;

(c) The format in which results, products, or outcomes will be developed or provided for transportability purpoees to specified user populations, and

(d) The procedures for the dissemination of the results, end products or outcomes at the local, State, and/or National levels.

9. *Applicant's staff competencies and experience.* (Maximum 8 points)

The application clearly describes:

(a) The name and qualification (including project management qualifications) of the project director, key professional staff, advisory groups, and any consultants;

(b) Time commitments planned for the project by the project director, key staff, advisory groups, and any consultants.

(c) Evidence of past and successful experience of the proposed project director and key staff members in similar or related projects.

(d) The competencies that are required for the proposed project;

(e) Evidence that the proposed project director was instrumental in preparing the application; and

(f) Evidence of commitment to employment opportunities under Title IX of the Education Amendments of 1972.

10. *Budget and cost-effectiveness.* (Maximum 4 points)

The application provides a justifiable and itemized statement of cost which is substantiated by line items in the proposed budget and appears to be cost-effective with respect to proposed results, products, or outcomes.

11. *Institutional capability and commitment.* (Maximum 4 points)

The application provides adequate evidence of:

(a) Institutional experience and commitment to the proposed work:

(b) Provides appropriate facilities and equipment; and

(c) Provides documented assurance of support from cooperating agencies, local educational agencies or postsecondary institutions, business, industry and labor. If these are necessary for successful implementation of the project.

12. *Sex bias and sex role stereotyping.* (Maximum 5 points)

The application provides appropriate plans to eliminate sex bias and sex role stereotyping in the:

(a) Proposed plans;

(b) Proposed management plan; and

(c) Proposed results, end products, outcomes, and dissemination.

The criteria listed in this section shall be the only criteria that the Commissioner, the Commissioner's staff, or any other Federal or non-Federal reviewer may utilize in reviewing applications with the exceptions noted below. In addition to the criteria listed above, the U.S. Commissioner of Education and his staff may utilize the following criteria in making decisions regarding whether or not to fund officially transmitted applications. These criteria are not weighed since they are part of administrative decisions that may have to be utilized in exceptional instances in the administration of discretionary grant programs. These criteria are listed below:

1. Duplication of effort.

2. Duplication of funding.

3. Evidence that an applicant has not performed satisfactorily in previous years.

4. Cost sharing is required by all applicants.

5. State board approval is required for applications from local educational agencies.

6. Application has been sent to the State director of vocational education.

7. Signed assurance of compliance with the Department of Health, Education, and Welfare regulation under Title VI, and

8. Signed protection of Human Subject Certification Form Number HEW 596.

Title 18—Conservation of Power and Water Resources

CHAPTER I—FEDERAL POWER

SUBCHAPTER A—GENERAL RULES

[Docket No. RM 77-15; Order No. 564]

PART 3—ORGANIZATION; OPERATION; INFORMATION AND REQUESTS

PART 3c—STANDARDS OF CONDUCT

Miscellaneous Amendments; Establishment by Transfer

MARCH 30, 1977.

By this order, the Commission amends its rules to revise, add or delete certain sections concerned with its organization and operation, and to establish a new part concerning standards of conduct previously issued and currently in effect. These actions are taken under authority granted through sections 2 and 309 of the Federal Power Act and section 16 of the Natural Gas Act.

This order is issued as an omnibus rulemaking in order to reflect changes in, and clarify, the Commission's organization, locations, delegations of authority, information and submittal procedures, and methods of operation. Many of the changes in organization and office locations have occurred over a period of years. Revisions to the delegations of authority and general course and methods of operation reflect current practices which are not stated as such in the Commission's rules. In clarifying information and submittal procedures, provisions previously fragmented among several sections have been consolidated into a single, new section.

The Commission's standards of conduct previously were included in Part 3 of its rules. Part 3 was established to carry out the provisions of section 552 of the Administrative Procedure Act (5 U.S.C. 552), under which agencies are required to publish a description of their organization and a statement of the general course and method by which their functions are carried out. Over time, standards of conduct were added to Part 3. In order to restore Part 3 to its original purpose, and at the same time to increase the separate emphasis on standards of conduct, a new part is established for the latter by transferring the relevant provisions from Part 3 to Part 3c.

The Commission finds. (1) The amendments prescribed herein concern rules of agency organization, procedure or practice which do not require notice of hearing under 5 U.S.C. 553.

(2) In view of the purpose, intent and effect of the amendments ordered herein, good cause exists for making them effective upon issuance of this order, and compliance with the effective date provisions of 5 U.S.C. 553 is not required.

(3) It is necessary and appropriate, and in the public interest in administering the Federal Power Act and the Natural Gas Act to adopt the amendments set forth in this order.

The Commission, acting under the provisions of the Federal Power Act, as amended, particularly sections 2 and 309 (41 Stat. 1063; 46 Stat. 798; 49 Stat. 847, 858–859; 63 Stat. 972; 16 U.S.C. 793, 825h), and the provisions of the Natural Gas Act, as amended, particularly section 16 (52 Stat. 830; 15 U.S.C. 717o), orders:

(A) The Title to Part 3, Subchapter A of Chapter I, Title 18 of the Code of Federal Regulations, is revised to read as set forth above.

(B) Section 3.3 in Part 3, Subchapter A of Chapter I, Title 18 of the Code of Federal Regulations is revised to read as follows:

§ 3.3 Objectives.

The Commission originally was established to license non-Federal hydroelectric power projects. Through subsequent legislation, the Commission's authority has been expanded to include the regulation of electric power and natural gas in interstate commerce, the review of plans for Federal projects affecting electric power, and the approval of rates for the sale of surplus electric energy from certain Government projects.

(C) Section 3.4 in Part 3, Subchapter A of Chapter I, Title 18 of the Code of Federal Regulations, is revised to read as follows:

§ 3.4 Organization.

The Commission consists of the five-member Commission, the Chairman, the Executive Director, and the technical and administrative staff.

(a) The Commission. The members of the Commission are appointed by the President to five year terms, by and with the consent of the Senate. The Chairman is designated by the President, and a vice chairman is elected annually by the members of the Commission. Except as noted in paragraph (b) of this section, the Commission is responsible for all plans, programs and actions of the agency. Any three members of the Commission constitute a quorum for the transaction of business.

(b) The Chairman. The Chairman is the chief executive officer of the agency, and is responsible for the conduct of all executive and administrative functions, except those reserved to the Commission under Reorganization Plan No. 9 of 1950 (64 Stat. 1265) (3 CFR, 1949–1953 Comp., p. 1005).

(c) Executive Director. The Executive Director is responsible for the performance of executive and administrative functions delegated by the Chairman, and regulatory functions directed by the Commission.

(d) The Staff. The Commission staff consists of the following bureaus and offices. The organization and responsibilities of each are summarized herein, and are described in greater detail in the FPC Organization and Functions Manual.

(1) The Bureau of Natural Gas, responsible for providing technical staff assistance to the Commission in administering the Natural Gas Act and related Executive Orders, including the sale and transportation of natural gas in interstate commerce, and the operation of pipelines and producers engaged in interstate commerce. The Bureau consists of the Office of the Bureau Chief, the Pipeline Certificate and Curtailment Division, the Pipeline Rates Division, the Producer Division, and the Resource Evaluation and Analysis Division.

(2) The Bureau of Power, responsible for providing technical staff assistance to the Commission in carrying out the Federal Power Act, Water Resources Planning Act, and other statutes and Executive Orders pertaining to the sale and transmission of wholesale electric power in interstate commerce, the construction and operation of hydroelectric projects, water resources planning, the adequacy and reliability of the nation's bulk electric power supply, and investigations relating to electric energy. The Bureau consists of the Office of the Chief, the Rates and Corporate Regulation Division, the River Basins Division, the Power Surveys and Analyses Division, the Licensed Projects Division, the Power Supply and Reliability Division, and regional offices located in Atlanta, Chicago, Fort Worth, New York and San Francisco.

(3) The Office of Chief Accountant, responsible for assuring that jurisdictional natural gas companies, electric utilities and licensees provide the Commission, investors and other interested parties with reliable accounting and related data. The office consists of the Office of the Chief, the Audits Division, and the Systems and Financial Reports Division.

(4) The Office of the General Counsel, responsible for providing legislative liaison and legal services to the Commission, including both representation of the Commission in the courts, before committees of the Congress, in conferences with other Federal and non-Federal agencies, and in various other public forums, and representation of the public interest in investigations by the Commission and in proceedings pending before it.

(5) The Office of the Secretary, responsible for maintenance of official Commission records; receipt, control and distribution of regulatory filings and Commission mail; issuance of formal Commission documents; preparation of Commission meeting agendas and minutes; conduct of the Commission's records management function; and performance of delegated regulatory functions on behalf of the Commission as described in § 3.5. The office consists of the Executive Secretariat; the Agenda and Minutes Division, and the Regulatory Support Services Division.

(6) The Office of Administrative Law Judges, responsible for the conduct of public hearings and disposition of related legal proceedings in assigned regulatory matters pending before the Commission, in accordance with the provisions of sections 556 and 557 of the Administrative Procedure Act and § 1.27 of this chapter.

(7) The Office of Special Assistants to the Commission, responsible for analysis of administrative hearing records and other contested actions before the Commission, as assigned, and for the preparation of related Commission orders.

(8) The Office of Policy Analysis, responsible for providing technical studies and policy analyses of economic and environmental aspects of the Commission's regulatory and policymaking activities. The office consists of the Office of the Chief, the Econometric Analysis Division, the Economic Studies Division, the Reports and Statistical Analysis Division, and the Energy Systems Division.

(9) The Office of Administrative Operations responsible for the performance of administrative support services for the Commission and staff. The office consists of the Office of the Director, the Administrative Services Division, the Drafting Division, the Printing Division, and the Library Services Division.

(10) The Office of the Comptroller, responsible for providing financial and management analysis services to the Commission. The office consists of the Office of the Comptroller, the Management Analysis Division, and the Financial Management Division.

(11) The Office of Public Information, responsible for management of the Commission's public information program and activities.

(12) The Office of Personnel Programs, responsible for management of FPC personnel programs. The Office consists of the Office of the Director, the Personnel Operations Division, and the Employee Relations and Services Division.

(13) The Office of Regulatory Information Systems, responsible for management of the Commission's automated data processing program and the Regulatory Information System (RIS). The office consists of the Office of the Assistant Executive Director (RIS), the Systems Planning and Control Division, the Data Management Division, the Application Systems Development Division, and the Facilities Operation Division.

(D) Subparagraph (2) of paragraph (b), § 3.5 in Part 3, Subchapter A of Chapter I, Title 18 of the Code of Federal Regulations, is revised to read as follows:

§ 3.5 Delegations of final authority.

The Commission has authorized:

* * * * *

(b) The Chief Accountant, or in his absence, the Acting Chief, to:

* * * * *

(2) Approve or authorize proposed accounting entries submitted by public utilities, licensees and natural gas companies which require Commission approval under the Uniform Systems of Accounts, and which are consistent with applicable statutory requirements and

V42163 APR 1 77 UMI

Commission rules, regulations or orders, including the Uniform Systems of Accounts, or reject such entries when inconsistent with the foregoing: *Provided*, That where the proposed accounting entries involve unusually large transactions or unique or controversial features, including the propriety of recognition for ratemaking purposes, the Chief Accountant shall present the same to the Commission for consideration.

* * * * *

(E) Section 3.6 in Part 3, Subchapter A of Chapter I, Title 18 of the Code of Federal Regulations, is revised to read as follows:

§ 3.6 Office of the Commission.

(a) Headquarters of the Federal Power Commission are located at 825 North Capitol Street, NE., Washington, D.C. 20426.

(b) Regional offices of the Bureau of Power are located as follows:

(1) New York Regional Office, at 26 Federal Plaza, New York, N.Y. 10013, serving: Connecticut; Delaware; District of Columbia; Maine; Maryland; Massachusetts; New Hampshire; New Jersey; New York; Pennsylvania; Rhode Island; Vermont; and parts of Kentucky, Ohio, Virginia and West Virginia.

(2) Atlanta Regional Office, at 730 Peachtree Building, Atlanta, GA 30308, serving: Alabama; Florida; Georgia; North Carolina; South Carolina; Tennessee; and parts of Kentucky, Mississippi, Virginia and West Virginia.

(3) Chicago Regional Office, at 230 South Dearborn Street, Chicago, IL 60604, serving: Illinois; Indiana; Iowa; Michigan; Minnesota; North Dakota; Wisconsin; and parts of Kansas, Missouri, Montana, Nebraska, Ohio, South Dakota and Wyoming.

(4) Fort Worth Regional Office, at 819 Taylor Street, Fort Worth, TX 76102, serving: Arkansas; Colorado; Louisiana; Oklahoma; Texas; and parts of Kansas, Mississippi, Missouri, Nebraska, New Mexico, South Dakota and Wyoming.

(5) San Francisco Regional Office, at 555 Battery Street, San Francisco, CA 94111, serving: Alaska; Arizona; California; Hawaii; Idaho; Nevada; Oregon; Utah; Washington; and parts of Montana, New Mexico and Wyoming.

(F) Subpart A of Part 3, Subchapter A of Chapter I, Title 18 of the Code of Federal Regulations is amended by adding immediately following § "3.7 Commission organization and operating during emergency conditions" a new § 3.8 to read as follows:

§ 3.8 Public information and submittals.

(a) Information concerning matters for which the Commission is responsible may be obtained in person at the headquarters office of the Commission and, to the extent available, at regional offices of the Bureau of Power. A public reference room is maintained in the Office of Public Information at Commission headquarters where assistance and reproduction facilities are available. More limited public facilities are maintained at the regional offices. Information also may be obtained by written request. All formal requests, filings and submittals should be addressed to the Federal Power Commission, Washington, D.C. 20426, except prescribed Power System Statements and Licensed Project Recreation Reports. The latter are to be submitted to regional offices of the Bureau of Power.

(b) The public may examine copies of public information filed with the Commission at its Office of Public Information during regular business hours (See § 1.1(b)). The Commission lets a competitive contract each year for the search and duplication of public documents, and a schedule of fees for such services is prescribed annually. Any person may obtain a copy of the schedule of fees in person, by telephone or by mail from the Office of Public Information. Copies of transcripts, electronic recordings, or minutes of Commission meetings closed to public observation containing material non-exempt pursuant to § 1.3a of this chapter are available to the public at the actual cost of duplication or transcription. Where practical, copies of documents also may be made on self-service duplicating machines located in the Office of Public Information. Copies of data extracted from the Commission's magnetic tape computer files are available on a reimbursable basis, upon written request to the Office of Public Information. The fee varies with the size and complexity of the request. Where the Secretary determines that a waiver or reduction of fees is in the public interest, copies of documents may be furnished without charge or at a reduced fee. Except for requests from Government agencies, certification of copies of official Commission records shall be accompanied by a fee of $2.00 per document. Inquiries and orders may be made to the Office of the Secretary in person, by telephone or by mail.

(c) Stenographic reports of Commission hearings are made by a private contractor. Interested persons may obtain copies of public hearing transcripts from the contractor at prices set in the contract, or through the search and duplication service noted in paragraph (b) of this section. Copies of the contract are available for public inspection in the Office of Public Information.

(d) The Commission's opinions, decisions, orders and rulemakings are distributed in mimeograph form immediately following Commission action, and are available in the Office of Public Information or, upon request, by mail. Opinions, decisions, rules and regulations, and selected orders subsequently are bound and published as "Federal Power Commission Reports," and are available from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

(e) A "List of Formal Documents" issued by the Commission is published daily and available in the Office of Public Information. A current subject index of major Commission actions since July 4, 1967, also is maintained in the Office of Public Information and is available for public inspection and copying (See § 1.36(e)).

(f) The Commission publishes an annual report to the Congress in which the Commission's operations during the past fiscal year are described. Copies may be obtained from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

(g) The Commission publishes a number of reports, decisions, maps, statistics and other information on the electric power and natural gas industries. These publications are available, in person or by mail from the Office of Public Information, or from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

(h) The Commission staff provides informal advice and assistance to the general public and to prospective applicants for licenses, certificates and other Commission authorizations. Opinions expressed by the staff do not represent the official views of the Commission, but are designed to aid the public and facilitate the accomplishment of the Commission's functions. Inquiries may be directed to the chief of the appropriate bureau, office or division described in § 3.4(d).

(i) The Commission issues news releases under the authority of sections 4(d), 307, 311, and 312 of the Federal Power Act and section 14(a) of the Natural Gas Act. Releases are issued on major applications, decisions, opinions, orders, rulemakings, new publications, major personnel changes, and other matters of general public interest. Releases are issued by and available from the Office of Public Information.

(j) Press, television, radio and photographic coverage of Commission proceedings is permitted as follows: (1) Press tables are located in each hearing room, and all sessions of hearings are open to the press, subject to standards of conduct applicable to all others present; (2) television, movie and still cameras and recording equipment are permitted in hearing rooms prior to the opening of a hearing or arguments, and during recesses, upon prior arrangement with the Commission or presiding administrative law judge. All equipment must be removed from the room before hearings begin or resume; (3) television, movie and still cameras and recording equipment may not be used while hearings and oral arguments are in progress; (4) television and press cameras and recording equipment may be used at FPC press conferences under prior arrangement with the Director of Public Information, provided their use does not interfere with the orderly conduct of the conference.

§ 3.102 [Deleted]

(G) Section 3.102 in Part 3, Subchapter A of Chapter I, Title 18 of the Code of Federal Regulations, is deleted.

§ 3.109 [Deleted]

(H) Section 3.109 in Part 3, Subchapter A of Chapter I, Title 18 of the Code of Federal Regulations, is deleted.

§ 3.105 [Amended]

(I) Footnote 1 to § 3.105 in Part 3, Subchapter A of Chapter I, Title 18 of the Code of Federal Regulations, is revised to read as follows:

[1] The following abbreviations are used in this subpart: BNG—Bureau of Natural Gas; OCA—Office of Chief Accountant; OGC—Office of the General Counsel; OPA—Office of Policy Analysis; OPI—Office of Public Information; PWR—Bureau of Power.

§§ 3.106, 3.107, 3.116, 3.135–3.139, 3.162–3.168 [Amended]

(J) Sections 3.106, 3.107, 3.116, 3.135, 3.137, 3.138, 3.139, 3.162, 3.163, 3.164, 3.165, 3.166, 3.167, and 3.168 in part 3, Subchapter A of Chapter I, Title 18 of the Code of Federal Regulations, are revised as follows:

In each instance where it is used, the abbreviation "OAF" is deleted and the abbreviation "OCA" is inserted.

(K) Sections 3.107, 3.116, 3.137, 3.163, 3.164, and 3.168 in Part 3, Subchapter A of Chapter I, Title 18 of the Code of Federal Regulations, are revised as follows:

In each instance where it is used, the abbreviation "OEC" is deleted and the abbreviation "OPA" is inserted.

(L) Paragraph (c) of § 3.114 in Part 3, Subchapter A of Chapter I, Title 18 of the Code of Federal Regulations, is revised to read as follows:

§ 3.114 Licenses.

* * * * *

(c) Except for the notice requirement, all other applications under this Act are processed in a manner similar to that stated in § 3.113.

(M) Section 3.117 in Part 3, Subchapter A of Chapter I, Title 18 of the Code of Federal Regulations, is revised to read as follows:

§ 3.117 Headwater benefits.

The Commission determines headwater benefits and payments therefor under section 10(f) of the Act and in accordance with the provisions of §§ 11.26 through 11.31 of this chapter. Agreements for headwater benefits payments involving non-Federal entities may be submitted to the Commission for approval in accordance with § 13.1 of this chapter. Public notice is given of proposed Commission actions pertaining to headwater benefits matters.

(N) Paragraph (a) of § 3.170 in Part 3, Subchapter A of Chapter I, Title 18 of the Code of Federal Regulations, is amended by adding a new subparagraph (30), to read as follows:

§ 3.170 Approved forms, etc.

(a) The following is a list of approved forms, statements, and reports, under the Natural Gas Act, descriptions of which have been published in Subchapter G, Parts 250 and 260 of this chapter.

* * * * *

(30) Form No. 45, report of new nonjurisdictional sales of natural gas (§ 260.20 of this chapter).

* * * * *

(O) Section 3.183 in Part 3, Subchapter A of Chapter I, Title 18 of the Code of Federal Regulations, is revised to read as follows:

§ 3.183 Federal power marketing acts.

The Bonneville Project Act (16 U.S.C. 832), the Eklutna Project Act (64 Stat. 382), the Falcon Dam Act, as amended (68 Stat. 255, 77 Stat. 475), and the Flood Control Act of 1944 (58 Stat. 887, 890) provide that the Commission review and, if satisfactory, confirm and approve rates proposed for the sale of power generated at projects constructed under these and other acts. The Commission also allocates the costs of certain of these projects and participates in the allocation of costs of others. The Federal Columbia River Transmission System Act (16 U.S.C. 837; 88 Stat. 1376) provides that the Commission review and, if satisfactory, confirm and approve rates for the transmission of non-Federal power over the Federal transmission system.

(P) Section 3.186 in Part 3, Subchapter A of Chapter I, Title 18 of the Code of Federal Regulations, is revised to read as follows:

§ 3.186 Information relative to miscellaneous functions.

Excerpts from the statutes referred to in §§ 3.181 through 3.185 are included in the appendices to the pamphlet editions of the Federal Power Act and the Natural Gas Act, copies of which may be obtained from the Office of Public Information or the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Additional information pertaining to these functions may be obtained from the Secretary.

(Q) Subparts C, D, and E, of Part 3, Subchapter A of Chapter I, Title 18 of the Code of Federal Regulations, are deleted from Part 3 and redesignated as Subparts A, B, and C, respectively, and transferred without any substantive changes to a new Part 3c, which is established in Subchapter A of Chapter I, Title 18 of the Code of Federal Regulations. The table of contents is as follows:

Subpart A—Standards of Conduct for Employees

Sec.
3c.1 Purpose.
3c.2 Coverage.
3c.3 Notice to employees.
3c.4 Definitions.
3c.5 Conflicts of interest.
3c.6 Ethical conduct.
3c.7 Statements of employment and financial interests.
3c.8 Interpretation and advisory service.
3c.9 Procedures for reviewing statements of employment and financial interests and reporting conflicts of interest.
3c.10 Disciplinary and other remedial action.
3c.11 Miscellaneous statutes and regulations.

Subpart B—Standards of Conduct for Special Government Employees

Sec.
3c.101 Purpose.
3c.102 Coverage.
3c.103 Notice and receipt.
3c.104 Definitions.
3c.105 Classification of special Government Employees.
3c.106 Conflicts of interest.
3c.107 Ethical conduct.
3c.108 Statements of employment and financial interests.
3c.109 Interpretation and advisory service.
3c.110 Procedure for reviewing statements of employment and financial interests and reporting conflicts of interest.
3c.111 Disciplinary and other remedial action.

Subpart C—Standards of Conduct for Commissioners

3c.201 Purpose.
3c.202 Coverage.
3c.203 Definitions.
3c.204 Conflicts of interest.
3c.205 Ethical conduct.
3c.206 Miscellaneous statutes and regulations.

AUTHORITY: E.O. 11222, 3 CFR, 1964–1965 Comp., p. 306; 5 CFR 735.104.

(R) Editorial changes shall be made in new Part 3c, Subchapter A of Chapter I, Title 18 of the Code of Federal Regulations, as follows:

(1) All references to Subparts C, D, and E, respectively, are deleted, and Subparts A, B, and C, respectively, are inserted.

(2) All references to §§ 3.201 through 3.246, inclusive, are deleted, and appropriate references to §§ 3c.1 through 3c.206, inclusive, are inserted.

(S) The amendments to Part 3 of the Commission's General Rules ordered herein and Part 3c of the Commission's General Rules prescribed herein shall be effective upon the issuance of this order.

(T) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-9937 Filed 3-30-77;3:03 pm]

Title 24—Housing and Urban Development

CHAPTER II—OFFICE OF ASSISTANT SECRETARY FOR HOUSING—FEDERAL HOUSING COMMISSIONER

[Docket No. R-77-433]

DEBENTURE INTEREST RATES

The following amendments have been made to this chapter to change the debenture interest rate. The Secretary has determined that advance publication and notice and public procedure are unnecessary since the debenture interest rate is set by the Secretary of the Treasury in accordance with a procedure established by statute and that said cause exists for making this amendment effective on January 1, 1977.

Accordingly, Chapter II is amended as follows:

V4263 APR 1 77 UMI

PART 203—MUTUAL MORTGAGE INSURANCE AND INSURED HOME IMPROVEMENT LOANS

1. Section 203.405 is amended to read as follows:

§ 203.405 Debenture interest rate.

Debentures shall bear interest from the date of issue, payable semiannually on the first day of January and the first day of July of each year at the rate in effect as of the date the commitment was issued, or as of the date the mortgage was endorsed for insurance, whichever rate is higher. The following interest rates are effective for the dates listed:

Effective rate	On or after—		Prior to—	
Percent:				
6½	Jan.	1,1971	July	1,1971
6⅞	July	1,1971	Jan.	1,1972
6⅞	Jan.	1,1972	July	1,1972
5½	July	1,1972	Jan.	1,1973
6¼	Jan.	1,1973	July	1,1973
6	July	1,1973	Jan.	1,1974
6¼	Jan.	1,1974	July	1,1974
6⅞	July	1,1974	July	1,1975
7	July	1,1975	Jan.	1,1976
7⅛	Jan.	1,1976	July	1,1976
7	July	1,1976	Jan.	1,1977
6¾	Jan.	1,1977		

(Sec. 211, 52 Stat. 23; 12 U.S.C. 1715b. Interprets or applies sec. 203, 52 Stat. 10, as amended; 12 U.S.C. 1709.)

2. Section 203.479 is amended to read as follows:

§ 203.479 Debenture interest rate.

Debentures shall bear interest from the date of issue, payable semiannually on the first day of January and the first day of July of each year at the rate in effect as of the date the commitment was issued, or as of the date the loan was endorsed for insurance, whichever rate is the higher. The following interest rates are effective for the dates listed:

Effective rate	On or after—		Prior to—	
Percent:				
6½	Jan.	1,1971	July	1,1971
6⅞	July	1,1971	Jan.	1,1972
6⅞	Jan.	1,1972	July	1,1972
5½	July	1,1972	Jan.	1,1973
6¼	Jan.	1,1973	July	1,1973
6	July	1,1973	Jan.	1,1974
6¼	Jan.	1,1974	July	1,1974
6⅞	July	1,1974	July	1,1975
7	July	1,1975	Jan.	1,1976
7⅛	Jan.	1,1976	July	1,1976
7	July	1,1976	Jan.	1,1977
6¾	Jan.	1,1977		

(Sec. 211.52 Stat. 23; 12 U.S.C. 1715b. Interprets or applies sec. 203, 52 Stat. 10, as amended; 12 U.S.C. 1709)

PART 207—MULTIFAMILY HOUSING MORTGAGE INSURANCE

In § 207.259 paragraph (e)(6) is amended to read as follows:

§ 207.259 Insurance benefits.

* * * * * * *

(e) * * *

(6) Bear interest from the date of issue, payable semiannually on the first day of January and first day of July of each year at the rate in effect as of the date the commitment was issued, or as of the date of initial insurance endorsement of the mortgage, whichever rate is the higher. The following interest rates are effective for the dates listed:

Effective rate	On or after—		Prior to—	
Percent:				
6½	Jan.	1,1971	July	1,1971
6⅞	July	1,1971	Jan.	1,1972
6⅞	Jan.	1,1972	July	1,1972
5½	July	1,1972	Jan.	1,1973
6¼	Jan.	1,1973	July	1,1973
6	July	1,1973	Jan.	1,1974
6¼	Jan.	1,1974	July	1,1974
6⅞	July	1,1974	July	1,1975
7	July	1,1975	Jan.	1,1976
7⅛	Jan.	1,1976	July	1,1976
7	July	1,1976	Jan.	1,1977
6¾	Jan.	1,1977		

(Sec. 211, 52 Stat. 23; 12 U.S.C. 1715b. Interprets or applies sec. 207, 52 Stat. 16, as amended; 12 U.S.C. 1713)

PART 220—URBAN RENEWAL MORTGAGE INSURANCE AND INSURED IMPROVEMENT LOANS

Section 220.830 is amended to read as follows:

§ 220.830 Debenture interest rate.

Debentures shall bear interest from the date of issue, payable semiannually on the first day of January and the first day of July of each year at the rate in effect as of the date the commitment was issued, or as of the date the loan was endorsed for insurance, whichever rate is higher. The following interest rates are effective for the dates listed:

Effective rate	On or after—		Prior to—	
Percent:				
6½	Jan.	1,1971	July	1,1971
6⅞	July	1,1971	Jan.	1,1972
6⅞	Jan.	1,1972	July	1,1972
5½	July	1,1972	Jan.	1,1973
6¼	Jan.	1,1973	July	1,1973
6	July	1,1973	Jan.	1,1974
6¼	Jan.	1,1974	July	1,1974
6⅞	July	1,1974	July	1,1975
7	July	1,1975	Jan.	1,1976
7⅛	Jan.	1,1976	July	1,1976
7	July	1,1976	Jan.	1,1977
6¾	Jan.	1,1977		

(Sec. 211, 52 Stat. 23; 12 U.S.C. 1715b. Interprets or applies sec. 220, 68 Stat. 596, as amended; 12 U.S.C. 1715k)

Effective date. These amendments are effective as of January 1, 1977.

Issued at Washington, D.C., January 17, 1977.

JOHN T. HOWLEY,
Acting Assistant Secretary for Housing - Federal Housing Commissioner.

Title 26—Internal Revenue

CHAPTER I—INTERNAL REVENUE SERVICE, DEPARTMENT OF THE TREASURY

SUBCHAPTER F—PROCEDURE AND ADMINISTRATION

[T.D. 7475]

PART 404—TEMPORARY REGULATIONS ON PROCEDURE AND ADMINISTRATION UNDER THE TAX REFORM ACT OF 1976

Certain Requirements for Income Tax Return Preparers

AGENCY: Internal Revenue Service, Treasury.

ACTION: Temporary regulations.

SUMMARY: This document provides temporary regulations for paid preparers of income tax returns and claims for refund. Changes to the applicable tax law were made by the Tax Reform Act of 1976. These regulations affect all paid income tax return preparers and provide them with the guidance needed to comply with the law.

DATE: The regulations apply to documents prepared after December 31, 1976.

FOR FURTHER INFORMATION CONTACT:

Elsie S. Little of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, D.C. 20224 (Attention: CC:LR:T) (202-566-3926).

SUPPLEMENTARY INFORMATION:

BACKGROUND

This document contains temporary regulations relating to certain requirements for income tax return preparers under sections 6694, 6695 and 7701(a)(36) of the Internal Revenue Code of 1954, as added by section 1203 (a), (b) and (f) of the Tax Reform Act of 1976 (Pub. L. 94-455, 90 Stat. 1688). The temporary regulations provided by this document will remain in effect until superseded by final regulations on this subject.

DISCUSSION

The temporary regulations provide questions and answers with respect to the application of the penalty for the negligent or intentional disregard of rules and regulations (section 6694(a)) and the penalty for the willful attempt to understate a taxpayer's tax liability (section 6694(b)). Questions and answers are also included with respect to the procedure for assessment by the Internal Revenue Service of such penalties and the procedure available to the income tax return preparer for seeking relief from the assessment of such penalties.

In addition, these temporary regulations provide questions and answers relating to the signature requirement and penalty (section 6695(b)), and the penalty (as it relates to banks) for the negotiation of certain checks issued by the Internal Revenue Service (section 6695(f)). Further, the definition of income tax return preparer (section 7701(a)(36)) is developed by questions and answers included in these regulations.

DRAFTING INFORMATION

The principal author of this regulation was Elsie S. Little of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulation, both on matters of substance and style.

Adoption of amendments to the regulations. Accordingly, 26 CFR Part 404 is amended as follows:

Paragraph 1. A new § 404.6694-1 is added immediately after § 404.6109-1. This new section reads as follows:

§ 404.6694-1 Questions and answers relating to understatement of taxpayer's liability by income tax return preparer.

(a) The following questions and answers relate exclusively to the penalty for the negligent or intentional disregard of rules and regulations by an income tax return prepared under section 6694(a) of the Internal Revenue Code of 1954. See also paragraph (c) of this section for further questions and answers relating to this penalty.

Q-1: What is the nature of the penalty under section 669(a) of the Code?

A-1: The penalty under section 6694(a) is intended to apply to the income tax return preparer who has disregarding the rules and regulations with a resulting understatement of the taxpayer's tax liability. The penalty applies only if such disregard by the preparer was intentional or negligent. The penalty was established as a sanction upon preparers for failure to observe rules and regulations.

Q-2: What is the primary duty and responsibility under section 6694(a) of the income tax return preparer in the preparation of a return or claim for refund of tax?

A-2: The primary duty and responsibility under section 6694(a) of the income tax return preparer in the preparation of a return or claim for refund of tax is the exercise of due diligence in the proper application of the rules and regulations to the facts provided with respect to a taxpayer's financial affairs in order to arrive at such taxpayer's true tax liability.

Q-3: Does the phrase "rules and regulations" in section 6694(a) include Treasury regulations and published Internal Revenue Service revenue rulings?

A-3: Yes. See, however, Q and A-5, Q and A-6, and Q and A-7 of this paragraph (a) with respect to disagreement in good faith with a rule or regulation.

Q-4: Does the conduct which is subject to the penalty provided by section 6694(a) include conduct which is based on a disagreement in good faith by an income tax return preparer with the legal validity of a regulation or published ruling?

A-4: No. Such conduct is not considered a negligent or intentional disregard of rules and regulations.

Q-5: What is meant by a "disagreement in good faith" by an income tax return preparer with the legal validity of a regulation or published ruling?

A-5: The interpretation given to a "disagreement in good faith" is similar to the interpretation given to such a disagreement under Code section 6653(a), relating to the disregard of rules and regulations by taxpayers who prepare their own returns. For example, if an income tax return preparer reasonably believes in good faith that case law conflicts with a rule or regulation and that such case law reflects a more accurate interpretation of one or more sections of the Internal Revenue Code, then the preparer may complete a return on the basis of such case law without being subject to the penalty.

Q-6: Where an income tax return preparer in good faith believes that a rule or regulation does not accurately interpret one or more sections of the Internal Revenue Code and prepares a return in conflict with such rule or regulation, must the preparer set forth in the return the relevant rule or regulation which is in dispute and the judicial decision if any relied upon?

A-6: Such disclosure is not required to avoid penalties under section 6694(a) if the preparer is relying on existing case law which conflicts with the rule or regulation which is in dispute. Section 6694(a) does not apply a more stringent requirement to preparers than is applied to taxpayers pursuant to section 6653(a). If no case conflicts with the regulation or ruling which is in dispute, the preparer may disclose on the return the rule or regulation which is in dispute and the grounds for his disagreement with the rule or regulation in evidence of his good faith.

Q-7: Who has the burden of proof in a proceeding regarding the issue of whether the income tax return preparer has negligently or intentionally disregarded rules and regulations in the preparation of an income tax return or claim for refund?

A-7: In any proceeding, the income tax return preparer bears the burden of proof that the preparer has not intentionally or negligently disregarded rules and regulations. If an income tax return preparer presents evidence that the normal practice of the preparer with respect to the treatment of a particular income or deduction item was not negligent and if there is evidence that this normal practice was followed, the preparer will be considered to have met the burden of proof unless the Service presents contrary evidence.

(b) The following questions and answers relate exclusively to the penalty for willful understatement of tax liability by an income tax return preparer under section 6694(b) of the Internal Revenue Code of 1954. See also paragraph (c) of this section for further questions and answers relating to this penalty.

Q-1: What constitutes conduct which would subject an income tax return preparer to the penalty for willful understatement of a taxpayer's tax liability provided by section 6694(b)?

A-1: Such conduct includes disregard by an income tax return preparer of correct facts supplied to the preparer by the taxpayer or others in an attempt by the preparer wrongfully to reduce the taxpayer's tax liability. For example, if an income tax return preparer disregards information concerning certain items of taxable income furnished by the client-taxpayer or other person, the penalty would be applicable. Where a taxpayer states to an income tax return preparer that the taxpayer has only two dependents, and the income tax return preparer, with full knowledge that the statement is accurate, reports six dependents on the tax return, the penalty would be applicable.

Q-2: Is the income tax return preparer required to examine or review documents or other evidence supporting the client-taxpayer's information or to make inquiries regarding the information supplied by the clients-taxpayer in order to avoid the penalty under section 6694(b)?

A-2: Generally, in preparing a return, the income tax return preparer may rely without verification upon information furnished by the client-taxpayer. The income tax return preparer is not required to examine or review documents or other evidence supporting the client-taxpayer's information in order to avoid the penalty under section 6694(b). However, the income tax return preparer cannot ignore the implications of information furnished. The income tax return preparer must make reasonable inquiries where the information as presented appears to be incorrect or incomplete. Additionally, many sections of the Internal Revenue Code require the presence of specific facts and circumstances before a deduction can properly be claimed. The income tax return preparer must make appropriate inquiries of the taxpayer to determine the presence of the underlying specific facts required by a code section incident to claiming a deduction. For example, in the case of the deduction for travel and entertainment expenses, the preparer should ascertain the existence of the records required by law to support the deduction.

Q-3: A taxpayer, during the tax interview conducted by an income tax return preparer, stated that he had paid $2,500 in doctor and hospital bills during the tax year when in fact he had paid a smaller amount. On the basis of the information the preparer properly calculated a deduction for medical expenses which resulted in an understatement of tax liability. The income tax return preparer had no reason to believe that the medical expense information presented was incorrect or incomplete. The preparer did not request underlying documentation. Is the income tax return preparer subject to the penalty provided by section 6694(b)?

A-3: No.

(c) The following questions and answers relate both to the penalty for the negligent or intentional disregard of rules and regulations by an income tax return preparer and to the penalty for the willful understatement of the taxpayer's tax liability by an income tax return preparer under section 6694 (a) and (b) of the Internal Revenue Code of 1954, respectively:

Q-1: Can the intentional disregard of rules and regulations by an income tax return preparer be a basis for the assertion of the penalty under section 6694(b) for the willful understatement of tax liability?

A-1: Yes. A willful understatement of tax liability can be based on an intentional disregard of rules and regulations. For example, an income tax return preparer who deducts all of a taxpayer's medical expenses, intentionally disregarding the applicable floors, limiting deductability of medical expenses, may have both intentionally disregarded rules and regulations within the meaning of section 6694(a) and willfully understated tax liability within the meaning of section 6694(b).

Q-2: Can both the penalty for the intentional disregard of rules and regulations and the penalty for the willful attempt to understate tax liability be assessed against a preparer with respect to the same return or claim?

A-2: Yes. However, the total amount collected by reason of imposing both penalties cannot exceed $500 per return. Thus, the Internal Revenue Service could first assess the penalty for negligent or intentional disregard of rules and regulations and then, at a later date, assess the penalty for the willful understatement of tax liability. If the first penalty of $100 is collected, the later assessment for willful understatement of tax liability would be limited to $400 with respect to the same tax return.

Q-3: Must there in fact be an understatement of tax liability for the assessment of the penalty for negligent or intentional disregard of rules and regulations as well as the penalty for willful understatement of tax liability?

A-3: Yes.

Q-4: Is a final administrative or judicial determination of an understatement of tax liability in a proceeding to which the taxpayer is a party required before the assessment of either or both penalties?

V 4263 APR 1 77 UMI

A–4: No. An understatement of tax liability may be shown to exist in a proceeding against the preparer independent of any proceeding against the taxpayer. If, however, in a proceeding to which the taxpayer is a party it is determined that an understatement of tax liability does not exist, then the Internal Revenue Service will not assert either penalty against the preparer and will refund any penalty if previously collected from the preparer.

Q–5: Normally would an investigation of the income tax return preparer's conduct be initiated before the assessment of either the penalty for the negligent or intentional disregard of rules and regulations or the penalty for the willful understatement of tax liability.

A–5: Yes.

Q–6: Will the income tax return preparer be sent a revenue agent's report prior to assessment of either penalty?

A–6: Yes.

Q–7: If the income tax return preparer wishes to oppose assessment of either penalty, will the preparer be afforded an opportunity to pursue administrative remedies prior to assessment of either penalty?

A–7: Yes. The income tax return preparer will be issued a thirty-day letter notifying the preparer of the proposed penalty and offering the preparer an opportunity to pursue administrative remedies prior to assessment of the penalty.

Q–8: What procedures will be followed if the income tax return preparer does not prevail during the administrative proceeding?

A–8: After administrative remedies are exhausted, if the Internal Revenue Service assesses the penalty, it will present a statement of notice and demand, separate from any notice of a tax deficiency, to the income tax return preparer. The penalty is payable upon notice and demand.

Q–9: What course may an income tax return preparer follow if the preparer does not agree with the penalty determination in the revenue agent's report and either (1) does not choose to pursue an administrative remedy within the Internal Revenue Service or (2) has received an adverse final administrative determination from the Internal Revenue Service?

A–9: The preparer may pay the entire amount assessed and file a claim for refund of the amount paid not later than 3 years from the date the penalty is paid. Alternatively, the preparer may pay 15% of the penalty within 30 days of the date of the atatement of notice and demand and file a claim for refund of the amount within the same 30 day period.

Q–10: If the preparer timely pays 15% of the penalty and files a claim for refund, can the Internal Revenue Service proceed to collect the remaining 85% of the penalty?

A–10: The Internal Revenue Service may not proceed to collect any part of the remaining 85% of the penalty during the period when the claim for refund is pending. However, with respect to any penalty for which the 15% amount is not timely paid, the Internal Revenue Service will pursue collection of the entire penalty.

Q–11: What can an income tax return preparer do if the Internal Revenue Service denies a claim for refund of the amount paid for the assessed penalty?

A–11: The income tax return preparer may bring an action for refund in the appropriate U.S. District Court within 30 days from the date of denial. The preparer must bring the action within this 30-day period to postpone or avoid collection measures by the Service relating to the remaining 85% of the penalty. In this regard, see Q and A–13 of this paragraph (c). If the income tax return preparer does bring an action, the Internal Revenue Service need not file a counterclaim in the action for the remaining 85% of the outstanding penalty because any court decision with regard to the refund of 15% of the penalty will apply as well to the remaining 85% of the penalty.

Q–12: What procedures are available to the income tax return preparer if the Internal Revenue Service does not act on a claim filed for the refund of an amount paid against an assessed penalty?

A–12: If the Internal Revenue Service does not deny a claim for refund by the end of six months after the date the claim is presented, the income tax return preparer may bring an action in the appropriate U.S. District Court within the 30-day period after the end of the six month period. If the income tax return preparer does not begin an action within the 30-day period, the Internal Revenue Service will proceed with collection of the remaining 85% of the penalty.

Q–13: Where an income tax return preparer brings a timely action for refund before the appropriate U.S. District Court, can the Internal Revenue Service begin collection action on the remaining 85% of the penalty due if the 15% payment was timely made?

A–13: If the preparer brings a timely refund action, the Internal Revenue Service cannot, except as part of a jeopardy assessment, seek to collect the remaining 85% of the penalty during the period when the action is pending. The Internal Revenue Service will resume its collection activities only upon final resolution of the matter. The final resolution includes any settlement between the Internal Revenue Service and the income tax return preparer, or any final decision by a court and includes the types of determinations provided under existing law (section 1313 (a)) relating to taxpayer deficiencies. During any period for which the Internal Revenue Service is prevented from pursuing collection of the remainder of a penalty, the running of the statute of limitations for collection is suspended.

PAR. 2. New sections are added immediately after § 404.6695–1. These new sections read as follows:

§ 404.6695–2 Questions and answers relating to certain assessable penalties with respect to the preparation of income tax returns for other persons.

The following questions and answers relate to certain assessable penalties with respect to preparation of income tax returns for other persons under section 6695 of the Internal Revenue Code of 1954.

Q–1: X prepares income tax returns and furnishes a photocopy of each of the returns to the appropriate taxpayer for filing with the Internal Revenue Service. X is required to sign the return as preparer. Will the photocopy return be accepted?

A–1: Revenue Procedure 76–40 (1976–49 I.R.B.) provides that reproductions of forms may be made after insertion of the tax computations and other required information. However, all signatures on forms to be filed with the IRS must be original signatures, affixed after the reproduction process.

Q–2: X receives a notice of a penalty assessment for failure to sign a return which X prepared for a client. To determine if X can obtain an abatement of the penalty, what justification constitutes reasonable cause for failure to sign the return?

A–2: Reasonable cause, broadly defined, is a cause which arises despite ordinary care and prudence exercised by the individual. If X believes he has reasonable cause for elimination of the penalty, X must furnish the Service with a written statement setting forth the facts establishing reasonable cause.

Q–3: X and Y are tax return preparers. X uses a facsimile signature stamp to identify the returns which X prepares. Y signs a gummed label which is attached to the place where the preparer's signature is required. Will a stamped return or return with a label signed by the preparer qualify as a signed return?

A–3: No. The preparer must physically sign the return. He may not be identified by a stamped signature or signature label.

Q–4: X prepares returns as an employee of a major accounting firm. Is X required to sign the returns and furnish his social security number?

A–4: X is required to sign the return as preparer if he is the individual primarily responsible for the overall accuracy of the return. As an employee, X is not required to disclose his social security number. However, X's employer's identification number must be shown on the return.

Q–5: X employs A, B, and C to prepare income tax returns for taxpayers. After A and B have collected the information from the taxpayer and applied the tax laws to the information, the return form is completed by computer service. On the day the returns prepared by A and B are ready for their signatures, A is away from the city for one week on another assignment and B is on detail to another office for the day. May C sign the returns prepared by (i) A and (ii) B?

A–5: (i) Yes. A is unavailable; C may sign the returns prepared by A, provided that (a) C notifies each taxpayer that he as preparer (and not A) is primarily responsible for the preparation of the return, (b) C reviews with each taxpayer the information obtained by A relative to the taxpayer, and (c) C reviews the preparation of each return prepared by A.

(ii) No. Another preparer cannot sign the returns prepared by B because B is available.

Q–6: Is a bank subject to the penalty under Code section 6695(f), relating to the negotiation of certain checks issued by the Service, if the bank prepares returns and claims for refund of taxpayers who are not employees of the bank and if the bank either (i) cashes refund checks (with respect to returns or claims prepared) and remits all of the cash to taxpayers, or (ii) accepts refund checks (with respect to returns or claims prepared) for deposit to taxpayers' accounts?

A–6: No. The first endorsement or negotiation of the refund check is made by the taxpayer, not the bank. Code section 6695(f) was not intended to apply to subsequent endorsements made as a part of the check clearing process through the financial system: *Provided*, The initial endorsement or negotiation of the check was not made by an income tax return preparer of the return or claim for which the Internal Revenue Service issued the check.

§ 404.7701–1 Questions and answers relating to the definition of income tax return preparer.

The following questions and answers relate to the definition of income tax return preparer under section 7701(a)(36) of the Internal Revenue Code of 1954.

Q–1: Does the term "income tax return preparer" include a person who completes a return gratuitously for a taxpayer who is a friend, relative, or neighbor even if that person receives a gift of gratitude from the taxpayer?

A–1: No. The definition of income tax return preparer includes only persons who prepare the returns of others for compensation. It does not include a person who completes a return for a friend, relative, or neighbor with no implicit or explicit agreement for compensation, even though that person receives a gift of gratitude, such as an invitation to dinner or a return favor.

Q–2: Are there any educational qualifications or professional status requirements for a person to be considered an income tax return preparer?

A–2: No.

Q–3: Is it required that a person complete all parts of the turn in question to be considered an income tax return preparer?

A–3: No. An income tax return preparer is any person who prepares, for compensation, all or a substantial portion of a tax return or claim for refund.

Q–4: What constitutes a substantial portion of a return or claim for refund?

A–4: Whether a portion of a return or claim constitutes a substantial portion is to be determined by comparing the length of, complexity of, and tax liability or refund involved with respect to that portion of the return or claim, to the return or claim as a whole.

Q–5: Is the filing of a single schedule of a tax return considered to be a substantial portion?

A–5: Completion of a single schedule of a tax return will not be considered a substantial portion of the return unless that particular schedule is the dominant portion of the entire tax return.

Q–6: May a person be considered an income tax return preparer even though that person does not actually place or review placement of the figures on the taxpayer's return?

A–6: Yes. A person who supplies to a taxpayer sufficient information and advice so that completing the tax return becomes merely a mechanical or clerical matter is to be considered an income tax return preparer.

Q–7: Does the definition of income tax return preparer include an individual who only gives advice on particular issues of law or Internal Revenue Service policy?

A–7: An individual who only gives advice on particular issues of law or Internal Revenue Service policy relating to particular deductions or items of income will not have prepared a return if the advice does not directly relate to, or is given without regard to or consideration of, any specific amounts which are to be placed on the return of the taxpayer. Furthermore, an individual will not have prepared a return if the advice is not given in connection with the preparation of a return.

Q–8: May the term "income tax return preparer" include persons who prepare United States returns or claims outside the United States?

A–8: Yes. Such persons are income tax return preparers, irrespective of their nationality, residence, or the locations of their places of business, provided that they otherwise meet the definition of income tax return preparer contained in section 7701(a)(36). Notwithstanding the provisions of § 301.6109–1(g), each such person must secure a taxpayer identifying number and must comply with the provisions of section 1203 of the Tax Reform Act of 1976 and the regulations thereunder.

Q–9: X, a regular and continuous employee of S, a subsidiary corporation of P corporation, prepares the returns of employees of both P and S corporations. Is X considered an income tax return preparer under Code section 7701(a)(36)?

A–9: No. For purposes of the exception under section 7701(a)(36)(B)(ii) to the definition of the term "income tax return preparer," employees of a subsidiary corporation are considered employees of the parent corporation.

Q–10: Does the exception provided by section 7701(a)(36)(B)(iii) with respect to the definition of income tax return preparer include the fiduciary of a conservatorship for a person under a legal disability?

A–10: Yes; The exception to the definition of the term income tax return preparer" under section 7701(a)(36)(B)(iii) includes the fiduciary (and its officers and employees) of an estate, guardianship, conservatorship, or similar arrangement for a taxpayer under a legal disability (such as a minor, an incompetent, or an infirm individual).

There is a need for immediate guidance with respect to the provisions contained in this Treasury decision. For this reason, it is found impracticable to issue it with notice and public procedure under subsection (b) of section 553 of Title 5 of the United States Code or subject to the effective date limitation of subsection (d) of that section.

(Sec. 7805 of the Internal Revenue Code of 1954 (68A Stat. 917; (26 U.S.C. 7805)).)

WILLIAM E. WILLIAMS,
Acting Commissioner of Internal Revenue.

Approved: March 28, 1977.

LAURENCE N. WOODWORTH,
Assistant Secretary of the Treasury.

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Stabilization and Conservation Service

[7 CFR Part 728]

1978 WHEAT MARKETING QUOTA PROGRAM

Proposed Determinations

Notice is hereby given that the Secretary of Agriculture is preparing to determine whether marketing quotas for wheat are required to be proclaimed for the 1978–79 marketing year; to determine and proclaim the national acreage allotment for the 1978 crop of wheat, to apportion among States and counties the national acreage allotment for the 1978 crop of wheat, to designate the 1978 commercial wheat-producing area, to determine a projected national yield for the 1978 crop of wheat, to formulate regulations for establishing projected county yields for the 1978 crop of wheat; and, if marketing quotas are proclaimed, to establish the date of the referendum to determine whether farmers favor the marketing quotas so proclaimed, the amount of the national marketing quotas, wheat marketing allocation, and the national allocation percentage, for the 1978–79 marketing year. If marketing quotas are proclaimed for the 1978–79 marketing year, the Secretary will also determine and declare whether marketing quotas shall be in effect for the 1979–80 marketing year or for the 1979–80 and 1980–81 marketing years as necessary to effectuate the policy of the Act.

Subsections (a) and (b) of section 332 of the Agricultural Adjustment Act of 1938, as amended, read as follows:

Sec. 332 (a) Whenever prior to April 15 in any calendar year the Secretary determines that the total supply of wheat in the marketing year beginning in the next succeeding calendar year will, in the absence of a marketing quota program, likely be excessive, the Secretary shall proclaim that a national marketing quota for wheat shall be in effect for such marketing year and for either the following marketing year or the following two marketing years, if the Secretary determines and declares in such proclamation that a two- or three-year marketing quota program is necessary to effectuate the policy of the Act.

Sec. 332(b) If a national marketing quota for wheat has been proclaimed for any marketing year, the Secretary shall determine and proclaim the amount of the national marketing quota for such marketing year not earlier than January 1 or later than April 15 of the calendar year preceding the year in which such marketing year begins. The amount of the national marketing quota for wheat for any marketing year shall be an amount of wheat which the Secretary estimates (i) will be utilized during such marketing year for human consumption in the United States as food, food products, and beverages, composed wholly or partly of wheat, (ii) will be utilized during such marketing year in the United States for seed, (iii) will be exported either in the form of wheat or products thereof, and (iv) will be utilized during such marketing year in the United States as livestock (including poultry) feed, excluding the estimated quantity of wheat which will be utilized for such purpose as a result of the substitution of wheat for feed grains under section 328 of the Food and Agriculture Act of 1962; less (A) an amount of wheat equal to the estimated imports of wheat into the United States during such marketing year and, (B) if the stocks of wheat owned by the Commodity Credit Corporation are determined by the Secretary to be excessive, an amount of wheat determined by the Secretary to be a desirable reduction in such marketing year in such stocks to achieve the policy of the Act: *Provided*, That if the Secretary determines that the total stocks of wheat in the Nation are insufficient to assure an adequate carryover for the next succeeding marketing year, the national marketing quota otherwise determined shall be increased by the amount the Secretary determines to be necessary to assure an adequate carryover: *And provided further*, That the national marketing quota for wheat for any marketing year shall be not less than one billion bushels.

Section 333 of the Act, as amended, reads as follows:

The Secretary shall proclaim a national acreage allotment for each crop of wheat. The amount of the national acreage allotment for any crop of wheat shall be the number of acres which the Secretary determines on the basis of the projected national yield and expected underplantings (acreage other than that not harvested because of program incentives) of farm acreage allotments will produce an amount of wheat equal to the national marketing quota for wheat for the marketing year for such crop, or if a national marketing quota was not proclaimed, the quota which would have been determined if one had been proclaimed.

Section 334(a) of the Act, as amended, reads as follows:

The national allotment for wheat, less a reserve of not to exceed 1 percentum thereof for apportionment as provided in this subsection and less the special acreage reserve provided for in this subsection, shall be apportioned by the Secretary among the States on the basis of the preceding year's allotment for each such State, including all amounts allotted to the State and including for 1967 the increased acreage in the State allotted for 1966 under section 335, adjusted to the extent deemed necessary by the Secretary to establish a fair and equitable apportionment base for each State, taking into consideration established crop rotation practices, estimated decrease in farm allotments because of loss of history, and other relevant factors. The reserve acreage set aside herein for apportionment by the Secretary shall be used (1) to make allotments to counties in addition to the county allotments made under subsection (b) of this section, on the basis of the relative needs of counties for additional allotments because of reclamation and other new areas coming into production of wheat, or (2) to increase the allotment for any county, in which wheat is the principal grain crop produced, on the basis of its relative need for such increase if the average ratio of wheat acreage allotment to cropland on old wheat farms in such county is less by at least 20 per centum than such average ratio on old wheat farms in an adjoining county or counties in which wheat is the principal grain crop produced or if there is a definable contiguous area consisting of at least 10 per centum of the cropland acreage in such county in which the average ratio of wheat allotment to cropland on old wheat farms is less by at least 20 per centum than such average ratio on the remaining old wheat farms in such county, *Provided*, That such low ratio of wheat acreage allotment to cropland is due to the shift prior to 1951 from wheat to one or more alternative income-producing crops which, because of plant disease or sustained loss of markets, may no longer be produced at a fair profit and there is no other alternative income-producing crop suitable for production in the area or county. The increase in the county allotment under clause (2) of the preceding sentence shall be used to increase allotments for old wheat farms in the affected area to make such allotments comparable with those on similar farms in the adjoining areas or counties but the average ratio of increased allotments to cropland on such farms shall not exceed the average ratio of wheat acreage allotment to cropland on old wheat farms in the adjoining areas or counties. There also shall be made available a special acreage reserve of not in excess of one million acres as determined by the Secretary to be desirable for the purposes hereof which shall be in addition to the national acreage reserve provided for in this subsection. Such special acreage reserve shall be made available to the States to make additional allotments to counties on the basis of the relative needs of counties, as determined by the Secretary, for additional allotments to make adjustments in the allotments on old wheat farms * * * on which the ratio of wheat acreage allotment to cropland on the farm is less than one-half the average ratio of wheat acreage allotment to cropland on old wheat farms in the county. Such adjustments shall not provide an allotment for any farm which would result in an allotment-cropland ratio for the farm in excess of one-half of such county average ratio and the total of such adjustments in any county shall not exceed the acreage made available therefor in the county. Such apportionment from the special acreage reserve shall be made only to counties where wheat is a major income-producing crop, only to farms on which there is limited opportunity for the production of an alternative income-producing crop, and only if an efficient farming operation on the farm requires the allotment of additional acreage from the special acreage reserve. For the purposes of making adjustments hereunder the cropland on the farm shall not include any land developed as cropland subsequent to the 1963 crop year.

Sec. 334(b) of the Act requires that the State acreage allotment of wheat for the 1978 crop, less a reserve of not to exceed 3 per centum thereof, be apportioned among the counties in the State on the basis of the preceding year's wheat allotment in each such county, including for 1967 the increased acreage in the county allotted for 1966 pursuant to section 335, adjusted to the extent deemed necessary to establish a fair and equitable apportionment base for each county, taking into consideration established crop rotation practices, estimated decrease in farm allotments because of loss of history, and other relevant factors.

Sec. 334(a) of the Act, as added by section 314 of the Food and Agriculture Act of 1962, provides that if the acreage allotment for any State for the 1978 crop of wheat is 25,000 acres or less, the Secretary, in order to promote efficient administration of the Agricultural Adjustment Act of 1938 and the Agricultural Act of 1949, may designate such State as outside the commercial wheat-producing area for the 1978–79 marketing year. That section also provides that if any State is so designated, acreage allotments for the 1978 crop of wheat and marketing quotas for the 1978–79 marketing year shall not be applicable to any farm in such State, and that acreage allotments in any State shall not be increased by reason of such designation.

Section 336 of the Act, as amended, provides that if a national marketing quota for wheat for one, two, or three marketing years is proclaimed, the Secretary shall, not later than August 1 of the calendar year in which such national marketing quota is proclaimed, conduct a referendum, by secret ballot, of farmers to determine whether they favor or oppose marketing quotas for the marketing year or years for which proclaimed. Section 336 further provides that the Secretary shall proclaim the results of any referendum within thirty days after the date of such referendum, and if he determines that more than one-third of the farmers voting in the referendum voted against marketing quotas, he shall proclaim that marketing quotas will not be in effect with respect to the crop of wheat produced for harvest in the calendar year following the calendar year in which the referendum is held. Section 336 of the Act also provides that if the Secretary determines that two-thirds or more of the farmers voting in a referendum approve marketing quotas for a period of two or three marketing years, no referendum shall be held for the subsequent year or years of such period.

Section 301(b)(8)(B) of the Act, as amended by the Food and Agriculture Act of 1965, provides for the determination of a projected national yield of wheat on the basis of the national yield per harvested acre of wheat during each of the five calendar years immediately preceding the year in which such projected national yield is determined, adjusted for abnormal weather conditions affecting such yield, for trends in yields and for any significant changes in production practices.

Section 301(b)(13)(J) of the Act, as amended by the Food and Agriculture Act of 1964, provides for the determination of projected county yields of wheat on the basis of the yield per harvested acre of wheat for the county during each of the five calendar years immediately preceding the year in which such projected county yield is determined, adjusted for abnormal weather conditions affecting such yield, for trends in yields and for any significant changes in production practices.

Section 324 of the Food and Agriculture Act of 1962 added a new subtitle, designated "Subtitle D—Wheat Marketing Allocation," to title III of the Agricultural Adjustment Act of 1938. Under the sections of the Act comprising this subtitle (379a to 379j, inclusive), during any marketing year for which a national marketing quota is in effect for wheat, beginning with the marketing year on the 1964 crop, a wheat marketing allocation program shall be in effect. Whenever such a program is in effect for any marketing year, the Secretary is required to determine the wheat marketing allocation for such year, which shall be the amount of wheat which in determining the national marketing quota for such marketing year the Secretary estimated would be used during such year for food products for consumption in the United States, and that portion of the amount of wheat which in determining such quota he estimated would be exported in the form of wheat or products thereof during such marketing year on which the Secretary determines that marketing certificates should be issued to producers in order to achieve, insofar as practicable, the price and income objectives of subtitle D. The Secretary is also required to determine the national allocation percentage which shall be the percentage which the national marketing allocation is of the national marketing quota.

Prior to making any of the foregoing determinations, consideration will be given to data, views, and recommendations pertaining thereto which are submitted in writing to the Director, Grains, Oilseeds and Cotton Division, ASCS, P.O. Box 2415, Washington, D.C. 20013. To be sure of consideration, all written submissions must be postmarked not later than April 18, 1977.

All written submissions made pursuant to this notice will be made available for public inspection at the office of the Director during regular business hours (8:15 to 4:45 p.m.).

The Secretary has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

Signed at Washington, D.C., on March 28, 1977.

BOB BERGLAND,
Secretary of Agriculture.

[7 CFR Part 730]

1977 RICE SET-ASIDE PROGRAM

Determination

Section 101(g)(5)(A) of the Agricultural Act of 1949, as amended, provides that the Secretary may require a set-aside of cropland for a crop of rice if he estimates (without taking into consideration the effect of a set-aside) that the carryover of rice for the marketing year beginning in the calendar year immediately following the calendar year in which such crop will be grown will exceed 15 per centum of the total supply of rice for the marketing year beginning in the calendar year in which such crop will be grown. Current projections indicate that, without a set-aside program, carryover stocks as of August 1, 1978, will be 38.5 million hundredweights, 26.4 percent of the projected total supply for the 1977 crop of 145.8 million hundredweights.

A preliminary determination that a set-aside of cropland shall not be in effect for the 1977 crop of rice was published in the FEDERAL REGISTER on January 4, 1977 (42 FR 780), in accordance with provisions of 7 U.S.C. 1441(g).

Notice is hereby given that the Secretary has made a final determination that a set-aside of cropland shall not be in effect for the 1977 crop of rice. (Sec. 101, 63 Stat. 1051, as amended (7 U.S.C. 1441).)

Effective date: This final determination is effective March 29, 1977.

The Secretary has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

Signed at Washington, D.C. on March 25, 1977.

BOB BERGLAND,
Secretary of Agriculture.

Agricultural Marketing Service

[7 CFR Part 908]

HANDLING OF VALENCIA ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

Expenses and Rate of Assessment for the 1976–77 Fiscal Period

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed Rule.

SUMMARY: This notice invites written comment on proposed expenses of $287,-

V4263 APR 1 77 UMI

110 and rate of assessment of $0.0145 per carton of Valencia oranges to support the activities of the Valencia Orange Administrative Committee for the 1976–77 fiscal period under Marketing Order No. 908.

DATES: Comments must be received on or before April 15, 1977. Proposed effective dates: November 1, 1976, through October 31, 1977.

ADDRESSES: Comments may be addressed to the Hearing Clerk, United States Department of Agriculture, Room 1077, South Building, Washington, D.C. 20250. Two copies of all written comments shall be submitted, and they will be made available for public inspection at the Office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

FOR FURTHER INFORMATION CONTACT: Charles R. Brader, Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250, (202) 447–3545.

Consideration is being given to the following proposals submitted by the Valencia Orange Administration Committee, established under the amended marketing agreement and Order No. 908, as amended (7 CFR Part 908), regulating the handling of Valencia oranges grown in Arizona and designated part of California, effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), as the agency to administer its terms and provisions:

(1) Expenses that are reasonable and likely to be incurred by the Valencia Orange Administrative Committee during the fiscal period November 1, 1976, through October 31, 1977, will amount to $287,110.

(2) The rate of assessment for the fiscal period, payable by each handler in accordance with § 908.41, be established at $0.0145 per carton of oranges.

Dated: March 29, 1977.

CHARLES R. BRADER,
Acting Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[7 CFR Part 967]

[Docket No. AO-354-A2]

CELERY GROWN IN FLORIDA

Recommended Decision and Opportunity to File Written Exceptions to Proposed Further Amendment of Marketing Agreement and Order

Notice is hereby given of the filing with the Hearing Clerk of this recommended decision with respect to proposed further amendment of the marketing agreement, as amended, and Order No. 967, as amended (7 CFR Part 967) regulating the handling of celery grown in Florida.

Interested persons may file written exceptions to this decision with the Hearing Clerk, United States Department of Agriculture, Washington, D.C. 20250, by April 18, 1977. The exceptions should be filed in quadruplicate. All written submissions made pursuant to this notice will be made available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

This notice is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900).

PRELIMINARY STATEMENT

This proposed amendment of the marketing agreement, as amended, and order, as amended, was formulated on the record of a public hearing held at Orlando, Florida, February 1, 1977. Notice of the hearing was published in the January 13, 1977, issue of the FEDERAL REGISTER (42 FR 2691) with a supplement to the notice set forth in the January 28, 1977, issue of the FEDERAL REGISTER (42 FR 5362). The proposals contained in the notice were submitted by the Florida Celery Committee.

MATERIAL ISSUES

The material issues of record are as follows:

(1) Providing for a public member on the committee;

(2) Amending § 967.37 "Base Quantities" to clarify the basis for determining Base Quantities, to provide conditions for obtaining and retaining Base Quantities and to add authority to require annual registration by producers;

(3) Amending § 967.38 "Marketable Allotments" to revise the basis for determining each celery producer's annual sales allotment;

(4) Amending § 967.44 Research and Development" to authorize production research;

(5) Providing for the receipt of voluntary contributions to finance research projects;

(6) Making such changes in the order as may be necessary to bring the entire order, as amended, into conformity with the amendatory action resulting from the hearing.

FINDINGS AND CONCLUSIONS

The following findings and conclusions on the material issues are based on the record of the hearing:

(1) The Florida celery marketing agreement and order (hereinafter in the text of findings and conclusions collectively referred to as the "order") should be amended to provide for a representative of the public on the administrative committee. To effectuate such a change, § 967.25 of the current order providing for the establishment and membership of the Florida Celery Committee should be revised to enlarge the committee from 15 members to 16 members, with the additional member to be a public member. Further, § 967.26 providing for eligibility of committee members should be revised to indicate the criteria for the public member, and a new paragraph (f) should be added to § 967.27 "Nominations" to indicate the procedures which should be used in the nomination of the public member.

Record evidence indicates that public representation on commodity committees could improve the exchange of information and viewpoints between industry members and the public. Proponent witnesses indicated that the industry likely would benefit from the judgment and knowledge that a public member could contribute to industry decisions. In turn, such a member could be effective in enlightening the general public with respect to the nature and operation of the celery order. As is provided for producer or handler members, the additional public member should have an alternate.

Individuals selected from the public to serve on the committee should meet specified eligibility requirements. The record indicates that it would be appropriate that public member and alternate member nominees not have a direct financial interest nor be closely associated with the production, processing, financing or marketing of agricultural commodities. Also, such nominees should be able to devote sufficient time and express a willingness to attend committee meetings regularly and to familiarize themselves with the practices and the economics of the industry. The evidence further indicates that preference should be given to selecting nominees who are residents of the production area so that participation in committee meetings and other activities will be more convenient and less expensive.

The public member and alternate member should be nominated by the committee in accordance with rules or regulations which should indicate the qualification requirements for public member nominees and the procedure by which the committee will receive names of candidates. The committee should have the duty of recommending such procedural rules for approval by the Secretary. Record evidence indicates that the public member should be nominated by July 1 each year. This will insure sufficient time for the Secretary to consider the nominations so that selection can be made prior to the beginning of each term of office which would be the same as the terms for producer or handler members. However, the nomination of the initial public member may be made later than July 1 but as soon as practical after said member's position on the committee is authorized.

The committee's responsibility with regard to nominations of public members will require a conforming change in § 967.31 "Duties." A paragraph (m) should be added specifying that one of the committee's duties will be to secure suitable candidates for the public member and alternate positions and to nominate eligible persons to be the public member and alternate on the committee.

(2) Section 967.37 "Base Quantities" should be amended by clarifying the basis for determining Base Quantities, adding a requirement for periodic review of Base Quantities, and modifying the procedure for allocating an annual reserve. The order became effective on November 15, 1965. Since then significant changes have taken place in the distribution of sales authority among producers as reflected in individual producers' holdings of Base Quantities, and the use made of the Base Quantity provisions of the order to establish and maintain orderly marketing conditions. To ensure that regulatory activities related to the Base Quantity provision are more in accord with current and prospective production and marketing trends in the Florida celery industry, this section should be modified as follows:

Paragraphs (a) and (b) specify the procedures which were used in determining the initial Base Quantities under the order. Since these provisions are obsolete, they should be deleted and replaced by a new paragraph (a) which should provide that Base Quantities of producers with a history of production and participation under the order shall be those in effect for the 1976–77 season, as recorded by the committee.

Under the present order, as amended, initial Base Quantities for each producer were determined on the basis of the greatest number of crates of harvested celery sold by him or on his behalf during a specified historical representative period. This method of determining Base Quantities, which is authorized by Section 8c(6)(B) of the act, resulted in allocations to existing producers of authority to sell celery on the basis of a uniform rule for the first season (1965–66) of operation under the Florida Celery Marketing Order. In subsequent years a number of producers transferred their Base Quantities to other producers. Such transfers are authorized by § 967.39 "Transfers" of the order which provides that any producer's Base Quantity may be transferred in part or total for a specified period of time subject to approval of the committee. As a result, producers' Base Quantities in effect for the 1976–77 season as recorded by the Committee on December 15, 1976 are the product of the Base Quantities originally issued under a uniform rule, as subsequently modified by authorized transfers by producers to other producers. Therefore, the proposed basis for determining Base Quantities of producers with a history of sales under the order is substantially the same as the basis set forth when the order was issued in 1965.

Provision also should be made for determining Base Quantities for other producers; i.e. those without a history of sales under the order. Under proposed requirements discussed later herein, such producers may acquire a base from a reserve to be established and allocated annually. Base Quantities of both existing and new producers would be subject to modification because of periodic updating of the method of determining Base Quantities, any increases which might accrue from additive allocations from a reserve to be established by the committee, cancellation of a Base Quantity due to non-use, or transfers of Base Quantity pursuant to § 967.39.

A new paragraph (b) should be incorporated to require the committee to review Base Quantities periodically, and recommend appropriate changes in the basis for determining Base Quantities. This requirement would provide a means of keeping Base Quantities consistent with sales performance.

The record indicates that over a period of time, individual producers often modify their participation in the celery business, increasing or decreasing the size of their operation and in some instances discontinuing celery production and marketing. This results in a disparity between the aggregate of Base Quantities and the production and marketing capacity of the celery industry which affects other aspects of operations under the order. For example, when a grower does not grow and market celery for one or more years, there may be an important effect on the annual sales allotments issued to producers. Each year a determination is made of the total quantity of celery to be marketed (Marketable Quantity). The ratio of the Marketable Quantity to total Base Quantities is applied to individual producers' Base Quantities to determine the quantity or allotment of celery handlers may acquire from each producer. When total Base Quantities include unused individual Base Quantities, some allotments go to inactive producers while active producers may have allotments smaller than warranted by their productive capacity and the total market requirements.

The record indicates that revisions which should be made in the order to provide for entry of new producers, expansion of existing producers' celery operations, or elimination of Base Quantities of persons who do not make a bona fide effort to grow and market celery, could have a substantial effect upon the structure of the industry in terms of numbers of producers and the size of individual celery enterprises. Therefore, in order for the Base Quantities to continue to reflect the productive and market capacity of the industry, it is appropriate to require the committee to review the use being made of Base Quantities. Such appraisals should be made at least every five years but may be made more often to correlate with the rate of change within the industry. In the event a change is deemed necessary, and after due consultation with the industry to solicit their views and suggestions, the committee should so recommend to the Secretary. Record evidence shows, and so should the proposed amendment to the order, that the Secretary may then establish through rule making procedure, a revised appropriate basis for determining Base Quantities.

Paragraph (d) should be revised to require a reserve to be established annually, and to indicate the procedures which should be followed in allocating such reserve. This paragraph currently authorizes a reserve on a permissive basis whereas the proposed reserve requirement would be mandatory.

The order's present reserve authority was designed to permit adjustments in Base Quantities of producers who for various reasons had been adversely affected in their marketing operations during the representative period, or to expand the industry's production capacity in the event existing capacity was unable to satisfy increased market demand. The proposed reserve provision would permit Base Quantity adjustments for the same reasons, and in addition, should reduce the monetary value accuring to Base Quantities. Record evidence shows that until recently Base Quantities were transferred among producers for various financial considerations. However, with a substantial amount of Base Quantity available for acquisition by bona fide producers at no cost, existing Base Quantities should have little or no monetary value. This would be consistent with respect to the objective of the order, which is to achieve orderly marketing rather than to create value in a sales base. For these reasons, the proposed revision should be implemented.

Evidence in the record shows that the annual reserve should amount to six percent of total Base Quantities. Such a reserve would insure year to year stability, and still be adequate to permit new producers to gain entry into the industry, and to allow established producers to expand. The reserve to be allocated for a given year should be calculated from the total Base Quantities in effect the preceding year. The record indicates that half of the reserve should be available to new producers and the other half to existing producers. This is a reasonable and appropriate method of distributing the reserve, and should properly serve the equity interests of both new and existing producers.

Proponent witnesses recommended that the order should provide for any unallocated reserve Base Quantities for new producers to be prorated at the committee's discretion among existing producers on a uniform basis. Such a distribution would be contrary to the basic intent of the reserve authority as it relates to existing producers. The record shows that existing producers may be granted increases in Base Quantities from the reserve upon request, supported by substantial evidence of a production and marketing capability consistent with such request. To grant Base Quantities otherwise, even though on a uniform basis, would serve no useful purpose and, further, would tend to dilute the significance of Base Quantities granted to new producers. Therefore, any reserve for new producers which is unallocated should not be made available to other producers.

The record indicates, and so should the proposed amendment, that additive Base Quantities issued to existing producers from a reserve should be valid for only one season but Base Quantities issued or allocated to new producers should be permanent. Allocations to existing producers would be related to new or additional resources acquired by them or a potential new market. If experience warrants continued production and market-

V 4263 APR 1 77 UMI

ing at the higher level, the producer could again request an additive Base Quantity. The new producer faces different circumstances justifying different treatment with regard to receiving a Base Quantity for a reserve. The establishment of a new farming operation to produce and market celery requires the expenditure of a large amount of money. A producer may not be willing or able to make resource commitments of the magnitude required for a celery business without assurance of an opportunity to market future crops. Therefore, it is fair and reasonable to provide that Base Quantities issued to new producers should not be subject to reissuance each year. At the same time, new producers should be obligated to demonstrate their intent to maintain a viable celery operation. For this reason, and to preclude speculation with respect to reserve Base Quantities, the record shows that the order should provide that Base Quantities issued to new producers cannot be transferred within three years after issuance.

The order should continue to provide that the committee shall establish, subject to approval of the Secretary, rules and procedures to be used in determining the reserve and the adjustments to be made in Base Quantities. The guidelines set forth in the order for the size of the reserve and its allocation to new and existing producers, and for obtaining Base Quantities will help insure equitable treatment for both an applicant and other producers. Therefore, such standards are determined to be proper and adequate for administration of the order. The specific criteria would help insure that adjustments would be fair and reasonable.

Requests for Base Quantity under the reserve authority, together with supporting material, should be made to the committee not later than April 1. This would provide adequate time for the committee to evaluate each request and inform each person of its decision early enough for those granted new Base to initiate plans for the ensuing season. Because of the time required to develop procedures governing the establishment and distribution of the reserve, the order should provide that the reserve feature of the program will become effective for the 1978–79 season.

A new paragraph (e) should be added to empower the committee to cancel a producer's Base Quantity if he does not make a bona fide effort during two consecutive seasons to produce and market celery thereunder. The record indicates that two consecutive years of not marketing should be construed to be evidence of a producer's withdrawal from the celery industry. Cancellation of unused Base Quantities would make the annual calculation of the Marketable Quantity more realistic, should enhance the committee's ability to evaluate potential production, and should contribute to more efficient program operation. This provision should not be mandatory, however, in order that exceptions may be made to recognize extenuating circumstances. Record evidence indicates that one indication of a bona fide effort to produce and market celery would be a producer's marketing of at least half of the alloted celery in which he has a proprietary interest; that is, celery which he owns in part or in total. Other criteria may be similarly designed to preclude token production to preserve a Base Quantity. Rules and regulations should be developed by the committee for approval of the Secretary indicating the procedures to be used in implementing this procedure.

A new paragraph (f) should be added to require annual registration by producers. Under such a requirement, each person planning to grow celery during the ensuing season would have to register with the committee, and indicate his commitments to produce and market celery. Commitments as used in the order relate to the obligation of resources of production, either potentially or in fact. Such resources would include not only the land, labor, and facilities, but also the finances which are necessary to produce celery. The registration procedure would impose no unreasonable burden on the individual, and would contribute greatly to more efficient operation of the order. Registration would provide the committee with a better indication of the potential for production so that a meaningful Marketable Quantity and individual producers' sales allotments could be determined. In the event a producer chose not to register, his Base Quantity should not be affected for that season but he should not receive a marketable allotment. Otherwise, the beneficial effect of the program in achieving a balance of supply with market requirements would be greatly diminished.

The record indicates that all producers should register no later than May 1 each year. This is necessary so that the committee will have sufficient time prior to June 15 to evaluate commitments of registering producers to grow and market celery in the ensuing season. June 15 is the final date for the committee to meet and adopt a marketing policy, including a recommended Marketable Quantity. The 45 day interval from May 1 through June 14 probably is the minimum amount of time needed to evaluate the industry's production capacity and its relationship to prospective market demands. The committee may find through experience that more time would be desirable. If it should be decided that registration should be required by some date other than May 1, the order should allow for such a change.

Proponent witnesses testified that although May 1 should normally be the final date for registration, a later date in 1977 should be specified by the Secretary, provided that such date be no later than July 31. Such a deadline is necessary because producers would not have sufficient time in which to adjust their farming operation to an allocation calculated on the basis of Base Quantities registered after July 31. The requested latitude in setting an initial registration date would permit the implementation of this feature of the proposal a year earlier than would otherwise be practicable and therefore should be provided.

(3) Paragraph (a) of § 967.38 Marketable Allotments should be revised to provide that the Uniform Percentage shall be calculated each year by dividing the Marketable Quantity by the total Base Quantities of producers who register with the committee. As discussed earlier, some Base Quantities may not be used every year. The inclusion of such Base Quantities in the calculation of the Uniform Percentage would distort the relationship between production capacity and market requirements, contrary to the objective of the order.

Such a change in calculation of the Uniform Percentage would require a conforming change in § 967.15 Uniform Percentage so that it would state that such percentage would be derived by dividing the Marketable Quantity by the total Base Quantities of registered producers as provided in § 967.38.

Also, paragraph (e) of § 967.38 Marketable Allotments should be revised to provide that the first 37,500 crates of all producers' Base Quantities shall be omitted in the calculation and application of the Uniform Percentage. The order presently specifies that only the Base Quantities of those producers with Base Quantities of 37,500 crates or less must be omitted in such calculations.

The objective of the current provision is to prevent undue hardship for the relatively small producers. Each year the Secretary determines the total amount of celery which should be marketed (Marketable Quantity). The Marketable Quantity is divided by the total Base Quantities of registered producers, with the result being the Uniform Percentage. This percentage is then applied to each producer's Base Quantity to determine each producer's annual sales allotment. However, the Base Quantities of the smaller producers, those with 37,500 crates or less of Base Quantity, are excluded from both the calculation and the application of the Uniform Percentage. Their annual sales allotments must be equal to (or in the event of a Uniform Percentage above 100 percent, larger than) their total Base Quantity. While this provision is beneficial to producers who choose to maintain a small celery business, it tends to discourage expansion on the part of other small producers. For example, a producer with a Base Quantity of 37,500 crates acquiring one additional crate of Base Quantity becomes subject to application of the Uniform Percentage; if such percentage were 90, his Marketable Allotment would be 33,751 crates. By acquiring the additional crate of Base Quantity, he would reduce his sales allotment by 3,750 crates.

The proposed revision would still protect the small producer from a reduction in his sales allotment. However, by exempting the first 37,500 crates of every producer's Base Quantity from application of the Uniform Percentage, a deterrent to expansion on the part of small producers would be eliminated.

A new paragraph (f) should be added to this section to provide that Marketable Allotments shall be issued only to those producers who register with the committee by May 1 each year. As discussed earlier herein, registration by producers to indicate their intent and commitment to produce and market celery is essential to effective operation of the order. Therefore, such a requirement is appropriate.

(4) Section 967.44 of the order should be amended to authorize production research. The order presently contains authority for the committee to undertake or finance marketing research and development projects and marketing promotion. Celery growers in Florida requested of the Secretary that the order be amended to authorize committee expenditures for production research to broaden the possibilities for reseach beneficial to the Florida celery industry and its customers.

The record indicates that the need for research on matters related to the production of celery is great. Producers of this crop are beset by a variety of problems ranging from those associated with attacks by disease and insects to the need for varieties better suited to the production area.

Expert witnesses testified to the continuing requirement for research in order to solve the severe problems caused in recent years by insects, particularly the leaf miner which is a relative newcomer on the local list of problem pests. Leaf miner infestations have sharply curtailed yields of good quality celery, and control efforts thus far have been only partially effective. Harmful soil organisms remain a problem, as do virus and root disease, and the various blights.

The improvement of existing varieties and development of new varieties might contribute significantly to the production of celery that is better able to withstand the attacks of the many pests. Varietal research may also lead ultimately to a reduced incidence of premature bolting or growth cracks, and lower the susceptibility of celery to damage by low temperatures.

Research in any or all of the aforementioned areas would contribute to lower costs and more efficient production. However, production research should not be limited to such areas. The committee should have broad and flexible authority for timely development of production research programs on any problems that arise.

In recent years, there has been active competition for research dollars within the agricultural community. Celery must share with many other crops, with similar production problems, the available research time, effort, and funds. Indications are that a relatively small amount of celery industry money, provided by the committee, will encourage research into the areas especially desired by the industry. The act provides that an assessment can be levied for specific purposes including production research. With these added funds, the committee can make a substantial commitment to such research.

Record evidence shows that currently most production research on celery in Florida is performed by public agencies, such as the University of Florida or the U.S. Department of Agriculture. Research funded by the committee would most likely also be carried out by such public agencies. However, this would not rule out having private organizations or the committee itself conduct such research.

All proposals for research must be submitted to the Secretary for approval. Also, the committee should have the authority to make any necessary changes in the format of the research project as long as it does not change the original objectives. Any change that required a greater expenditure of funds would require Departmental approval. Activity reports on research conducted should be issued by the committee annually, although interim reports on research projects may be issued. Reports should also be issued in writing or verbally by the organization conducting the research. All written reports should be provided to the Secretary and committee members as well as any other interested parties.

The record has demonstrated that a program of production research administered by the marketing order committee should have a positive effect upon the production of Florida celery, thereby increasing returns to growers. In view thereof, it is concluded that the order should be amended to authorize production research.

(2) A new § 967.63 should be added to the order to provide for the receipt of voluntary contributions to be used only for research and development projects. Record evidence indicates that research and market development projects for Florida celery directly benefit growers of that commodity, and secondarily benefit other groups and businesses whose interests are allied with the production and marketing of celery. These groups frequently desire to contribute resources to research and development projects and the order should provide that such contributions may be accepted by the committee. It is important, however, that the committee have complete control over the use of any contributions, which must be free of any encumbrances by the donor.

(6) Some of the amendatory actions included in this recommended decision require that certain conforming changes be made so that the order, as amended, will be in conformity with those actions. One such change (add a new paragraph (m) to § 967.31, *Duties*) is discussed with the issue to which it is pertinent. All such changes should be incorporated in the recommended amendment of the order.

Rulings on briefs of interested persons. At the conclusion of the hearing, the Administrative Law Judge fixed February 11, 1977, as the final date for interested persons to file proposed findings and conclusions, and written arguments or briefs, based upon the evidence received at the hearing. One brief was filed by John Joseph Cassidy, Esq., and Jamie S. Gorelick, Esq., on behalf of Gressinger and Sons. Every point in the brief was carefully considered along with record evidence in making the findings and reaching the conclusions herein set forth. To the extent that the findings and conclusions in the brief are inconsistent with findings and conclusions contained herein, requests to make such findings or to reach such conclusions are denied on the basis of the facts found and stated in connection with this recommended decision.

In addition to continuing proposed findings and conclusions on the material issues, the brief recommended that all information obtained by the committee concerning transactions, activities, and use being made of base quantities and marketable allotments be available to committee members. The act prohibits the disclosure of information that may affect detrimentally the business operations of the persons who furnish reports required under marketing orders. However, since the operation of this allocation program is inextricably involved with individual producers' base quantities and marketable allotments, this information should not be treated as confidential. All other information must remain confidential and in the custody of the committee staff, as required under § 967.73 of the order.

General findings. Upon the basis of the record, it is found that:

(1) The findings hereinafter set forth are supplementary, and in addition, to the previous findings and determinations which were made in connection with the issuance of the marketing agreement and order and each previously issued amendment thereto. Except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein, all of said prior findings and determinations are hereby ratified and affirmed;

(2) The marketing agreement and order, as amended, and as hereby proposed to be further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(3) The marketing agreement and order, as amended, and as hereby proposed to be further amended, regulate the handling of celery grown in the production area in the same manner as, and are applicable only to persons in the respective classes of commercial and industrial activity specified in, the marketing agreement and order upon which hearings have been held;

(4) The marketing agreement and order, as amended, and as hereby proposed to be further amended, are limited in their application to the smallest regional production area which is practicable, consistently with carrying out the declared policy of the act, and the issuance of several orders applicable to subdivisions of the production area would not effectively carry out the declared policy of the act;

(5) The marketing agreement and order prescribe, so far as practicable, such

V 4263 APR 1 77 UMI

different terms applicable to different parts of the production area as are necessary to give due recognition to the difference in the production and marketing of celery grown in the production area; and

(6) All handling of celery grown in the production area as defined in the marketing agreement and order, as amended, and as hereby proposed to be further amended, is in the current of interstate or foreign commerce or directly burdens, obstructs, or affects such commerce.

RECOMMENDED AMENDMENT OF THE MARKETING AGREEMENT AND ORDER

The following amendment of the marketing agreement and order, as amended, is recommended as the detailed means by which the foregoing conclusions may be carried out:

1. Revise § 967.15 to read as follows:

§ 967.15 Uniform percentage.

"Unform Percentage" means the percentage for any given season resulting from dividing the Marketable Quantity by the total Base Quantities registered by producers as provided in § 967.38.

2. Revise § 967.25 to read as follows:

§ 967.25 Establishment and membership.

There is hereby established a Florida Celery Committee consisting of 16 members, including 15 producer or handler members and one public member to administer the terms and provisions of this part. Each shall have a respective alternate who shall have the same qualifications as the member.

3. Revise § 967.26 to read as follows:

§ 967.26 Eligibility.

Each member and alternate of the committee, except for the public member and alternate, shall be at the time of his selection and during his term of office, a producer or handler, or an officer or employee of a producer or handler in the group for which selected. The public member shall be neither a producer nor handler and shall have no direct financial interest in the production or marketing, except as a consumer, of agricultural products.

4. Revise § 967.27 by adding a new paragraph (f) to read as follows:

§ 967.27 Nominations.

* * * * *

(f) The members of the committee selected by the Secretary pursuant to § 967.32 shall nominate a public member and alternate member of the committee. The committee shall recommend rules for receiving names of persons to be considered for nomination to the public member and alternate positions. Rules shall also be recommended for establishing eligibility of persons nominated to the public member and alternate positions. The persons nominated for the public member and alternate positions shall be submitted by the incumbent committee to the Secretary by July 1 of each year together with information deemed pertinent by the committee or as requested by the Secretary.

5. Amend § 967.31 by adding paragraph (m) to read as follows:

§ 967.31 Duties.

* * * * *

(m) To secure suitable candidates for the public member and alternate positions, and to nominate persons for such positions on the committee.

6. Amend § 967.37 to read as follows:

§ 967.37 Base Quantities.

(a) (1) Base Quantities for producers with a history of production and order participation for the period 1965–66 through 1976–77 shall be Base Quantities in effect for the 1976–77 season, as recorded by the Florida Celery Committee on December 15, 1976, subject to modifications relating to current production and marketing experience specified in (b) through (e) of this section, or to transfers pursuant to § 967.39.

(2) Base Quantities for other producers shall be established pursuant to Base Quantity reserve as specified in paragraph (d) of this section, subject to modifications relating to current production and marketing experience specified in (b) through (e) of this section, or to transfer pursuant to § 967.39.

(b) Periodically, but at least once each five years, the committee shall review Base Quantities and recommend any change in the formula, to be prescribed by the Secretary, for determining Base Quantities which may be deemed appropriate.

* * * * *

(d) (1) Beginning with the 1978/79 season, a reserve in the amount of six percent of the total Base Quantities shall be established annually. Such reserve may be used for the issuance of Base Quantities to new producers and adjustments in Base Quantities for producers with existing Base Quantities, with 50 percent being made available for new producers and 50 percent available for adjustments for producers with existing Base Quantities.

(2) Base Quantities issued to new producers shall be permanent, subject to requirements of § 967.37(e). Base Quantities issued to new producers shall not be transferrable within three years after issuance. Any adjustments in Base Quantities issued to producers with existing Base Quantities shall be effective for one season only and a new request by such producers for adjustment in Base Quantity shall be submitted each season.

(3) The committee may recommend rules for establishing such reserve and for procedures whereby persons may apply for Base Quantities thereunder. Such rules shall be subject to approval by the Secretary. Rules may provide for open informal hearings by the committee on applicants' requests and may establish guides or standards for equitable and thorough consideration of pertinent factors relating to each case, including but not limited to past production of celery by applicant, acreage planted, average yields, the production capacity of the farm or land the applicant expects to use, land, labor, and equipment available to applicant for celery production, economic and marketing factors, and other factors deemed pertinent.

(4) Each person filing an application hereunder for a new Base Quantity or adjustment in an established Base Quantity shall be notified by the committee of its determination thereon. Such determination and considerations appertaining thereto shall be subject to review by the Secretary. If a Base Quantity is issued to an applicant hereunder, the requirements of § 967.38(c) shall then apply.

(e) A condition for the continuing validity of a Base Quantity is production of celery thereunder. If no bona fide effort is made to produce and sell celery thereunder for two consecutive seasons commencing with the 1977–78 season, the Base Quantity may be declared invalid due to lack of use and cancelled at the end of the second season of nonproduction. The committee shall determine criteria, subject to approval by the Secretary, as to whether a bona fide effort has been made to produce and sell celery, including one requirement that the producer must have sold at least 50 percent of each of his seasonal Marketable Allotments, unless prevented from doing so by acts of God or other circumstances beyond his control.

(f) Annual registration of Base Quantity holders will be required no later than May 1 or such other date as may be approved pursuant to regulations. For the 1977–78 season Base Quantity holders shall register within 30 days following the effective date of this part but no later than July 31, 1977. Any Base Quantity holder who does not register or who has not made firm and substantial commitments to produce celery for the forthcoming season shall have his Base Quantity eliminated from the calculations in determining the Uniform Percentage. However, such procedure will not cause the Base Quantity holder to lose his Base Quantity.

7. Amend § 967.38 to read as follows:

§ 967.38 Marketable Allotments.

(a) When the Secretary establishes a season's Marketable Quantity, a percentage shall be determined by dividing the amount fixed as the season's Marketable Quantity by the total Base Quantities of producers who have registered with the committee pursuant to § 967.37(f).

* * * * *

(e) The first 37,500 crates of each producer's Base Quantity shall be subtracted from both the Marketable Quantity and total Base Quantities when the Uniform Percentage is calculated in this section (§ 967.38(a)). The Uniform Percentage for the first 37,500 crates will be 100 percent except when the Uniform Percentage calculated in this section (§ 967.38(a)) exceeds 100 percent in which event the higher percent shall be used.

(f) Marketable allotments shall be issued only to producers who have registered by May 1, or such other date prescribed by the Secretary, and indicated firm and substantial commitments for the production of celery for the forthcoming season.

8. Revise the section heading and the first two sentences of § 967.44 to read as follows:

§ 967.44 Research and development.

The committee may, with the approval of the Secretary, establish or provide for the establishment of projects involving production research, marketing research and development projects, and marketing promotion including paid advertising, designed to assist, improve or promote the marketing, distribution and consumption or efficient production of celery. The expenses of such projects shall be paid by funds collected pursuant to §§ 967.61 or 967.63.* * *

9. Add a new § 967.63 to read as follows.

§ 967.63 Contributions.

The committee may accept voluntary contributions but these shall only be used to pay expenses incurred pursuant to § 967.44. Furthermore, such contributions shall be free from any encumbrances by the donor and the committee shall retain complete control of their use.

Signed at Washington, D.C., on March 29, 1977.

WILLIAM T. MANLEY,
Acting Administrator.

[7 CFR Part 989]

[Docket No. AO–198–A9]

RAISINS PRODUCED FROM GRAPES GROWN IN CALIFORNIA

Recommended Decision and Opportunity To File Written Exceptions to Proposed Further Amendment of Marketing Agreement and Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed Rule

SUMMARY: This recommended decision would amend the Federal marketing agreement and order covering California raisins. It provides interested persons with the opportunity to file written exceptions concerning the recommendations made herein.

The major purpose of the recommended changes in the order is to improve operations. The principle changes would: (a) Streamline the definition of "varietal types" so all raisins with similar characteristics would be included in the same varietal type, regardless of the method of production or variety of grape used; (b) provide for grading requirements and grower district representation provisions to be relocated in the rules and regulations to facilitate reference; (c) simplify provisions to change grading requirements when price levels are below or above parity; and (d) make minor changes in the provisions pertaining to offering reserve tonnage raisins to handlers. Authority is also proposed to be added to designate certain raisins for production, processing, and marketing research and development projects and for exempting these raisins from any or all regulation under the order

DATE: Written exceptions to this recommended decision may be filed with the Hearing Clerk, U.S. Department of Agriculture, Washington, D.C. by April 22, 1977.

ADDRESS: Written exceptions should be filed in quadruplicate with the Hearing Clerk, Room 1077, South Building, U.S Department of Agriculture, Washington, D.C 20250. All written submissions will be made available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service, Department of Agriculture, Washington, D.C. 20250 (202–447–3545).

SUPPLEMENTARY INFORMATION: Prior documents in this proceeding: Notice of Hearing issued October 21, 1976; published October 27, 1976 (41 FR 47059).

PRELIMINARY STATEMENT

Notice is hereby given of the filing with the Hearing Clerk of this recommended decision with respect to proposed further amendment of the marketing agreement, as amended, and Order No. 989, as amended (7 CFR Part 989; 41 FR 32412), regulating the handling of raisins produced from grapes grown in California, and of the opportunity to file written exceptions thereto.

This notice is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing orders (7 CFR Part 900).

This proposed amendment of the marketing agreement, as amended, and order, as amended, was formulated on the record of a public hearing held at Fresno, CA, November 5, 1976, pursuant to notice thereof.

Material issues. The material issues of record are as follows:

(1) Revising the definition of "act", "varietal type"; adding definitions for "other failing raisins", and "raisin residual material"; and deleting the definition of "bleached raisins".

(2) Deleting provisions specifying grower districts for the purposes of grower representation on the committee; providing for the establishment of these provisions in rules and regulations; and making conforming changes in certain related provisions.

(3) Deleting provisions specifying incoming and outgoing grade standards; providing for the establishment of these standards in rules and regulations; simplifying provisions for changing these standards in below or above parity situations, and deleting related provisions which are no longer necessary.

(4) Adding provisions permitting establishment of procedures to give handlers the option of eliminating the initial inspection check for a certain defect on incoming raisins.

(5) Adding provisions for designating raisins for certain research and development and for exempting these raisins from any or all regulations under the order.

(6) Clarifying provisions on the substitution of reserve tonnage raisins; deleting authority for the establishment of minimum export prices for reserve tonnage raisins; and making minor changes in the provisions on offering reserve tonnage raisins to handlers.

(7) Clarifying provisions on handler services performed with respect to reserve tonnage raisins.

(8) Deleting an obsolete reference to the Raisin Advisory Board.

(9) Making such changes in the order as may be needed to bring the entire order, as amended, into conformity with the amendatory action resulting from the hearing.

Findings and conclusions. The following findings and conclusions on the material issues are based on the record of hearing:

(1) The definition of "act" in § 989.2 should be revised to mean Public Act No. 10, 73d Congress, as amended and as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended (Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674). This updates the citation contained in the definition, thereby covering the complete statutory authority pursuant to which the marketing agreement and order (hereinafter, in this text of the Findings and conclusions, collectively referred to as the "order") is operative. The citation (48 Stat. 31, as amended; 7 U.S.C. 601 et seq.; 68 Stat. 906, 1047) is replaced by (Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674). In the notices of hearing, the proposed definition contained the date May 12, 1933, the effective date of Public Act No. 10, 73d Congress. At the hearing, the proponents recommended that this date be deleted because it was not needed.

When the order was established in 1949, it regulated the handling of raisins produced from Thompson Seedless, Muscat, Sultana, and Zante Currant raisin variety grapes grown in California. At that time, these comprised all of the varieties from which any appreciable volume of raisins were produced. The raisin industry recognized that raisins with differing characteristics due to the particular variety of grapes or the method of drying grapes into raisins, or both, could entail different regulatory treatment. Thus, the categorization of raisins into varietal types was established in conjunction with the application of quality and volume regulations.

In the ensuing years, the raisin industry became concerned that other grape varieties (table and wine) could be made into raisins and compete with raisins made from the traditional raisin variety grapes. These grape varieties included, but were not limited to, Alicante Bouschet, Cardinal, Carignane, Italia, Malaga, Monukka, and Zinfandel. So

V 4263 APR 1 77 UMI

that raisins produced from these grape varieties would be regulated, the order was amended in 1960 to cover all raisins made from grapes produced in California, and these table and wine grapes were added to the list of varietal types. At the same time, authority was added permitting the committee, with the approval of the Secretary, to change the list of varietal types to meet changing conditions in the future.

After operating under this extensive list of varietal types for approximately 10 years, the industry discovered that the categorization of the varietal types was so particularized that raisins with similar characteristics and market uses had been put into different varietal types. Needless to say, this categorization made differentiation for volume and quality regulations quite difficult. Also, the raisin industry found that certain varietal types had never been produced in commercial quantities. Furthermore, for some raisins there are no grade standards and these raisins have been inspected against the standards prescribed for the raisins they most closely resemble.

In 1973, the raisin industry determined that improved order operations could be achieved if raisins with similar characteristics would be treated as the same varietal type regardless of the variety of the grape or production processes used to dry the grapes into raisins. An example of this is the way raisins produced from Cardinal, Malaga, and Italia are treated. Raisins produced from these three varieties of grapes possess characteristics similar to Muscats and Valencias. Through rulemaking, they are being treated as Muscats and Valencias for regulatory purposes. To cite another example of varietal type combining, in 1975, it was determined through rulemaking that raisins produced by the various dipping methods possess characteristics so similar to each other that they should all be classed as one varietal type, Dipped Seedless.

To incorporate the changes already made on varietal types through rulemaking into the order, but in a somewhat broader degree, § 989.10 should be revised to describe seven varietal types. Each varietal type proposed is intended to be broad enough to include all raisins with similar characteristics and market uses regardless of the grape variety or method of drying used in producing the raisins. These varietal types should include: (1) Natural (sun-dried) Seedless, (2) Dipped Seedless, (3) Golden Seedless, (4) Muscats (including other raisins with seeds), (5) Sultana, (6) Zante Currant, and (7) Monukka. These raisins are generally recognized as possessing characteristics differing from other raisins in a degree sufficient to make necessary or desirable separate identification and classification. The section heading, varietal type, was used in the notice of hearing. This heading should be changed to "varietal types" to more accurately reflect the contents of the provisions in § 989.10.

Category (1), Natural (sun-dried) Seedless, should include all sun-dried seedless raisins that possess characteristics similar to natural Thompson Seedless raisins and which have not been dipped in or sprayed with water, with or without soda, oil, or other chemicals prior to or during the drying process. This varietal type would include raisins made from such grape varieties as Thompson Seedless, Emerald Seedless, or Perlette which are dried on the vine or dried after removal therefrom.

Category (2), Dipped Seedless, should include seedless raisins produced by sun-drying or other dehydration of grapes which have been dipped in or sprayed with water, with or without soda, oil, or other chemicals and which may or may not have been sulfured prior to drying. It would not include Golden Seedless raisins, but could include dried-on-the vine raisins. This varietal type would include raisins made from such grape varieties as Thompson Seedless, Emerald Seedless, and Perlette.

Category (3), Golden Seedless, should include raisins whose color varies from dark to golden yellow. The process for making these raisins is similar to the process for making Dipped Seedless raisins, but following the dipping process, Golden Seedless raisins are moved to a sulfur house and exposed to fumes of burning sulfur. After this, they are dried.

Category (4), Muscats (including other raisins with seeds) should include all raisins with seeds. Raisins produced from Muscat grapes (Muscat of Alexandria and Muscatel Gordo Blanco) would be the most common. However, raisins from such other grapes as Malaga, Valencia, Alicante Bouschet, Cardinal, Carignané, Italia, and Zinfandel would also be included. Muscat raisins are marketed in three forms: Loose, seeded, or layered. Loose are those where the stems are removed, but the seed is intact. Seeded Muscats have both stems and seeds removed. Layered Muscats are unstemmed and left in bunches.

Category (5), Sultana, should include all raisins with an undeveloped (vestigial) seed. The most prominent raisins in this varietal type are produced from Sultana grapes. They resemble natural Thompson Seedless, but are not as plump.

Category (6), Zante Currant, should include all raisins produced from Black Corinth or White Corinth grapes. They are darker than natural Thompson Seedless and very small.

Category (7), Monukka, should include raisins produced from Monukka and Black Imperial grapes. These raisins are usually larger, darker, and plumper than the other varietal types.

A distinction between natural and dipped-made raisins should only be made on seedless raisins, not raisins with seeds. At this time, the industry does not believe it is necessary to make this distinction and additional differentiation.

Types of raisins in the future may possess characteristics sufficient different from those known today to require separate identification and classification for the purposes of quality or volume regulation under the order. Should this occur, the new varietal type of raisin should be added to the list of varietal types by rulemaking and not necessitate formal amendment proceedings.

The inspection agency of the committee would be responsible for classing raisin lots by varietal types. Should any question arise as to the inspector's classification of any varietal type delivered, the tenderer should appeal to the committee. If an appeal is made, the committee should call on other experts in the industry to classify the raisins into one of the seven recommended types. If the raisin is new, possessing characteristics significantly different from those of the seven listed, then it should be added to the list by rulemaking.

The definitions of "other failing raisins" and "raisin residual material" in § 989.59(f) should be moved to that portion of the order devoted to "definitions" for convenient reference and to improve order organization. These definitions should be included in § 989.24 together with the definitions of the terms "standard raisins" and "off-grade raisins". "Other failing raisins" should be defined to mean any raisins received or acquired by a handler, either as standard raisins or off-grade raisins, which are processed to a point where they qualify as packed raisins but fail to meet the applicable minimum grade standards for packed raisins. This definition is the same as that currently contained in § 989.59(f). "Raisin residual material" should be defined to mean defective raisins, stemmer waste, sweepings, and other residue accumulated by a handler from reconditioning raisins or from processing standard raisins and other failing raisins. Except for the deletion of the phrase "which may be received or acquired by a handler or", the definition is the same as currently contained in § 989.59(f). The phrase, which should be deleted, is used for regulatory purposes in § 989.59(f) and is not needed to define the term "raisin residual material".

In connection with moving the definitions of these two terms to § 989.24, conforming changes are needed in the definition of "off-grade raisins". The phrases "for the purposes of disposition" and "pursuant to § 989.59(f)" are no longer needed in the definition and should be deleted. With the deletion of these two phrases, "off-grade raisins" would mean raisins which do not meet the then effective minimum grade and condition standards for natural condition raisins: *Provided*, That raisins which are certified as off-grade raisins shall continue to be such until successfully reconditioned or become "other failing raisins". Section 989.13, Processor, and § 989.84, Disposition limitation, both contain parenthetical references to the definition of "other failing raisins" contained in § 989.59(f). These references are no longer needed and should be deleted. The current heading of § 989.24, Standard raisins, and off-grade raisins, was published in the notice of hearing. However, the heading should be changed to Standard raisins, off-grade raisins, other failing raisins, and raisin residual material to more accurately reflect the provisions which would appear under the heading.

The term "bleached raisins" in § 989.6 should be deleted because the term is obsolete and will no longer be used under the order. The term covers (a) any raisins which have been produced by soda dipping, with or without oil, whether sun-dried or artificially dehydrated, or (b) any raisins which have been produced by soda dipping, sulfuring, and sun-drying. Outside the raisin industry, the term "bleach" and its various forms are used generally in connection with the removal of color. However, in the raisin industry, the term refers to a slowing down of the darkening process (oxidation) which occurs during drying. The longer it takes grapes to dry the darker the raisins become.

The types of raisins generally included under the term "bleached raisins" have been called Soda Dipped raisins, Sulfur Bleached raisins, and Valencia raisins. However, because the term means one thing to the raisin industry and another to persons outside the industry, the industry will no longer use this term under the order. Moreover, Soda Dipped raisins and Sulfur Bleached raisins would be classified as Dipped Seedless raisins, and Valencia raisins classified as Muscats under the recommended revision of § 989.10, Varietal types.

In connection with the deletion of this term, a conforming change should be made in § 989.8, Natural condition raisins, by deleting the words "with or without bleaching". Also, conforming changes should be made in the provisions in § 989.97 (Exhibit B) Grade and condition standards for natural condition raisins, when these requirements are moved to the rules and regulations as discussed under Material Issue (3).

(2) The provisions of § 989.96 specify several producer districts and the number of producers to represent the respective districts on the Raisin Administrative Committee. In 1967, these provisions were changed to require producer representation on the committee to be reviewed every three years for equitable producer representation and any necessary changes made. Pursuant to this mandate, changes were made and placed in the rules and regulations. Hence, provisions on district representation are either in the order or in the rules and regulations. This format requires a review of the applicable order provisions and the rules and regulations to be sure of finding all of the current district representation. To eliminate this and thus facilitate reference to grower district representation, § 989.96 should be deleted and the provisions on district representation prescribed in the rules and regulations. Thus, all such regulations would be in the same place and the current difficulties with the present format would be eliminated. Furthermore, the mandate for review makes this change logical and desirable.

The provisions currently in § 989.96 should be moved to the rules and regulations at or after the time the recommended amendment of the order becomes effective. The requirements contained in § 989.96 should remain in effect until October 1, 1977, and then be established in the rules and regulations.

In view of this recommended change, appropriate changes should be made in the provisions of § 989.22 District, § 989.26 Establishment and membership, and § 989.26a Changes in producer representation, as follows: (a) In § 989.22, the phrase "specified in § 989.96" should be changed to "designated in the rules and regulations"; (b) in the second sentence of § 989.26, the term "§ 989.96" should be changed to "the rules and regulations"; and (c) in the first sentence of § 989.26a, the term "§ 989.96" should be changed to "the rules and regulations".

(3) Under the order, all natural condition raisins tendered to the handler must meet minimum grade and condition standards before the handler is permitted to acquire or receive them. After the raisins are processed to the point where they can be classified as packed raisins, minimum standards for packed raisins are applied to them prior to shipment or final disposition. The minimum grade and condition standards for natural condition raisins (incoming grade standards) are closely related to those for packed raisins (outgoing grade standards), since raisins meeting the incoming standards have to be of a quality and condition that they would, when properly processed, meet the effective minimum grade standards for packed raisins.

Section 989.58(a) does not permit a handler to acquire or receive natural condition raisins which fail to meet the grade and condition standards set forth in § 989.97 (Exhibit B) or as later changed and then in effect. No handler may ship or otherwise make final disposition of packed raisins unless they at least meet the minimum grade standards for packed raisins specified in § 989.59–(a).

Changes in the applicable grade and condition standards are authorized pursuant to §§ 989.58(b) and 989.59(b). Numerous changes have been made in both, the natural condition and packed standards, by rulemaking since the standards have been effective. Hence, standards are prescribed in one part of the order and the changes are in rules and regulations. This format requires a review of the applicable order provisions and provisions in the rules and regulations to be sure of finding all of the current incoming and outgoing grade regulations.

To eliminate this and facilitate reference to the applicable regulations, the minimum grade and condition standards for natural condition raisins set forth in § 989.97 (Exhibit B), and the minimum grade standards for packed raisins in § 989.59(a), should be deleted and provision made for their establishment and relocation in the rules and regulations along with changes currently prescribed therein.

In order to permit the establishment of the grade and condition standards in the rules and regulations, that part of the first sentence of § 989.58(a) before the proviso, should be revised to provide that no handler shall acquire or receive natural condition raisins which fail to meet such minimum grade and condition standards as the committee may establish, with the approval of the Secretary, in applicable rules and regulations.

In the notice of hearing, it was proposed that the word "the" follow the infinitive "to meet" in the first sentence of § 989.58(a). Also, the word "raisins" in the first proviso was inadvertently omitted after the phrase "may receive off-grade". At the hearing, the proponents proposed that the word "such" be inserted in place of "the" because it is more exacting in conveying the intent of the provision, and that the word "raisins" be inserted after the phrase "may receive off-grade" in the first proviso.

Also, in the notice of hearing, the last sentence of § 989.58(a) was proposed to be amended by deleting the phrase "the acquisition or receipt of" after the phrase "this paragraph shall apply to". However, this phrase should be included in the last sentence of § 989.58(a) because its deletion alters the meaning of the sentence.

The proposal in the notice of hearing on revising § 989.59(a) merely brought the minimum grade standards for packed raisins into conformity with the recommended revision of varietal types discussed in Material Issue (1). However, the record evidence indicates that the minimum standards for packed raisins prescribed in paragraph (a) should be deleted and provision made for their establishment by rulemaking in rules and regulations. This change should be made for the same reason that the change in § 989.58(a) should be made; namely, to facilitate reference to the applicable regulations by eliminating the need to look in the order and the regulations. Therefore, § 989.59(a) should provide that unless otherwise provided in this part, no handler shall: (1) Ship or otherwise make final disposition of natural condition raisins unless they at least meet the effective and applicable minimum grade and condition standards for natural condition raisins, or (2) ship or otherwise make final disposition of packed raisins unless they at least meet such minimum grade standards established by the committee, with the approval of the Secretary, in applicable rules and regulations or as later changed or prescribed pursuant to the provisions of paragraph (b) of § 989.59. The two provisos currently in paragraph (a) pertaining to the shipment or final disposition of varietal types of raisins for which no standards are in effect, and authorization to grind raisins which do not meet the minimum standards for packed raisins because of mechanical damage or sugaring, into a raisin paste, should be retained in the revision of § 989.59(a).

The grade and condition standards currently contained in § 989.97 (Exhibit B) and the standards for packed raisins currently specified in § 989.59(a) should

V 42 63 APR 1 77 UMI

be moved to the rules and regulations at or after the time the recommended amendment of the order becomes effective. The requirements contained in § 989.97 (Exhibit B) and § 989.59(a) should remain in effect until October 1, 1977, and then be established in the rules and regulations. The temporary changes in the minimum grade standards for packed raisins (terminating November 30, 1977) set forth in § 989.202 of Subpart—Supplementary Regulation (41 FR 52645) should be recognized when establishing the minimum standards for packed raisins in the rules and regulations.

As indicated previously, § 989.58(b) provides, in part, that the committee may recommend to the Secretary changes in the minimum grade and condition standards for natural condition raisins. Similarly, § 989.59(b) provides, in part, that the committee may recommend to the Secretary changes in the minimum grade standards for packed raisins of any varietal type prescribed in paragraph (a) of that section. Section 989.61(a) provides that the provisions of Part 989 relating to minimum grade and condition standards and inspection requirements, within the meaning of section 2(3) of the Act, and any other provisions pertaining to the administration and enforcement thereof, shall continue in effect irrespective of whether the estimated season average price to producers for raisins is in excess of the parity level specified in Section 2(1) of the Act. Section 2(3) authorizes the Secretary to establish and maintain such minimum standards of quality and maturity and such grading and inspection requirements for certain agricultural commodities, other than milk and its products, in interstate commerce as will effectuate the orderly marketing of those commodities as will be in the public interest Many questions have been asked by the raisin industry over the years seeking clarification on the types of changes permitted pursuant to §§ 989.58(b) and 989.59(b), and the applicability of these changes in below, or above parity situations. Consistent with the legislative history of section 2(3) of the Act, minimum standards of quality are intended to keep off the market low quality, off-grade, culls, unclassified, or immature products, even though prices are above the parity level. Such action is intended to be in the interest of consumers, as well as in the interest of producers. Any changes in the minimum standards, whether temporary or permanent, to be applicable in above parity situations, must be justified in the public interest. Conditions may occur in any season necessitating changes in the minimum standards. These conditions can arise from many circumstances, including but not limited to, (a) crop conditions, (b) changes or advances in production, processing, and packaging technology, (c) conditions requiring more precise correlation between the incoming and outgoing standards, and (d) changes in economic factors affecting the orderly marketing of raisins in the public interest With respect to (a), there have been two years (1958 and 1976) in which a large portion of the raisin crop was badly damaged by rain. All-out efforts were made to salvage as much of the crops as possible. In both seasons, there were temporary relaxations in the minimum standards. The purpose of the relaxations was to permit the industry to salvage as much of those crops as possible, but still be able to market a product acceptable to consumers and other users. These changes were in the public interest. However, there have been instances in which raisin production was reduced because of weather, but changes in the minimum standards were unnecessary. For example, in 1972, the production of California raisins was drastically curtailed by freezes. Those raisins that were produced in the fall of 1972 were of acceptable quality, and the minimum standards were not changed. In 1973, production returned to normal, but because of depleted stocks and the need to fill pipelines, the demand for 1973 crop California raisins was extremely strong. The minimum standards were not changed that year. In both, the 1972–73 and 1973–74 crop years, the season average price to producers exceeded parity. Regarding (b), better processing machinery may be developed resulting in more efficient processing of raisins. For example, such machinery could achieve better removal of stems or capstems from the pack, thereby enabling a reduction in the tolerences for these defects and hence, a reduction in the amount of foreign material in the pack. With respect to (c), it may be found that a tolerance for a particular defect in the incoming grade and condition standards is too liberal in comparison with the tolerance for the same defect in the outgoing minimum grade standards for packed raisins. The defect may be of such a nature that it cannot be removed readily during processing, and if the incoming tolerance is not decreased the quality of the outgoing pack may be lower than the effective minimum standards for packed raisins. Regarding (d), circumstances such as farm labor problems including the high cost and difficulty in finding adequate help, may force the raisin industry to find an alternative method of harvesting raisins by mechanical means. This could affect the quality of the raisins harvested in such ways as increased mechanical injury and broken skin. If these defects do not affect eating quality, less restrictive tolerances for these defects may be appropriate.

Therefore, changes in the minimum standards should be authorized whether or not the estimated average season price to growers is above or below parity level. These changes may be of short term or long term duration. In order that any changes are effective in above parity situations, such should be based on a specific determination by the Secretary that these changes will effectuate the orderly marketing of raisins as will be in the public interest.

Accordingly, § 989.58(b) should be revised to provide that the committee may recommend to the Secretary changes in the minimum grade and condition standards for natural condition raisins of any varietal type and may recommend to the Secretary that the minimum grade and condition standards for any varietal type be added or deleted. As discussed herein, such recommended changes may be more restrictive or may relax the minimum standards then in effect, and may be made whether or not the season average price to producers is above parity. Paragraph (b) should also provide that the committee shall submit with its recommendation all data and information upon which it acted in making its recommendation, and such information as the Secretary may request. The Secretary shall approve any such change if he finds, upon the basis of the data submitted to him by the committee or from other pertinent information available to him, that to do so would tend to effectuate the declared policy of the act.

The notice of hearing did not contain a proposal to revise § 989.59(b). However, the record evidence indicates that the provisions of § 989.59(b) should be revised in conformity with the recommended changes in § 989.59(a) and to keep it properly related to § 989.58(b). Therefore, § 989.59(b) should provide that the committee may recommend changes in the minimum grade standards for packed raisins of any varietal type and may recommend to the Secretary that minimum grade standards for any varietal type be added or deleted. As in the case of changes pursuant to § 989.58(b), any changes pursuant to this paragraph may be more restrictive or may relax the minimum standards then in effect, and may be made whether or not the season average price to producers is above parity. The committee shall submit with its recommendation all data and information upon which it acted in making its recommendation and such other information as the Secretary may request. The Secretary shall approve any such change if he finds, upon the basis of data submitted to him by the committee or from other pertinent information available to him, that to do so would tend to effectuate the declared policy of the act. Unless a change pursuant to this paragraph is supported by a justification by the committee that it will effectuate the orderly marketing of raisins as will be in the public interest it should not be effective in above parity situations.

Provisions currently in § 989.61(b) include authorization, criteria, and limits for modifying the grade standards for natural condition and packed raisins when the parity level is exceeded. The recommended revision of §§ 989.58(b) and 989.59(b) makes this paragraph unnecessary and it should be deleted.

The first sentence of § 989.61 in the notice of hearing implies that the provisions on minimum grade and condition standards and inspection requirements and any other provisions pertaining to the administration and enforcement thereof are the only provisions under the order that continue in effect in above parity situations. However, other provisions under the order, such as those for expenses and assessments/reporting, and

research and development purposes also remain in effect in above parity situations. Therefore, the first sentence of § 989.61 in the notice of hearing should be amended by substituting the words "of the order" in place of "thereof".

(4) The proviso in § 989.58(d)(1) should be revised to provide that the initial inspection for infestation shall not be required if the raisins are fumigated in accordance with such rules and procedures as the committee shall establish with the approval of the Secretary. This proviso currently permits handlers to fumigate lots of natural condition raisins received by them prior to the completion of the inspection and certification process. It also eliminates the need to certify a lot as off-grade raisins, upon its receipt by a handler, if fumigation only is needed for the lot to be certified as standard raisins and the fumigation is performed successfully soon after the lot is received. However, because it may take up to a week before a handler has received a sufficient volume of raisins to fill a fumigation chamber or build a stack of raisins and cover it so fumigation can be performed, the completion of the inspection and certification process is unnecessarily delayed.

The recommended revision of the provisions in § 989.58(d)(1) would give handlers who have a policy of fumigating all incoming raisins the option of eliminating the inspection check for infestation at the time of receipt. Moreover, this revision would eliminate the unnecessary delay in the completion of inspection and certification, because these activities would not be interrupted for the fumigation process.

To the extent that handlers take advantage of this option and fumigate soon after completion of incoming inspection and certification, the quantity of natural condition raisins that can be initially certified as standard raisins would be increased, and the workload of the handlers, the committee, and the inspection agency would be reduced.

Authority should be provided for rules and regulations to prescribe such things as issuance of the inspection certificate prior to completion of fumigation, requirements that the raisin lots remain under the supervision of the inspection service during fumigation, and the determination by the inspection service that fumigation was successful.

(5) Authority should be added to the order for the committee to designate raisins for production, processing, and marketing research and development projects and for exempting the acquisition and disposition of these raisins from any or all regulations established under the order. The purpose of authorizing the committee to grant such exemptions is to encourage projects which will encourage cost savings and better raisins and raisin products. Such projects would be initiated without finanial support of the committee, but would be for the long-run benefit of the entire raisin industry.

The type of research contemplated under these provisions includes experimentation and development of new kinds of raisins (raisins made from other than the traditional raisin grapes) and new techniques in making raisins. For example, a number of growers have indicated interest in planting the new Fiesta grape for raisin production but are apprehensive, because they are not sure of the marketing possibilities. With respect to handlers, the possibility of having to set aside, under volume regulations, raisins for diversion is unattractive with respect to experimental raisins.

When the total handler acquisitions of raisins under an exemption granted by the committee, exceeds 500 natural condition tons or a larger quantity approved by the Secretary upon a recommendation of the committee, the exemption should terminate. Also, each exemption granted for a particular research project should be for not more than five years. If the research project is not completed after the fifth year, the committee should review the progress made and decide whether or not the exemption should be continued.

To experiment with a new kind of raisin and conduct meaningful test market studies, a relatively large quantity of exempt tonnage is needed. The 500 natural condition ton limitation as set out above should be adequate for these purposes and is designed to encourage more than one producer or handler to participate in similar research. The record evidence indicates that the current industry view is a quantity greater than 500 tons would be of commercial significance, have an impact on the market, and should be subject to all regulations established under the order. However, the evidence indicates that should the 500 ton limitation turn out to be too restrictive in light of operational experience, the order should authorize an increase by the Secretary, upon a recommendation of the committee, and that formal amendment proceedings would be unnecessary. Five years is deemed ample time for completion of the types of research projects contemplated initially.

There was considerable discussion at the hearing on how the committee planned to administer these provisions. During the discussion, possible methods of administration were illustrated which would afford producers and handlers participating in such research activities maximum flexibility, and lessen the chances of noncompliance.

According to the record evidence, any request for such an exemption would be made by the producer or handler seeking the exemption at a committee meeting. The committee would review the request and decide whether or not the project involved a new kind of raisin or a new method of making raisins. If the project qualified, the committee would determine which regulations would not apply and the period of time the exemption would be granted. If the committee granted the exemption, all producers and handlers would be notified of the project, the regulations from which the raisins were exempt, and the length of time for which the exemption was approved. Notices would be sent to all handlers and releases would be made through news media.

It is contemplated that an application system would be used by the committee so it would not grant exemptions for the same research project for more than 500 total tons in any one crop year. In other words, each producer or handler requesting an exemption for the particular raisins and research project would indicate the quantity of such raisins they expected to produce or market. When the 500-ton limitation set out above was reached for a specific project, no further exemptions would be granted by the committee.

The committee should maintain a complete record of all exempt acquisitions and shipments. All acquisitions and receipts by handlers are reported to the committee by handlers on a weekly basis, broken down by varietal type indicating the quantities held for reconditioning. Shipments are reported monthly, broken down by destinations, varietal type, and pack. Also, the record evidence indicates that any exempt tonnage will be kept under surveillance by committee management until disposed of by the handlers.

The method of administration of these provisions should be based on the committee's study and operating experience under these provisions. The provisions should not identify a specific means of administration, but merely provide a broad framework upon which the committee can base its decision to grant exemptions. Thus, if the initial method of administering the provisions turns out to be defective in some way, the committee could seek other means of administration.

The proposal in the notice of hearing required the Secretary to approve the exemptions granted by the committee. However, at the hearing it was determined that approval of the Secretary was not needed because no committee funds would be used for the research, and the committee could administer the provisions adequately. Also, the proposal in the notice of hearing limited the research covered under the provisions to new grape varieties and kinds of raisins, and new drying methods. The record evidence indicates that the language of the provisions should be broadened to include production, processing, and marketing research and development to afford the industry the greatest flexibility possible in operating under these provisions.

In view of the foregoing, a new paragraph (c) should be added to § 989.60 providing that the committee may designate such raisins as it deems appropriate for production, processing, and marketing research and development. The period of such designation shall be for not more than five years unless extended by the committee. The volume which may be acquired by all handlers shall not exceed 500 natural condition tons annually, unless increased by the Secretary upon a recommendation of the committee. Such designated raisins may be acquired and disposed of free from those regulations specified by the committee. In any crop year, when the total industry acquisitions of designated raisins exceed 500 natural

V4263 APR 1 77 UMI

condition tons or a larger quantity approved by the Secretary upon a recommendation of the committee, the exemption shall not apply.

(6) The first sentence of § 989.66(b)(3) currently specifies procedures for handlers to substitute for any quantity of reserve tonnage raisins a like quantity of free tonnage raisins of like quality and varietal type of the same or more recent year's production. A literal interpretation of the requireemnt that the free tonnage raisins substituted for the reserved tonnage raisins be "like quality" would require the free tonnage to be Grade A if the reserve tonnage was Grade A, the free tonnage to be Grade B if the reserve tonnage was Grade B, and so forth. However, this is different from how the committee is administering this provision. Since all raisins acquired by handlers must be standard raisins (i.e., raisins meeting the then effective minimum grade and condition standards for natural condition raisins), and handlers are only required to hold standard raisins to satisfy their respective reserve obligations, the committee has permitted handlers to substitute standard raisins for reserve tonnage raisins. Therefore, for the purpose of bringing the current requirement in line with committee application, the first sentence of § 989.66(b)(3) should provide that each handler may, under the direction and supervision of the committee, substitute for any reserve tonnage raisins a like quantity of standard raisins of the same varietal type and of the same or more recent year's production.

The provisions in § 989.67(d)(1) authorizing the establishment of minimum export prices (packer resale prices) for reserve tonnage raisins should be deleted. The committee has not established minimum export prices for nearly 10 years. Currently, there is no need for minimum export prices and no likelihood that any would be established in the foreseeable future.

In an order amendment effective August 4, 1976 (41 FR 32412), provisions pertaining to offers of reserve tonnage to handlers for free tonnage replacement were modified to permit the committee to make such replacement offers at any time prior to the committee's first offer to sell reserve tonnage raisins from a new crop year.

However, in that amendment action the provisions which require the committee to announce the price for replacement tonnage prior to or at the beginning of the crop year were not changed. The time when the committee may make a replacement offer and the price announcement should be the same. To accomplish this, the second sentence of § 989.67(f) should specify that the committee may establish a price for such replacement tonnage which is higher, the same as, or lower than that for reserve tonnage in the first offer of the crop year.

Section 989.67(j) currently authorizes the committee to sell reserve tonnage raisins to handlers to provide them with raisins to sell as free tonnage in the event (among others) of national emergency, crop failure, changes in economic or marketing conditions, or inadequate carryover. Such offers are made to handlers in the same maner as in § 989.67(d)(1) and shares are determined on the basis of handler acquisitions pursuant to § 989.67(d)(2). To provide more flexibility in the disposition of reserve tonnage raisins, the shares of any such offer should be determined on the basis of either handler acquisitions or shipments. The general intent of this proposal is to provide those handlers who have demonstrated that they can use more raisins with additional free tonnage.

Handlers normally do not acquire more raisins than they need to meet trade requirements. However, incorrect marketing decisions can result in significant differences between acquisitions and shipments. Historically, in the raisin industry, increases in free tonnage shipments have not been distributed among all handlers equally because market expansion can be the result of the intensive marketing efforts of some handlers, but not others. In these instances, basing the shares of any such offer on handler shipments would make additional tonnage available to those who have been expanding markets for free tonnage raisins. Basing the shares on acquisitions in this situation would be contrary to the purpose of augmenting the supply of free tonnage with reserve tonnage to meet increased market demand, since handlers not needing tonnage would be given the opportunity to purchase it. To afford maximum flexibility of operations under this provision, the decision as to the basis of determining shares of any such offer should rest solely with the committee.

Each proposal to make such offers would be considered by the committee in light of information available at the time. Hence, if more than one offer is needed during a crop year, it could happen that the determination of shares in one offer may be based on handler acquisitions and shares of the other may be based on handler shipments.

Section 989.54(d) authorizes the committee to make offers of reserve tonnage raisins for use as free tonnage for reasons other than specified in § 989.67(j), and this should be recognized in § 989.67(j). Two such offers are required to be made to handlers pursuant to § 989.54(d). The first offer is an adjustment offer of 10 percent of the previous year's shipments which is allocated to handlers on the basis of their prior year's acquisitions to enable them to acquire a quantity of raisins equal to their prior year's shipments. The second offer is a growth offer of an equal percentage which is made simultaneously to handlers based on their prior year's shipments to provide them with additional raisins for market expansion if they desire it.

The proposal published in the notice of hearing and the record evidence state that the second sentence of § 989.67(j) should provide that any quantities of reserve raisins offered to handlers for free use, except as provided in § 989.54(d), may be offered to them on the basis of shipments or acquisitions and if on the basis of acquisitions shall be offered in the same manner as in subparagraph (1) of paragraph (d) of § 989.67, with shares determined pursuant to subparagraph (2) of paragraph (e) of that section. However, the manner and procedures were not specified for offers based on handler shipments. So that the manner in making offers based on shipments will conform with the manner of making offers on the basis of acquisitions, the procedure (formula) for determining handlers' shares should be the same as that for acquisitions except that shipments should be used as the basis instead of acquisitions. Moreover, the procedure for determining handlers' shares is contained in paragraph (d)(2) of § 989.67, not paragraph (e)(2). Thus, the reference should be corrected to subparagraph (2) of paragraph (d).

In view of the foregoing, the second sentence of § 989.67(j) should provide that any quantities of reserve raisins offered to handlers for free use, except as provided in § 989.54(d), may be offered to them on the basis of handler shipments or acquisitions in the same manner as in subparagraph (1) of paragraph (d) of this section. If offered on the basis of acquisitions, shares shall be determined pursuant to subparagraph (2) of paragraph (d) of this section; if offered on the basis of shipments, the same formula shall be used, except that shipments shall be used as the basis instead of acquisitions in computing handlers' shares.

(7) Under the order, raisin handlers are compensated for services performed with respect to reserve tonnage raisins held for the account of the committee. Such services now include receiving, handling, storing and fumigation. Fumigation has been paid as part of the total package of handler services for a number of years. Therefore, for clarification purposes, the word "fumigating" should be added after the word "receiving" in the first sentences of §§ 989.80(a) and 989.82, and after the word "storing" in the next-to-the-last sentence of § 989.79.

(8) In an order amendment effective August 4, 1976 (41 FR 32412), the Raisin Advisory Board and Raisin Administrative Committee were abolished and replaced with a new administrative committee and an executive operations committee, respectively. As a conforming change, all references to the Board were deleted or changed to "committee". However, one conforming change was inadvertently overlooked in § 989.80(c), regarding funds needed to carry out the functions of the Board. Since funds for the Board are not needed, the fourth sentence of § 989.80(c) should read: "In order to provide funds to carry out the functions of the committee the committee may accept advance payments from any handler to be credited toward such assessments as may be levied pursuant to this section against such handler during the crop year".

(9) Some of the amendatory actions included in this recommended decision require conforming changes elsewhere in the order, as amended. Such changes have been discussed with the issues to which they are pertinent. All such changes should be incorporated in the recommended amendment of the order.

Rulings on briefs of interested persons. At the beginning of the hearing, the Administrative Law Judge fixed November 26, 1976, as the final date for interested persons to file proposed findings and conclusions, and written arguments or briefs, based upon the evidence received at the hearing. No briefs were filed.

General findings. Upon the basis of the record, it is found that:

(1) The findings hereinafter set forth are supplementary, and in addition, to the previous findings and determinations which were made in connection with the issuance of the marketing agreement and order and each previously issued amendment thereto. Except the findings as to the base period for parity computation, and except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein, all of said prior findings and determinations are hereby ratified and affirmed;

(2) The marketing agreement and order, as amended, and as hereby proposed to be further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(3) The marketing agreement and order, as amended, and as hereby proposed to be further amended, regulate the handling of raisins produced from grapes grown in the production area in the same manner as, and are applicable only to persons in the respective classes of commercial and industrial activity specified in, the marketing agreement and order upon which hearings have been held;

(4) The marketing agreement and order, as amended, and as hereby proposed to be further amended, are limited in their application to the smallest regional production area which is practicable, consistently with carrying out the declared policy of the act, and the issuance of several orders applicable to subdivisions of the production area would not effectively carry out the declared policy of the act;

(5) There are no differences in the production and marketing of raisins produced from grapes grown in the production area which make necessary different terms and provisions applicable to different parts of such area; and

(6) All handling of raisins produced from grapes grown in the production area as defined in the marketing agreement and order, as amended, and as hereby proposed to be further amended, is in the current of interstate of foreign commerce or directly burdens, obstructs, or affects such commerce.

RECOMMENDED AMENDMENT OF THE MARKETING AGREEMENT AND ORDER

The following amendment of the marketing agreement and order, as amended, is recommended as the detailed means by which the foregoing conclusions may be carried out:

1. Section 989.2 is revised to read:

§ 989.2 Act.

"Act" means Public Act No. 10, 73d Congress, as amended, and as re-enacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended (Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674).

§ 989.6 [Deleted]

2. Section 989.6 is deleted.

§ 989.8 [Amended]

3. Section 989.8 is amended by deleting the phrase "with or without bleaching".

4. Section 989.10 is revised to read:

§ 989.10 Varietal types.

"Varietal types" means raisins generally recognized as possessing characteristics differing from other raisins in a degree sufficient to make necessary or desirable separate identification and classification. Varietal types are the following: Natural (sun-dried) Seedless, Dipped Seedless, Golden Seedless, Muscats (including other raisins with seeds), Sultana, Zante Currant and Monukka: *Provided*, That the committee may, subject to approval of the Secretary, change this list of varietal types.

§ 989.13 [Amended]

5. Section 989.13 is amended by deleting the phrase "(as defined in paragraph (f) of § 989.59)".

6. Section 989.22 is revised to read:

§ 989.22 District.

"District" means any one of the geographical areas referred to in §§ 989.26 or 989.43, and designated in the rules and regulations.

7. Section 989.24 is amended by revising the section heading and paragraph (b), and adding new paragraphs (c) and (d), to read:

§ 989.24 Standard raisins, off-grade raisins, other failing raisins, and raisin residual material.

(a) * * *

(b) "Off-grade raisins" means raisins which do not meet the then effective minimum grade and condition standards for natural condition raisins: *Provided*, That raisins which are certified as off-grade raisins shall continue to be such until successfully reconditioned or become "other failing raisins".

(c) "Other failing raisins" means any raisins received or acquired by a handler, either as standard raisins or off-grade raisins, which are processed to a point where they qualify as packed raisins but fail to meet the applicable minimum grade standards for packed raisins.

(d) "Raisin residual material" means defective raisins, stemmer waste, sweepings, and other residue accumulated by a handler from reconditioning raisins or from processing standard raisins and other failing raisins.

8. The second sentence of § 989.26 is revised to read:

§ 989.26 Establishment and membership.

* * *. The producer members shall be selected in the number and for the districts as designated in the rules and regulations, or as such number or districts may be authorized pursuant to § 989.26a. * * *

9. The first sentence of § 989.26a is revised to read:

§ 989.26a Changes in producer representation.

The Secretary, on recommendation of the committee, may change the total number of producer members on the committee, may change the number of districts designated in the rules and regulations, may redefine such districts into which the production area is divided, or may change the number of producer members which shall be selected to represent particular districts. * * *

10. Paragraphs (a) and (b) and the proviso in paragraph (d)(1) of § 989.58 are revised to read:

§ 989.58 Natural condition raisins.

(a) *Regulation.* No handler shall acquire or receive natural condition raisins which fail to meet such minimum grade and condition standards as the committee may establish, with the approval of the Secretary, in applicable rules and regulations: *Provided*, That a handler may receive raisins for inspection, may receive off-grade raisins for reconditioning and may receive or acquire off-grade raisins for disposition in eligible nonnormal outlets: *And provided further*, That a handler may acquire natural condition raisins which exceed the tolerance established for maturity under a weight dockage system established pursuant to rules and regulations recommended by the committee and approved by the Secretary. Nothing contained in this paragraph shall apply to the acquisition or receipt of natural condition raisins of a particular varietal type for which minimum grade and condition standards are not applicable or then in effect pursuant to this part.

(b) *Changes in minimum grade and condition standards for natural condition raisins.* The committee may recommend to the Secretary changes in the minimum grade and condition standards for natural condition raisins of any varietal type and may recommend to the Secretary that minimum grade and condition standards for any varietal type be added or deleted. The committee shall submit with its recommendation all data and information upon which it acted in making its recommendation, and such other information as the Secretary may request. The Secretary shall approve any such change if he finds, upon the basis of the data submitted to him by the committee or from other pertinent information available to him, that to do so would tend to effectuate the declared policy of the act.

. . . . . .

V 42 63 APR 1 77 UMI

(d) (1) • • •: *Provided*, That the initial inspection for infestation shall not be required if the raisins are fumigated in accordance with such rules and procedures as the committee shall establish with the approval of the Secretary. • • •

• • • • • •

11. Paragraphs (a) and (b) of § 989.59 are revised to read:

§ 989.59 Regulation of the handling of raisins subsequent to their acquisition by handlers.

(a) *Regulations.* Unless otherwise provided in this part, no handler shall: (1) Ship or otherwise make final disposition of natural condition raisins unless they at least meet the effective and applicable minimum grade and condition standards for natural condition raisins; or (2) ship or otherwise make final disposition of packed raisins unless they at least meet such minimum grade standards established by the committee, with the approval of the Secretary, in applicable rules and regulations or as later changed or prescribed pursuant to the provisions of paragraph (b) of this section: *Provided*, That nothing contained in this paragraph shall prohibit the shipment or final disposition of any raisins of a particular varietal type for which minimum standards are not applicable or then in effect pursuant to this part; *And provided further*, That a handler may grind raisins, which do not meet the minimum grade standards for packed raisins because of mechanical damage or sugaring into a raisin paste.

(b) The committee may recommend changes in the minimum grade standards for packed raisins of any varietal type and may recommend to the Secretary that minimum grade standards for any varietal type be added or deleted. The committee shall submit with its recommendation all data and information upon which it acted in making its recommendation, and such other information as the Secretary may request. The Secretary shall approve any such change if he finds, upon the basis of data submitted to him by the committee or from other pertinent information available to him, that to do so would tend to effectuate the declared policy of the act.

• • • • • •

§ 989.59 [Amended]

12. Section 989.59(f) is amended by deleting the phrase "(including defective raisins, stemmer waste, sweepings, and other residue)" from the first sentence and by deleting the comma following "standard raisins", and the second sentence.

13. A new paragraph (c) is added to § 989.60 to read:

§ 989.60 Exemption.

• • • • • •

(c) The committee may designate such raisins as it deems appropriate for production, processing, and marketing research and development. The period of such designation shall be for not more than five years unless extended by the committee. The volume which may be acquired by all handlers shall not exceed 500 natural condition tons annually for each designated project, unless increased by the Secretary upon a recommendation of the committee. Such designated raisins may be acquired and disposed of free from those regulations specified by the committee. In any crop year, when the total industry acquisitions of the designated raisins exceed 500 natural condition tons or a larger quantity approved by the Secretary upon a recommendation of the committee, the exemption shall not apply.

14. Section 989.61 is revised to read:

§ 989.61 Above parity situations.

The provisions of this part relating to minimum grade and condition standards and inspection requirements, within the meaning of section 2(3) of the act, and any other provisions pertaining to the administration and enforcement of the order, shall continue in effect irrespective of whether the estimated season average price to producers for raisins is in excess of the parity level specified in section 2(1) of the act.

15. The first sentence of subparagraph (3) in § 989.66(b) is revised to read:

§ 989.66 Reserve tonnage generally.

• • • • • •

(b) • • •

(3) Each handler may, under the direction and supervision of the committee, substitute for any reserve tonnage raisins a like quantity of standard raisins of the same varietal type and of the same or a more recent year's production. • • •

• • • • • •

16. The last sentence of § 989.67(d)(1) is deleted, and the second sentences of paragraphs (f) and (j) of § 989.67 are revised to read:

§ 989.67 Disposal of reserve raisins.

• • • • • •

(f) • • •. The committee may establish a price for such replacement tonnage which is higher, the same as, or lower than that for reserve tonnage in the first offer of the crop year. • • •

• • • • • •

(j) • • •. Any quantities of reserve raisins offered to handlers for free use, except as provided in § 989.54(d), may be offered to them on the basis of handler shipments or acquisitions in the same manner as in subparagraph (1) of paragraph (d), of this section. If offered on the basis of acquisitions, shares shall be determined pursuant to subparagraph (2) of paragraph (d) of this section. If offered on the basis of shipments, the same formula shall be used, except that shipments shall be used as the basis instead of acquisitions in computing handlers' shares. • • •

§ 989.79 [Amended]

§ 989.80 [Amended]

§ 989.82 [Amended]

17. The word "fumigating" is added after the word "receiving" in the first sentences of § 989.80(a) and 989.82, and after the word "storing" in the next-to-the-last sentence of § 989.79.

18. In the fourth sentence of § 989.80(c), the words "and the Board" immediately following the words "functions of the committee" are deleted.

§ 989.84 [Amended]

19. Section 989.84 is amended by deleting the phrase "(as defined in § 989.59(f))".

§ 989.96 [Deleted]

20. Section 989.96 is deleted, effective October 1, 1977.

§ 989.97 [Revoked]

21. Section 989.97(Exhibit B) is deleted, effective October 1, 1977.

Signed at Washington, D.C. on March 28, 1977.

WILLIAM T. MANLEY,
Acting Administrator.

FEDERAL ENERGY ADMINISTRATION

[10 CFR Part 213]

OIL IMPORT REGULATIONS

Allocations for the Period May 1, 1977 Through April 30, 1978; Cancellation of Hearing

On March 15, 1977, the Federal Energy Administration (FEA) issued proposed regulations amending Part 213 of Chapter II, Title 10 of the Code of Federal Regulations, to provide for the commencement of the next allocation period, and to reduce accordingly the level of fee-exempt allocations (42 FR 15317, March 21, 1977). Due to a lack of interest, the public hearing scheduled for April 4, 1977 has been cancelled. In all other respects, the notice remains the same.

Issued in Washington, D.C., March 29, 1977.

ERIC J. FYGI,
Acting General Counsel,
Federal Energy Administration.

[FR Doc.77-9853 Filed 3-30-77;9:29 am]

[10 CFR Part 440]

WEATHERIZATION ASSISTANCE FOR LOW-INCOME PERSONS

Proposed Rulemaking

AGENCY: Federal Energy Administration.

ACTION: Proposed rule.

SUMMARY: The Federal Energy Administration (FEA) hereby proposes to amend Chapter II of Title 10, Code of Federal Regulations, to establish a program of weatherization assistance for low-income persons pursuant to Part A, 42 U.S.C. 6861–6870, of Title IV of the Energy Conservation and Production Act (Act), Pub. L. 94–385, 90 Stat. 1125 et seq. These proposed regulations set forth the requirements for the development and implementation of a weatherization assistance program to assist in achieving a healthful dwelling environment and maximum practicable energy conservation in the dwellings of low-income persons, particularly elderly and handicapped low-income persons, in order both to aid those persons least able to afford higher utility costs and to conserve needed energy.

FEA will receive written comments and hold public hearings with respect to this proposal. This proposal is currently undergoing further interagency review, and FEA accordingly expects the final rulemaking to reflect comments from other Federal agencies as well as from other interested persons.

DATES: Written comments must be received on or before April 25, 1977. Hearings shall be held on the dates and the places indicated below.

ADDRESS: Federal Energy Administration, Box LN, Executive Communications, Washington, D.C. 20461.

FOR FURTHER INFORMATION CONTACT:

Ms. Mary Bell, Director, Office of Weatherization Assistance. (202–566–3091.)

SUPPLEMENTARY INFORMATION: The Act authorizes FEA, after consultation with the Secretary of Housing and Urban Development, the Secretary of Health, Education, and Welfare, the Secretary of Labor, and the Director of the ACTION Agency and in coordination with the Director of the Community Services Administration (CSA), to promulgate regulations in order to carry out the provisions of the Act establishing the weatherization program. The Act authorizes fifty-five million dollars for the purpose of carrying out the weatherization assistance program for fiscal year 1977, sixty-five million for 1978, and eighty million for 1979. However, the actual amounts available for the weatherization assistance program during this period will depend upon the appropriations made available in each fiscal year for this program, within the ceiling of the authorization.

In the process of developing this proposed rulemaking FEA consulted with other Federal agencies, coordinated its development with CSA, and circulated earlier staff drafts to the Regional Offices of FEA which distributed copies to the States and other persons. Substantive comments were considered by FEA and are summarized and discussed below. While the proposed rulemaking sets forth FEA's current views on the appropriate design of the program, FEA is fullly prepared to modify any aspect of the program, as justified from comments received on this proposal and by any other relevant information available to FEA in the preparation of final program regulations. While FEA is requesting comments on all aspects of the proposal, it is particularly interested in receiving comments on the specific issues identified and discussed below.

ELEMENTS OF THE PROGRAM

The program is a voluntary grant-in-aid program. In most cases, it is expected that grants will be made to the States to be used for the conduct of weatherization projects throughout the States. However, in cases where a State does not participate in the program, a Community Action Agency (CAA) or a unit of general purpose local government may apply directly for a grant. In appropriate circumstances tribal organizations within a given State may receive grants whether or not the State is also a grantee.

A. *Allocation of Funds.* Section 414(a) of the Act requires that FEA develop a funding formula on the basis of the relative need for weatherization assistance among low-income persons throughout the States. FEA is required to take into account the number of dwelling units to be weatherized; climatic conditions; the type of weatherization work to be done; and such other factors as FEA determines are necessary.

Section 440.10 of the proposed regulations proposes a formula for the allocation of program funds among the States. This allocation, however, does not alone commit FEA to award a portion of or the total amount, allocated as a grant to a State, or other eligible applicant within the State. Funding will only be made to a State or eligible applicant whose application conforms to program requirements, as determined by FEA, and subsequent to execution of a grant agreement. The design of the proposed formula is discussed below.

Allocation by State for fiscal year 1977 under the proposed formula would be as follows:

Alabama: $100,000 plus 0.88 percent of rest.
Alaska: $100,000 plus 0.55 percent of rest.
Arizona: $100,000 plus 0.22 percent of rest.
Arkansas: $100,000 plus 0.85 percent of rest.
California: $100,000 plus 2.34 percent of rest.
Colorado: $100,000 plus 1.99 percent of rest.
Connecticut: $100,000 plus 1.21 percent of rest.
Delaware: $100,000 plus 0.21 percent of rest.
District of Columbia: $100,000 plus 0.25 percent of rest.
Florida: $100,000 plus 0.21 percent of rest.
Georgia: $100,000 plus 0.92 percent of rest.
Hawaii: $0 plus 0.00 percent of rest.
Idaho: $100,000 plus 0.72 percent of rest.
Illinois: $100,000 plus 6.71 percent of rest.
Indiana: $100,000 plus 3.02 percent of rest.
Iowa: $100,000 plus 2.90 percent of rest.
Kansas: $100,000 plus 1.36 percent of rest.
Kentucky: $100,000 plus 2.12 percent of rest
Louisiana: $100,000 plus 0.42 percent of rest
Maine: $100,000 plus 1.38 percent of rest.
Maryland: $100,000 plus 1.23 percent of rest.
Massachusetts: $100,000 plus 2.86 percent of rest.
Michigan: $100,000 plus 6.43 percent of rest.
Minnesota: $100,000 plus 5.61 percent of rest.
Mississippi: $100,000 plus 0.59 percent of rest.
Missouri: $100,000 plus 3.17 percent of rest.
Montana: $100,000 plus 1.01 percent of rest.
Nebraska: $100,000 plus 1.48 percent of rest.
Nevada: $100,000 plus 0.14 percent of rest.
New Hampshire: $100,000 plus 0.70 percent of rest.
New Jersey: $100,000 plus 2.67 percent of rest.
New Mexico: $100,000 plus 0.68 percent of rest.
New York: $100,000 plus 9.91 percent of rest
North Carolina: $100,000 plus 1.55 percent of rest.
North Dakota: $100,000 plus 1.31 percent of rest.
Ohio: $100,000 plus 6.10 percent of rest.
Oklahoma: $100,000 plus 1.06 percent of rest.
Oregon: $100,000 plus 1.22 percent of rest.
Pennsylvania: $100,000 plus 7.26 percent of rest.
Rhode Island: $100,000 plus 0.65 percent of rest.
South Carolina: $100,000 plus 0.58 percent of rest.
South Dakota: $100,000 plus 1.11 percent of rest.
Tennessee: $100,000 plus 1.82 percent of rest.
Texas: $100,000 plus 1.32 percent of rest.
Utah: $100,000 plus 0.82 percent of rest.
Vermont: $100,000 plus 0.53 percent of rest.
Virginia: $100,000 plus 1.81 percent of rest.
Washington: $100,000 plus 2.02 percent of rest.
West Virginia: $100,000 plus 1.63 percent of rest.
Wisconsin: $100,000 plus 0.44 percent of rest.
Wyoming: $100,000 plus 0.44 percent of rest.

Under the proposed allocation formula, the first $5 million of appropriated funds would be allocated equally among the States. This would amount to an allocation of $10,000 to be budgeted for administration under the 10 percent statutory ceiling on administrative expenses. FEA has determined that the program cannot be adequately administered within a State with a lower administrative budget.

The percent of each State's share of the remaining appropriated funds beyond the first $5 million is proposed to be determined as follows:

$$\text{Sum for all States.}\left(\frac{0.587\ (\text{heating})^2}{(\text{owners})}+\frac{0.033\ (\text{cooling})^2}{+0.5\ (\text{renters})}\right)\times 100$$

Where:
0.587 is the percentage of total residential energy consumed nationwide for heating.
"Heating" is the number of annual heating degree-days in the State.
0.033 is the percentage of total residential energy consumed nationwide for cooling.
"Cooling" is the number of annual cooling degree-days in the State.
"Owners" is the number of low-income owner occupied units within the State.
"Renters" is the number of low-income renter occupied units within the State.

1. *Number of low-income homes.* The number of low-income homes in all of the States consists of total owner-occupied low-income units and total renter-occupied low-income units. This information was obtained from the "Public Use Sample of Basic Records from the 1970 Census" (the most recent figures available) by means of a computer tabulation. The number of owner-occupied and renter-occupied low-income homes, by State, for purposes of the proposed formula has been determined to be as follows:

V4263 APR 1 77 UMI

TABLE II.—*Low-income homes by State*

State:	Owner occupied	Renter occupied	Total
Alabama	135,2	132,9	268,1

Source: Special tabulation of "Public Use Sample of Basic Records from the 1970 Census," (15 pct) 1/100 file, Federal Energy Administration, Washington, D.C.

In developing figures on number of low-income homes, FEA has assumed that the number of renter-occupied dwelling units is roughly equivalent to the number of multi-family dwelling units and that the cost of weatherizing multi-family units is on the average no more than half the cost of weatherizing a single-family dwelling unit (due to frequent absence of need for floor or attic insulation). Therefore, FEA proposes to include a factor of 0.5 in the formula, thereby giving half the weight to the number of renter-occupied dwelling units as is given to the number of owner-occupied dwelling units. FEA proposes assigning a 0.5 factor to renter-occupied dwelling units because, although an approximation, it represents a reasonable and workable correlation between the cost of weatherizing such a dwelling unit and the greater cost of weatherizing single-family dwelling units.

One Governor disagreed and stated that by discounting the number of renter-occupied dwellings the formula provides proportionately fewer benefits for the "poorer poor" who tend to occupy rental housing. In his view, this effect would be mitigated if the formula were to be based on the total number of dwelling units in a State occupied by low-income occupants. The Energy Advisory Council to another Governor, however, supported the proposed approach.

2. *Degree days.* A second factor evaluated by FEA in the development of the proposed allocation formula is the impact of climatic conditions. Heating and cooling degree-day data is used in the proposed formula as a measure of the severity of climate. The degree-day data were prepared by the National Oceanic and Atmospheric Administration (NOAA) for each State, with the exception of Alaska. The number of degree-days for each State is a population-weighted average of the climatological normal (1941–1970) degree-days for each weather station within the State. The degree-day data for Alaska were derived using data from Climatography of the United States No. 81 (by State), August 1973, Environmental Data Services, National Oceanic and Atmospheric Administration, U.S. Department of Commerce. The number of degree days, by State, for purposes of the proposed formula, has been determined to be as follows:

TABLE III.—*1941–70 State heating degree-day normals (population weighted)*

Source: Table II, percent of normal of accumulated heating degree-days, by month, season, and State, Nov. 13, 1973, and percent of normal of accumulated cooling degree-days, by month, season, and State, Apr. 16, 1974, Environmental Data Service, National Oceanic and Atmospheric Administration (NOAA), U.S. Department of Commerce

The proposed allocation formula uses the square of the State's normal heating degree-days plus the square of the State's normal cooling degree-days. Squaring each factor places a greater emphasis on the State with extremes of climate, where the greatest need for weatherization and potential for energy conservation is found. The lack of a squared degree-day factor would give the same weight to a State with 1500 cooling degree-days and 1500 heating degree-days and to a State with either 3000 heating degree-days or 3000 cooling degree-days. FEA believes this would be inequitable because the latter two situations represent more severe climates with greater weatherization need and energy conservation potential than the first case. Degree-days are the most widely used and accepted measure of climate severity as it affects usage of energy. Heating degree-days, in particular, have been shown to be a very accurate predictor of heating fuel consumption. While the situation for cooling is less clear cut, the Department of Commerce publishes the cooling degree-day data as the best available indicator. Conclusive research is not available as to the accuracy of this indicator. The heating and cooling degree-day data have been weighted to reflect the fact that a significantly larger portion of residential energy is used for heating rather than for cooling.

The percentage of total residential energy used for both heating and cooling is applied to the respective degree-day

V 42 63 APR 1 77 UMI

figures in order to weight them in a fashion consistent with the potential energy savings in each use sector. The percentage figures were obtained from calculations performed in the "Federal Energy Administration Project Independence Blueprint: Final Task Force Report," which is available for review at FEA Regional Offices and at the Office of Weatherization Assistance, Washington, D.C., whose addresses appear elsewhere in this preamble. These percentages are 58.7% and 3.3% for heating and cooling respectively. The Final Task Force Report is available as provided below.

FEA has received numerous comments from all sections of the Nation on this element of the formula. Many of them were directed at previous formulas in earlier drafts of the regulations proposed today, in which heating degree-days only were considered, or in which heating degree-days squared plus cooling degree-days squared were considered without weighting factors to reflect potential energy savings in each use sector.

Two comments were received from States recommending that degree-days be deleted from the formula. Three comments (including one from HEW) were received recommending that cooling degree-days be either deemphasized or eliminated from the formula because: savings of imported oil would thereby be enhanced in the Northeast (the Northeast has a heavy reliance on imported oil which is used for space heating); use of total cooling degree-days does not correlate with energy savings (few low-income persons have air conditioning); and heating is more essential to safety and health than cooling.

Based on these comments the cooling degree days were weighted to reflect percentage of energy used in space cooling.

One comment claims discrimination against the southern States because of the deemphasis placed on cooling degree days.

On the issue of "to square or not to square," three comments expressed an opinion that squaring of degree days places too much emphasis on climate and too little emphasis on the number of low-income dwellings.

After evaluating all of these comments, FEA believes that squaring degree-days will allocate more funds to areas with severe climates where there is a greater potential for energy savings and a greater need for weatherization.

3. *Type of weatherization work to be done.* The issue of the type of weatherization work to be done has been equally controversial in the development of the proposed allocation formula. In earlier drafts, an average cost per home or funding range for each State was established. This factor was derived from data provided by the National Association of Home Builders (NAHB) Research Foundation in "An Evaluation of Data Developed in 'A Study of Level of Retrofit for Energy Savings of Homes Owner Occupied by Low-Income Families,'" November 1975. The NAHB study and related materials are available for review at FEA Regional Offices and at the Office of Weatherization Assistance, Washington, D.C., whose addresses appear elsewhere in this preamble, as provided below. The NAHB study provides information on the characteristics of the low-income housing stock in each State, including the average attic area, accessible attics, the average number of windows per home, and several other factors. The study calculates the annual BTU savings which may be obtained from the installation of several specific types of weatherization materials in an average home in each State.

The NAHB study also provides data on the cost of materials for each type of weatherization material and on the average cost of space heating in each State.

FEA received numerous comments criticizing both the concept of an average cost per home and the figures themselves. Many of the comments recommended that the homes in each State should be treated equally with respect to types of weatherization materials. As the result of these comments, FEA has eliminated the average cost per home as a factor in the allocation formula. The formula proposed in this rulemaking takes into consideration the type of weatherization work to be done in the 0.5 factor assigned to renter-occupied dwelling units, which is discussed above.

FEA has received several comments regarding Alaska's allocation under the proposed formula. The comments have recommended that Alaska be exempted from the allocation formula and that Alaska's allocation be determined separately. The bases for this recommendation are the following:

70 percent of the poverty population in Alaska lives in Alaskan Bush Villages, which are hundreds of miles away from Anchorage and have no roads connecting them to major marketing areas.

There is a tremendous disparity for insulation materials between Anchorage and the Bush Villages. There is at least a 100 percent increase in retail prices in Bush Villages as compared to Anchorage prices. This difference is due to remoteness, inaccessibility, and dispersion of Bush Villages. There are no roads connecting market areas and all supplies have to be flown into villages by small one-engine airplanes.

The inflation rate for the State of Alaska over the past 2 years is approximately triple the U.S. average.

Degree days in the Bush Villages are much higher than in Anchorage (the population center).

Determining the low-income population in accordance with the OMB Poverty Guidelines ignores the fact of vastly inflated wages and prices in Alaska.

FEA has considered these comments, but at this time has concluded that a special exception for Alaska is inappropriate.

The State of Hawaii has not been included in the program because of the determination that Hawaii has no significant problems that the weatherization assistance program could address.

B. *Eligible Dwelling Units.* Financial assistance under this part may only be used to weatherize the dwelling unit of a low-income family unit. A low-income family unit consists of one or more persons who meet either of two tests. The first test requires that total family income is not above the poverty level set forth in the guidelines established by the Office of Management and Budget. Under the second test, any family unit is a low-income family unit if it contains a member who has received cash assistance payments under Title IV (Aid to Dependent Children) or Title XVI (Supplementary Income) during a twelve month period prior to the time of receipt of weatherization assistance.

The first test is addressed to identifying family units which are poor and will include the so-called poorest of the poor. The second test identifies persons who are both needy and especially vulnerable to the adverse effects of high energy costs, including specifically the elderly and the handicapped.

The combination of both tests defines the outer limits of dwelling units eligible for financial assistance in the conduct of a weatherization project under this part. However, a State plan may establish priorities among eligible dwelling units for the entire State or a specific weatherization project. FEA requires a State to establish such priorities for elderly and handicapped low-income persons. FEA encourages a State to pay particular attention to establishment of priorities because presently authorized funding limits for the program will serve to weatherize only a fraction of eligible dwelling units in the Nation.

C. *Minimum Program Requirements.* Any weatherization assistance program receiving financial assistance pursuant to the Act must conform to the proposed minimum requirements set forth in § 440.15. FEA intends to permit a grantee to develop, publish and implement its own procedures, to be approved by FEA, provided that these procedures satisfy the minimum requirements prescribed in this part. In this way, FEA seeks to encourage local initiative and creativity, facilitate coordination of weatherization programs within a State, and enable each grantee to develop practice and procedure most compatible with State or local administrative practices.

Prior to the expenditure of any grant funds, each grantee must develop, publish and implement procedures to assure conformity with minimum program requirements, including procedures to ensure that a weatherization project will only weatherize eligible dwelling units and will give priority to elderly and handicapped low-income persons.

Moreover, each grantee must make provision that funds will be used to supplement but not supplant State or local funds and will be coordinated with other programs to improve thermal efficiency and conserve energy. Additionally, each grantee must take steps to secure, to the maximum extent practicable, the services of volunteers and public service employment workers, pursuant to the Comprehensive Employment and Training Act of 1973 (CETA).

If a grantee elects to weatherize rental housing, it must develop procedures to

assure that: (1) The owner consents to the weatherization of his property; (2) benefits primarily accrue to low-income persons and not to owner; (3) rents are not raised because of improvements made; and (4) no excessive enhancement shall occur to the value of the dwelling unit. A rental dwelling unit may only be weatherized with financial assistance provided under this part if it is an eligible dwelling unit and will be weatherized in conformity with the State procedures for weatherizing rental housing. Accordingly, in a multi-family structure, a dwelling unit which is not an eligible dwelling unit cannot be weatherized under this program.

Each State shall establish a State policy advisory council (PAC) to provide advice with respect to the development and implementation of the weatherization program within the State. The PAC must be broadly representative of organizations and agencies, including consumer groups, which represent low-income persons, particularly elderly and handicapped low-income persons. In the event a State does not participate in the program, the Regional Administrator would establish the PAC.

D. *Allowable Expenditures.*—

1. *General approach.* Proposed § 430.16 specifies allowable expenditures. Not less than 90 percent of each grant awarded under the program may be used to purchase weatherization materials. Certain costs associated with weatherization materials would be allowable. However, allowable expenditures for weatherization materials would not include costs to employ labor or otherwise to pay the cost of installing weatherization materials. No more than 10 percent of each grant may be used for administrative expenses. However administrative expenses may not include costs associated with tools and equipment or any costs of labor to carry out a weatherization project, except for supervisors and foremen.

FEA was guided by specific provisions of the Act in reaching its proposed approach to allowable program expenditures. The Act specifically requires that financial assistance under the program be used "to the maximum extent practicable" for purchase of materials and that administrative costs not exceed 10 percent. Moreover, while the Act does not foreclose all use of grant funds for labor costs, it does specifically require that labor be secured, "to the maximum extent practicable," from the services of volunteers and training participants and public service employment workers, pursuant to CETA. A further statutory provision relevant to the general approach to allowable expenditures is the requirement that financial asistance under the program be used to "supplement, and not to supplant," State or local funds and to increase the funds otherwise available to carry out weatherization activities.

FEA believes that these objectives—maximum practicable use of financial assistance to purchase weatherization materials, maximum practicable use of CETA funded labor and volunteers enhancement of use of other sources of funding—can best be achieved by emphasizing use of program funds for purchase of materials and limiting or restricting use of program funds for most other purposes. Moreover, the intent of the Act that this program be "supplementary" to other resources and programs for weatherization, in FEA's view, reinforces the appropriateness of the proposed approach to allowable program expenditures.

A discussion of specific issues raised in the development of the regulations with respect to allowable expenditures is provided below. Each specific issue is affected—and in some instances to a great degree—by the discussion above of the general approach to allowable expenditures.

2. *Labor costs.* Thirteen comments were received on the subject of labor costs. One Governor commenting on earlier drafts of the proposed regulations which were circulated for review, stated:

> My most basic concern is with the continued restriction of * * * funds to materials. * * * It is my opinion, and that of the current program operators, that such language would cripple existing weatherization efforts. Without the flexibility of labor allowances, and with most Community Action Agencies losing their Title X and CETA slots, the program would lack the required manpower to install weatherization materials and retrofit targeted dwellings.

One comment specifically urged FEA to coordinate with the Department of Labor to assure the availability of manpower for assisting the occupants of rental dwelling units and to seek an exemption from the Davis-Bacon wage determination requirements. Comments from ACTION spoke to the use of volunteers and to allowing States to spend a portion of their grant funds to help defray the costs of VISTA volunteers working on weatherization projects. Another commenter urged that FEA enter into memoranda of agreement with Federal agencies having manpower programs to insure that the weatherization programs are given funding priority. Another commented that the regulations should address the fact that the availability of labor differs from area to area. It too urged that FEA try to secure weatherization priority for labor funds from the Departments of Labor, Commerce and Housing and Urban Development.

A comment received from a State contended that because CETA funds would not always be available and because training of volunteers can be too time-consuming, twenty-five percent of program funds should be allowed for labor. Another commented that the program cannot be properly supported by volunteer labor and indicated that there has been no action at the Federal level to give manpower funding priority to weatherization.

The Department of Health, Education, and Welfare proposed that, since no labor or installation charges may be included in the $400 maximum allowable for weatherization materials, the PAC's be permitted to specify some amount toward labor and installation for handicapped and elderly applicants, if and when no volunteer labor pool is available.

FEA has received several comments recommending that installation costs be an eligible program expenditure.

In addition to the reasons stated above in the discussion of the general approach to allowable expenditures and affecting the limits on expenditures of program funds for labor costs, FEA was concerned that if general labor costs were an allowable program expenditure, the FEA program would be unavoidably tilted from weatherization assistance to a public employment resource and a manpower training program. As desirable as these ancillary goals may be to the program, FEA itself clearly does not have a mandate under the Act to carry out a manpower training program or provide employment for labor, skilled or unskilled, in the construction trades, home improvement business or retrofit industry.

3. *Installation costs.* FEA received several comments recommending that purchase of weatherization materials installed in place be an allowable program expenditure. In this manner, labor costs for installation would be covered in the purchase price, with the materials installed by the supplier of the materials. FEA considered this suggestion and has decided not to allow installation costs for two primary reasons. First, FEA has not succeeded in formulating a workable mechanism to insure that installation is performed only by independent third parties in the ordinary course of business. It would be unacceptable were the allowance of installation costs to be used as a subterfuge to apply program funds to secure labor without a real connection with a bona fide supplier of weatherization materials.

Second, FEA was unable to devise an administratively workable procedure to assure that all reasonable efforts had been made to procure labor for a weatherization project were installation costs to be allowed.

4. *Cost of weatherization materials.* Proposed § 440.16(a) establishes the allowable cost elements for weatherization materials, for which not less than 90 percent of grant funds are to be spent. FEA proposes that cost of weatherization materials be limited to purchase price f.o.b., but not including mechanical equipment valued in excess of fifty dollars; materials transportation costs; and taxes. Materials transportation costs, consisting of maintenance, operation and insurance of vehicles to transport weatherization materials, are also included. The cost of purchasing or leasing such vehicles, however, is specifically excluded, and transportation of work crews would not be an allowable materials cost.

With respect to the earlier drafts, FEA received numerous comments on proposed approaches to the definition of the cost of weatherization materials. FEA received many comments, including comments from CSA, recommending a

V 4263 APR 1 77 UMI

more generous allowance for costs incurred in the transportation of weatherization materials and work crews. One State recommended that materials costs include the purchase of rental, maintenance, repair and insurance of vehicles used to transport weatherization materials. This same State suggested that the regulations state that gran funds should not be used for the purchase or rental of vehicles until all avenues for securing vehicles have been exhausted and until the State PAC approves such expenditures.

FEA has also received several comments recommending that the purchase and maintenance of tools and most equipment necessary to install weatherization materials be allowable materials costs. The proposed regulations do not include as allowable costs the cost of purchasing tools and most equipment. FEA expects grantees to provide for these costs, to the extent they are necessary, from other resources. In disallowing cost of tools and most equipment, FEA was concerned that sub-grantees might purchase costly tools and equipment which would not be needed and perhaps would never be used.

HEW recomended that materials costs should include the purchase of high efficiency or alternate fuel heating units. FEA has determined, however, not to allow this expenditure, in part because of the statutory prohibition on mechanical equipment expenditures of more than fifty dollars. CSA recommended that the cleaning or repair of heating and cooling sources be an allowable expenditure. FEA is not at this time proposing to allow such expenditures as materials costs primarily to maximize the use of program funds for weatherization materials, as discussed above.

5. *Administrative costs.* The Act limits administrative expenses to 10 percent. Many comments were received from States, CSA and a CAA stating that 10 percent is insufficient for administrative costs because, among other reasons: grantees are required to audit (annually) and periodically to monitor local projects; grantees are to be held accountable for the non-compliance of sub-grantees; there are two layers of administration at the State and local levels; both grantees and sub-grantees have reporting and recording requirements; and materials costs do not allow expenditures for labor. CSA recommended that local projects be assured of receiving the full 10 percent for administrative costs and that the State administrative budget be allowed as an additional administrative cost. One State recommended that administrative expenses be limited to State administration, project management and audit and accounting services, and that all other project expenses be allowable as materials and material-related costs.

FEA carefully considered these comments and the reasons discussed above in the general approach to allowable expenditures in developing proposed § 440.16(b). Proposed § 440.16(b) provides that no more than the statutory limit of 10 percent of grant funds may be used for administrative expenses. This 10 percent limitation is proposed to apply to the total of all grants within the State and accordingly includes the administrative costs of sub-grantees as well as grantees. For example, if a State were awarded a grant of one million dollars, $100,000 could be expended in the State for administrative costs. If the State agency required $50,000 to administer the program, this would leave up to $50,000 for the administrative expenses of sub-grantees.

6. *Other restrictions on allowable expenditures.* The earlier drafts contained an absolute restriction on use of program funds to weatherize public housing. This position was based on the understanding that other Federal funding could be available for such purposes. Several comments, nevertheless, recommended the elimination of the restriction on weatherizing public housing. Two comments argued that, at the very least, State assisted public housing should be eligible for weatherization assistance if included in a State plan, as many tenants in State assisted public housing pay their own utility bills. Other comments indicated that there is a concentration of some of the neediest low-income persons in such housing, and that many dwelling units in one building could be weatherized, which would presumably be very cost-effective. It was also pointed out that CETA workers are permitted to work in only two types of rental housing—public rental housing or private, not-for-profit rental housing—and argued that a prohibition on weatherization of public housing would mean that almost no rental housing would be weatherized.

FEA carefully reviewed this issue, and because it believes funds from other Federal sources can be made available to weatherize Federally-assisted housing constructed under programs of the Department of Housing and Urban Development and the Farmers Home Administration, has retained the limitation in proposed § 440.16(c) on use of program funds to weatherize public housing.

Also not eligible for weatherization assistance under proposed § 440.16(c)(2) is a dwelling unit which has been weatherized previously with grant funds authorized under this Act. FEA intends that weatherization of a dwelling unit be completed at one time and not in sequential stages. FEA at this time believes that there is too great a risk in a sequential program over a period of years that neither the cost nor use of energy will be effectively diminished. Furthermore, there are serious managerial and record-keeping problems in starting but not finishing work upon a given dwelling unit. Added to this is the uncertainty of the continued availability of program funds. Finally, a sequential approach probably would not easily provide FEA with the information it needs to monitor the effectiveness of the program and improve its operation.

Proposed § 440.16(c)(3) seeks to prevent the waste of Federal financial assistance by prohibiting use of program funds upon a dwelling unit which is vacant or designated for public acquisition or clearance within twelve months of the date upon which weatherization would be scheduled to be completed.

Under proposed § 440.16(d) the cost of weatherization materials is limited to $400 per dwelling unit, unless the State PAC provides for expenditures of a greater amount in the light of local conditions.

HEW, which provides funds for home repairs and some insulation under one of its programs, specifically recommended that the restrictions on expenditures in early drafts of the proposed rulemaking be broadened to include its program, implemented under 45 CFR 233.20(c). FEA has elected not to follow the suggestion because this is an example of a Federal assistance program for which this program can provide complementary assistance.

E. *Applications.* Application procedures for a State are set forth in proposed § 440.12. To be eligible for financial assistance, a State must submit an application to FEA not later than 90 days from the date of publication of final regulations.

In the event a State either fails to submit a timely application or its application receives the final disapproval of FEA, a local applicant becomes eligible to apply as provided in proposed § 440.13. A CAA, a tribal organization or a unit of general purpose local government, are local applicants which may apply for funds in appropriate circumstances. A local applicant must make application to the Regional Administrator within 30 days from the date of its eligibility, except that a tribal organization may also apply whenever funds are reserved for Indians by the Regional Administrator. FEA may fund one or more weatherization projects in a State conducted by one or more eligible local applicants.

One comment recommended that the eligibility of units of general purpose local government not be precluded by any minimum size of the populations those governments serve. FEA has followed this recommendation. An Alaskan CAA recommended that IRA Councils (unincorporated villages) be included in the definition of units of general purpose local government. FEA has this recommendation under active consideration. FEA is particularly interested in receiving comment upon whether the definition of "a unit of general purpose local government" should be expanded, further restricted or qualified.

In the event a State does not participate in the program, the Regional Administrator will carry out most of the responsibilities for developing a weatherization plan applicable within the State and, upon application, will select weatherization projects within the State to be funded.

F. *Administrative Requirements.* The Act provides that each State, in order to participate in the program, must develop a weatherization plan identifying the areas to be served and the manner in which the program is to be implemented. After notice and a public hearing, a State will adopt a final plan describing the proposed funding distribution and recipients. Proposed § 440.14 requires that a State conduct one or more public hearings after giving reasonable notice throughout the State and after making copies of the proposed State plan available. Proposed § 440.14 also lists the requirements for the development of a State plan.

In accordance with the Act, proposed § 440.14(c) provides that funds are to be allocated within the State to a CAA with respect to any geographical area in which the CAA is conducting an emergency energy conservation program. Furthermore, any such CAA is to receive priority in the allocation of funds with respect to any geographical area which it serves but in which it is not conducting such an emergency program. Pursuant to the Act, paragraphs (d) and (e) of proposed § 440.14 provide that the Governor of a State, or Regional Administrator where a State does not participate, may make a determination, if justified on the basis of public hearing, to vary the allocation or priority requirements under which the CAA could otherwise receive funds. While one comment suggested FEA prohibit the Governor from making such a determination, the Act specifically authorizes the Governor to make such a determination.

Finally, a State in its plan may establish a weatherization project in a geographic area which is not served by a CAA or which does not have a CAA. FEA has not restricted a State to select only areas served by a CAA so that each State may give attention to its perception of greatest local need within its jurisdiction. Nor is a State required to confine weatherization projects to a geographic area where publicly funded labor sources are available.

G. *Weatherization Materials and Techniques.* Proposed § 440.17 prescribes standards for weatherization materials and energy conservation techniques.

Standards for weatherization materials appear in an Appendix to the proposed regulations. Any weatherization materials for which standards exist in the Appendix must meet or exceed the identified standards. These standards were devolped by the National Bureau of Standards and reviewed by FEA. While one comment said a simple R-factor criterion would be sufficient for materials standards, FEA has chosen a more thorough approach which it believes may be more cost-effective.

Proposed § 440.17 also requires use of the approaches including the energy conservation techniques described in Project Retro-Tech, FEA Conservation Paper No. 28. FEA will, however, permit a grantee or sub-grantee to propose alternative approaches which may be used in a weatherization project subject to prior approval of the Regional Administrator. FEA will not mandate a single approach where workable alternatives are available. Copies of Project Retro-Tech may be obtained from FEA Regional Offices or the FEA Office of Weatherization Assistance whose addresses appear elsewhere in this preamble.

FEA is interested in receiving comments on whether to proscribe the use of weatherization materials or energy conservation techniques which require frequent periodic repair or replacement. Such repairs and replacements are themselves energy consuming. Moreover, FEA chooses to encourage cost-effective weatherization with a long-lasting impact. On the other hand FEA, at this time, does not seek to preclude a State from proposing innovative approaches which may maximize benefits and number of beneficiaries in the short run.

H. *State Policy Advisory Councils.* The Act requires that each State establish a qualified and representative PAC to advise on the administration of the weatherization program within the State. Several comments were received on earlier drafts of the proposed rulemaking recommending that the regulations further specify the composition of the State PAC. On comment inquired as to the number of people that must be on a State's PAC. CSA recommended that FEA specifically require the inclusion of low-income persons on the State's PAC. It also recommended that the State's PAC include representatives of local project advisory committees established pursuant to CSA guidelines. Various other comments suggested that the regulations specify minimum percentages of poor, elderly, handicapped, black, and Spanish-speaking persons to be represented on the State's PAC.

FEA believes many of these decisions should be left to each State. However, FEA has provided certain minimum representational requirements. FEA believes that the composition of the State's PAC should include representatives of organizations and agencies which represent consumer groups or low-income persons, including elderly and handicapped low-income persons. It was also suggested that FEA utilize CSA's local project advisory committees. FEA is proposing not to require PAC's beyond the State PAC.

I. *Indians.* Section 440.11 of the regulations permits application by a tribal organization or other entity which serves Native Americans if the Regional Administrator determines that (1) the low-income members of an Indian tribe in a particular State are not receiving weatherization assistance under the Act that is equivalent to the assistance provided to other low-income persons in that State and (2) the members of the tribe would be better served by means of a grant made directly to the tribal organization or entity. Proposed § 440.11(c) provides that the Regional Administrator shall undertake to make such a determination in the event that a State shall: (1) Not submit a timely application, (2) recommend that direct grants be made for low-income members of an Indian tribe, (3) file an application which does not make adequate provision for the low-income members of an Indian tribe residing in the State. Section 440.11(e) allows an Indian tribe 30 days in which to apply after the Regional Administrator has reserved funds for which tribal organizations may apply. The tribal organization or entity would be required to satisfy, and be subject to, the same requirements as a local applicant in the State in which it is located.

J. *Technical assistance.* Section 416 of the Act authorizes FEA to use up to 10 percent of the sums appropriated for FEA's weatherization program in any fiscal year to provide technical assistance to any project receiving financial assistance. However, FEA has decided not to exercise this authority in order to maximize use of funds for actual weatherization work. FEA intends, however, to provide as much necessary technical assistance as it can, utilizing whatever existing staff and resources may appropriately be devoted to this task.

K. *Administrative Review.* The Act provides that FEA shall not finally disapprove an application, or any amendment thereto, or suspend a grant without affording the party affected, as well as other interested parties, reasonable notice and an opportunity for a public hearing. Section 440.30 of the proposed regulations implements this provision of the Act. Any adverse determination made by the Regional Administrator may be appealed in writing to the Administrator.

This appeal procedure applies to only a State or eligible local applicant but not a sub-grantee, such as a CAA. For example, the proposed regulations do not provide an appeal right to a CAA which has applied as a subgrantee and which has been denied allocation or priority funding by a Governor pursuant to procedures in the Act, implemented in the proposed regulations.

Comment Procedures

A. *Written Comment Procedures.* Interested persons are invited to participate in this rulemaking by submitting data, views, or arguments with respect to the proposals set forth in this notice to Executive Communications, Room 2105, Federal Energy Administration, Box LN, Washington, D.C. 20461.

Comments should be identified on the outside of the envelope and on documents submitted to FEA Executive Communications with the designation "Weatherization Assistance for Low-Income Persons Regulations." Fifteen copies should be submitted. All comments received by April 22, 1977, before 4:30 p.m., e.s.t., and all other relevant information, will be considered by FEA before final action is taken regarding the proposed regulations.

Any information or data considered by the person furnishing it to be confidential must be so identified and submitted in writing, one copy only. FEA reserves the right to determine the confidential status of the information or data and to treat it according to its determination.

B. *Public Hearing.* FEA has determined that in addition to holding a public hearing on this proposal in Washington, D.C., it will hold hearings in the 10 FEA Regions. Two hearings will be held

V 4263 APR 1 77 UMI

in Region X, one in Seattle, Washington, and the other in Anchorage, Alaska.

1. *National hearings.* The Washington, D.C., hearing (hereinafter referred to as the national hearing) will be held beginning at 9:30 a.m., April 25, 1977, at 2000 M Street, NW., Room 2105, Washington, D.C. The hearing will be continued, if necessary, on April 26, 1977. Any person who has an interest in this proceeding or who is a representative of a group of persons that has an interest in this proceeding may make a written request for an opportunity to make an oral presentation. Such a request should be directed to Executive Communications, FEA, Room 3309, Federal Building, 12th and Pennsylvania Avenue, NW., Washington, D.C. 20461, and must be received before 4:30 p.m., e.s.t., on April 14, 1977. A request may be hand-delivered between the hours of 8:00 a.m., and 4:30 p.m., Monday through Friday. Requests should be submitted in accordance with the "Request Procedures" set forth below.

2. *Regional hearings.* Each of the regional hearings will be held beginning at 10:00 a.m., local time, on the dates and at the locations specified below and will be continued, if necessary, on a second day.

Any person who has an interest in this proceeding or who is a representative of a group of persons that has an interest may make a written request for an opportunity to make an oral presentation. Such a request should be directed to FEA at the address given below for the appropriate Region, and in accordance with the "Request Procedures" set forth below. Requests must be received before 4:30 p.m., local time, on April 15, 1977.

FEA region	Hearing date	Submit requests to testify to—	Hearing location
I. Boston, Mass	Apr. 21 Apr. 22	FEA, 150 Causeway St., room 700, Boston, Mass. 02114.	McCormack State Office Bldg., 21st floor, conference room 21, 1-Ashburton Pl., Boston, Mass.
II. New York, N.Y	Apr. 18 Apr. 19	FEA, 26 Federal Plaza, New York, N.Y. 10007.	Federal Bldg., 26 Federal Plaza, room 2705, New York, N.Y.
III. Philadelphia, Pa	Apr. 21 Apr. 22	FEA, 1421 Cherry St., Philadelphia, Pa. 19102.	Federal Bldg., 1421 Cherry St., 11th floor, Philadelphia, Pa.
IV. Atlanta, Ga	Apr. 21 Apr. 22	FEA, 1655 Peachtree St., NE., Atlanta, Ga. 30309.	Atlanta Civic Center room, 201, 345 Piedmont Ave., NE., Atlanta, Ga.
V. Chicago, Ill	Apr. 21 Apr. 22	FEA, 175 West Jackson Blvd., Chicago, Ill. 60604.	U.S. District Court, room 1903, 219 South Dearborn St., Chicago, Ill. 60604.
VI. Dallas Tex	Apr. 18 Apr. 19	FEA, P.O. Box 35228, 2626 West Mockingbird Lane, Dallas, Tex.	Baker Hotel, 1400 Commerce Terrace Room, Dallas, Tex.
VII. Kansas City, Mo	Apr. 21 Apr. 22	FEA, 12 Grand Bldg., 112 East 12th St., P.O. Box 2208, Kansas City, Mo 64142.	601 East 12th St., Federal Bldg., room 40, Kansas City, Mo.
VIII. Denver, Colo	Apr. 21	FEA, P.O. Box 26247, Belmont Branch, 1075 South Yukon St., Lakewood, Colo. 80226.	Post Office Auditorium, Post Office Bldg., 19th and Stout St., Denver, Colo.
IX. San Francisco, Calif	Apr. 21 Apr. 22	FEA, 111 Pine St., 4th floor, San Francisco, Calif. 94111.	ERDA Conference Room, room 2575, 525 Market St., San Francisco, Calif.
X. Seattle, Wash	Apr. 21 Apr. 22	FEA, 1992 Federal Bldg., 915 2d Ave., Seattle, Wash. 98174.	Seattle Federal Bldg., 915 2d Ave., South Auditorium, Seattle, Wash.
Alaska	Apr. 22	FEA, G-11, Federal Office Bldg., 605 West 4th Ave., Anchorage, Alaska.	Conference Room, Federal Office Bldg., 605 West 4th Ave., Anchorage, Alaska.

3. *Request procedures.* The following request procedures are applicable to both the national and regional hearings. Persons requesting an opportunity to make an oral presentation will submit their written requests to the appropriate address for the Region in which they wish to appear. A request should be labeled both on the document and on the envelope "Weatherization Assistance for Low-Income Persons."

The person making the request should briefly describe the interest concerned; if appropriate, state why she or he is a proper representative of a group of persons that has such an interest; and give a concise summary of the proposed oral presentation and a phone number where she or he may be contacted through April 15, 1977, for regional hearings and April 20, 1977, for the national hearing. Each person selected to be heard will be notified by FEA before 4:30 p.m., local time, April 15, 1977, in the case of the regional hearings and by April 20, 1977, in the case of the national hearing. Each person selected to be heard must submit 100 copies, if feasible, of her or his statement to the Office of Regulation Development, FEA, Room 3214, 2000 M Street, NW., Washington, D.C., before 9:00 a.m., e.s.t. April 25, 1977 for the national hearing and to the location of the hearing by 9:00 a.m., on the day the statement is scheduled to be presented, for regional hearings.

4. *Hearing procedures.* FEA reserves the right to select the persons to be heard at these hearings, to schedule their respective presentations and to establish the procedures governing the conduct of the hearings. The length of each presentation may be limited, based on the number of persons requesting to be heard.

An FEA official will be designated to preside at the hearings. These will not be judicial or evidentiary-type hearings. Questions may be asked only by those conducting the hearings. At the conclusion of all initial oral statements, each person who has made an oral statement will be given the opportunity, if he or she desires, to make a supplemental statement which will be given in the order in which the initial statements were made and will be subject to time limitations.

Any person attending the hearing who wishes to ask a question at the hearings may submit the question, in writing, to the presiding officer. The presiding officer will determine whether the question is relevant, and whether the time limitations permit it to be presented for answer.

Any further procedural rules needed for the proper conduct of the hearings will be announced by the presiding officer.

A transcript of the hearings will be made and the entire record of the hearings, including the transcript, will be retained by FEA and made available for inspection at the Freedom of Information Office, Room 3116, Federal Building, 12th and Pennsylvania Avenue, NW., Washington, D.C. between the hours of 8:00 a.m., and 4:30 p.m., Monday through Friday. Any person may purchase a copy of the transcript from the reporter.

COORDINATION WITH OUTSIDE PARTIES, ENVIRONMENTAL AND INFLATIONARY REVIEW

In preparing this proposed rulemaking, issues and options were reviewed not only internally by FEA but also by representatives of the Director of the Community Services Administration, the Secretary of the Department of Housing and Urban Development, the Secretary of Health, Education and Welfare, the Secretary of Labor and the Director of the ACTION Agency. Recommendations regarding the content of the guidelines were solicited from all the States.

In accordance with FEA's obligations under the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321 et seq.), an evaluation of the potential environmental impacts of this program has been prepared by FEA. Notice of an environmental assessment appears elsewhere in today's FEDERAL REGISTER. As provided in that notice, comments will be received on the assessment and copies will be furnished upon request to interested persons.

As required by section 7(c)(2) of the Federal Energy Administration Act of 1974, Pub. L. 93-275, a copy of this notice has been submitted to the Administrator of the Environmental Protection Agency (EPA) for his comments concerning the impact of this proposal on the quality of the environment. The Administrator has no comments.

The proposal has also been reviewed in accordance with Executive Order 11821, and OMB Circular A-107, issued November 27, 1974, and has been determined not to be a major proposal requiring an evaluation of its inflationary impact.

In consideration of the foregoing, it is proposed to amend Part 440 of Chapter II of Title 10, Code of Federal Regulations, as set forth below.

Issued in Washington, D.C., March 25, 1977.

ERIC J. FYGI,
Acting General Counsel,
Federal Energy Administration.

Subchapter D, Chapter II of Title 10, Code of Federal Regulations, is amended by establishing Part 440 as follows:

PART 440—WEATHERIZATION ASSISTANCE FOR LOW-INCOME PERSONS

Sec.
440.1 Purpose and scope.
440.2 Administration of grants.

Sec.
440.3 Definitions.
440.10 Allocation of funds.
440.11 Indians.
440.12 State applications.
440.13 Local applications.
440.14 Administrative requirements.
440.15 Minimum program requirements.
440.16 Allowable expenditures.
440.17 Standards and techniques for weatherization.
440.18 Eligible dwelling units.
440.20 Oversight responsibility.
440.21 Recordkeeping.
440.22 Quarterly reports.
440.30 Administrative review.

AUTHORITY: Energy Conservation and Production Act, Pub. L. 94-385; Federal Energy Administration Act of 1974, as amended, Pub. L. 93-275 and Pub. L. 94-385; E.O. 11790, 39 FR 23185.

§ 440.1 Purpose and scope.

This part contains the regulations adopted by the Federal Energy Administration to carry out a program of weatherization assistance for low-income persons established by Part A (42 U.S.C. 6861-6872) of Title IV of the Energy Conservation and Production Act (Pub. L. 94-385, 90 Stat. 1125 et seq.).

§ 440.2 Administration of grants.

Grant awards under this part shall be administered in accordance with the following—

(a) Federal Management Circular 73-2 (34 CFR 251), entitled "Audit on Federal Operations and Programs by Executive Branch Agencies;"

(b) Federal Management Circular 74-4 (34 CFR 255), entitled "Cost Principles Applicable to Grants and Contracts with State and Local Governments;"

(c) Federal Management Circular 74-7 (34 CFR 256), entitled "Uniform Administrative Requirements for Grants-in-Aid to State and Local Governments;"

(d) Office of Management and Budget Circular A-89, entitled "Catalog of Federal Domestic Assistance;"

(e) Office of Management and Budget Circular A-95, entitled "Evaluation, Review and Coordination of Federal and Federally Assisted Programs and Projects;"

(f) Office of Management and Budget Circular A-97, entitled "Rules and Regulations Permitting Federal Agencies to Provide Specialized or Technical Services to State and Local Units of Government under Title III of the Intergovernmental Coordination Act of 1968;"

(g) Treasury Circular 1082, entitled "Notification to States of Grant-in-Aid Information;" and

(h) Such procedures applicable to this part as FEA may from time to time prescribe for the Administration of grants.

§ 440.3 Definitions.

As used in this part—

"Act" means the Energy Conservation and Production Act (Pub. L. 94-385, 90 Stat. 1125 et seq.)

"Administrator" means the Administrator of the Federal Energy Administration.

"Annual degree-days" means the total number of degree-days in one year, with respect to any State, as determined by FEA.

"CAA" means a Community Action Agency.

"Cosmetic items" means items which, when installed, will not reduce energy costs in a cost effective manner, including but not limited to finishes, decorative fenestration materials, and elevation materials such as aluminum siding, board and bat, clapboard, brick, shakes, or asphalt siding.

"Director" means the Director of the Community Services Administration.

"Dwelling unit" means a house, including a stationary mobile home, an apartment, a group of rooms, or a single room occupied as separate living quarters.

"Elderly" means a person who is 60 years of age or older.

"Eligible State" means any of the forty-eight contiguous States, Alaska, or the District of Columbia.

"FEA" means the Federal Energy Administration.

"Family Unit" means all persons living together in a dwelling unit.

"Governor" means the chief executive officer of a State (including the Mayor of the District of Columbia).

"Grantee" means the State or other entity named in the notice of grant award as the recipient.

"Handicapped person" means any individual (1) who is a handicapped individual as defined in section 7(6) of the Rehabilitation Act of 1973, (2) who is under a disability as defined in section 1614(a)(3)(A) or 223(d)(1) of the Social Security Act or in Section 102(7) of the Developmental Disabilities Services and Facilities Construction Act, or (3) who is receiving benefits under chapter 11 or 15 of Title 38, United States Code.

"Heating or cooling source" means a device the operation of which can raise or lower temperatures within a dwelling unit as part of the permanent heating, ventilating and air-conditioning system installed in the dwelling unit, including but not limited to furnaces, heat pumps, stoves, boilers, heaters, fireplaces, air conditioners, fans, and solar devices.

"Indian" means a person who is a member of an Indian tribe.

"Indian tribe" means any tribe, band, nation or other organized group or community of Indians (including any Alaska native village, or regional or village corporation as defined in or established pursuant to the Alaska Native Claims Settlement Act (Pub. L. 92-203; 85 Stat. 688)) which (1) is recognized as eligible for the special programs and services provided by the United States to Indians because of their status as Indians; or (2) is located on, or in proximity to, a Federal or State reservation or rancheria.

"Low-income" means that income in relation to family size which (1) is at or below the poverty level determined in accordance with criteria established by the Director of the Office of Management and Budget or (2) is the basis on which cash assistance payments have been paid during the preceding 12 month period under Titles IV and XVI of the Social Security Act or applicable State or local law.

"Mechanical equipment" means a control device or apparatus which is primarily designed to improve the heating or cooling efficiency of a dwelling unit, and which will permanently be affixed to an existing heating or cooling source, including but not limited to a flue damper, clock thermostat, filter, or replacement limit switches.

"Multi-family dwelling unit" means a dwelling unit which is located in a structure containing more than one dwelling unit.

"Number of low-income, owner-occupied dwelling units in the State" means the number of such dwelling units in a State, as determined by FEA.

"Number of low-income, renter-occupied dwelling units in the State" means the number of such dwelling units in a State, as determined by FEA.

"Percentage of total residential energy used for space cooling" means the national percentage of total energy used for space cooling as determined by FEA.

"Percentage of total residential energy used for space heating" means the national percentage of total energy used for space heating, as determined by FEA.

"Regional Administrator" means a Regional Administrator of the Federal Energy Administration.

"Separate living quarters" are those in which the occupants do not live and eat with any other persons in the structure and which have either (1) direct access from the outside of the building or through a common hall or (2) complete kitchen facilities for the exclusive use of the occupants. The occupants may be a single family, one person living alone, two or more families living together, or any other group of related or unrelated persons who share living arrangements.

"Single-family dwelling unit" means a structure containing no more than one dwelling unit.

"State" means each of the States and the District of Columbia.

"Sub-grantee" means a person conducting a weatherization project who is a recipient from a grantee of funds awarded under this part.

"Tribal organization" means the recognized governing body of any Indian tribe, or any legally established organization of Indians which is controlled, sanctioned, or chartered by such governing body.

"Unit of general purpose local government" means any city, county, town, parish, village, or other general purpose political subdivision of a State.

"Weatherization project" means a project conducted in a single geographical area which undertakes to weatherize dwelling units which are thermally inefficient.

"Weatherization materials" means items intended primarily to improve the heating or cooling efficiency of a dwelling unit including, but not limited to, ceiling, wall, floor, and duct insulation, storm windows and doors, and caulking and weatherstripping, but not including mechanical equipment valued in excess of $50 per dwelling unit.

§ 440.10 Allocation of funds.

(a) FEA shall provide financial assistance, from sums appropriated for any fiscal year, only upon annual application.

V 4263 APR 1 77 UMI

(b) FEA shall determine the allocation for each State as follows: (1) The first five million dollars appropriated shall be divided equally among the eligible States.

(2) The percentage of the remaining available funds allocated to each eligible State shall be determined by the following formula—

(i) The square of the number of heating degree-days in the State multiplied by the percentage of total residential energy used for space heating;

(ii) Plus the square of the number of cooling degree-days in the State multiplied by the percentage of total residential energy used for space cooling;

(iii) Multiplied by the sum of the number of low-income, owner-occupied dwelling units in the State and one-half of the number of low-income, renter-occupied dwelling units in the State;

(iv) Divided by the sum of the result produced for all States by the computation outlined in subparagraphs (A), (B), and (C) of this paragraph; and

(v) Multiplied by 100.

(vi) The Administrator shall notify each eligible State of the amount of grant funds for which that State is eligible to apply.

§ 440.11 Indians.

(a) Notwithstanding any other provision of this part, the Regional Administrator may determine (after taking into account the amount of funds made available to the State to carry out the purposes of this part) that—

(1) The low-income members of an Indian tribe are not receiving benefits under this part equivalent to the assistance provided to other low-income persons in such State under this part, and

(2) The members of such tribe would be better served by means of a grant made directly to provide such assistance.

(b) In any State for which the Regional Administrator shall have made such determination, the Regional Administrator shall reserve from the sums that would otherwise be allocated to such State under this part not less than 100 percent, nor more than 150 percent, of an amount which bears the same ratio to the State's allocation for the fiscal year involved as the population of all low-income Indians for whom a determination under paragraph (a) of this section has been made bears to the population of all low-income persons in such State.

(c) The Regional Administrator shall undertake to make the determination prescribed in paragraph (a) of this section in the event a State shall—

(1) Not apply within the 90 day time period prescribed in § 440.14(a)(2),

(2) Recommend that direct grants be made for low-income members of an Indian tribe,

(3) File an application determined by FEA, in accordance with the procedures in § 440.30, not to make adequate provision for the low-income members of an Indian tribe residing in the State, or

(4) Have received grant funds, and FEA determines, in accordance with the procedures in § 440.30, that the State fails to implement its procedures for the provision of weatherization assistance to low-income members of an Indian tribe residing in the State.

(d) Any sums reserved by the Regional Administrator pursuant to paragraph (b) of this section shall be granted to the tribal organization serving the individuals for whom such a determination has been made, or, where there is no tribal organization, to such other entity as the Regional Administrator determines has the capacity to provide adequate weatherization assistance pursuant to this part. Where a grant is proposed to be made to an organization to perform services benefiting more than one Indian tribe, the approval of each such Indian tribe shall be prerequisite to the issuance of a notice of grant award.

(e) Within 30 days after the Regional Administrator has reserved funds pursuant to paragraph (b) of this section, the Regional Administrator shall give written notice to the tribal organization or such other qualified entity of the amount of funds reserved and its eligibility to make application therefore.

(f) Such tribal organization or other qualified entity shall thereafter be treated as a unit of general purpose local government eligible to apply for funds hereunder, pursuant to the provisions of § 440.13.

§ 440.12 State applications.

(a) To be eligible for financial assistance, a State shall submit an application to FEA in conformity with the requirements of § 440.15 not later than 90 days after the date of publication of this part. The Regional Administrator will review each timely State application and, if the submission otherwise complies with the applicable provisions of this part, approve a final budget and issue a notice of grant award.

(b) Each application shall include—

(1) The name and address of the State agency or office responsible for administering the program;

(2) A copy of the final State plan prepared after notice and a public hearing in accordance with § 440.14(a), except that an application by a local applicant need not include a copy of the final State plan;

(3) A detailed description of the manner in which the State would meet the minimum program requirements of § 440.15;

(4) The Budget for total funds applied for under the Act;

(5) The total number of dwelling units proposed to be weatherized with grant funds during the budget period for which assistance is awarded;

(6) A schedule for implementation which shall indicate the number of dwelling units which are expected to be weatherized by calendar quarter;

(7) An estimate of the number of single-family and multi-family dwelling units to be weatherized;

(8) An estimate of the minimum number of dwelling units to be weatherized where elderly persons reside;

(9) An estimate of the minimum number of dwelling units to be weatherized where handicapped persons reside;

(10) An estimate of the minimum number of dwelling units of Indians to be weatherized or a recommendation that a tribal organization be treated as a local applicant eligible to submit an application pursuant to § 440.12(b);

(11) An estimate by percentage of the use of Federal manpower programs and/or volunteer labor programs and/or other labor sources in implementing each proposed weatherization project;

(12) Any determination made in accordance with § 440.14(d) not to provide funds, except that an application by a local applicant need not include this information; and

(13) Any further information which the Administrator determines is necessary to determine the acceptability of an application.

§ 440.13 Local applications.

(a) To be eligible for financial assistance, a local applicant, which shall be either a CAA or unit of general purpose local government, shall submit an application pursuant to § 440.12(b) to the Regional Administrator which meets the requirements of this part within 30 days of the date upon which either of the following shall have occurred—

(1) A State, within which a local applicant is situate, fails to submit an application within 90 days of the publication of this part; or

(2) The Regional Administrator finally disapproves the application of a State pursuant to § 440.30 of this part.

(b) In the event one or more timely applications are submitted by local applicants, the Regional Administrator shall act for the State, as far as practicable, for the purposes of § 440.14. The Regional Administrator shall combine the hearing on the proposed plan pursuant to paragraph (a) of § 440.14 with a hearing on proposed denial of the timely application of any local applicant, as provided in § 440.30 to the maximum extent practicable. Based upon the final plan developed by the Regional Administrator, the hearing and information submitted by a local applicant and other interested persons, FEA will determine whether or not to award a grant to a local applicant and the amount thereof. The Regional Administrator may provide financial assistance to one or more weatherization projects in a State conducted by one or more eligible local applicants.

§ 440.14 Administrative requirements.

(a) Before submitting an application, a State, after giving reasonable notice throughout the State, shall conduct one or more public hearings for the purpose of receiving comments on a proposed State plan which will identify and describe proposed weatherization projects and describe the proposed funding distributions and the recipients. Such proposed State plan shall be published and made available throughout the State prior to the hearing. The notice for such hearing shall specify that copies of the plan are available and how they may be obtained. A transcript of the hearing shall be prepared and written submission of views and data shall be accepted for the record.

(b) Subsequent to the hearing, the State shall prepare a final plan which shall identify and describe—

(1) Each area to be served within a State and shall include for each area—

(i) The number of dwelling units to be weatherized;

(ii) The climatic conditions within the State;

(iii) The type of weatherization work to be done;

(iv) The relative need for weatherization assistance among low-income persons; and

(v) The amount of energy to be conserved by the program; and

(2) The manner in which the State program is to be implemented which shall include—

(i) An analysis of the existence and effectiveness of any weatherization project being carried out by a CAA;

(ii) Mechanisms for providing sources of labor for each weatherization project to be funded;

(iii) The extent to which priority will be given to weatherization of single-family dwelling units for the elderly and handicapped;

(iv) The amount of non-Federal resources to be applied to the program;

(v) The amount of Federal resources (other than FEA weatherization grant funds) to be applied to the program; and

(vi) The rental dwelling units to be weatherized by project, if any.

(c) The plan shall insure that funds received under the Act will be allocated to a CAA carrying out a program under Title II of the Economic Opportunity Act of 1964, 42 U.S.C. 2809, or to other appropriate and qualified entities in such State or area so that:

(1) Funds will be allocated on the basis of the relative need for weatherization assistance among the low-income persons in such State or area, taking into account appropriate climatic and energy conservation factors; and

(2)(i) Funds allocated to a geographical area served by the emergency energy conservation program carried out by a CAA under section 222(a)(12) of the Economic Opportunity Act of 1964, shall be allocated to such agency, and (ii) priority in the allocation of funds will be given to such CAA in so much of the geographical area served by it as is not served by the emergency energy conservation program.

(d) Paragraph (c)(2) of this section shall not apply if the Governor determines, or the Regional Administrator determines acting on behalf of the Governor pursuant to § 440.13(b), on the basis of the public hearing provided under paragraph (a) of this section that—

(1) The emergency energy conservation program carried out by a CAA has been ineffective in meeting the purpose of the Act; or

(2) The emergency energy conservation program is clearly not of sufficient size and cannot in timely fashion develop the capacity to support the scope of the project to be carried out in such area with funds to be granted under this part.

(e) Any eligible local applicant may request in its application that the Regional Administrator determine that the allocation requirement and priority set forth in paragraph (c)(2) of this section shall no longer be applicable. In such event, the Regional Administrator shall decide whether to make such determination as part of the notice and public hearing procedure required by § 440.30, which hearing may be consolidated by the Regional Administrator with the public hearing required by paragraph (a) of this section.

§ 440.15 Minimum program requirements.

(a) Prior to the expenditure of any grant funds each grantee shall develop, publish and implement procedures to be approved by the Regional Administrator to insure that:

(1) No dwelling unit may be weatherized without documentation that the dwelling unit is an eligible dwelling unit as provided in § 440.18;

(2) Priorities are established to govern the provision of weatherization assistance to elderly and handicapped low-income persons, and such priority as the applicant determines is appropriate for single-family or other high-energy-consuming dwelling units;

(3) Financial assistance provided will be used to supplement, and not supplant, State or local funds, and, to the extent practicable as determined by FEA, to increase the amounts of such funds that would be made available in the absence of Federal funds provided under this part;

(4) To the maximum extent practicable, the services of volunteers and training participants and public service employment workers, pursuant to the Comprehensive Employment and Training Act of 1973, will be secured to work under the supervision of qualified supervisors and foremen;

(5) The limitations set forth in § 440.14(c) will be complied with; and,

(6) To the maximum extent practicable, the use of weatherization assistance shall be coordinated with other programs, Federal, State, local or privately funded, to improve thermal efficiency and to conserve energy.

(b) If a grantee decides to weatherize leased dwelling units:

(1) No leased dwelling unit shall be weatherized without first obtaining the written permission of the owner of the dwelling unit or his agent; and

(2) The grantee shall establish procedures approved by the Regional Administrator to insure that—

(i) The benefits of weatherization assistance shall accrue primarily to low-income tenants;

(ii) Rents shall not be raised because of the increased value of dwelling units due solely to weatherization assistance provided under this part; and

(iii) No undue or excessive enhancement shall occur to the value of the dwelling units.

(c) Prior to the expenditure of any grant funds, a State policy advisory council shall be established by a State or by the Regional Administrator, if a State does not participate in the program, which:

(1) Has special qualifications and sensitivity with respect to solving the problems of low-income persons, including the weatherization and energy conservation problems of such persons;

(2) Is broadly representative of organizations and agencies, including consumer groups, which represent low-income persons, particularly elderly and handicapped low-income persons, in the State or geographical area in question; and

(3) Is responsible for advising the responsible official or agency administering the allocation of financial assistance in such State or area with respect to the development and implementation of such weatherization assistance program.

(d) No person in the United States shall, on the ground of race, color, national origin, or sex, or on the ground of any other factor specified in any Federal law prohibiting discrimination, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program, project, or activity supported in whole or in part with financial assistance under this part. Whenever the Administrator determines that a recipient of financial assistance under this part has failed to comply with this paragraph or an applicable regulation, he shall notify the recipient to secure compliance. If within a reasonable period of time the recipient fails to comply, the Administrator shall (1) refer the matter to the Attorney General with a recommendation that an appropriate civil action be instituted; (2) exercise the power and functions provided by Title VI of the Civil Rights Act of 1964 and any other applicable Federal nondiscrimination law; or (3) take such other action as may be provided by law.

§ 440.16 Allowable expenditures.

(a) At least 90 percent of each grant awarded under this part shall be used to purchase weatherization materials. Allowable expenditures for weatherization materials include costs for only:

(1) Purchase of weatherization materials, FOB but not including mechanical equipment valued in excess of fifty dollars per dwelling unit;

(2) Transportation of weatherization materials to any storage site and to the site of weatherization work, except no purchase or lease of vehicles shall be allowed;

(3) Maintenance, operation, and insurance of vehicles used to transport weatherization materials; and

(4) Taxes related to other allowable expenditures for weatherization materials.

(b) No more than 10 percent of each grant awarded under this part shall be used for administrative expenses. Allow-

V 4 2 6 3 A P R 1 7 7 UMI

able administrative expenses shall not include any costs of tools or equipment or any costs of labor to carry out a weatherization project, except for supervisors and foremen.

(c) No grant funds awarded under this part shall be used for any of the following purposes:

(1) To weatherize dwelling units in any public housing project;

(2) To weatherize any dwelling unit which has been weatherized previously with grant funds authorized under this part;

(3) To weatherize any dwelling unit which is vacant or designated for acquisition or clearance by a Federal, State or local program within twelve months from the date weatherization of the dwelling unit would be scheduled to be completed; or

(4) To purchase cosmetic items or a heating or cooling source.

(d) The cost of weatherization materials provided with financial assistance under this part shall not exceed $400.00 in the case of any dwelling unit unless the State policy advisory council, established pursuant to § 440.15(c), provides for a greater amount with respect to specific categories of units or materials.

§ 440.17 Standards and techniques for weatherization.

(a) Weatherization materials for which standards exist in Appendix A to this part shall meet or exceed the applicable standards in Appendix A.

(b) A weatherization project shall apply the approaches to weatherization contained in Project Retro-Tech, FEA Conservation Paper Number 28, including the advisory energy conservation techniques therein, or such other approaches which are approved by the Regional Administrator.

§ 440.18 Eligible dwelling units.

No dwelling unit shall be eligible for weatherization assistance under this part unless it is a dwelling unit of a family unit:

(a) Whose income is at or below the poverty level determined in accordance with criteria established by the Director of the Office of Management and Budget; or

(b) Which contains a member who has received cash assistance payments under Titles IV or XVI of the Social Security Act or applicable State or local law paid during the 12-month period preceding the Federal fiscal year in which funds were obligated for financial assistance to such dwelling unit.

§ 440.20 Oversight responsibility.

(a) The Administrator and the appropriate Regional Administrator, in coordination with the Director, shall monitor and evaluate the operation of projects carried out by CAA's receiving financial assistance under this part through on-site inspections, or through other means, in order to assure the effective provision of weatherization assistance for the dwelling units of low-income persons.

(b) FEA shall also carry out periodic evaluations of the program and projects not carried out by a CAA and receiving financial assistance under this part.

(c) The Administrator and the appropriate Regional Administrator, the Director with respect to CAA's and the Comptroller General of the United States, or any of their duly authorized representatives, shall have access for the purpose of audit and examination to any books, documents, papers, information, and records of any weatherization project receiving financial assistance under the Act.

(d) Each grantee shall conduct, on an annual basis, an audit of the pertinent records of any sub-grantee receiving financial assistance under this part.

§ 440.21 Recordkeeping.

Each grantee or sub-grantee receiving Federal financial assistance under this part shall keep such records as FEA shall require, including records which fully disclose the amount and disposition by each recipient of the funds received, the total cost of the project or program for which such assistance was given or used, the source and amount of funds for such project or program not supplied by FEA, and such other records as FEA deems necessary to facilitate an effective audit and performance evaluation. Such recordkeeping shall be in accordance with Federal Management Circular 74-7 and any further requirements of this regulation or which may otherwise be established by FEA under the terms and conditions of a grant.

§ 440.22 Quarterly reports.

Each grantee receiving financial assistance under this part shall submit a quarterly program performance report and a quarterly financial report to the appropriate Regional Administrator. The program performance report shall contain such information as the Administrator may prescribe in order effectively to monitor the progress of a grantee.

§ 440.30 Administrative review.

(a) If a timely application submitted by a State or eligible local applicant fails to meet the requirements of this part, the Regional Administrator will return the application to the applicant together with a written statement of the reasons why the application fails to meet such requirements.

(b) The applicant will have a reasonable period, as determined by the Regional Administrator, to amend its application and to resubmit it by a specified date for reconsideration.

(c) The Regional Administrator shall give notice to the applicant in the event that the Regional Administrator determines that:

(1) Any application resubmitted by an eligible applicant in accordance with paragraph (b) of this section fails to comply with this regulation; or

(2) Any application returned to an eligible applicant pursuant to paragraph (a) of this section is not timely resubmitted as provided in paragraph (b) of this section.

(d) The Regional Administrator shall give notice to the grantee in the event the Regional Administrator finds there is a failure by a grantee to comply substantially with the provisions of this part.

(e) The Regional Administrator shall issue such notice in the form of written notice mailed by registered mail, return receipt requested, to the applicant (or grantee) and other interested parties including:

(1) A statement explaining why there has not been compliance with the regulations;

(2) A statement indicating the necessary amendments or other actions, if any, which would create compliance under the regulations;

(3) The date, place and time on which a public hearing will be held by the Administrator, one subject of which will be the proposed determination, which hearing shall in no event be later than 15 working days after receipt of such notice; and

(4) The manner in which views may be presented.

(f) Any party which has received notice under paragraph (d) of this section:

(1) May make a written submission of its views with supporting data and arguments to the Regional Administrator on or prior to the date of the public hearing; and

(2) Will be afforded an opportunity to make an oral presentation at the public hearing.

(g) The Regional Administrator shall consider all relevant views and data including arguments and other submissions made at the public hearing. The Regional Administrator shall make a final determination accompanied by a written statement stating the reasons for the determination not later than 5 working days after the public hearing.

(h) A State or eligible local applicant may file a written appeal on an adverse final determination made by the Regional Administrator under paragraph (g) of this section to the Administrator not later than 10 working days after receipt of the Regional Administrator's determination. The Administrator shall have 21 working days to consider the appeal and take any action with respect thereto which he deems appropriate. Any action taken by the Administrator shall be the final determination of FEA. Upon the expiration of the 21 working day period if no action has been taken by the Administrator, the final determination of the Regional Administrator shall be the final determination of FEA.

(i) Anything herein to the contrary notwithstanding, the public hearing required by paragraph (e) (3) of this section may be combined, at the discretion of the Regional Administrator, with any other public hearing in the State conducted pursuant to this part.

(j) Upon issuance of the notice provided in paragraph (d) the Regional Administrator may suspend payments to any grantee pending a final determination. If the Regional Administrator makes a final determination of failure to comply, the grantee will no longer be eligible to participate in the program until the Regional Administrator is satisfied that there is no longer any such failure to comply.

APPENDIX A—*Standards for weatherization materials*

Material or product	Standards
Insulation-air spaces: Reflective.	Conformance to F.S. HH-I-1252A.
Storm windows:	
Aluminum frame.	Equivalent to ANSI A134.3-1972.
Wood frame	Conformance to sec. 3 of NWMA Industry Standard I.S.3-73.
Rigid vinyl frame.	Conformance to NBS Product Standard PS26-70 and performance guarantee.
Frameless plastic glazing.	Required minimum thickness, 6 mil (0.006 in).
Storm doors:	
Aluminum	Equivalent to ANSI A134.4-1972.
Wood:	
Pine	Conformance to sec. 3 of NWMA I.S.5-73.
Fir, hemlock, spruce.	Conformance to sec. 3 of FHDA/ 5-75.
Hardwood veneered.	Conformance to sec. E of NWMA I.S.1-73.
Rigid vinyl	Conformance to NBS Product Standard PS26-70 and performance guarantee.
Caulks and sealants.	Commercial availability.
Weatherstripping	Do.
Vapor barriers	Conformance to ASTM C755-73.
Clock thermostats.	Commercial availability.
Insulation-mineral fiber:	
Blanket/batt	Conformance to F.S. (1) HH-I-521E and ASTM C665-70.
Board	Conformance to F.S. HH-I-526C and ASTM C612-70 or C726-72.
Duct material	Conformance to F.S. HH-I-545B.
Loose-fill	Conformance to F.S. HH-I-1030B and ASTM C764-73.
Insulation-mineral cellular:	
Aggregate board	Conformance to F.S. HH-I-529B.
Cellular glass	Conformance to F.S. HH-I-551B and ASTM C552-73.
Perlite	Conformance to F.S. HH-I-574A and ASTM C549-73.
Vermiculite	Conformance to F.S. HH-I-585B and ASTM C516-67.
Insulation-organic fiber:	
Cellulose-classes 25 and 75.	Conformance to F.S. HH-I-515C and ASTM C739-73 (loose-fill).
Cellulose-class 200.	Conformance to F.S. HH-I-515C and ASTM C739-73 (loose-fill) and fire safety requirements (2).
Vegetable	Conformance to F.S. HH-I-528B and fire safety requirements.
Board and block	Conformance to F.S. LLL-I-535A and ASTM C208-72 and fire safety requirements.
Insulation-organic cellular:	
Polystyrene board.	Conformance to F.S. HH-I-524B and ASTM C578-69 and fire safety requirements.
Urethane board	Conformance to F.S. HH-I-530A and ASTM C591-69 and fire safety requirements.
Flexible unicellular.	Conformance to F.S. HH-I-573B and ASTM C534-70 and fire safety requirements.

NOTES

1. F.S. means federal specifications as cited, copies of which may be obtained from Specifications Sales, Building 197, Washington Naval Yard, General Services Administration, Washington, D.C. 20407.

2. For fire safety requirements, see Sec. 2.1.3.1 of NBSIR 75-795 which may be obtained from FEA.

FEDERAL HOME LOAN BANK BOARD

[12 CFR Parts 545 and 561]

[No. 77-198]

FEDERAL SAVINGS AND LOAN SYSTEM AND FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION

Certain Loans in Excess of 90 Percent of Value and Definition of "Scheduled Items"

MARCH 23, 1977.

SUMMARY

The following summary of the amendments proposed by this Resolution is provided for the reader's convenience and is subject to the full explanation in the following preamble and to the specific provisions of the regulations.

I. PRESENT REGULATIONS

State-chartered institutions must include in "scheduled items" their loans and contracts to facilitate sale by them of real estate owned while such loans or contracts have unpaid principal balances in excess of 90 percent of the value of the real estate security when such loans and contracts are subject to no State lending limitations as to maximum amount. Also, certain such loans and contracts of Federal associations require private insurance or a specific reserve account.

II. PROPOSED REGULATIONS

This proposal would permit State-chartered institutions to exclude from their "scheduled items" such loans and contracts having unpaid principal balances over 90 percent (but not over 95 percent) of the value of the real estate security, if such loans and contracts meet the requirements of § 545.6-1(a)(5) of the rules and regulations for the Federal Savings and Loan System (12 CFR 545.6-1(a)(5)) regarding loans over 90 percent of value.

Also, the proposal would exclude such loans and contracts from the requirement of private insurance or specific reserve in § 545.6-1(a)(5)(v), so that such loans and contracts by any insured institution, including Federal associations, would not be scheduled items merely because of noncompliance with that requirement.

III. REASON FOR PROPOSAL

To establish substantial parity between State-chartered FSLIC-insured institutions and Federal associations regarding inclusion of such loans and contracts as "scheduled items."

The Federal Home Loan Bank Board considers it desirable to propose to amend § 545.6-1(a)(5)(v) of the rules and regulations for the Federal Savings and Loan System (12 CFR 545.6-1(a)(5)(v)) and § 561.15(d)(2) of the rules and regulations for Insurance Accounts (12 CFR 561.15(d)(2)) for the principal purpose of excepting from "scheduled items" certain loans and contracts to facilitate sale of real estate owned having unpaid principal balances in excess of 90 percent of the value of the real estate security.

Present regulations provide, in part and in substance, that a Federal savings and loan association's loans and contracts to facilitate sale of real estate owned are not "scheduled items" if they meet the requirements of § 545.6-1 of the Federal Regulations, including, where applicable, the requirements in (a)(5) of that section for loans over 90 percent of value of the real estate security. As to State-chartered institutions whose accounts are insured by the Federal Savings and Loan Insurance Corporation, the present rule as to "scheduled items" is as follows:

1. Such a loan or contract to facilitate is not a "scheduled item" under § 561.15(d)(2) if it complies with applicable maximum amount lending limitations.

2. Such loan or contract is a "scheduled item" under § 561.15(d)(2) if there are no applicable maximum amount lending limitations and its unpaid principal balance exceeds 90 percent of the value of the real estate security.

This proposal would, in substance, exclude from "scheduled items" a State-chartered insured institution's over-90-percent-of-value loan or contract to facilitate sale of real estate owned which is subject to no lending limitation as to maximum amount when it complies with all of the provisions of § 545.6-1(a)(5) of the Federal Regulations regarding over-90-percent-of-value loans by Federal associations. Also, under the proposal, such loans and contracts of any insured institution, including Federal associations, would not be subject to the requirement of private mortgage insurance or specific reserve in § 545.6-1(a)(5)(v), and would therefore not be scheduled items merely because of noncompliance with that requirement.

Interested persons are invited to submit written data, views and arguments to the Office of the Secretary, Federal Home Loan Bank Board, 320 First Street, NW., Washington, D.C. 20552, by May 2, 1977, as to whether this proposal should be adopted, rejected, or modified. Written material submitted will be available for public inspection at the above address.

Accordingly, the Board hereby proposes to amend said §§ 545.6-1(a)(5)(v) and 561.15(d)(2) to read as follows:

V42163 APR 1 77 UMI

§ 545.6–1 Lending powers under sections 13 and 14 of Charter K.

Any Federal association which has Charter K may, under sections 13 and 14 thereof, make the following types of loans on the security of first liens on improved real estate and the use by such an association of loan plans, practices, and procedures which comply with the applicable provisions of §§ 545.6 to 545.6–13, are hereby approved by the Board:

(a) *Homes or combination of homes and business property:*

* * * * *

(5) *Loans in excess of 90 percent of value.* The limitation of 80 percent set forth in subdivision (i) of subparagraph (1) of this paragraph shall be 95 percent in the case of any loan with respect to which the requirements set forth in subdivisions (i), (iii), (iv) (v), (vi), and (viii) of subparagraph (4) of this paragraph are met and with respect to which the following additional requirements are met:

* * * * *

(v) Except as to a loan or contract to facilitate the sale of real estate owned, either:

(*a*) That as long as the unpaid balance of such a loan is in excess of an amount equal to 90 percent of the value or purchase price of the real estate security, whichever is less, determined at the time the loan was made, that portion of the unpaid balance of such loan which is in excess of an amount equal to 80 percent of such value or purchase price of the real estate security is guaranteed or insured by a mortgage insurance company which has been determined to be a "qualified private insurer" by the Federal Home Loan Mortgage Corporation; or

(*b*) The association establishes and maintains a specific reserve with respect t such loan equal to one percent of the unpaid principal balance thereof until the unpaid principal balance has been reduced to an amount not in excess of 90 percent of the value or purchase price of the real estate security, whichever is less, determined at the time the loan was made.

* * * * *

§ 561.15 Scheduled items.

The term "scheduled items" means:

* * * * *

(d) Loans secured by, and contracts for the sale of, real estate described in paragraph (c) of this section and real estate previously owned or held by an insured institution for development or investment purposes (other than insured loans, guaranteed loans, or contracts or loans having the benefit of a guaranty by the Federal Savings and Loan Insurance Corporation) during the period that such loans or contracts:

* * * * *

(2) have unpaid principal balances in excess of the maximum amounts permitted under otherwise applicable lending limitations, or, in the absence of otherwise applicable lending limitations, in excess of 90 percent (95 percent, if the requirements of § 545.6–1(a)(5) of this chapter are met) of the value of the real estate securing such loans or sold under such contracts; except that only 20 percent of the unpaid principal balance of any such loan or contract will be included in "scheduled items" if all of the following requirements are met:

* * * * *

(Sec. 5 48 Stat, 132, aa amended (12 U.S.C. 1464); secs. 402, 403, 407, 48 Stat. 1256, 1257, 1260, as amended (12 U.S.C. 1725, 1726, 1730). Reorg. Plan No. 3 of 1947, 12 CFR 4981, 3 CFR 1943–48 Comp. 1071.)

By the Federal Home Loan Bank Board.

Social Security Administration

[20 CFR Part 404]

[Reg. No. 4]

FEDERAL OLD-AGE, SURVIVORS, AND DISABILITY INSURANCE

Requirements for Entitlement or Reentitlement to Child's Benefits

Notice is hereby given, pursuant to the Administrative Procedure Act (5 U.S.C. 553), that the amendments to the regulations set forth in tentative form below are proposed by the Commissioner of Social Security with the approval of the Secretary of Health, Education, and Welfare. The proposed amendments to Subpart D of Part 404 of Title 20 of the Code of Federal Regulations (20 CFR) define the term "unmarried" as used in the initial entitlement provisions for child's benefits, and the meaning of the term "has not married" as used in the reentitlement provision for child's benefits. They also specify that a child does not need to reestablish dependency as a condiiton for reentitlement. The proposed amendments incorporate existing policy, and are intended to avoid possible misunderstandings of present regulations. Interested parties are given 45 days from the date of publication of this notice in which to submit any data, views or arguments.

Section 202(d)(1) of the Social Security Act provides that one of the requirements for initial entitlement to child's benefits is that the child be unmarried at the time of application. The proposed amendments to the regulations define "unmarried" as not currently married. A child whose marriage is void or has been annulled or has been terminated by death or divorce, is considered to be unmarried. The policy enunciated by this definition has been in effect since 1941.

Section 202(d)(6) of the Act, specifies the conditions under which a child whose entitlement to child's insurance benefits terminated, with the month preceeding the month the child attained age 18 or later, may become reentitled. The reentitlement provisions state a child may become reentitled to child's benefits provided he has not married since his prior entitlement. The proposed amendments provide that for purposes of reentitlement, a child whose marriage has been voided or annulled is considered to have never married. However, a claim for reentitlement can not be treated as if the child had not married, if the annulling court awards permanent alimony or retains jurisdiction under State law to grant permanent alimony in the annullment action.

The proposed amendments cited in the two preceding paragraphs are intended to show the differences between the term "unmarried" used with respect to initial entitlement provisions, and the term "has not married" used with respect to reentitlement to child's benefits. "Unmarried" connotes the status of being not currently married, while "has not married" refers to the status of not having married at all since initial entitlement to child's benefits. A marriage which terminated by death of the spouse or divorce is not a bar to initial entitlement to child's benefits, but would constitute a bar to reentitlement.

Since section 202(d)(6) of the Act does not require reestablishing dependency, the proposed amendments specifically state that a child does not need to reestablish dependency as a condition for reentitlement.

Accordingly 20 CFR 404.320(a)(3) and (b) are being revised and paragraphs (c)(6) and (c)(7) are being added to define "unmarried" as used in initial entitlement provisions, to clarify the meaning of the term "has not married" as used in the reentitlement provisions, and to specify that a child does not need to reestablish dependency as a condition for reentitlement.

If there are any questions concerning these amendments, you may contact Mr. S. J. Weissman, Legal Assistant, 6401 Security Boulevard, Baltimore, Maryland 21235, telephone 301–594–7341.

Prior to final adoption of the proposed amendments to the regulations consideration will be given to any data, views or arguments pertaining thereto which are submitted in writing to the Commissioner of Social Security, Department of Health, Education, and Welfare, P.O. Box 1585, Baltimore, Maryland 21203, on or before May 16, 1977.

Copies of all comments received in response to this notice will be available for public inspection during regular business hours at the Washington Inquiries Section, Office of Information, Social Security Administration, Department of Health, Education, and Welfare, North Building, Room 4146, 330 Independence Avenue, SW., Washington, D.C. 20201.

(Secs. 202(d)(1), 202(d)(6), 205(a), and 1102 of the Social Security Act, 49 Stat. 623, 49 Stat. 624, 49 Stat. 647 as amended; 42 U.S.C. 402(d)(1), 402(d)(6), 405(a), and 1302.)

NOTE.—The Social Security Administration has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A–107.

Dated: March 7, 1977.

J. B. CARDWELL,
Commissioner of Social Security.

Approved: March 28, 1977.

JOSEPH A. CALIFANO, Jr.,
Secretary of Health, Education, and Welfare.

Part 404 of Chapter III of Title 20 of the Code of Federal Regulations is amended as set forth below:

Section 404.320 is amended by revising paragraphs (a)(3) and (b), and adding paragraphs (c)(6) and (c)(7) to read as follows:

§ 404.320 Child's insurance benefits; conditions of entitlement.

(a) *Entitlement.* A child is entitled to a child's insurance benefit if he:

* * * * *

(3) Is unmarried (see paragraph (c)(6) of this section) at the time such application is filed; and

* * * * *

(b) *Reentitlement.* A child whose entitlement to benefits terminated with the month before the month he attained age 18 or later, may thereafter again become entitled to benefits without reestablishing dependency, provided he has not married (see paragraph (c)(7) of this section and § 404.321(b)(2)) since his last entitlement. Reentitlement to benefits is effective upon filing application for such reentitlement beginning with:

* * * * *

(c) *Definition of terms.* * * *

(6) *Unmarried.* The term unmarried, as used in paragraph (a)(3) of this section, means not currently married. A child whose marriage is void or has been annulled or has been terminated by death or divorce, is considered to be unmarried.

(7) *Has not married.* The term has not married, as used in paragraph (b) of this section, means to have never married or to have had a marriage which was voided or annulled (and for which no permanent alimony has been granted or the annulling court does not retain jurisdiction to grant alimony). It does not include a child whose marriage was terminated by death of the spouse or divorce.

[Reg. No. 5]

FEDERAL HEALTH INSURANCE FOR THE AGED AND DISABLED

Establishment of Cost Basis on Purchase of Facility as an Ongoing Operation, and Transactions Involving Provider's Capital Stock

Notice is hereby given pursuant to the Administrative Procedure Act (5 U.S.C. 553), that the amendment to the regulations set forth in tentative form below, is proposed by the Commissioner of Social Security with approval of the Secretary of Health, Education, and Welfare. The proposed amendment is a new paragraph (l) to § 405.415 that describes the intenaction of various program regulations, together with applicable legal and accounting principles, when applied to complex financial transactions. Section 405.415(l) incorporates into Subpart D existing program policy applicable to those transactions involving a provider's capital stock (see Social Security Ruling 75–22, Cumulative Bulletin 1975, p. 107). As a result of two decisions issued by the Provider Reimbursement Review Board, the Social Security Administration believes there is a need for more definitive and detailed explanation of this program policy in Subpart D. The Provider Reimbursement Review Board ruled in both decisions that the purchase of a corporate provider's capital stock should be considered a purchase of the corporate assets and, for program purposes, a revaluation of asset basis and the recognition of goodwill should be permitted upon such a transaction. Both decisions were reversed by the Commissioner. Moreover, this issue is being litigated in various Federal Courts. The purpose of the proposed addition to the regulation is to place together in one section of the reimbursement regulations various other health insurance program regulations that define program policy applicable to the purchase of the capital stock of a corporate provider. As the proposed amendment codifies longstanding program policy and does not propose new policy, the publication of the proposed amendment does not require a Notice of Intent. It is believed that publication of this notice requesting comments will provide ample time for comment and adequate notice and opportunity for participation by all interested individuals and organizations. This is in keeping with the spirit and intent of the Secretary's policies for the development of regulations announced on July 25, 1976. The proposed amendments are a specific interpretation of existing program policy based on previously promulgated regulations. Interested parties will have 45 days from publication in the Federal Register to submit their views and comments.

Proposed paragraph (l) describes the interaction of various health insurance program regulations, together with the legal and accounting principles applied to complex financial transactions. As stated in existing § 405.626(c), a transfer of corporate stock does not constitute a change of provider ownership. Thus, the transfer of corporate stock does not result in a termination of the provider agreement; the existing provider agreement continues in effect, and there is no basis for any change in health insurance program reimbursement to the provider. In addition, other health insurance program regulations are consistent with this position. Paragraph (a)(1) of § 405.415 states that depreciation must be "* * * recorded in the provider's accounting records," and paragraph (a)(2) of § 405.415 states that depreciation must be "based on the historical cost of the asset." Historical cost is defined in paragraph (b)(1) of § 405.415 as the "cost incurred by the present owner in acquiring the asset." Section 405.429 states that the provider's equity capital is the "provider's investment in plant, property and equipment related to patient care." These regulations, when read together with § 405.626(c), enunciate the principle that, as a transfer of corporate stock does not result in a termination of the provider agreement, there has been no change in the provider's status with respect to the health insurance program, and there is no basis for any change in the health insurance program's reimbursement to the ongoing provider.

A second provision of the proposed amendment (§ 405.415(l)(2)) points out that a statutory merger is treated as a sale of assets.

A third provision of the proposed amendment (§ 405.415)(l)(3)) points out that a statutory merger between related parties, or a consolidation of two or more providers, is treated under § 405.427 and no revaluation of assets or recognition of good will is permitted as a result of such transaction. Section 405.427 describes those conditions under which the related party principle should be applied. Paragraph (g) of § 405.415 states that in a non bona fide sale, the purchaser's cost basis shall not exceed the seller's cost basis less accumulated depreciation.

The proposed revision of paragraph (l) of § 405.415 is also consistent with paragraph (f) of § 405.415. Paragraph (f) deals with the way in which gains or losses on disposal of depreciable assets are treated under the health insurance program. When a provider's assets are sold the transaction causes adjustments to the seller's health insurance program allowance for depreciation based upon the gain or loss on the sale of the asset. Because a sale of corporate stock is not a sale of the corporation's assets, the provisions of paragraph (f) of § 405.415 are not applicable to the seller after such a transaction.

Furthermore, based upon basic principles of corporation law, a stockholder and the corporation are distinct legal entities, with title to the corporate

V 4263 APR 1 77 UMI

property vested in the corporation itself and not in the stockholder. Thus, transfer of corporate stock ownership does not result in a transfer or change in ownership of corporate assets. Accounting principles also support this position because a transfer of stock does not result in any change in the recorded value of the corporation's assets, liabilities, or net worth.

The proposed revision to paragraph (g) of § 405.415 merely adds clarifying words and subtitles and is not related to the proposed addition of paragraph (l) of § 405.415.

If there are any questions concerning this regulation, you may contact Mr. John Jansak, Branch Chief, Provider Reimbursement Policy Branch, Division of Provider Reimbursement and Accounting Policy, Bureau of Health Insurance, Room 405, East Building, 6401 Security Boulevard, Baltimore, Maryland 21235, telephone number 301–594–9820. Mr. Jansak will respond to questions, but will not accept comments on this regulation.

Prior to the final adoption of the proposed amendments to the regulations, consideration will be given to any data, views, or arguments pertaining thereto which are submitted in writing to the Commissioner of Social Security, Department of Health, Education, and Welfare, Post Office Box 1585, Baltimore, Maryland 21203, on or before May 16, 1977.

Copies of all comments received in response to this notice will be available for public inspection during regular business hours at the Washington Inquiries Section, Office of Information, Social Security Administration, Department of Health, Education, and Welfare, North Building, Room 4146, 330 Independence Avenue, SW., Washington, D.C. 20201.

Secs. 1102, 1814(b), 1833(a), 1861(v), and 1871 of the Social Security Act; 49 Stat. 647, as amended, 79 Stat. 294, as amended, 79 Stat. 302, as amended, 79 Stat. 322, as amended, 79 Stat. 331; 42 U.S.C. 1302, 1395(b), 1395(a), 1395x(v), and 1395hh.) (Catalog of Federal Domestic Assistance Program No. 13.800, Health Insurance for the Aged—Hospital Insurance.)

NOTE: It is hereby certified that this proposal has been screened pursuant to Executive Order No. 11821, and does not require an inflation impact evaluation.

Dated: January 17, 1977.

J. B. CARDWELL,
Commissioner of Social Security.

Approved: March 28, 1977.

JOSEPH A. CALIFANO, Jr.,
Secretary of Health, Education, and Welfare.

Part 405 of Chapter III of title 20 of the Code of Federal Regulations as amended is further amended as set forth below:

In § 405.415 paragraph (g) is revised and paragraph (l) is added to read as follows:

§ 405.415 Depreciation; Allowance for depreciation based on asset costs.

• • • • •

(g) *Establishment of cost basis on purchase of facility as an ongoing operation.*—(1) *Purchase of assets.* In establishing the cost basis for the assets of a facility purchased as an ongoing operation after July 1, 1966, the price paid by the purchaser shall be the cost basis where the purchaser can demonstrate that the sale was a bona fide sale and the price did not exceed the fair market value of the facility at the time of the sale. The cost basis for depreciable assets shall not exceed the fair market value of those assets at the time of sale.

(2) *Transactions other than bona fide.* If the purchaser cannot demonstrate that the sale was bona fide, the purchaser's cost basis shall not exceed the seller's cost basis, less accumulated depreciation.

(3) *Assets acquired August 1, 1970, or later.* For depreciable assets acquired August 1, 1970, or later, the cost basis of the depreciable assets shall not exceed the current reproduction cost depreciated on a straight-line basis over the life of the assets to the time of the sale.

(4) *Facilities purchased August 1, 1970, or later.* Where a facility is purchased as an ongoing operation August 1, 1970, or later, the cost basis shall not exceed the fair market value of the tangible assets purchased, subject to the limitations in paragraph (g) (1), (2), and (3) of this section applicable to the depreciable assets.

• • • • •

(l) *Transactions involving provider's capital stock*—(1) *Acquisition of capital stock of a provider.* The acquisition of the capital stock of a provider does not give rise to a revaluation of the provider's assets, nor may any of the excess paid over the book value of the provider's assets be included in the computation of equity capital for program reimbursement purposes. Any interest expense incurred as a result of such an acquisition is not an allowable cost for health insurance program purposes, as it is not incurred on a loan made for a purpose related to patient care (see § 405.419(b)(2)(ii)). An example of this type of transaction is one in which Corporation A purchases the capital stock of Corporation B, the provider. Corporation B continues as the provider after the purchase and Corporation A is merely the stockholder.

(2) *Statutory merger.* (i) A statutory merger for health insurance program purposes is a combination of two or more corporations with one of them surviving, effected according to the requirements and procedures set forth in the corporation laws of the State of incorporation, and the surviving corporation becomes the owner of the assets and liabilities of the merged corporation(s) by operation of State law. (ii) If the statutory merger is between two or more corporations which are unrelated (for purposes of paragraph (l)(3) of this section or of § 405.427), and one of the merged corporations is a provider, and the provider is the nonsurviving corporation, the assets of the merged corporation(s) acquired by the surviving corporation are subject to the provisions of paragraph (g)(1), (3), and (4) of this section, and the former provider corporations are subject to those health insurance program policies applicable to terminated providers (e.g., see paragraphs (d)(3) and (f) of this section). An example of this type of transaction is one in which Corporation A, a nonprovider, and Corporation B, the provider, are combined by a statutory merger, with Corporation A being the surviving corporation. In such a case the assets of Corporation B acquired by Corporation A are subject to revaluation, as defined in paragraph (g) of this section. (The basis of the assets owned by the surviving corporation before the merger are unaffected by the transaction.)

(3) *Statutory merger between related parties or consolidation.* The statutory merger of two or more related corporations, or the consolidation of two or more providers resulting in the creation of a new corporate entity, is treated as a transaction between related parties (see § 405.427). No revaluation of assets is permitted for those assets acquired by the surviving corporation, nor is the recognition of good will for equity capital purposes permitted for such transactions that occurred before August 1970. An example of this type of transaction is one in which Corporation A purchases the capital stock of Corporation B, the provider. Immediately after the acquisition of the capital stock of Corporation B, there is a statutory merger of Corporation B and Corporation A, with Corporation A being the surviving corporation. Under these circumstances, the statutory merger is a transaction between related parties and does not give rise to a revaluation of the provider's assets.

DEPARTMENT OF LABOR

Employment and Training Administration

[20 CFR Part 602]

TEMPORARY ALIEN CERTIFICATION PROGRAM

1977 Adverse Effect Rates

AGENCY: Department of Labor.

ACTION: Proposed rule.

SUMMARY: The Employment and Training Administration of the Department of Labor is proposing to issue its annual updating of its adverse effect rates for the temporary alien certification program. Adverse effect rates are minimum rates which the Department has determined must be offered and paid by the employers of temporary alien agricultural and logging workers in order to prevent the employment of such aliens from having an adverse effect on the wages of U.S. workers.

DATES: Comments on the proposed rule are due by May 2, 1977.

FOR FURTHER INFORMATION CONTACT:

Aaron Bodin, Chief, Division of Labor Certifications, United States Employment Service, Room 8410, 601 D Street, NW., Washington, D.C. 20213. (202–376–6295).

SUPPLEMENTARY BACKGROUND:

BACKGROUND

Section 214.2(h)(3)(i) of the Immigration and Naturalization Service Regulations (8 CFR 214.2(h)(3)(i), issued under the Immigration and Nationality Act, requires, in support of a petition for the admission of an alien into the United States to perform certain temporary labor:

Either a certification from the Secretary of Labor or his designated representative stating that qualified persons in the United States are not available and that the employment of the beneficiary will not adversely affect the wages and working conditions of workers in the United States similarly employed, or a notice that such a certification cannot be made, shall be attached to every nonimmigrant visa petition to accord an alien a classification under section 101(a)(15)(H)(ii) of the Act. • • •

Each year the Department undates its adverse effect rates so that, in light of current economic conditions, employers will be required to offer workers a wage which will not adversely affect the wages of U.S. workers.

RELATIONSHIP OF PROPOSED RULE TO PROPOSED REGULATIONS FOR 20 CFR PART 665

On January 25, 1977, at 42 FR 4670, the Department proposed comprehensive new regulations for the entire labor certification process for the temporary employment of aliens in the United States in agricultural and logging occupations. Those regulations, when eventually finalized, were proposed to be placed into a new Part 655 in 20 CFR, and to replace all the present regulations at 20 CFR 602.10, 10a, and 10b. The rule proposed in this document, however, is merely the annual update of the adverse effect rates. Because of the considerable interest shown by the public in the January 25 proposed comprehensive revision, the Department expects that it will be some time before the January 25 proposal will be finalized. The Department expects, however, that the new adverse effect rates proposed in this document will be finalized shortly after the end of the thirty-day comment period.

WHERE TO SEND COMMENTS

Comments on the proposed rule should be sent to the Assistant Secretary for Employment and Training, Attn: William B. Lewis, Administrator, United States Employment Service, Room 8000, 601 D Street, NW., Washington, D.C. 20213.

Accordingly, 20 CFR 602.10b, paragraph (a)(1), is proposed to be revised to read as follows:

§ 602.10b Wage rates.

(a)(1) Except as otherwise provided in this section, the hourly wage rates set forth below shall be offered and paid to agricultural workers. The Department has found that, unless these wage rates are offered and paid, the wage rates of similarly employed U.S. workers will be adversely affected.

State:	Rate
Connecticut	$2.75
Maine	2.64
Massachusetts	2.70
New Hampshire	2.97
Rhode Island	2.72
Vermont	2.93
New York	2.70
Maryland	2.43
Virginia	2.63
Florida (sugar cane only)	3.23

Signed at Washington, D.C. this 25th day of March, 1977.

ERNEST G. GREEN,
Assistant Secretary for Employment and Training.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[21 CFR Part 109]

[Docket No. 77N-0080]

POLYCHLORINATED BIPHENYLS (PCB'S)

Unavoidable Contaminants in Food and Food Packaging Materials; Reduction of Temporary Tolerances

AGENCY: Food and Drug Administration.

ACTION: Proposed reduction of temporary tolerances for polychlorinated biphenyls (PCB's).

SUMMARY: The Food and Drug Administration (FDA) is proposing to reduce the temporary tolerances for unavoidable residues of the industrial chemicals PCB's in several classes of food. Specifically, the agency is proposing to reduce the tolerances in milk and dairy products from 2.5 parts per million (ppm) to 1.5 ppm (fat basis); in poultry from 5 ppm to 3 ppm (fat basis); in eggs from 0.5 ppm to 0.3 ppm, and in fish and shellfish from 5 ppm to 2 ppm.

DATES: Comments on or before May 31, 1977.

ADDRESSES: Written comments on this proposal may be sent, in quadruplicate, to the Hearing Clerk, Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT:

Howard N. Pippin, Division of Regulatory Guidance (HFF–312), Bureau of Foods, Food and Drug Administration, Department of Health, Education, and Welfare, 200 C St. SW., Washington, DC 20204, (202) 245–3092.

SUPPLEMENTARY INFORMATION: PCB's are a class of toxic industrial chemicals that are highly stable, heat resistant, and nonflammable. By late 1971, the unique physical and chemical properties of PCB's and their widespread, uncontrolled industrial application had resulted in their becoming a persistent and ubiquitous environmental contaminant. One consequence of the contamination of the environment with PCB's was the indirect contamination of certain foods.

REGULATORY HISTORY

In the FEDERAL REGISTER of July 6, 1973 (38 FR 18096), the Commissioner of Food and Drugs issued regulations under Part 122 (21 CFR Part 122), to deal with the problem of contamination of animal feeds, foods, and food packaging materials with PCB's. Among these regulations are those establishing temporary tolerances for unavoidable PCB residues resulting from environmental contamination of milk and dairy products, poultry, eggs, fish and shellfish, infant and junior foods, and feed and feed components for food producing animals. There is also a temporary tolerance for PCB's in paper food-packaging material intended for or used with human food, finished animal feed and components intended for animal feeds, which is currently stayed (by order published in the FEDERAL REGISTER of August 24, 1973 (38 FR 22794)) pending completion of an evidentiary hearing under sections 406 and 701(e) of the act (21 U.S.C. 346 and 371 (e)). In establishing these tolerances as "temporary" the Commissioner recognized that, in the future, unavoidable PCB contamination should decrease. The stated intention of the Commissioner has thus been to reduce the temporary tolerances as PCB contamination became less unavoidable.

At the National Conference on PCB's sponsored by the Environmental Protection Agency (EPA) on November 19 through 21, 1975, in Chicago, FDA announced that it had initiated a review of the appropriateness of the current temporary tolerances. (The proceedings from the National Conference have been published and a copy is on file in the office of the Hearing Clerk.) In a notice published in the FEDERAL REGISTER of February 26, 1976 (41 FR 8409), the Commissioner issued a statement of policy regarding PCB's in certain freshwater fish. The notice discussed the review of the temporary tolerances and stated that if, on the basis of this review, lowering of any of the temporary tolerances was warranted, the Commissioner would issue a proposal in the FEDERAL REGISTER to amend the existing PCB regulations.

TOXICITY OF PCB'S

The temporary tolerances established in 1973 were arrived at after evaluation of the best available toxicological data. Data from long-term (2-year) animal studies established that a no-effect level in rats and dogs for PCB's with three levels of chlorination (42, 54, or 60 percent) is 10 ppm. These animal data were used as a basis for estimating a no-effect level in man. When data derived from dogs were used, a no-effect level of 2.5 micrograms per kilogram (g/kg) body weight per day was calculated. When rat data were used, the no-effect level in man was 5g/kg body weight per day. Thus, for a 70-kilogram individual (approximately 155 pounds), an allowable level of PCB ingestion would be 175 to 210 micrograms per day.

When establishing tolerances for environmental contaminants, such as

V 4263 APR 1 77 UMI

PCB's, it is preferable, though not always possible, to rely on human rather than animal data. In the case of PCB's, human data were available from the unfortunate "Yusho" poisoning incident in Japan in 1968 in which many individuals consumed rice oil contaminated with PCB's. The rice oil involved in the Yusho incident was contaminated with Kanechlor 400, a Japanese brand of PCB containing 48 percent (by weight) chlorine. The 48 percent (by weight) chlorine-containing PCB Aroclor 1248, an American product, is very similar to the Kanechlor 400. Consequently, the human data derived from the Yusho incident, though stemming from exposure to a Japanese PCB, were relevant and significant in establishing a temporary tolerance for residues resulting mostly from American-made PCB's.

The victims in the Yusho incident were calculated to have consumed an average of 15,000 milligrams per day (mg/day) of the rice oil contaminated with Kanechlor 400. At that time the rice oil was determined to be contaminated at levels of 2,000 to 3,000 ppm PCB's, the average level of PCB contamination in the oil being 2,500 ppm. The levels of PCB contamination of the oil were calculated by comparing the measured organic chlorine content of the rice oil with the known organic chlorine content of Kanechlor 400. Using the two average levels (consumption of rice oil and PCB level in the rice oil), the average daily intake of PCB's was estimated to be 37.5 mg/day. The average cumulative dose of PCB's that caused an overt effect in the Japanese victims was reported to be 2,000 milligrams. Based on the average daily intake of 37.5 mg/day, it would take 53 days of exposure for an individual to consume this amount. Actual periods of exposure no doubt varied around this figure. However, it was estimated that the maximum exposure at Yusho would have been 100 days.

Humans in the United States have not been exposed to PCB's at the concentrated levels that existed in the Yusho incident. General public exposure in the United States to PCB's has been sporadic. In developing temporary tolerances based on the data from the Yusho incident, a time period of 1,000 days of exposure to PCB's was used. As previously stated, this was not an analysis based on lifetime exposure. Rather, it was postulated that PCB levels in food would steadily decrease over the 1,000-day time period used in the calculation. The sporadic exposures in the United States were generally thought to result mainly from contaminated animal feed and, as measures were adopted to prevent future contamination, the PCB level in food was expected to be reduced. In calculating a total allowable exposure from the average overt dose in the Yusho incident, a safety factor of 1 to 10 was used and a total allowable exposure of 200 milligrams was calculated. Because of the sporadic nature of PCB exposure in the United States, the total exposure (200 milligrams) was spread out over the 1,000-day time period (over 10 times as long as Yusho exposure) providing a tolerable daily exposure of no more than 200 micrograms per day. Transforming this figure to body weight per day for a 70-kilogram adult produced a figure of 3 μg/kg body weight per day.

As indicated previously, FDA established the temporary tolerances for PCB's in 1973 with the clear intent that they should be lowered as experience indicated the appropriateness of such changes. The Chairman of the HEW Committee to Coordinate Toxicology and Related Programs established a Subcommittee on the Health Effects of PCB's and Polybrominated Biphenyls (PBB's), whose purpose was to assess new data developed since 1973 on the toxicology, human exposure to PCB's and cources of residues of PCB's, and to formulate recommendations about future research needs. This subcommittee, composed of scientists from several governmental agencies concerned with PCB's, reviewed all the currently available scientific literature and has released its final report. A copy of the report is on file in the office of the Hearing Clerk.

This information, as well as information obtained since the subcommittee report was published, has been evaluated by FDA. Three problem areas with PCB's are of major concern to FDA, namely, new toxicity data on PCB's, studies that indicate PCB's are carcinogenic, and the presence of PCB's in the environment resulting in widespread occurrence of residues in freshwater fish.

It is known that the toxicity of chlorinated biphenyls depends upon the degree of chlorination and the isomeric form. The low chlorinated biphenyls tend to have a higher acute toxicity compared to the higher chlorinated biphenyls, whose different pattern of toxicity is associated in part with a longer biological half-life and less susceptibility to metabolic alteration or degradation by the liver and other organs (Reference 2). Studies have shown that PCB's containing six or fewer halogen atoms are readily absorbed from the intestine. They are not excreted to an appreciable extent before being metabolized to more polar compounds, and long-term storage in the skin and adipose tissue occurs. However, tissues from animals and man containing PCB's from environmental exposure have residues resembling PCB mixtures with more than 50 percent chlorination, suggesting that PCB's with five or fewer chlorine atoms (less than 50 percent chlorination) are more readily metabolized than the PCB's with higher chlorination (Reference 3).

Evaluation of the toxicity of specific PCB's is further complicated by the finding that commercial preparations of PCB's contain, as impurities, some quantity of chlorinated dibenzofurans (Reference 4). Certain isomers of the chlorinated dibenzofurans are appreciably more toxic than a similar amount of chlorinated biphenyls (Reference 5). More recent information from the Yusho episode has brought new factors into consideration with the finding that the rice oil contained approximately 1,000 ppm PCB, chlorinated dibenzofurans at approximately 5 ppm, and unknown organic chlorinated substances, which so far are unidentified, at approximately 1,000 ppm (Reference 6). It is not known whether the chlorinated dibenzofuran contaminant or the unidentified source of organic chlorine is a crucial toxic substance producing the symptoms observed in the Yusho incident, whether exposure to the 1,000 ppm PCB produced the observed effects, or whether an interaction occurred.

Different animal species vary in their susceptibility to the toxic effects of PCB's. However, evaluation of this susceptibility is complicated by a general lack of information on the detailed composition of the PCB mixtures used in the studies and the relationship between the composition of a PCB mixture and the toxicity of that mixture. PCB's have been shown to cause effects on reproduction, hepatic porphyria (Reference 7) and other biochemical changes in the liver (Reference 8) and gastric mucosa (Reference 9) as well as liver tumors (Reference 10). In primates, the skin and the Meibamian glands are affected, in addition to the liver and gastric mucosa (Reference 11). In the rabbit, atrophy of the thymus has been reported (Reference 12). The levels causing these effects depend on the species and the compound tested. In rats, a dietary level of 20 ppm Aroclor 1254 depressed reproduction while a level of 500 ppm Aroclor 1260 was needed to reduce reproduction in the same strain of rats (Reference 13). Dietary levels of 5 ppm Aroclor 1254 have a marked effect on reproduction in the mink (Reference 14), and limited studies have shown that 2.5 ppm Aroclor 1248 affects reproduction in nonhuman primates (Reference 15).

Numerous biochemical systems are reported to be affected by PCB's. Hepatic porphyria has not been reported in the monkey, mink or human, but Aroclor 1254 or Aroclor 1242 and Aroclor 1016 have produced it in the rat (Reference 7). The female rat is more sensitive than the male and Aroclor 1016 is less active than either Aroclor 1254 or 1242 (Reference 7). Other biochemical changes reported in the liver include lipid accumulation induction of microsomal enzymes, including the hydroxylase and demethylase enzymes as well as an increase in cytochrome PL-448 (Reference 16). Mitochondrial function is inhibited when rats are fed extremely high levels of PCB (1,000 ppm) but not at 100 ppm (Reference 17).

Histological and ultrastructural changes in the liver reflect the observed biochemical changes, and include hepatomegaly with a concomitant increase in smooth endoplasmic reticulum, atypical mitochondria and the formation of "fingerprints" in the hepatic cytoplasm. These changes are more pronounced at higher dose levels, and with Arcolor 1254 and 1260. The effects are less pronounced with Aroclor 1242 or 1016 (Reference 18).

Some of the new toxicity data relate to the carcinogenic effect of PCB's in mice and rats. In one strain of mice,

neoplastic nodules (hepatomas, hyperplastic nodules) developed after dietary exposure to Aroclor 1254 (Reference 19). Female Sherman strain rats fed 100 ppm Aroclor 1260 for 21 months developed hepatocellular carcinomas as well as neoplastic nodules (hyperplastic nodules) of the liver (Reference 8).

However, several problems remain to be resolved before the risk of carcinogenesis following exposure to environmental PCB's can be fully evaluated. For example, the commercial PCB's fed to the animals in the carcinogenicity studies were found to contain low levels of toxic impurities, including chlorinated dibenzofurans. It has not been established what the role of the dibenzofurans is in the development of the carcinogenic lesions. In addition, the relatively high levels of commercial PCB's required to produce the carcinogenic response suggest the probability that liver damage may be required before the onset of carcinogenesis.

Recent experiments with monkeys indicate that adult monkeys suffered illness and female monkeys had reproductive disfunction when exposed to PCB's (Aroclor 1248) in amounts comparable to those experienced by patients in the Yusho poisoning incident (References 11, 20, 41, and 42). Infant monkeys suffered illness when nursing from their mothers whose milk contained PCB residues at a range of approximately 7 to 16 ppm on a fat basis (References 15 and 42). Surviving weaned infants recovered from the overt toxic effects (References 41 and 42), but behavioral abnormalities were noted (Reference 21).

Recent preliminary survey data indicate the presence of PCB residues in human breast milk at levels averaging 1.8 ppm (fat basis) (Reference 22). This may present as yet undefined risks to the nursing infant. It is known that residues of other halogenated hydrocarbons occur in breast milk and are thus ingested by nursing infants (Reference 23). Although such exposure is obviously not desirable, the immediate problem is to attempt to define more precisely the potential risks to infant health.

The relevance of the observations in the monkey studies to human infants nursing on mothers' milk containing PCB residues (average values to 3.5 ppm fat basis (Reference 24)) due to maternal exposure to PCB's largely from environmental sources is not known. In the monkey study these residues in the milk of the maternal monkeys resulted from their exposure to a commercial preparation of Aroclor 1248. This contains approximately 40 percent tetrachlorinated biphenyls, an appreciable amount of trichlorinated biphenyls (Reference 25), and unknown quantities of at least five different chlorinated dibenzofurans (Reference 26). Additionally, the maternal monkeys were toxic and hence toxicity effects in the offspring monkeys may not be purely due to the relatively low levels of PCB's received through monkey milk. It is not known if this overt toxicity, as well as the toxic effect of contaminants of Aroclor 1248 present in commercial samples, and not shown to be present in environmental samples, had additional adverse effects on the monkey fetus in utero or upon the nursing infant monkey.

Additional investigations are needed to evaluate the potential adverse effects on human infants nursing from mothers whose breast milk contains PCB residues. Because of the long biological half-life of PCB's in the mammalian body, it is desirable to limit the exposures of females to PCB residues in food to the extent reasonably possible in order to reduce the likelihood that PCB residues might occur both in body fat and in breast milk. The Commissioner is concerned about transfer of PCB residues to the fetus through the placenta or to the infant through breast milk. Fetal and infant exposure to PCB's should clearly be minimized until possible adverse effects are more clearly defined.

After assessing recent toxicological data, the Commissioner concludes that it is desirable to reduce human exposure to PCB's even further. While the data do not support establishment of a new allowable daily intake of PCB's, especially in light of the studies regarding carcinogenicity, the Commissioner concludes that the predicted level of exposure discussed below is tolerable.

Human Exposure To PCB's

Contamination of foods with PCB's results primarily from four broad sources: (1) Environmental contamination—in fish from contaminated lakes and streams; (2) industrial accidents—isolated incidents involving direct leakage and spillage of, or contact with, PCB fluids and other PCB-containing materials on animal feeds, feed ingredients, or food; (3) agricultural contamination—PCB migration to feed from silo coatings, causing subsequent contamination of milk; and (4) food packaging materials—migration to foods packaged in PCB-contaminated paper products. There were a number of other positive findings in foods which could not be traced to one of these broad sources before 1972; the sources of such occasional findings remain speculative. However, in recent years, essentially all positive findings of PCB's in the food supply have been attributable to one or more of these four sources.

The findings of the FDA Total Diet Study for fiscal years 1971 through 1975 show that PCB levels in all food classes of the total diet have declined to no detectable PCB occurrence in the composites and no calculable daily intake of PCB's, except in the meat-fish-poultry composites. About 40 percent of these meat-fish-poultry composites analyzed in fiscal year 1975 continued to contain detectable PCB's, although only traces have been detected in the most recent years (Reference 1).

It is important to stress that review of PCB levels in the diet must be an ongoing process. In analyzing the health implications of PCB residues in the diet, one must exercise caution because review of partial data for a given year or even complete data on a year-by-year basis may led to false conclusions concerning trends. For example, fiscal year 1976 findings show that milk and eggs infrequently contain PCB residues, i.e., less than 1 percent frequency rate. However, animal feed components contained detectable PCB residue (about 8 percent frequency rate) at a rate higher than in fiscal years 1974 and 1975, but lower than the approximate 13 percent rate for fiscal year 1973. Most of the feed component samples found positive in fiscal year 1976 were of animal and it is expected that such year-to-year variations will be encountered. This increased incidence did not cause an increase in dietary intake of PCB's. In fact, the rate of meat-fish-poultry composites found positive for PCB's in the first half of the fiscal year 1976 Total Diet Study dropped to a low of 5 percent and the first half of the 1976 meat and poultry sampling by the U.S. Department of Agriculture (USDA) showed a reduction to a low occurrence rate of 0.2 percent (Reference 27).

Since 1973, PCB's have not been found in the other total diet composite categories, notably not in dairy product composites and the composites of grain and cereal products. Based on the total diet study, there remains a continued low level occurrence (above 40 percent positive in fiscal year 1975 but only at trace levels) in the meat-fish-poultry composites. The fact that levels in these composites have declined to only traces further supports the inference that the meat and poultry and eggs rarely contain detectable PCB's and that the low level findings are primarily due to the fish in those composites. This would imply that the PCB levels in an "average" total diet may have decreased as much as they will until such time as there is a change in the levels for fish (Reference 1).

Evidence indicates that residue levels higher than those reported in foods other than fish in the studies discussed above would generally be due to avoidable sources of contamination such as isolated accidental spills or the use of PCB coating in dairy farm silos with the resultant contamination of the silage and milk. The Commissioner concludes that in light of these findings of reduced levels of PCB's in foods, it is appropriate to lower the tolerances for unavoidable residues of PCB's.

Section 406 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346) requires that the Commissioner consider the ways in which individuals may be affected by PCB's, other than through consumption of food.

Although human exposure to PCB's from air and water appears to be minimal, there is little question that such exposure does occur. Samples of ambient air collected in Florida, Mississippi, and Colorado show that PCB's were present at all locations. The average concentration at each of the three locations was approximately 100 nanograms

V42163 APR 1 77 UMI

per cubic meter of air. Studies of surface water from the major drainage basins of the United States report the widespread occurrence of PCB's in both surface water and bottom sediments. Main residue levels of PCB's in the surface water ranged from 0.01 to 0.05 micrograms per liter (μg/l), with a maximum residue level of 20.0 μg/l (Reference 28).

In Wisconsin, effluents from cooling water in aluminum foundries contained PCB's ranging from 11.5 to 335 parts per billion (ppb). Effluents from paper mills ranged from 0.01 to 25 ppb. Analysis of snow melt water from Wisconsin cities showed PCB residue levels of 0.17 to 0.24 ppb, suggesting that fallout of PCB's from the air may be an important source of PCB's entering the waters of the State (Reference 29).

In Michigan, testing of 900 samples of industrial effluents showed 22 percent had PCB residues greater than 0.5 μg/1, 8 percent greater than 1.0 μg/1, 6 percent greater than 10 μg/1 and 2 percent greater than 100μg/1. With sludge disposal taking place by incineration, landfill and crop or pasture application, the continuation of PCB's in the environment seems obvious (Reference 30).

At this time there is no evidence of deleterious effects resulting from inhalation of PCB's from the air; contamination of water results primarily in the intake of dietary PCB's from fish as discussed below in this preamble. However, surveillance of the food supply of the United States for PCB residues is maintained through ongoing FDA sampling programs. Should PCB contamination prove to be wider than is now thought, these surveillance programs will be helpful in the detection, evaluation, and resolution of any potential problem.

Reports of adverse human health effects resulting from PCB exposure have come from studies of occupational exposure as well as from human exposure through ingestion of contaminated rice oil in Japan. Some of the earliest reports of adverse health effects due to occupational exposure to PCB's in the United States were published in 1936 and described skin lesions and symptoms of systemic poisoning among workers who were reported to have inhaled chlorodiphenyls (Reference 31). Over the ensuing years numerous reports have described cutaneous eruptions as well as systemic manifestations among marine electricians, machinists, capacitor and transformer manufacturing workers, and others occupationally exposed to PCB's.

Researchers have reported dermatological ailments that include "brown chromodermatosis" of the dorsal joints of the hands and purple-like eruptions of the face and neck (References 32 and 33). However, one study, a health survey of workers in carbonless copy paper factories, 2 years after the use of PCB in such processes had ceased, showed neither dermal effects nor abnormalities of liver function, urine or blood tests. Blood levels of PCB's were reported as 0.01 to 0.02 ppm (Reference 34).

While the harmful effects of occupational exposure to PCB's may be significant in individual situations, they do not have an impact on the exposure that FDA regulates through tolerances for PCB's in foods.

Petition To Reduce Tolerances

On November 21, 1975, the Environmental Defense Fund (EDF) and the Natural Resources Defense Council (NRDC) jointly submitted a petition (Docket No. 75P–0346) seeking establishment of a zero tolerance for PCB residues in food, to be achieved by means of a phased reduction to zero of appropriately set temporary tolerances. The petition summarizes the recent studies and new data regarding the occurrence and the toxicology of PCB's and, on the basis of these data, the petitioners draw certain inferences and conclusions regarding the risk to human health presented by PCB's. The Commissioner's comments on the petitioners' conclusions are as follows:

1. The petitioners contend that it should be the express intention of the Commissioner, mandated by his responsibilities under the Federal Food, Drug, and Cosmetic Act, to establish zero tolerances for PCB residues in food. They state that this goal should be achieved by means of phased reduction of temporary tolerances which minimize the risk to the public health and which are "based on a level of risk which has been assessed using appropriate statistical models to account for the potential carcinogenic risk posed by any given residue level." The petitioners recommend use of the Mantel-Bryan or a comparable formula to establish risk probabilities for a carcinogen.

The Commissioner agrees that it is important to reduce human exposure to PCB's and that it is appropriate to reduce the tolerances for PCB's to the lowest practicable level; this has been the policy of FDA from the outset. However, he does not agree that "zero tolerances" are necessary or appropriate at this time. The phrase "zero tolerance" has been applied to the "no detectable residue" requirements of the exception to the Delaney anticancer clause in the act applicable to drugs and feed additives used in food producing animals (section 512(d)(1)(H) (21 U.S.C. 360b (d)(1)(H))). The absolute prohibition of the Delaney clause against the approval of food additives that cause cancer in man or laboratory animals does not apply to an environmental contaminant, such as PCB's, that is unavoidably present in food.

Section 406 of the act, under which the PCB tolerances are established, applies to substances whose presence in food cannot be avoided by good manufacturing practice. A tolerance that would totally prohibit such a substance in the food, when that substance cannot be avoided, would be inappropriate in the absence of a grave danger to health, for it would make all foods containing the substance unlawful per se. When an environmental contaminant is already present in food, FDA's responsibility is to decide what level(s) of the contaminant should cause removal of food from interstate commerce. If a nodetectable-residue requirement were automatically applied to environmental contaminants already present in the food supply, enforcement activities could significantly disrupt the food supply. Removing food containing any detectable residue from the marketplace could lead to enforcement action against food commodities not deemed to present any significant risk to public health.

The Commissioner advises that, while the statistical evaluation formulas for establishing risk probabilities, like the Mantel-Bryan procedure, are valid and useful in some situations, they are not an appropriate tool for determining a regulatory approach for unavoidable contaminants like PCB's.

2. The petitioners make direct comparisons between the 1968 human PCB poisoning episode in Japan and the results of some studies on the effects of low level exposure of nonhuman primates to PCB's. The implication in the petition appears to be that humans might suffer overt symptoms of PCB poisoning at the same levels (as low as 2.5 ppm in the whole diet) as did the monkeys.

As discussed elsewhere in this preamble, the Japanese patients were exposed not only to PCB's but also to the more highly toxic chlorinated dibenzofurans and to other chlorinated substances, some of which are as yet unidentified. The monkey studies represent tests of a commercial preparation of Aroclor 1248, which contains high percentages of trichlorinated and tetrachlorinated biphenyls, two of the more acutely toxic PCB constituents. Further, the commercial Aroclor 1248 also contained chlorinated dibenzofurans. While the effects seen in these monkeys were similar to the findings in the Japanese patients, such effects have not been noted in humans exposed to environmental PCB's in food in this country. Persons whose consumption of PCB's in their diet is substantial relative to the general population, have not exhibited any adverse health effects (Reference 40).

3. In discussing the validity of the tolerable daily intake published in the order establishing the temporary tolerances, the petitioners state that results from the recent nonhuman primate studies indicate that the rat and dog, on which that tolerable daily intake was partially based, are relatively insensitive to many of the toxic effects of PCB's. The petitioners imply that the tolerable daily intake published in 1973 is not valid in light of newly acquired data.

The Commissioner acknowledges that, compared to the monkey, the rat and dog may be relatively insensitive to PCB's; on the other hand, it is not known whether monkeys are unusually sensitive compared to humans. It is not yet possible to make a direct comparison of effects of PCB's from one kind of test animal to another or to humans. However, when judgments regarding allowable intakes are made, all available data from all species are considered.

4. The petitioners contend that the existing temporary tolerances are insufficient to protect the public health.

The Commissioner advises that the temporary tolerances were consistent with the toxicological data available when they were established. Although he acknowledges that more recent toxicological data indicate that further reduction of PCB intake is desirable, the Commissioner is not aware of any consumers who have suffered deleterious effects by ingesting PCB's. As anticipated, except for fish, PCB residues in foods have only rarely reached or exceeded the tolerance levels. Current data do not indicate that even consumers of fish have actually experienced deleterious effects from contaminated fish. Thus, the Commissioner cannot agree with the petitioners' contention that the temporary tolerances have been insufficient to protect the public health.

Furthermore, PCB residues in food have declined significantly, so that a specific appraisal of human exposure to PCB's in light of recent data would not support the petitioners' contention. The remaining significant PCB residues occur predominantly in freshwater fish, most of which are sport fish or are in intrastate commerce and are therefore not subject to effective FDA control. The Commissioner believes that the temporary tolerances for PCB's in certain foods have provided significant protection to public health; the relevant question now concerns the additional steps indicated to further protect the public.

5. The petitioners stated that "PCB's continue to contaminate our food" and, further, that "The apparent decrease in the levels of PCB's * * * must be viewed with caution."

The Commissioner acknowledges that available data are incomplete, as are contamination data at any particular time. However, there are specific errors in the petition which could have influenced the conclusion that the decrease in PCB levels is only "apparent." The petition reports fiscal year 1973 levels of PCB's, from the FDA Total Diet Survey as "trace—6.0 ppm" in the food composites. The highest finding in a Total Diet Survey food composite for the period was 0.07 ppm. The 6.0 ppm was found in an individual cereal food, not in a composite. The fiscal year 1974 FDA and USDA data reported in the petition are for partial years only. There were approximately 7,000 samples examined by FDA in fiscal year 1974, which resulted in an overall 3.2 percent occurrence rate for PCB's instead of the 5.4 percent reported in the petition. Similarly, USDA examined over 1,000 samples of poultry with only 2 samples positive for PCB's estimated to be approximately 0.2 ppm and 1.25 ppm (fat basis). Additionally, the decline in PCB occurrence in foods, meats and animal feeds is shown to continue when fiscal year 1975 data are included (Reference 1).

In the discussion from which the petitioners conclude that PCB contamination of food is a continuing problem, the cited examples are of contamination incidents that occurred before FDA established the temporary tolerances in 1973. The current reduction in or absence of such problems, except in the case of fish, indicates that FDA regulatory activities and other events have effectively reduced the PCB problem. The remaining significant problem, as previously noted, is with fish, particularly freshwater fish.

The Commissioner concludes that the petition to establish zero tolerances should not be granted to the extent that the petition seeks to have all food containing any detectable level of PCB's removed from commerce. However, the Commissioner does conclude that it is desirable to reduce the tolerances for PCB's at this time as far as is reasonably possible.

Temporary Tolerances

Section 406 of the act states:

> Any poisonous or deleterious substance added to any food, except where such substance is required in the production thereof or cannot be avoided by good manufacturing practice shall be deemed to be unsafe for the purpose of the application of clause (2)(A) of section 402(a); but when such substance is so required or cannot be so avoided, the Secretary shall promulgate regulations limiting the quantity therein or thereon to such extent as he finds necessary for the protection of public health * * *. In determining the quantity of such added substance to be tolerated in or on different articles of food the Secretary shall take into account the extent to which the use of such substance is required or cannot be avoided in the production of each such article, and the other ways in which the consumer may be affected by the same or other poisonous or deleterious substances.

When the Commissioner established the temporary tolerances for PCB's, it was expected that PCB prevalence in the environment would soon decline and that, as a result, the levels of PCB's in foods and feeds would also decline. He stated that the tolerances would be reevaluated and reduced accordingly. As discussed above, except for fish, the levels of PCB's in the foods for which there are tolerances are now lower than they were when the temporary tolerances were established. Also, recent data regarding toxic effects of PCB's give rise to added concern regarding human exposure to PCB's. Therefore, the Commissioner has reviewed each temporary tolerance and proposes to reduce certain of them.

In addition to the factors specifically required by section 406 of the act to be considered in setting tolerances for unavoidable poisonous or deleterious substance in foods, the Commissioner must, as a practical matter, also consider the limits of the analytical methodology available for enforcement of such tolerances.

The current temporary tolerances for finished animal feed, feed components of animal origin, and infant and junior foods are already at the lowest level at which PCB's can be reliably determined in each of these products for enforcement purposes. It is therefore not possible at this time to lower these tolerances.

As little as 1.5 ppm PCB can be reliably determined in the fat of milk and manufactured dairy products (Reference 35), and the Commissioner proposes to lower the temporary tolerances for those foods from the current 2.5 ppm to 1.5 ppm (fat basis).

The Commissioner has considered the current temporary tolerance of 5 ppm on a fat basis for PCB residues in poultry. For the reasons previously stated, he has concluded that it is desirable to also further reduce the temporary tolerance for PCB's in this class of food to the greatest extent possible. Accordingly, the Commissioner considered proposing a tolerance of 1.5 ppm in the fat of poultry, the lowest level at which PCB can be reliably determined in these foods for enforcement purposes (Reference 35). However, under the provisions of section 406 of the act, the Commissioner also considered the extent to which the contaminant is unavoidable.

The current tolerance for PCB's in polutry feed, the primary source of PCB's to which chickens are exposed, is established at 0.2 ppm—the level of detection. Data indicate that continuous feeding of poultry with finished feed contaminated with PCB, results in PCB residues in the dissectible poultry fat at approximately 10 times the levels in the feed (References 36 and 37). The biomagnification factor of 10 is only approximate and varies from flock to flock. While it is unlikely that any flock would be consistently consuming feed containing PCB's at the tolerance of 0.2 ppm and allowing for othre sources by which poultry may be exposed to PCB's, such as water and the environment, a tolerance level for poultry established at the level of detection (1.5 ppm on a fat basis) could be exceeded. The Commissioner found this tolerance unacceptable because it would be inconsistent to set tolerances on two products at levels such that the use of one product that complies with the applicable tolerance causes the second product to be illegal, unless other overriding considerations justify such a situation. Because the biomagnification factor of 10 is only approximate, and may vary from one lot of feed to another, from one flock to another, or from one bird to another, the Commissioner determined that a tolerance of 3 ppm (fat basis) is the lowest level that will make allowances for PCB residues resulting from feed contaminated at levels not exceeding the current feed tolerance. Accordingly, he considered whether this level would provide an acceptable margin of safety to the consumer.

Because the frequency of PCB residue occurrence in feeds is low, the likelihood of residues in poultry reaching the 3 ppm (fat basis) level is very small. Moreover, data regarding PCB residues in poultry confirm this and show that PCB contamination of poultry is very sporadic and infrequent. As such, this food is not a significant source of dietary PCB's. A tolerance of 3 ppm (fat basis) will continue to provide this assurance, while also providing adequate protection for the consumer. Therefore, the Commissioner proposes to reduce the temporary tolerance for poultry from 5 ppm to 3

V42163 APR 1 77 UMI

ppm (fat basis). As stated previously, the finished feed tolerance of 0.2 ppm cannot be reduced at this time because the analytical methodology necessary to enforce a lower tolerance is not available. The Commissioner advises that when such methodology becomes available so that the 0.2 ppm feed tolerance can be reduced, the tolerance for PCB residues in poultry will also be reevaluated.

The proposed reduction in the temporary tolerance for PCB's in eggs is from 0.5 ppm to 0.3 ppm, the practical analytical limit for reliable determination of PCB's in eggs. Although eggs would be expected to contain PCB residues if the chickens were consistently fed contaminated feed, the residues in eggs resulting from 0.2 ppm PCB in the feed are not expected to exceed a 0.3 ppm tolerance. As with poultry, eggs are not expected to contribute measurably to dietary PCB's, because the occurence of PCB's in feed is sporadic rather than consistent.

The temporary tolerance for PCB's in paper food-packaging material is currently stayed pending completion of an evidentiary hearing. When the hearing is completed or the issues resolved, the Commissioner will issue in the FEDERAL REGISTER a notice regarding the resolution and removal of the stay of the tolerance. At that time he will also propose to reduce the tolerance for PCB residues in paper food-packaging material in accordance with the reduction in the PCB levels which has occurred since 1973.

PCB's in Fish

Although unavoidable PCB residues no longer occur regularly in the previously mentioned classes of foods, PCB contamination of the aquatic environment is sufficiently widespread that fish, mainly freshwater fish, in various locations of the United States contain significant amounts of the contaminant.

This conclusion is based on an extensive review of data FDA has compiled (Reference 39) from various sources including its own surveillance of fishery products taken from commercial markets and the testing programs conducted by the National Marine Fisheries Service by the U.S. Fish and Wildlife Service (PCB residue data from this source are not fully relevant because analyses were performed on whole fish, whereas the temporary tolerance is expressed in terms of the edible portion of fish), by the Michigan Department of Agriculture relative to Great Lakes fish, and by the New York Department of Environmental Conservation relative to Hudson River fish. These data show that with the exception of a few anadromous species (fish, such as salmon, that move from the ocean upriver to spawn), all ocean fish contain an average of considerably less than 1 ppm PCB. The average PCB levels for most species were less than 0.5 ppm for whole fish and the levels in edible portions (without heads, tails, scales, entrails) were lower still, the majority having an average of a few tenths of 1 ppm. The highest level of PCB's found in any ocean fish sample other than anadromous species was 1.8 ppm. Anadromous species had relatively high PCB levels, the highest in whole fish being 17 ppm (striped bass caught in the New Jersey area). However, the average levels in these species were less than 3 ppm in whole fish and less than 0.5 ppm in edible portions. Bottom-feeding and high-fat-containing fish tend to have higher PCB levels than other varieties (Reference 39).

A large number of freshwater fish, covering numerous species obtained from over 100 locations nationwide, have been analyzed for PBC's. Contamination appears to be geographically widespread, although in many species highest concentrations occur in the Great Lakes and in major rivers in the East and the Mississippi basin. Some Great Lakes' species, mainly coho salmon and lake trout, show PCB levels ranging as high as 30 ppm, while Hudson River species range as high as 178 ppm. Predator fish, such as walleye and bass, exhibit the highest PCB levels. Eels also contain high levels (Reference 39).

Because it is desirable to reduce exposure to PCB's in fish to the greatest extent possible, the Commissioner considered proposing a tolerance of 1 ppm, the lowest level which PCB's can be reliably determined in these foods for enforcement purposes (Reference 35). However, under the provisions of section 406 of the act, the Commissioner is required, in establishing a tolerance, to consider the extent to which the contaminant is unavoidable.

The Commissioner has determined that establishment of a tolerance at 1 ppm for fish sold in interstate commerce would have a substantially adverse impact on this country's commercial freshwater fishing industry and, to a lesser extent, the commercial marketing of saltwater species. He estimates that the loss to fresh and marine fisheries as a result of enforcing this legal limit would be a maximum total landed value of $18 million or $127 million after processing, (cleaning, canning, distributing, retailing etc.) (Reference 39). The Commissioner points out that because most commercial fishing is done by fairly small operators who may specialize in one or two species, the elimination of any species, even though it may account for only a fraction of the total catch, could be disastrous for them.

Accordingly, the Commissioner has examined the economic impact of proposing a tolerance for PCB's in fish at 2 ppm and has considered whether this level would provide an acceptable margin of safety to the consumer. For marine or saltwater fish, lowering the current temporary tolerance to 2 ppm would result in a loss of $1 million landed value, which would increase about seven times after processing. Thus, the total losses at a 2 ppm tolerance would be about $7 million (Reference 39). For freshwater fish the loss at the 2 ppm level would be more severe: about $7 million landed value or $49 million processed value.

The Commissioner notes that the economic loss for marine fish would be about the same at the 3 ppm level, but the dollar loss for freshwater fish would be about 40 percent of that estimated for a 2 ppm tolerance. He further notes that according to the FDA economic assessment, the current temporary tolerance of 5 ppm may be resulting in an $8 million maximum total loss for freshwater fish (Reference 39). The commercial impact of a 2 ppm level would be much less than that of 1ppm, and limits above 2 ppm would further decrease the potential commercial impact even more.

The Commissioner has evaluated the adequacy of a 2 ppm tolerance for fish from the standpoint of the protection of public health, while also assessing whether any higher limits could be safely tolerated. An average per capita consumption level for fish and shellfish in this country is reported to be approximately 19 grams per day. If all fish contained a maximum permitted PCB residue of 2 ppm, average daily intake of PCB's from commercial fish alone would be about 38 micrograms. The FDA Total Diet Study data show that average PCB intake from all sources in an average adult diet is about 8 micrograms per day, most of which is contributed by the fish in the meat-poultry-fish composite. Totaling these two figures (even though this counts both a theoretical maximum fish contribution and an average fish contribution) gives a maximum theoretical daily intake of about 45 micrograms PCB, or an annual intake of about 16.8 milligrams. This low level of intake is less than one-fiftieth of the average cumulative dose (1,000 milligrams) of PCB in rice oil which caused overt toxic effects in the Japanese poisoning episode. However, because of the presence of the previously discussed toxic impurities other than PCB's in the rice oil, it is likely that amounts of pure PCB's greater than those reported in this episode would be required to produce the reported toxic effects.

The amount of PCB's in environmental samples, such as fish, that is required to produce overt toxic effects is not known. A recently completed study has tried to assess some of the consequences of human exposure to PCB's as a result of high consumption of fish from contaminated areas. Data show that a group of Michigan sports fishermen consumed an average of 24 to 25 pounds of fish per person per year, with the highest individual exposure for a 2-year period reported as 180 pounds per year. In cooked fish, PCB residues ranged from 0.36 to 5.38 ppm. Although there was a wide range of PCB levels in blood for each quantity of fish consumed, there was a highly significant correlation between the reported quantity of Lake Michigan fish consumed and the concentration of PCB in the blood of study participants; the higher reported fish consumption was associated with higher PCB blood levels. The blood values ranged from a low of 0.007 ppm in the control group (fish consumption less than 6 pounds per year) to a high of 0.366 ppm in the exposed group (average fish consumption 24 to 25 pounds per year) (Reference 40).

These investigators calculated that the amount of PCB's ingested by the exposed group could average 46.5 milligrams per year and ranged from 14.17 to 114.31 milligrams per year. No systematic adverse health effects could be demonstrated in the exposed group when compared to controls (Reference 40).

The 46 micrograms per day (16.8 milligrams per year) intake, given as an example previously, is based on a hypothetical 2 ppm PCB content in all fish, although this level actually occurs only sporadically. About 97 percent of the commercial fish consumed in this country are ocean fish, most of which contain no detectable PCB's, and average considerably less than 1 ppm PCB. This results in an average PCB intake from fish of substantially less than 19 micrograms per day, providing an additional margin of safety.

Actual PCB intake can be considered to be even lower in light of a study of PCB levels in cooked fish. Most of the PCB occurrence data are for raw fish and comparisons of PCB levels in raw versus cooked fish indicate that actual human exposure to PCB's from fish consumption is less than might be expected from the raw fish data. This is not unexpected, because preparation (trimming away fatty tissue) and cooking have been shown to decrease the concentration of PCB's. For example, the PCB level in cooked lake trout ranged from 1.03 ppm to 4.67 ppm; in cooked coho salmon from 0.48 ppm to 5.38 ppm; and in other cooked fish from 0.36 ppm to 2.06 ppm. These levels are decidedly lower than the mean levels of 22.91 ppm and 10.45 ppm reported in raw lake trout and coho salmon, respectively, for 1974 (Reference 40).

Thus, the Commissioner concludes that a tolerance of 2 ppm will provide adequate protection for all but those population groups that consume above average amounts of freshwater fish from contaminated waters. Moreover, a 2 ppm tolerance would eliminate a relatively minor percentage of marine fish and less than 25 percent of freshwater fish from commercial markets. On the other hand, although a tolerance higher than 2 ppm would be more economically desirable, such a tolerance would, based on the above analysis add to the risk for the so-called average consumer and those population groups who regularly consume freshwater fish. Therefore, in keeping with the agency objective to minimize dietary exposures to PCB's, the Commissioner concludes that a 2 ppm temporary tolerance for PCB residues in fish represents a proper balance of the safety and economic criteria of section 408 of the act.

The Commissioner does not consider it appropriate to change the temporary status of the tolerances for PCB's. The scientific community is actively studying PCB contamination and its effects on humans, and it is reasonable to expect that new data may justify a further downward revision of the tolerances; FDA will monitor these developments so that the Commissioner can take further action when it is appropriate.

The Commissioner has carefully considered the environmental effects of the proposed regulation and, because the proposed action will not significantly affect the quality of the human environment, has concluded that an environmental impact statement is not required. A copy of the environmental impact assessment is on file with the Hearing Clerk, Food and Drug Administration.

38. Letter: Boxboard Research and Development Association to FDA, November 2, 1976.

39. Economic Impact Assessment for Proposed Reduction of Temporary Tolerances for Polychlorinated Biphenyls in Food, FDA document.

40. Humphrey, H. E. B., H. A. Price, and M. L. Budd, "Evaluation of Changes of the Level of Polychlorinated Biphenyls (PCB's) in Human Tissue," Final Report of FDA Contract No. 223–73–2209, 1976.

41. Barsotti, D. A., R. J. Marlar and J. R. Allen, "Reproductive Dysfunction in Rhesus Monkeys Exposed to Low Levels of Polychlorinated Biphenyls (Aroclor 1248)," Food and Cosmetics Toxicology, 14:99–103, 1976.

42. Allen, J. R. and D. A. Barscotti, "The Effects of Transplacental and Mammary Movement of PCB's on Infant Rhesus Monkeys," Toxicology, 6:331–340, 1976.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 402(a), 406, 701(e), 52 Stat. 1046 as amended, 1049, 70 Stat. 919 as amended (21 U.S.C. 342(a), 346, 371(e))) and under authority delegated to him (21 CFR 5.1), the Commissioner proposes that Part 109 (formerly Part 122, prior to recodification published in the FEDERAL REGISTER of March 15, 1977 (42 FR 14302)) be amended by amending § 109.30 to read as follows:

§ 109.30 Temporary tolerances for polychlorinated biphenyls (PCB's).

(a) • • •

(1) 1.5 parts per million in milk (fat basis).

(2) 1.5 parts per million in manufactured dairy products (fat basis).

(3) 3 parts per million in poultry (fat basis).

(4) 0.3 part per million in eggs.

(5) 0.2 part per million in finished animal feed for food-producing animals (except the following finished animal feeds: feed concentrates, feed supplements, and feed premixes).

(6) 2 parts per million in animal feed components of animal origin, including fishmeal and other byproducts of marine origin and in finished animal feed concentrates, supplements, and premixes intended for food-producing animals.

(7) 2 parts per million in fish and shellfish (edible portion). The edible portion of fish excludes head, scales, viscera, and inedible bones.

(8) 0.2 part per million in infant and junior foods.

(9) 10 parts per million in paper food-packaging material intended for or used with human food, finished animal feed and any components intended for animal feeds. The tolerance shall not apply to paper food-packaging material separated from the food therein by a functional barrier which is impermeable to migration of PCB's.

NOTE.—At 38 FR 22794, Aug. 24, 1973, the following appeared concerning § 109.30(a)(9) (formerly 122.10(a)(9)):

"• • • § 109.30(a)(9) is hereby stayed pending full review of the objections and requests for hearing."

In the interim, as stated in the final order (38 FR 18098), the Food and Drug Administration will enforce the temporary tolerance level established by § 109.30(a)(9) by seizing any paper food-packaging material shipped in interstate commerce after September 4, 1973 containing higher than the specified level of PCB's as adulterated in violation of sec. 402 of the act.

Interested persons may, on or before May 31, 1977, submit to the Hearing Clerk, Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20857, written comments (preferably in quadriplicate and identified with the Hearing Clerk docket number found in brackets in the heading of this document) regarding this proposal. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

The Food and Drug Administration has determined that this document does not contain a major proposal requiring preparation of an inflation impact statement under Executive Order 11821 and OMB Circular A–107. A copy of the inflation impact assessment is on file with the Hearing Clerk, Food and Drug Administration.

Dated: March 25, 1977.

JOSEPH P. HILE,
Associate Commissioner for Compliance.

[21 CFR Part 1020]

[Docket No. 77N–0061]

DIAGNOSTIC X-RAY EQUIPMENT PERFORMANCE STANDARD

Intent To Propose Rules

AGENCY: Food and Drug Administration (FDA).

ACTION: Notice of Intent.

SUMMARY: The agency is considering amending the Federal performance standard for diagnostic x-ray systems with regard to the x-ray field limitation and alignment requirements for general-purpose radiographic and fluoroscopic x-ray equipment. The amendments would clarify the requirements of the standard concerning positive beam limitation for radiographic x-ray systems, field limitation and alignment for spot-film devices, and field limitation for fluoroscopic x-ray systems. In addition, the agency is considering permitting the installation of certified beam-limiting devices that do not provide positive beam limitation on uncertified, stationary, general-purpose radiographic systems manufactured prior to the effective date of the standard if with such installation adequate radiation protection can be assured by alternate means. Data, views, and information are requested before proposing the amendments.

DATES: Comments concerning the amendments are requested by April 22, 1977.

ADDRESSES: Individuals or organizations wishing to receive copies of draft amendments or related documents distributed for review during the development of these amendments may have their names placed on the mailing list by writing to: Division of Compliance (HFX–440), Bureau of Radiological Health, Food and Drug Administration, 5600 Fishers Lane, Rockville, Md. 20857.

Comments concerning the proposed amendments should be sent (preferably in quadruplicate) to: Hearing Clerk (HFC–20), Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, Md. 20857.

FOR FURTHER INFORMATION CONTACT:

Thomas B. Shope, Bureau of Radiological Health (HFX–460), Food and Drug Administration, 5600 Fishers Lane, Rockville, Md. 20857, (301–443–3426).

SUPPLEMENTARY INFORMATION: The Food and Drug Administration, under authority conferred by the Public Health Service Act as amended by the Radiation Control for Health and Safety Act of 1968 (Pub. L. 90–602 (42 U.S.C. 263b et seq.)), administers an electronic product radiation control program to protect the public health and safety. This authority provides for the development and administration of radiation safety performance standards for electronic products. A radiation safety performance standard for diagnostic x-ray systems and their major components was established in the FEDERAL REGISTER of August 15, 1972 (37 FR 16461) and became effective on August 1, 1974. (The extension of effective date was published in the FEDERAL REGISTER of June 12, 1973 (38 FR 15444)).

The Commissioner of Food and Drugs is considering amending Subchapter J of Title 21 of the Code of Federal Regulations by changing the performance standard for diagnostic x-ray equipment (21 CFR 1020.30 et seq). This notice of intent to propose rules is being issued to conform with the FDA policy of early public disclosure of rule making activities and to solicit comments from interested persons concerning the subject matter of the proposed amendments.

Since the promulgation of the performance standard for diagnostic x-ray systems, numerous questions have been received from manufacturers and others concerning the manner in which the current requirements of the standard concerning positive beam limitation are to be interpreted. As a result of these inquiries and the interpretations given by the agency in response to them, it may be desirable to amend § 1020.31(e)(2) (21 CFR 1020.31(e)(2)) to define more clearly the performance required of radiographic systems equipped with positive beam-limiting devices.

The Commissioner is also considering amending § 1020.31(e)(2)(ii) to only require that positive beam-limiting devices prevent the x-ray field from exceeding the image receptor size by specified tolerances. The current standard requires that positive beam-limiting devices prevent the x-ray field from being larger or smaller than the dimensions of the image receptor to within specified tolerances. The change in this requirement will permit more flexibility in the use of these systems while still protecting the public from unnecessary radiation exposure by ensuring that the x-ray field size is limited to the image receptor size.

Amendments are also being developed that would clarify the requirements concerning the capability to bypass or override the positive beam limitation feature. Amendments to §§ 1020.31(g) and 1020.32(b) would also permit the provision of an override capability on spot-film and automatic fluoroscopic collimation systems to permit their use as manual collimation systems in case of system failure.

Also under consideration is a change in the applicability of § 1020.31(e)(2) to permit, under certain circumstances, the installation of certified beam-limiting devices meeting the requirements of § 1020.31(d) on uncertified, stationary, general-purpose radiographic systems manufactured prior to the effective date of the standard. Such a change would allow the installation of a less expensive beam-limiting device in lieu of a positive beam limitation system when adequate radiation protection can be assured by alternate means.

Interested persons are invited to participate in the development of the proposed amendments by submitting written data, views, or arguments concerning the subject matter of the amendments or related topics suggested for inclusion in the amendments. Comments concerning the proposed amendments should be sent (preferably in quadruplicate) to the Hearing Clerk, Food and Drug Administration, at the address given above. Comments submitted before April 22, 1977, will be considered by the Commissioner in formulating the proposed amendments and will be reviewed, prior to publication in the FEDERAL REGISTER as notices of proposed rule making, at the next meeting of the Technical Electronic Product Radiation Safety Standards Committee scheduled for May 5 and 6, 1977. The Committee, a permanent statutory advisory committee to the Secretary, Department of Health, Education, and Welfare, must be consulted prior to establishment of standards under the Radiation Control for Health and Safety Act of 1968. Comments received after April 22, 1977, may be considered, depending on the stage of development of the amendments at the time such comments are received.

Information submitted in response to this advance notice will be available for public inspection in the office of the Hearing Clerk during working hours, Monday through Friday.

This notice is issued under the authority of provisions of the Public Health Service Act as amended by the Radiation Control for Health and Safety Act of 1968 (sec. 358, 82 Stat. 1177–1179 (42 U.S.C. 263f)) and under authority delegated to the Commissioner (21 CFR 5.1).

Dated: March 29, 1977.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Compliance.

[FR Doc.77–9872 Filed 3–31–77;8:45 am]

[21 CFR Part 1040]

[Docket No. 77N–0074]

LASER PRODUCTS

Intent To Amend Performance Standard

AGENCY: Food and Drug Administration (FDA).

ACTION: Notice of Intent.

SUMMARY: The Commissioner of Food and Drugs is considering amending the laser products performance standard to make the definition of "human access" less restrictive, to specify a solid angle for measuring the radiant power or radiant energy and measuring scanned laser radiation, and to specify a minimum distance for the radiance measurement. Additionally, there may be a need to provide for some products amendments that take into account the probability of viewing the laser radiation or the physical limitations of the eye in following a rapidly moving laser source. A change may also be proposed to allow manufacturers to use alternate wording in some of the warning labels.

DATE: Comments and data by April 22, 1977.

ADDRESSES: Written comments to the office of the Hearing Clerk (HFC–20), Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, Md. 20857. For copies of draft amendments distributed for review, Division of Compliance, HFX–440, Bureau of Radiological Health, Food and Drug Administration, 5600 Fishers Lane, Rockville, Md. 20857.

FOR FURTHER INFORMATION CONTACT:

Walter C. Baugh, Jr., Bureau of Radiological Health (HFX–460), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857, (301–443–3426).

SUPPLEMENTARY INFORMATION: The Food and Drug Administration published the performance standard for laser products in Part 1040 (21 CFR Part 1040) as a final rule in the FEDERAL REGISTER of July 31, 1975 (40 FR 32252). As discussed in the preamble to the final rule, FDA had received comments contending that biological evidence existed to support a lower chronic exposure hazard potential for Helium-Neon laser products, and the Commissioner concluded that the data submitted were insufficient to indicate a need for changing the Class I limits for that wavelength. However, as part of the continuous evaluation of new research data and its significance for the current provisions of the standard, FDA held a public meeting on June 13, 1976 (The meeting was announced in the FEDERAL REGISTER of June 1, 1976 (41 FR 22117).) This meeting provided an opportunity for knowledgeable experts to present and discuss available information on the biological effects and hazard potential of laser emissions. The analysis of the reports presented in the meeting indicated that the data on ultraviolet radiation damage and on pulsed laser radiation supported the existing hazard classification. The retinal lesion data presented confirmed the complexity of the wavelength dependence, but did not provide sufficient information for evaluation of hazard levels to the eye. The data purporting to relate a safety threshold to the value at which 50 percent of exposures produce damage is not acceptable from the viewpoint of protecting the public health. The Commissioner considers the visual function, rather than the retinal lesion alone, the critical end point for the hazard evaluation of the eye. The Commissioner believes that any modification of the hazard classification of the eye must be based on visual function data. He also believes that the experiments on radiation damage must be designed to determine the lowest value at which damage occurs, not the value at which 50 percent of exposures produce damage. Therefore, no changes in the existing levels for classification in the standard appear warranted at this time.

However, the experience of FDA in the administration of the laser standard since it became effective on August 2, 1976 indicates that some provisions of the standard may need to be amended. The modifications under consideration would further clarify the standard without affecting the hazard classification scheme and would reduce, in most cases, the burden on affected manufacturers without compromising the public health. More details concerning the rationale for the proposed amendments are discussed below.

In the original definition of "human access" in § 1040.10(b)(12), reference to a 10-centimeter (cm) line was included to account for the possible insertion into a laser product of flexible optical fibers. The likelihood that such fiber optics would reach points not accessible by a 100-cm straight line may not be sufficiently great to warrant the added design difficulty posed by this requirement; the Commissioner is considering whether the 10-cm line reference should be deleted or modified.

The Commissioner is considering the need for several compliance test changes in § 1040.10(e). The maximum detection of radiation requirement in § 1040.10(e)(2)(iv) implies that, for a moving source, either the stationary measurement instrument should constantly

V 4263 APR 1 77 UMI

track the source or an equivalent measurement should be obtained. Because the human eye cannot realistically follow a source moving periodically at a high frequency, it may be more reasonable to prescribe measurement criteria that take into account the frequency of source motion.

The 80 millimeter (mm) and 7 mm aperture stops as required by § 1040.10 (e) (3) (i) and (4) for measuring the radiant power (or radiant energy) of stationary and scanned laser radiation, respectively, could be interpreted to demand a 2π acceptance angle for measurement parameters to maximize the detected radiation.

The Commissioner is considering amending this provision because such an interpretation may not be appropriate for multiple and extended sources that cannot be focused through collecting optics to a single point on the retina.

Section 1040.10(e) (3) (iii) requires use of a circular aperture stop having a 7 mm diameter and an effective solid angle of acceptance of 10^{-5} steradian to measure radiance or integrated radiance. Because a source may be small or not have a uniform spatial distribution, the measured radiance could vary depending upon the distance of the detector from the source. In such cases the radiance measurement will not be a well-defined quantity unless a minimum distance for such measurement is specified.

The Commissioner is also considering the need for labeling changes in § 1040.10(g). Currently, § 1040.10(g) (10) permits alternate means of providing required labels, upon approval by the Director of the Bureau of Radiological Health. However, it does not provide similar flexibility in the wording of the warning statement required on such labels. The specified warning may preclude a more appropriate description of the radiation hazard for certain laser products. Thus, an amendment is being considered that would provide a means for the manufacturer to use alternate wording.

An amendment may also be proposed to relax certain requirements for some laser products whose emissions are not likely to be continuously viewed, provided the need for such action can be clearly established. For example, the labeling or other safety requirements for Class II laser products might be determined on the basis of integration times shorter than those established for classification.

Interested persons are invited to participate in these efforts to improve the laser product performance standard by submitting their written data, views, or arguments concerning such amendments and any associated potential environmental and economic impact.

Particular information would be appreciated concerning the following:

1. The advantages and/or disadvantages of incorporating a solid angle of acceptance for measuring the radiant power (or radiant energy) of stationary and scanned laser radiation, and the appropriate value of such an angle, with supporting documentation or arguments;

2. Any minimum distance for radiance measurement that would uniquely define the measured quantity and also provide adequate protection for the public health and safety;

3. The appropriate means to identify the hazards of a moving source in terms of its periodic frequency; and

4. The practicality, implications, and possible impact of providing alternate means for the wording of the warning labels.

Written comments or data should be sent (preferably in quadrupliate) to the office of the Hearing Clerk, Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, Md. 20857, and should be identified by referring to the docket number appearing in the heading of this document. Comments submitted before April 22, 1977, will be reviewed at the next meeting of the Technical Electronic Product Radiation Safety Standards Committee (TEPRSSC), scheduled for May 5–6, 1977. This committee, a statutory advisory committee to the Secretary of Health, Education, and Welfare, must be consulted prior to the establishment of standards under the Radiation Control for Health and Safety Act of 1968. All comments received will be considered to the fullest possible extent in formulating the proposed amendment(s). Information submitted in response to this notice will be available for public inspection in the office of the Hearing Clerk.

This notice is issued under the authority of the Public Health Service Act as amended by the Radiation Control for Health and Safety Act of 1968 (sec. 358, 82 Stat. 1177–1179 (42 U.S.C. 263f)) and the authority delegated to the Commissioner (21 CFR 5.1).

Dated: March 29, 1977.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Compliance.

[FR Doc. 77-9873 Filed 3-31-77;8:45 am]

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 52]

[FRL 685-4]

DISTRICT OF COLUMBIA

Proposed Revision to State Implementation Plan

On December 6, 1973 (38 FR 33702), the Administrator of the Environmental Protection Agency promulgated a transportation control plan for the District of Columbia portion of the National Capital Interstate Air Quality Control Region. This plan, which to the maximum extent practicable reflected the control strategies preferred by the District of Columbia, included measures such as mass transit controls, emission inspection programs and additional stationary source controls.

On March 22, 1974, the District of Columbia submitted to the EPA Regional Administrator amendments to the District's Air Quality Control Regulations. The District requested that the amendments be reviewed and processed as revisions to its State Implementation Plan. The revisions would replace or change portions of the federally promulgated Transportation Control Plan for the District of Columbia. The submission consisted of regulations governing storage of petroleum products (Section 8–2:707(a)), control of volatile organic compounds from loading gasoline tank trucks, trailers, and railroad cars (Section 8–2:707(b)), control of vapors from gasoline transfer (Section 8–2:707(c)), control of evaporative losses from filling of vehicular tanks (Section 8–2:707(d)) control of dry cleaning solvent evaporation (Section 8–2:707(e)), control of organic solvents (Section 8–2:707(f)), and definitions of terms used in these regulations (Section 8–2:702).

On August 29, 1974 (39 FR 31532) the Regional Administrator acknowledged receipt of these amendments and proposed certain ones as revisions to the District of Columbia's SIP. However, because the District's regulation for the control of organic solvents, Section 8–2:707(f), raised questions about the feasibility of enforcing the required emission limitation when applied to architectural coatings, the Administrator did not propose the amendment dealing with control of organic solvents, Section 8–2:707(f), as a revision to the District of Columbia's Implementation Plan. Since then, the District has submitted further documentation which explains that the regulation does not apply to architectural coatings, thereby alleviating the Administrator's earlier concerns regarding the District's organic solvent regulation.

The amendment consists of the following requirements: (1) No person shall discharge into the atmosphere more than 15 pounds of photochemically reactive solvents in any one day, nor more than 3 pounds in any one hour, from any article, machine, equipment or other contrivance, unless the uncontrolled organic emissions are reduced by at least 85 percent.

(2) No person shall discharge into the atmosphere more than 40 pounds of nonphotochemically reactive solvents in any one day, nor more than 8 pounds in any one hour, from any article, machine, equipment or other contrivance, unless the uncontrolled organic emissions are reduced by at least 85 percent. Dry cleaning operations are exempt from the requirements of this paragraph.

On May 13, 1974, the District provided certification to the Regional Administrator that after publishing adequate public notice, a hearing on the proposed amendment was held on September 24, 1973, as required by 40 CFR 41.4.

This notice is to announce receipt of this amendment by the Regional Administrator, to propose the amendment as a revision to the District of Columbia's SIP and to provide for a 30 day public comment period. All comments received on or before May 2, 1977 will be considered.

Because the Agency is revising its list of photochemically reactive and non-

reactive hydrocarbon compounds, conflict may result between the District's existing definitions and the Agency's final list. Also, because the regulation pertains to the District of Columbia, it necessarily impacts on the National Capitol Interstate AQCR which includes portions of Maryland and Virginia. This raises a question of enforcement feasibility within one AQCR and may have multi-regional implications. EPA specifically requests comments on these two points.

The Administrator's decision to approve or disapprove this proposed plan revision will be based on whether the amendment meets the requirements of section 110(a)(2) of the Clean Air Act and 40 CFR Part 51, Requirements for Preparation, Adoption and Submittal of Implementation Plans.

Copies of the proposed revision, including related supplemental information provided by the District are available for public inspection during normal business hours at the following locations:

U.S. Environmental Protection Agency, Region III, Curtis Building, Tenth Floor, Philadelphia, Pennsylvania 19106, Attn: Mr. Harold Frankford.

Department of Environmental Services, Bureau of Air and Water Quality Control, 614 H Street, N.W., Washington, D.C. 20001, Attn: Mr. John Brink.

Public Information Reference Unit, Room 2922—EPA Library, U.S. Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460.

All comments should be addressed to:

Mr. Howard Heim, Chief, Air Programs Branch, Air and Hazardous Materials Division, U.S. Environmental Protection Agency, Region III, Tenth Floor, Curtis Building, Sixth and Walnut Streets, Philadelphia, Pennsylvania 19106, Attn: AH 003aDC.

(Authority: 42 U.S.C. 1857(c)-5.)

Dated March 13, 1977.

A. R. MORRIS,
Acting Regional Administrator.

[FR Doc.77-9685 Filed 3-31-77: 8:45 am]

[40 CFR Part 52]

[FRL 707-1]

APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Proposed Approval of Variances to Emission Limiting Regulations for Louisiana

Section 110 of the Clean Air Act, as amended, and the implementing regulations in 40 CFR Part 51 require each State to submit plans which provide for the attainment and maintenance of National Ambient Air Quality Standards throughout the State. On May 31, 1972 (37 FR 10869), the EPA approved the Louisiana Implementation Plan, including that portion containing compliance schedules. Final dates by which air pollution sources were to be in compliance with the applicable emission limiting regulations of Louisiana's plan were prescribed and met the requirements of § 51.15.

On April 22, 1976, Louisiana submitted to the Regional Administrator individual source compliance schedules as proposed revisions to the approved plan pursuant to § 51.6. These schedules were established by the State as variances to regulations already in effect, and were adopted in conformity with schedules set forth in EPA enforcement orders for each source. Each schedule was adopted by the State after public notice and hearing in accordance with the procedural requirements of §§ 51.14 and 51.6 and the substantive requirements of § 51.15. Those compliance schedules extending over a period of more than one year contain legally enforceable increments of progress, and these increment dates are a part of the schedules described in this proposal.

Each compliance schedule establishes a new date by which the individual source must comply with the applicable emission limiting regulation, referred to as the "Final Compliance Date". (Even though the final compliance date for some of the schedules has now passed, the Regional Administrator proposes their approval as a matter of record.)

The compliance schedules which the Regional Administrator proposes to approve are described in this proposal only by name of source, location, State emission limiting regulation involved and date schedule adopted by State, and final compliance date. Copies of the full schedules and the detailed analysis which indicates that attainment and maintenance of the NAAQS will not be jeopardized are available for inspection at the Air Program Branch, Environmental Protection Agency, Region VI, 1201 Elm Street, Dallas, Texas 75270, and at the Environmental Protection Agency, Public Information Reference Unit, Room 2932, EPA Library, 401 M Street SW., Washington, D.C. 20460.

Interested persons may participate in this rulemaking by submitting written comments to the Air Program Branch, Environmental Protection Agency, Region VI, 1201 Elm Street, Dallas, Texas 75270. All comments will be considered and will be available for inspection during normal business hours at the Region VI office.

This notice of proposed rulemaking is issued under authority of Section 110 of the Clean Air Act, as amended, 42 U.S.C. 1875c–5.

Dated: March 16, 1977.

JOHN C. WHITE,
Regional Administrator.

It is proposed to amend Part 52 of Chapter I, Title 40 of the Code of Federal Regulations as follows:

Subpart T—Louisiana

1. In § 52.970, paragraph (c) is amended by adding a new subparagraph (6), reading as follows:

§ 52.970 Identification of plan.

• • • • • •

(c) • • •

(6) Variances to Emission Limiting Regulations adopted by the Louisiana Air Control Commission on October 29, 1975, December 12, 1975, and April 6, 1976, and submitted by the Governor on April 22, 1976.

2. Section § 52.980 is added as follows:

§ 52.980 Compliance schedules.

(a) The compliance schedules for the sources identified below are approved as revisions to the plan pursuant to §§ 51.6 and 51.15 of this chapter. All regulations cited are air pollution control regulations of the State and have immediately effective dates.

[40 CFR Part 52]

[FRL 707-7]

COMMONWEALTH OF VIRGINIA

Proposed Revision to State Implementation Plan

On May 10, 1976, the Commonwealth of Virginia submitted to the Regional Administrator a variance from § 4.707.00 of the Regulations of the State Air Pollution Control Board. The State requested that the variance be reviewed and processed as a revision of the Virginia State Implementation Plan (SIP) for the attainment and maintenance of air quality standards.

The variance from § 4.707.00 would allow the Alexandria City Incinerator to operate in excess of the present particulate emission standard for incinerators, .14 grains per standard cubic foot of dry flue gas corrected to 12 percent carbon dioxide (without the contribution of auxiliary fuel). This variance would allow operation of the Alexandria City incinerator in excess of this standard from January 1, 1976 to December 31, 1979. The incinerator would not be permitted to operate beyond the latter date.

The Commonwealth of Virginia has justified this request with the following:

(1) The operation of the Alexandria City Incinerator at present emission levels will not preclude the City from attaining and maintaining the national ambient air quality standards for suspended particulates.

(2) There is no evidence that continued operation of the Alexandria City Incinerator for the period of the variance would endanger the health of the residents of the City of Alexandria or environs.

(3) The expenditures to install new control equipment to bring the incinerator into compliance is not justified, as the incinerator is to be phased out by 1980. The City of Alexandria has proposed to replace the incineration process with a refuse derived fuel (RDF) program. Under the RDF program, trash will be burned in adjacent power plants in combination with regular fuel.

(4) The installation of new control equipment to bring the incinerator into compliance is not justified as the improvement in air quality from the use of additional control equipment would be negligible.

On December 5, 1975 Virginia submitted an analysis of the incinerator's impact on air quality. Particulate emissions from the incinerator and from other significant point sources in the area were modeled using Gaussian dispersion techniques. The relative impacts of these sources were estimated at each of the monitoring sites in the area. Also included were information on air quality trends at each of these sites, and results from stack tests performed on the incinerator.

The Commonwealth of Virginia submitted proof that a public hearing, with adequate public notice, was held on June 5, 1975, to consider public comment on the proposed revision, pursuant to 40 CFR Part 51, Requirements for Preparation, Adoption and Submittal of State Implementation Plans.

On September 3, 1976 (41 FR 37343) the Regional Administrator acknowledged receipt of the variance request, proposed it as a revision to the Virginia SIP, and provided for a 30 day public comment period ending October 4, 1976. During this public comment period, no comments were received.

The variance order, issued by the Commonwealth of Virginia on December 2, 1975, specified the conditions under which the variance was to be granted, including a requirement that the City of Alexandria submit a "plan of action" until the incinerator was to be phased out. This plan, in the form of a proposed compliance schedule, was submitted to Virginia by the City of Alexandria on September 25, 1975. Virginia extended the variance until December 31, 1979. The conditions under which this order was issued required that (1) the incinerator be operated at specified times, (2) the compliance schedule submitted on September 25, 1975 be followed and, (3) a reporting mechanism be included to indicate progress on the compliance schedule.

The compliance schedule submitted on September 25, 1975 has since been modified by a Consent Decree (dated April 6, 1976) agreed to by Friends of the Earth and the City of Alexandria, and adopted by the United States District Court for the Eastern District of Virginia. The modifications specify additional compliance activities in the form of purchase of goods and services which will encourage recycling activities. This compliance schedule, originally stated in a September 25, 1975 letter, and since modified by the Consent Decree, is to be incorporated as a condition to the approval of the variance by the Administrator. The schedule requires the following expenditures for the incinerator, which is to be phased out by December 31, 1979. The items to be purchased for the 1977 fiscal year are one refuse compactor ($80,000), two tractors and two trailers ($110,000), and two recycling containers and shelters ($10,000), and a promotional campaign for a recycling program ($5,000). For the 1978 fiscal year expenditures are to include the following: two additional tractors and trailers ($110,000), and additional promotion for a recycling program ($5,000). For the final year of the compliance program, 1979, the items to be purchased include: two more tractors and trailers ($110,000) and further promotion of a recycling program ($5,000).

The Administrator's approval of the variance would be further conditioned by the below-listed additional commitments by the City of Alexandria to the Environmental Protection Agency. These additional commitments were submitted to EPA from the City Manager of Alexandria in latters dated March 2, 1976 and April 19, 1976. As specifically stated in each of these letters, these commitments are added as conditions of the variance. They are:

(1) The waste materials burned will not exceed 300 tons/day. This is the throughput level at which May 1975 emission testing was done, and provides a baseline to determine if emissions or throughput are being maintained within the May 1975 levels.

(2) The City will examine ways of reducing incinerator throughput. The City has already agreed to add two recycling centers and to encourage their use with a promotional campaign.

(3) The incinerator will be maintained in good working condition until it is closed.

(4) Brush, cardboard and overwet materials which might exacerbate emissions will be removed from trash to be burned at the incinerator and hauled to the I-95 landfill at Lorton, Virginia. This selected burning process will be continued until closure of the incinerator.

(5) The City will regularly submit quarterly reports to EPA and the State of Virginia containing information related to progress under the compliance schedule. EPA will be notified if the compliance schedule, which leads to the development of the refuse derived fuel (RDF) program, is not being met.

(6) The City guarantees that closure of the incinerator will not be delayed because of an inability to implement an RDF program.

In order to ensure an expeditious phase-out of the Alexandria Incinerator's operations, the Regional Administrator hereby proposes that the compliance schedule submitted by the City of Alexandria to the Commonwealth of Virginia, as well as the additional conditions agreed to by Friends of the Earth, the City of Alexandria and EPA be incorporated into § 52.2435 (Compliance Schedules). This notice is to provide for public comment on this proposed rulemaking. All comments received on or before May 2, 1977.

All comments should be addressed to:

Howard Heim, Chief, Air Programs Branch (3AH10) Air & Hazardous Materials Division, U.S. Environmental Protection Agency, Region III, Curtis Building, Tenth Floor, Sixth & Walnut Sts., Philadelphia, Pa. 19106, ATTN: AH007aVA.

Copies of these amendments, and the analysis on which they are based, are available for public inspection during normal business hours at the following locations:

U.S. Environmental Protection Agency, Region III, Curtis Building, Tenth Floor, Sixth and Walnut Streets, Philadelphia, Pa. 19106, ATTN: Harold Frankford.

Virginia State Air Pollution Control Board, Room 1106, Ninth Street Office Building, Richmond, Va. 23219, ATTN: John M. Daniel, Jr.

Freedom of Information Center, Room 2922—EPA Library, U.S. Environmental Protection Agency, 401 M Street S.W., Washington D.C. 20460.

(Authority: 42 U.S.C. 1857c-5.)

Dated: March 23, 1977.

CHRISTOPHER K. SEGLEM,
Acting Regional Administrator.

Part 52 of Title 40, Code of Federal Regulations is proposed to be amended as follows:

Subpart VV—Virginia

1. In §52.2435, paragraph (h) is added as follows:

§ 52.2435 Compliance schedules.

* * * * * * *

(h) With respect to the Eisenhower Avenue Municipal Incinerator, Alexandria, Virginia:

(1) The City of Alexandria (hereafter referred to as "City") is required to purchase the following refuse collection equipment or implement the following projects by the dates specified in order to gradually reduce incinerator throughput:

(i) July 1, 1977—Purchase of one refuse compactor, two tractors and two trailers, and the implementation of a promotional campaign for a recycling program.

(ii) July 1, 1978—Purchase of two additional tractors, two additional trailers, and the implementation of additional promotion for a recycling program.

(iii) July 1, 1979—Purchase of two additional tractors, two additional trailers and the implementation of additional promotion for a recycling program.

(iv) December 31, 1979—Closure of the incinerator.

(2) Waste Materials will not exceed a throughput level of 300 tons per day.

(3) The incinerator will be maintained in good working condition until it is closed.

(4) Brush, cardboard and overwet materials which might exacerbate emissions will be removed from trash to be burned at the incinerator and hauled to the I-95 landfill at Lorton. This selected burning process will be continued until closure of the incinerator.

(5) The City will regularly submit quarterly reports to EPA and the Commonwealth of Virginia continuing information related to progress under the compliance schedule. EPA will be notified if the compliance schedule, which leads to the development of the refuse derived fuel (RDF) program, is not being met.

(6) The City guarantees that closure of the incinerator will not be delayed because of an inability to implement an RDF program.

PESTICIDE PROGRAMS

Tolerances and Exemptions From Tolerances for Pesticide Chemicals In or On Raw Agricultural Commodities

PROPOSED TOLERANCES FOR PESTICIDE CHEMICAL OXYTETRACYCLINE

AGENCY: Office of Pesticide Programs, Environmental Protection Agency (EPA).

ACTION: Proposed Rule.

SUMMARY: This notice proposes an amendment to 40 CFR 180.337 to correct an error made in a pervious rulemaking document.

DATES: Comments must be received by May 2, 1977.

ADDRESS COMMENTS TO: Federal Register Section, Technical Services Division, Office of Pesticide Programs (WH-569), EPA, Rm. 401, East Tower, 401 M St. SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: Eugene Wilson, Product Manager (PM) 21, Registration Division (WH-567), Office of Pesticide Programs, EPA (202-426-2454).

SUPPLEMENTARY INFORMATION: On February 2, 1976, the Environmental Protection Agency (EPA) proposed (41 FR 4832) that 40 CFR 180.337 be amended to (1) include a tolerance of 0.1 part per million (ppm) for residues of the pesticide oxytetracycline hydrochloride in or on the raw agricultural commodity pears resulting from a spray application, (2) to change the identification "fungicide" to "antimicrobial agent" in keeping with the pesticide's characteristics, and (3) to revise the section to read as follows.

§ 180.337 Oxyteracycline hydrochloride; tolerances for residue.

Tolerances are established for residues of the antimicrobial agent oxytetracycline hydrochloride in or on the following raw agricultural commodities:

0.35 part per million in or on pears resulting from infusion of pear trees with an aqueous solution of the pesticide after harvest and prior to formation of new blooms.

0.1 part per million in or on pears resulting from a spray application.

On March 30, 1976, the EPA published a notice of final rulemaking (41 FR 13360). The preamble to the notice of final rulemaking noted that the Agency had registered this pesticide for the infusion of pear trees with application occurring after harvest and before blooms. A tolerance of 0.35 ppm was in effect for residues resulting in or on pears from this use. The preamble went on to say that enforcement of two different tolerance levels for the same raw agricultural commodity was not practical, since the higher tolerance level of 0.35 ppm would be considered the maximum residue. Pesticide use is regulated through the registration of pesticide products under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended, the regulations thereunder (40 CFR 162), and subsequently by label or labeling for such registered products. Therefore, in the March 30 notice of final rulemaking, 40 CFR 180.337 was amended by deleting the reference to the method of application (i.e., "infusion of pear trees with an aqueous solution to the pesticide after harvest and prior to formation of new blooms") which appears on the labels of the registered product(s) and by keeping the established tolerance for residues of 0.35 ppm in or on pears. The regulation now reads:

§ 180.337 Oxytetracycline hydrochloride; tolerances for residues.

A tolerance of 0.35 part per million is established for residues of the antimicrobial agent oxytetracycline hydrochloride in or on the raw agriculture commodity pears.

The notice of proposed rulemaking and the subsequent final rulemaking document were published as a result of a petition (PP 5E1611) filed with the EPA by the California Department of Food and Agriculture, 1220 N. St., Sacramento CA 95814. In a letter dated October 29, 1976, Mr. John C. Hillis, Chief, Agricultural Chemicals and Feed, California Department of Food and Agriculture, stated that an error had been made in the final rulemaking document published March 30, 1976, which established a tolerance of 0.35 ppm for residues of oxytetracycline hydrochloride in or on pears and dropped reference to the method of application. The pesticide petition 5E1611 requested a tolerance of 0.1 ppm for residues of oxytetracycline (base) in or on pears resulting from the application of oxytetracycline calcium complex for the control of blight. Mr. Hillis requested in his letter that the section title of the regulation be changed from "oxytetracycline hydrochloride" to "oxytetracycline", since in either case the activity was measured in terms of oxytetracycline (base).

The EPA established the tolerance at the highest level supported by data since it was the concensus at the time that two different tolerances could not be established for a single raw agricultural commodity. However, two different residue levels are enforceable since the patterns of use result in residues of oxytetracycline hydrochloride and residues of oxytetracycline calcium complex.

V 4 2 6 3 APR 1 7 7 UMI

This correction is supported by residue and toxicology data submitted in support of pesticide petitions 5E1611, 3E1407, and 4E1460. The technical reason for two tolerance levels is based on the sensitivity of the method of analysis. The State of California is developing data to allow the tolerance level to be set at 0.1 ppm for residues of oxytetracycline in or on pears. Until such data is available to support an amendment to the regulation in this regard, two tolerances—one for oxytetracycline hydrochloride and one for oxytetracycline calcium complex—are appropriate. Such amendment to the regulation will protect the public health.

Any person who has registered or submitted an application for the registration of a pesticide under the Federal Insecticide, Fungicide, and Rodenticide Act which contains any of the ingredients listed herein may request, by **May 2**, 1977, that this proposal be referred to advisory committee in accordance with Section 408(e) of the Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on the proposed regulation. Three copies of the comments should be submitted to facilitate the work of the Agency and others interested in inspecting them. The comments should bear a notation indicating the petition/document control number "PP5E1611/P53". All written comments filed pursuant to this notice will be available for public inspection in the office of the Federal Register Section from 8:30 a.m. to 4 p.m. Monday through Friday.

Dated: March 25, 1977.

EDWIN L. JOHNSON,
Deputy Assistant Administrator for Pesticide Programs.

(Sec. 408(e), Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a(e)).)

Title 40 CFR 180.337 is amended and revised to read as follows.

§ 180.337 Oxytetracycline; tolerances for residues.

A tolerance of 0.35 part per million is established for residues of the antimicrobial agent oxytetracycline hydrochloride in or on the raw agricultural commodity pears resulting from infusion of pear trees with an aqueous solution of the pesticide after harvest and prior to formation of new blooms.

A tolerance of 0.1 part per million is established for residues of the antimicrobial agent oxytetracline calcium complex in or on the raw agricultural commodity pears from spray applications of the pesticide up to 60 days before harvest.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Public Health Service

[42 CFR Part 35]

HOSPITAL AND STATION MANAGEMENT

Contributions for the Benefit of Patients

Section 321 of the Public Health Service Act provides for the control, management, and operation of all institutions, hospitals, and stations of the Public Health Service Further, it provides that, pursuant to regulations, there will be care, treatment, and hospitalization of patients.

Notice is hereby given that the Assistant Secretary for Health, with the approval of the Secretary of Health, Education, and Welfare, proposes to adopt the regulations set forth in tentative form below for the purpose of codifying in regulations by section 321, administrative procedures concerning the acceptance and expenditure of contributions of money or property for the benefit of patients in PHS facilities Until recently the means by which the various installations of the PHS handled such contributions was left to their discretion and procedures were described by various internal administrative issuances. In reviewing a proposed change in such an internal directive at the National Institutes of Health, the HEW Office of the General Counsel pointed out that Section 321 requires that such rules be made "pursuant to regulations." Because the proposed regulations would merely codify long standing practices, it is believed that there are no major issues of public interest involved, no impacts on the environment, nor does this proposed regulation work a burden on any member of the public.

The new regulations policies of the Department, issued July 25, 1976, require that this Notice of Proposed Rulemaking (NPRM) have an implementation plan prepared prior to its issuance. In compliance with these requirements, an implementation plan was forwarded to the Secretary and he has authorized the issuance of this NPRM without the use of a Notice of Intent (NOI) which would otherwise be required by the new policies because, as mentioned above, the proposed regulation is a codification of long-standing PHS hospital practices, is of limited public interest, and it is determined that this NPRM will provide satisfactory opportunity for public input.

Written comments concerning the proposed regulation are invited from interested persons. Inquiries may be addressed, and data, views and arguments relating to the regulation may be presented in writing in duplicate to Mr. Lowell Peart, Building 1, Room 213, 9000 Rockville Pike, Bethesda, Maryland 20014 (301-496-4606). All comments received will be available for public inspection at said office on weekdays (Federal holidays excepted) between the hours of 8:30 a.m. and 5:00 p.m. All relevant material received on or before May 16, 1977 will be considered.

Notice is also given that it is proposed to make any amendments that are adopted effective upon publication in the FEDERAL REGISTER.

The Department of Health, Education, and Welfare has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

Dated: December 27, 1976.

THEODORE COOPER,
Assistant Secretary for Health.

Approved: March 28, 1977.

JOSEPH A. CALIFANO, JR.,
Secretary.

It is therefore proposed to amend Title 42 of the Code of Federal Regulations by adding the following new subpart E.

Subpart E—Contributions for the Benefit of Patients

Sec.
35.51 Applicability.
35.52 Acceptance of contributions.
35.53 Report of and accounting for contributions.
35.54 Donors.
35.55 Acceptable personal property.
35.56 Expenditure of cash contributions.

AUTHORITY: Sec. 215, 58 Stat. 690, as amended, 63 Stat. 835 (42 U.S.C. 216); sec. 321, 58 Stat. 695, as amended, 62 Stat. 1017 (42 U.S.C. 248).

Subpart E—Contributions for the Benefit of Patients

§ 35.51 Applicability.

This subpart sets forth the policies and procedures governing the acceptance and administration of contributions of money or property intended solely for the benefit of all patients in a ward or unit or a particular hospital or station of the Public Health Service, excluding outpatient clinics. Such contributions are distinguishable from (a) monies or other valuables belonging to specific patients which are accepted and held in custody for the convenience of the patient until such time as he or she wishes to withdraw them, and (b) gifts to the United States to support Public Health Service functions under section 501 of the Public Health Service Act or other statutory provisions, which may be accepted administered only in accordance with such statutory provisions or other applicable laws.

§ 35.52 Acceptance of contributions.

(a) The officer in charge or his delegate may accept contributions of money or personal property which are donated for the general benefit of all patients within a ward or unit or hospital or station without further specification or conditions as to use. Contributions tendered subject to conditions by the donor, such as expenditure or use only on behalf of certain patients or for specific purposes, may not be accepted.

(b) Contribution of money or property shall be accepted in writing by the officer in charge.

§ 35.53 Report of and accounting for contributions.

(a) Contributions of money accepted pursuant to § 35.52 of this chapter (hereinafter referred to as "patient fund") will be treated consistently with Federal deposit rules and as supplemented with appropriate procedures of the facility. This regulation is not intended to exclude contributions for the benefit of patients from proper accountability and control of funds and property.

(b) Contributions of property accepted pursuant to § 35.52 of this chapter shall be recorded and accounted for in the same manner as other property of a similar kind maintained in the hospital or station, but with suitable identification so that it can be distinguished from government-owned property.

§ 35.54 Donors.

Authorized contributions may be accepted from patients, employees and other individuals, and agencies and organizations.

§ 35.55 Acceptable personal property.

Contributions of personal property which may be accepted pursuant to § 35.52 of this Chapter include, but are not limited to, recreational equipment, furniture, radios and television sets. After its useful life, any cash proceeds realized upon disposition of such property shall be deposited to the credit of the patient fund and shall be available for expenditure pursuant to paragraph (c) of § 35.56 of this chapter.

§ 35.56 Expenditure of cash contributions.

(a) Officials authorized to accept contributions shall not maintain control over the actual obligation or expenditure of such monies.

(b) Only those officers or employees specifically designated in writing by the office in charge for such purpose may obligate and expend monies from the patient fund. The names of officials so designated shall be provided to the relevant fiscal control office.

(c) Subject to availiability of sufficient funds, monies in the patient fund may be expended for materials, services or activities which contribute to the well-being or morale of patients, including but not limited to provision of reading and entertainment materials, recreation activities, and, in appropriate cases, necessary financial support (including travel expenses, meals, and lodging) of relatives, guardians, or friends of patients to enable such persons to be available for the patient's comfort and support.

(d) Officers in charge may issue such additional instructions, not inconsistent with this subpart, as may be necessary to implement its provisions.

[FR Doc.77-9820 Filed 3-31-77;8:45 am]

[42 CFR Part 101]

CRITERIA FOR ALTERNATE PROFESSIONAL STANDARDS REVIEW ORGANIZATIONS

Advanced Notice of Proposed Rulemaking

Notice is hereby given that the Acting Assistant Secretary for Health, with the approval of the Secretary of Health, Education, and Welfare, is requesting comments from all interested organizations and individuals on major points to be addressed prior to the development of proposed rulemaking on criteria for establishing organizations which may qualify to become Professional Standards Review Organizations (PSROs) under section 1152(b)(1)(B) of the Social Security Act [42 U.S.C. 1320(c)-1(b)] where organizations composed of physicians meeting the requirements of section 1152(b)(1)(A) of the Act are not available.

Under section 1152(c) of the Act [42 U.S.C. 1320c-1(c)], on **January 1, 1978**, the Secretary may commence designating qualified organizations other than the statutorily preferred type of physician organizations designated under section 1152(b)(1)(A) of the Act to serve as PSROs.

Beginning on this date, the Secretary is authorized to designate as PSROs, as provided in section 1152(b)(1)(B) of the Act:

• • • such other public, nonprofit private or other agency or organization, which the Secretary determines, in accordance with criteria prescribed by him in regulations to be of professional competence and otherwise suitable;

In addition, as a result of the legislative amendments passed on December 31, 1975 (Section 108 of Pub. L. 94-182), the Secretary may designate alternate PSROs in those areas where, as of January 1, 1976, a poll under section 1152(f) of the Act had been lost or the largest membership association of doctors of medicine or osteopathy in the area or State officially opposed PSROs prior to December 31, 1975. Regulations establishing the criteria and other requirements are prerequisite to the designation of alternate PSROs, under section 1152(b)(1)(B).

BACKGROUND

By January 1, 1978, there may not be physician organizations designated as **PSROs in all 203 designated PSRO areas.** The Senate Finance Committee Report (No. 92-1230, 92nd Congress, 2nd Session, 1972, p. 259) on the PSRO statute declared that:

• • • only a full implementation effort will provide the impetus needed to establish effective and equitable comprehensive professional review throughout the Nation.

Section 1152(a) of the Act requires that PSROs be established throughout the country "at the earliest practicable date" and section 1152(c) requires that physician organizations established in accordance with section 1152(b)(1)(A) be given first priority to assume the role and to perform the activities required of PSROs. The Senate Finance Committee Report stated that physicians "preferably through organizations sponsored by their local associations should assume responsibility for the professional review activities" (Report No. 92-1230 p. 258). This intention was further reiterated in the Committee Report:

• • • priority in designation as a PSRO would be given to organizations established at local levels representing substantial numbers of practicing physicians who are willing and believed capable of progressively assuming responsibility for overall continuing review • • • [Senate Finance Committee Report No. 92-1230, p. 259]

However, Congress had made it clear that other applicant organizations would be considered for PSRO status if the local preferred physician group failed to express an interest in performing review activities. The Committee Report asserted:

Physician organizations or groupings would be completely free to undertake or decline assumption of these responsibilities of organizing a PSRO. If they decline, the Secretary would be empowered to seek alternative applicants from among other medical organizations, State and local health departments, medical schools, and failing all else, carriers and intermediaries or other health insurers [Senate Finance Committee Report No. 92-1230, pp. 259-260]

The Committee Report once again suggested that other applicants would be selected to perform review when it stated:

• • • the committee would not preclude other arrangements being made by the Secretary where medical organizations are unwilling or unable to assume the required work • • • [Senate Finance Committee Report No. 92-1230, p. 258]

Given the possibility that there may be no qualified physician organizations as specified under section 1152(b)(1)(A) of the Act in each designated PSRO area by January 1, 1978, the Department must determine eligibility criteria which will be used in designating alternate PSROs.

However, in light of the intention of Congress to give priority to qualified physician organizations under section 1152(b)(1)(A), the Department hopes to establish the preferred physician sponsored PSROs in as many as possible of the 83 areas where no planning or conditional PSROs have been established. The solicitation of new planning PSROs from professional associations qualified under section 1152(b)(1)(A) began in October 1976 and should continue through the summer of 1977.

LEGISLATIVE CRITERIA AND GUIDANCE

Section 1152(b)(1)(B) of the Social Security Act and the Senate Finance Committee Report offer some assistance in determining appropriate eligibility criteria for selecting alternate PSROs, as follows:

(1) Each alternate PSRO must be a • • • public, nonprofit private, or other agency or organization • • • [Section 1152(b)(1)(B) of the Social Security Act]

(2) The alternate organization must "be of professional competence" [Section 1152(b)(1)(B) of the Social Security Act]

(3) The Secretary may seek alternative applicants from "among other medical organizations, State and local health departments, medical schools, and failing all else, carriers, intermediaries or other health insurers" [Senate Finance Committee Report No. 92-1230 pp. 259-260]

(4) Each (alternate) organization must submit a formal plan indicating a willingness and capability to perform in an effective, timely, and objective manner and at a reasonable cost, the duties, functions and activities of a Professional Standards Review Organization • • • [Section 1152(b)(2) of the Social Security Act]

PUBLIC HEARINGS

Public hearings on alternate PSROs will be an integral part of the regulation development process. Such hearings will assist the Department in reaching as

V42163 APR 1 77 UMI

many concerned individuals, organizations, and potentially affected areas as possible.

ISSUES

In response to a request made by the National Professional Standards Review Council, the formation and responsibilities of which are mandated in section 1163 of the Social Security Act, the Public Health Service has drafted a preliminary policy paper concerning alternate PSROs. Although this paper suggests possible criteria which could be used to designate alternate PSROs, it should not be interpreted to represent the Department's final position and policies concerning alternate PSROs. Public input may cause substantial revision in the views developed by the Public Health Service thus far. Those parties interested in securing a copy of this paper should contact Michael J. Goran, M.D., Director, Bureau of Quality Assurance, Room 16A-55, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857.

As was previously stated, the PSRO statute and the Senate Finance Committee Report suggest language that could be transformed into criteria for establishing alternate PSROs. The Public Health Service has suggested the following preliminary criteria which could be used to designate alternate PSROs:

I. Each alternate PSRO must not make a profit (i.e., reimbursement for more than the actual cost) from its PSRO activities.

II. No organized medical society or association or organization "controlled" by such organizations can be designated an alternate PSRO.

III. Each alternate PSRO must have or demonstrate the capability to obtain the services of individuals with medical expertise to competently perform review activities.

IV. Each alternate PSRO must have the capability to adequately service the PSRO area.

V. Each alternate PSRO must not have inherent conflicts of interest that affect its role as a reviewer of health care.

These potential criteria should not be interpreted as definitive Department policy but rather as a preliminary attempt to stimulate discussion and interest in this area of concern. The Department invites public comment on these tentative criteria for establishing alternate PSROs. Moreover, the Department desires to solicit additional or alternative potential criteria which could supplement, complement and/or replace those suggested above and which will ensure that organizations designated by the Secretary as alternate PSROs could function effectively in this capacity.

In addition, comments are specifically requested on the following areas of interest:

1. What types of organizations (e.g., profit, nonprofit, State health departments, medical schools, etc.) are most "suitable" to become alternate PSROs?

2. In instances where the Secretary finds no qualified organization within the PSRO area to serve as the alternate PSRO should the Department then consider designating as an alternate PSRO a qualified organization which performs its principal activities outside the area?

3. Should organized medical societies or physician specialty associations have any role with respect to alternate PSROs?

4. What are the indicators of professional competence to perform review and effectively serve as an alternate PSRO?

5. What arrangements for medical competence should an alternate organization make?

6. Should an alternate PSRO be required to demonstrate that it has support from various elements of the health care community and from local consumers?

7. Should there be a relationship between consumers and the alternate PSRO? If so, how could such relationships be effected?

8. Are there any other factors that should be considered in designating alternate PSROs? If so, should they be structured as requirements or optional features?

Interested persons are invited to submit their written comments and suggestions on the issues identified in the Notice or related issues addressed to the Director, Bureau of Quality Assurance, Room 16A-55, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857. Comments and suggestions received on or before May 16, 1977 will be considered in the preparation of proposed regulations and will be available for public inspection at the above address on Monday through Friday of each week from 8:30 a.m. to 5 p.m.

This invitation to submit suggestions and comments is being issued for the purpose of obtaining the broadest participation possible in the drafting of the proposed rule. A Notice of Proposed Rulemaking will be published subsequent to a careful review of public comments and resolution of outstanding issues.

Dated: February 23, 1977.

JAMES F. DICKSON,
Acting Assistant Secretary for Health.

Approved: March 28, 1977.

JOSEPH A. CALIFANO, Jr.,
Secretary.

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 76]

[Docket 21006]

CABLE TELEVISION SERVICES

Monitoring for Signal Leakage From Cable Television Systems; Order Extending Time for Filing Reply Comments

Adopted: March 25, 1977.

Released: March 29, 1977.

AGENCY: Federal Communications Commission.

ACTION: Extension of time.

SUMMARY: Request for extension of time to file reply comments in Docket 21006 granted.

DATE: Reply comments due May 2, 1977.

FOR FURTHER INFORMATION CONTACT:

Robert S. Powers, Research Division, Cable Television Bureau, Federal Communications Commission, Washington, D.C. 20554 (202) 632-9797.

In the matter of amendment of Part 76 of the Commission's rules to add frequency channelling requirements and restrictions and to require monitoring for signal leakage from cable television systems.

1. The National Cable Television Association has requested an extension of time in which to file reply comments in this proceeding from April 1, 1977 until May 2, 1977 and that request is hereby granted.

2. The additional time is said to be necessary because of scheduling problems relating to an upcoming convention, because of the lack of engineering staff due to the recent death of NCTA's Engineering Vice-President, the likelihood of a filing in this proceeding by the Office of Telecommunications Policy, which would require extensive engineering analysis. We believe this constitutes good cause for the time extension requested.

Accordingly, *it is ordered*, That the date for filing responsive comments in this proceeding is extended to May 2, 1977.

This action is taken by the Chief, Cable Television Bureau pursuant to authority delegated by § 0.288 of the Commission's rules.

FEDERAL COMMUNICATIONS COMMISSION,
JAMES R. HOBSON,
Chief, Cable Television Bureau.

[Order 77-3-157; Docket 29790]

DALLAS/FORT WORTH-WESTERN MEXICO ROUTE PROCEEDING

Order Denying Petitions for Reconsideration and Consolidating Additional Applications

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 29th day of March, 1977.

This proceeding was instituted by Order 76-9-80 of September 15, 1976, to determine the need for authorization of United States flag service between the terminal points Dallas/Fort Worth and the coterminal points Guadalajara, Puerto Vallarta, Mazatlan, La Paz, and San Jose del Cabo in Mexico.[1] Timely filed petitions for reconsideration by American Airlines, Inc., Braniff Airways, Inc., and Eastern Air Lines, Inc., are pending disposition by the Board. Applications for route authority within the scope of the investigation have been filed by American Airlines (Docket 22487), Frontier Airlines (Docket 29886), and Texas International Airlines, Inc. (TXIA) (Docket 29888) accompanied by appropriate motions for consolidation. American has also filed an application (Docket 29884) which includes Manzanillo and Zihuatanejo as points in Mexico and a motion to consolidate in the event its request to expand the proceeding is granted.

The American petition for reconsideration requests that Manzanillo and Zihuatanejo be added as additional points in Western Mexico. It is opposed by the Bureau of Operating Rights. Braniff requests that the Board reconsider instituting the investigation at this time and defer it until bilateral negotiations beween the nited tSates and Mexico have been concluded. Answers opposing deferral have been filed by American, TXIA, United Air Lines and the Bureau. tween the United States and Mexico have Eastern asks that the scope of the proceeding be expanded to include Atlanta and New Orleans along with Dallas/Fort Worth as United States coterminal cities. It is supported by Atlanta and the Atlanta Chamber of Commerce. Answers in opposition have been filed by TXIA and the Bureau, and Eastern has filed a petition for leave to file an otherwise unauthorized document, viz. a proposed answer in response to the Bureau's opposition.

The substance of the Braniff petition has already been considered and disposed of in Docket 29789 (Order 76-12-119, December 21, 1976), the counterpart investigation (Yucatan) which was also instituted by Order 76-9-80. It will be denied for the same reasons which dictated denial as to the Yucatan proceeding in Order 76-12-119.

The Eastern petition to enlarge the scope of the proceeding notes that an Atlanta/New Orleans route to the five points in Mexico is provided for in the Air Transport Agreement between the United States and Mexico as Route P along with Route S, the Dallas/Fort Worth Route. It argues that Order 76-9-80 does not set forth the reason why Route P was not included as well as Route S. In its answer in opposition the Bureau recites that the greater part of the traffic historically moving along Route S has been through the Texas gateways of Dallas, Houston and San Antonio. It argues that "Since an award of Route S authority would involve first competitive U.S. carrier service, any incumbent should have enough immediate traffic support for viable operations. Traffic levels on Route P are smaller and any award of Route P authority would clearly result in the undue fragmentation of U.S.-Western Mexico traffic."

The unauthorized document which Eastern seeks to file is a reply to the Bureau's opposition and it is directed particularly to the Bureau's recital that the "greater part of the traffic historically" moving to the western Mexico points has been through the Texas gateways. It contends that the Bureau thus indicates "for the first time a superficial rationale for excluding Route P from the Western Mexico case." Because of the injection of this issue we will grant Eastern's motion for leave to file the otherwise unauthorized reply. However, we will reaffirm our decision to exclude consideration of Route P as part of the investigation. The possibility of its inclusion was in fact considered by the Board prior to entering Order 76-9-80. As noted in the order, Eastern advanced a request to include Route P in three separate documents which were before the Board for consideration in reaching the decision to consider only Route S at this time.[2] Further, consideration of the Route P authority in this proceeding would surely serve to delay consideration of awards for authority between the Texas gateways and Western Mexico. A prehearing conference has been held herein and direct exhibits are due to be filed later this month. Broadening the scope of the cast at this time to include Atlanta and New Orleans would be bound to attract new applications for service and further requests for consolidation, would require another prehearing conference, and would lead to a rather extensive postponement of all procedural dates. Under all of the circumstances, grant of Eastern's petition for reconsideration is not warranted and it will be denied.

[1] Order 76-9-80 also instituted a separate investigation (Docket 29789) to determine the need for authorization of United States flag service between Houston and New Orleans on the one hand, and Merida, Cozumel and Punta Cancun, on the other.

[2] Eastern's answers in support of motions by Braniff, American and Ozark for immediate hearing of applications filed by these carriers.

V4263 APR 1 77 UMI

The American petition to expand relies on the proposition that the two additional Mexico cities will most likely be included in a forthcoming bilateral agreement, and the argument that consideration of service at these additional Mexico points will be expedited if they are considered herein and that a second hearing as to them could be thereby avoided. As we stated in Order 76–12–119, "• • • rather than speculating about the addition of new routes in a forthcoming bilateral agreement • • • we think it preferable to proceed within the framework of the routes covered by the current agreement." Accordingly, the American petition for reconsideration will be denied.

The applications of American in Docket 22487, Frontier in Docket 29886 and TXIA in Docket 29888 seek route authority within the scope of the investigation and the respective motions for their consolidation herein will be granted.

Accordingly, it is ordered That: 1. The petitions for reconsideration of Order 76–9–80 filed by American Airlines, Inc., Braniff Airways, Inc. and Eastern Air Lines, Inc. be and they are hereby denied.

2. The petition of Eastern Air Lines, Inc. for permission to file an otherwise unauthorized document be and it is hereby granted.

3. The applications of American Airlines, Inc. (Docket 22487), Frontier Airlines, Inc. (Docket 29886) and Texas International Airlines, Inc. (Docket 29888) be and they are hereby consolidated into Docket 29790.

4. The petition of American Airlines, Inc., for consolidation of its application in Docket 29884 be and it is hereby denied and the application in Docket 29884 is dismissed, without prejudice.

5. This order shall be served on the same parties named in paragraph 17 of Order 76–9–80 and in addition on the St. Louis Airport Authority–City of St. Louis (St. Louis) and the Greater Cincinnati Chamber of Commerce, City of Cincinnati, and the Kenton County Airport (Cincinnati Parties).

This order shall be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board:

PHYLLIS T. KAYLOR,
Secretary.

[Order 77-3-154; Doc. 29632]

FRONTIER AIRLINES, INC.

Order Setting Application for Hearing

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 28th day of March 1977.

On August 11, 1976, Frontier filed an application pursuant to Subpart M of Part 302 of the Board's Procedural Regulations requesting an amendment of its certificate of public convenience and necessity for Route 73 to permit nonstop service between Albuquerque, New Mexico, and Phoenix, Arizona.[1] Frontier's Route 73 consists of a single segment. Condition 5 of the applicant's certificate provides that the carrier must make at least one intermediate stop on flights between Albuquerque and Phoenix.

A joint answer in support of the application has been filed by the New Mexico Aviation Department and the State Corporation Commission of New Mexico. An answer in support of the application has been filed by the City of Phoenix, Arizona. An answer opposing the application has been filed by TWA. Frontier filed a contingent reply to the answer of TWA.[2]

[1] Pursuant to section 1305(c) of the Board's Rules of Practice, Trans World Airlines and Delta Air Lines filed requests that the application be dismissed. Delta's objection that the question of Albuquerque-Phoenix nonstop authority should be included in an expanded Las Vegas-Dallas/Fort Worth Nonstop Service Investigation, Docket 29445, has been rendered inapplicable by our decision to deny all petitions for reconsideration of instituting Order 76–6–161, in Order 76–10–61, October 15, 1976. In its request to dismiss the application, TWA requests a hearing with the right to participate in the event that we should decide to process Frontier's application under Subpart M.

In any event, since we did not act to summarily dismiss the application within the 14-day period set forth in § 302.1305(a), the provisions for further procedures of Subpart M became applicable automatically.

[2] Because the answers of the City of Phoenix and TWA were untimely filed, both answers were filed with motions for leave to file otherwise unauthorized documents. An answer in opposition to TWA's motion for leave to file was filed by Frontier, with a contingent reply to TWA's answer. TWA filed a reply to Frontier's answer opposing TWA's motion for leave to file a late answer, with a motion for leave to file an unauthorized reply. Lastly, Frontier filed a letter in the docket of this proceeding, protesting that TWA, in its submission of two motions for leave to file otherwise unauthorized documents in this proceeding, seeks only to delay the Board's ultimate disposition of the instant application.

We shall grant all outstanding motions for leave to file otherwise unauthorized documents. Both the City of Phoenix and TWA have submitted answers containing information important to the development of a thorough and meaningful record in this proceeding. Moreover, all interested persons were put on notice, by TWA's contingent request for a hearing contained in its timely filed request for dismissal of the application, of TWA's intention to submit evidence in opposition to Frontier's application.

Upon consideration of the pleadings and all the relevant facts, the Board has determined that Frontier's application should be set for hearing under the procedures prescribed by Subpart M. We note that, by Notice of Environmental Rejection, contemporaneously issued with this order, the Chief of Legal Division, Bureau of Operating Rights, having reviewed the environmental evaluation provided with Frontier's application and having been duly designated by the Director, Bureau of Operating Rights, pursuant to § 312.8 of the Board's Procedural Regulations, has found, pursuant to § 312.13 of the Board's Procedural Regulations, that the proceeding instituted herein is not one which could lead to a "major Federal action significantly affecting the quality of the environment" within the meaning of section 102(2)(C) of the National Environmental Policy Act of 1969 (NEPA). However, that conclusion is not intended to foreclose any party from presenting evidence (subject to the usual evidentiary rules in force in C.A.B. proceedings) or from making arguments with respect to relevant environmental issues. Nor are we foreclosed from consideration of environmental facts resulting from the possible licensing actions in issue in this proceeding, which, although of a lesser magnitude than those required to trigger further procedures under the requirements of NEPA and Part 312 of the Board's rules, might nonetheless be relevant to our decision.

Accordingly, it is ordered, That: 1. The application of Frontier Airlines, Docket 29632, be and it hereby is set for hearing, on a subsidy ineligible basis, before an administrative law judge of the Board at a time and place hereinafter designated, as the orderly administration of the Board's docket permits; and

2. The motions for leave to file unauthorized documents filed by the City of Phoenix and Trans World Airlines, Inc. be and they hereby are granted.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc.77-9806 Filed 3-31-77;8:45 am]

[Doc. 29632]

FRONTIER AIRLINES, INC.

Environmental Rejection

On August 11, 1976, Frontier Airlines, Inc. submitted an environmental evaluation, pursuant to § 312.12(a)(1) of the Board's Procedural Regulations, in connection with its application for nonstop authority between Albuquerque, New Mexico, and Phoenix, Arizona, filed pursuant to Subpart M of the Board's Rules of Practice in Docket 29632.

Frontier's calculations are based upon the assumption that it would operate four daily nonstop flights between Albuquerque and Phoenix in addition to altering its existing service patterns in other markets to take advantage of this new nonstop authority. Such changes would result in two additional nonstop flights in the Albuquerque-Denver market and four additional flights in the Phoenix-Tucson market. Frontier's service in the Albuquerque-Tucson market would be decreased by two daily nonstop flights.[1]

Pursuant to §§ 312.8 and 312.13 of the Board's Procedural Regulations, the undersigned—having reviewed the environmental evaluation and other available information with respect to the application described above and having been duly designated by the Director, Bureau of Operating Rights, pursuant to § 312.8—hereby finds that any subsequent Board action approving, denying, or otherwise acting upon such application would not constitute a "major Federal action significantly affecting the quality of the environment" within the meaning of section 102(2)(C) of the National Environmental Policy Act of 1969.

Dated at Washington, D.C., March 28, 1977.

BARBARA A. CLARK,
Chief, Legal Division,
Bureau of Operating Rights.

[FR Doc.77-9803 Filed 3-31-77;8:45 am]

[Order 77-3-161; Doc. 29961]

KODIAK WESTERN ALASKA AIRLINES, INC.

Order Denying Suspension of Service at Ugashik, Alaska

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 29th day of March, 1977.

On October 22, 1976, Kodiak-Western Alaska Airlines, Inc. (KWA), filed an application pursuant to Part 205 of the Board's Economic Regulations for authority to temporarily suspend service at Ugashik, Alaska, for a period of not less than two years.[1]

In support of its application, KWA alleges that: (1) The lack of maintenance equipment and landing aids, a dirt airstrip with no gravel or other surfacing, and frequent inclement weather often combine to create conditions at Ugashik that are not conducive to the provision of adequate scheduled service; (2) the traffic and mail volumes are extremely light; (3) Pilot Point, Alaska, which is only 10 miles away, receives scheduled service; (4) if the request for suspension is approved, KWA would continue to provide charter service as needed; and (5) the "critical factor," according to KWA, is the 1973 decision of the Postal Service to relocate the Post Office to a site approximately one mile from the airstrip. KWA contends that there is no available means of transportation from the airstrip to the Post Office and, since its personnel are required by Postal Regulations to deliver the mail directly to the Post Office, this relocation has made it nearly impossible to serve Ugashik.[2]

Answers in opposition to KWA's application have been filed with the U.S. Postal Service and one Ugashik Village Council. These answers were accompanied by motions for leave to file untimely documents.[3] Both parties request the suspenion application be denied and allege that: (1) Pilot Point, although 10 miles away, can be reached only by air during most of the year; (2) the physical conditions of Ugashik Airport have not changed since KWA filed for its certificate of public convenience and necessity; (3) the canning business located in Ugashik would be forced to cease operations if mail service is discontinued; (4) approval of the application wolud leave Ugashik without any means of communication; (5) there is a vehicle in the village with which to transport the mail from airstrip to Post Office; (6) KWA's proposed charter service would not solve the problem of mail delivery; (7) an attempt to provide substitute air taxi service would involve comparative high cost; and finally (8) the new site of the Post Office is only 50–60 yards further from the airstrip than was the previous location.[4]

Upon consideration of the pleadings and all relevant facts, we have decided to deny KWA's request for suspension of service at Ugashik. The economic stability and general welfare of Ugashik are predicated on the availability of regularly scheduled air service. This is attested to by the vigorous objections to suspension by both the civic and postal authorities. Less than two years ago, the Board determined that scheduled air transportation at Ugashik was required.[5] KWA has not demonstrated that there are any changed circumstances which would require us to reverse this finding.

[1] We note that environmental evaluations concerning the Albuquerque-Denver, Phoenix-Tucson, and Albuquerque-Tucson markets were unnecessary since Frontier already holds unrestricted authority in each of these markets.

[1] Ugashik is a small village in the Bristol Bay area with a permanent population of 14. Seventy-nine passengers were enplaned at Ugashik for the year ending June 30, 1976, and incoming mail averaged one ton per month.

[2] KWA filed a motion for leave to file an otherwise unauthorized document which contained this last allegation. This motion will be granted.

[3] Good cause having been shown, we will grant the motions.

[4] Both the U.S. Post Office and the Ugashik Village Council filed motions for leave to file an otherwise unauthorized document wherein this last point was contained. These motions will be granted.

[5] See Kodiak-Western Alaska Renewal Proceeding, Docket 23604, Order 75–8–72, August 13, 1975.

Accordingly, it is ordered, That: 1. The application of Kodiak-Western Alaska Airlines, Inc., for suspension of service to Ugashik be and it hereby is denied;

2. The motions of the U.S. Postal Service and the Ugashik Village Council for leave to file untimely documents be and they hereby are granted; and

3. The motions of Kodiak-Western Alaska Airlines, Inc., the U.S. Postal Service, and the Ugashik Village Council to file otherwise unauthorized documents be and they hereby are granted.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc.77-9809 Filed 3-31-77;8:45 am]

[Doc. 30554]

PAN AMERICAN WORLD AIRWAYS

Proposed Approval

Application of Pan American World Airways, Inc., for disclaimer of jurisdiction, approval or exemption with respect to operation of the Westchester County Airport, Docket 30554.

Notice is hereby given, pursuant to the statutory requirements of section 408(b) of the Federal Aviation Act of 1958, as amended that the Civil Aeronautics Board intends to issue the attached order. Interested persons are hereby afforded until April 6, 1977, within which to file comments or request a hearing with respect to the action proposed in the order.

Dated at Washington, D.C., March 29, 1977.

PHYLLIS T. KAYLOR,
Secretary.

ORDER OF APPROVAL

Pan American World Airways, Inc. (Pan American) has requested that the Board disclaim jurisdiction over or, in the alternative, approve without hearing pursuant to section 408(b) of the Federal Aviation Act of 1958, as amended (the Act), Pan American's contract to manage the Westchester County Airport (Westchester). If action cannot be taken by March 29, 1977, the date upon which the contract is to take effect, Pan American has requested that the Board temporarily exempt it from the provisions of section 408 of the Act, pursuant to section 416 thereof, to the extent necessary to permit it to manage the airport.

Pan American has entered into an agreement to manage Westchester on behalf of Westchester County, New York (the County), under the supervision and control of County officials. Westchester serves the County and adjacent areas of Fairfield County, Connecticut, for certificated service (Allegheny Airlines), air taxi service, and general aviation service.

Pan American states that another party currently operates the Airport and that its contract with the County will expire shortly; that the County requested proposals by potential replacements of the existing operator; and that Pan American's proposal was chosen from a group of nine which had been submitted.

Under the terms of the agreement, Pan American is required to manage and operate Westchester and keep it available to the

V 42 63 APR 1 77 UMI

public for 24 hours a day, seven days a week, and to do so in a safe and efficient manner; to maintain and repair the physical plant of the airport (runways, grounds, buildings, etc.); to perform certain aviation support functions (e.g., operate the airport's fuel farm and make continuous meteorological observations); and to prepare certain plans, rules, and regulations for the airport, including an emergency contingency plan and an airport security plan.

With regard to contracts between the County and third parties relating to Westchester, Pan American is required to perform said contracts on behalf of the County, to insure compliance by third parties, and to advise the County in the solicitation of bids and negotiations of contracts which are necessary or desirable for the operation of Westchester. Pan American does not have authority to enter into any contracts, and is limited to an advisory capacity.

Pan American is also responsible for certain financial and accounting services, including the preparation of financial statements, billing and collection, and preparation of statistical reports required by County, State, and Federal agencies. It is also responsible for preparation of Westchester's operating and capital budgets, which are subject to County approval. The agreement also establishes personnel requirements which Pan American must meet, and Pan American's personnel selections must be approved by the County.

Under the agreement Pan American will be reimbursed for all of its expenses which are made pursuant to the operating budget approved by the County, plus a fixed fee of approximately $14,600 per month. In addition Pan American will receive an annual incentive fee of 10 percent of the net income, if any, of the airport for the year. Net income is the surplus of revenues, as defined in the agreement, over expenses. The annual incentive fee cannot, however, exceed 150 percent of the incentive fee paid in the previous year.

Finally, the agreement contains a strong prohibition against discrimination by Pan American in the provision of services and in the pricing of such services. It also prohibits Pan American from conducting air carrier operations at the airport except in cases of emergencies.

In support of its request for a disclaimer of jurisdiction, Pan American asserts that the County will, in fact, operate the airport and that Pan American will merely be acting as an agent of the County, carrying out its decisions. Pan American asserts that this situation is in sharp contrast to previous airport operating agreements in which the Board found control to exist within the meaning of section 408 of the Act;[1] that in those cases, Pan American would have assumed substantial entrepreneural risks for long periods of time, and would have assumed effective control of airport operations. Pan American asserts that although Westchester is a person engaged in a phase of aeronautics and Pan American is an air carrier, the county will in fact operate the airport with Pan American's assistance; and that Pan American is therefor neither operating the County's aeronautical properties nor acquiring control of the County's aeronautical operations.

With regard to the request for approval, Pan American asserts that the Board's approval of an agreement between Pan American and the Port Authority of New York and New Jersey for the operation of the Teterboro Airport provides ample precedent for approval of the subject application.[2] Pan American asserts further that the agreement with Westchester does not affect control of an air carrier directly engaged in the operation of aircraft in air transportation and will not create a monopoly or restrain competition. Pan American states that it received the contract through an essentially competitive bidding process; that its size in and of itself will not be a factor since the previous operator was the subsidiary of a much larger concern;[3] that Teterboro and Westchester Airports serve different markets;[4] and that Pan American will be acting as the County's agent.

Pan American believes that it has ample experience in airport operations which will enable Westchester to provide improved services to airport users; that since relief of congestion at New York's major airports continues to be of public concern, improved services at Westchester will benefit the public; and that Pan American, under the terms of its agreement with the County, has committed itself to encourage the investment of private capital at the airport.

An answer in support of Pan American's application was filed by Westchester County. It asserts that, after a careful and lengthy evaluation, Pan American was selected as the contractor most likely to meet the County's goals for its airport management program; that Pan American cannot operate into the airport under the terms of the agreement; and that carriers which compete with Pan American cannot use the airport because of its limited size. The County further asserts that its agreement with Pan American is totally unlike that approved by the Board involving Teterboro; that the County will retain full responsibility for fundamental decisions about the Airport's operations; and that disapproval of the agreement would be detrimental to the County since it would probably have to repeat the entire selection process and its pricing flexibility would be reduced by public disclosure of its agreement with Pan American.

No comments opposing the application or requesting a hearing have been received.

Notice of intent to dispose of this application without a hearing has been published in the FEDERAL REGISTER and a copy of such notice has been furnished by the Board to the Attorney General not later than the day following the date of such publication, both in accordance with the requirements of section 408(b) of the Act.

Upon consideration of the foregoing, we find that Pan American is an air carrier; that Westchester County, by virtue of its ownership of Westchester County Airport, is a person engaged in a phase of aeronautics; and that Pan American's agreement with the County, as described above, may constitute a contract by an air carrier to operate a substantial part of the properties of a person engaged in a phase of aeronautics within the meaning of subsection 408(a)(3) of the Act.[5] However, it is further found that the transaction does not affect control of an air carrier directly engaged in the operation of aircraft in air transportation, does not result in creating a monopoly or restrain competition; and that no person disclosing a substantial interest is currently requesting a hearing. It is also found that the transaction will not be inconsistent with the public interest or leave the requirements of section 408 otherwise unfulfilled; and that it should be approved, subject to condition.[6]

The Board has previously approved the operation of another suburban airport, Teterboro, by Pan American,[7] and many of the conclusions reached in that decision are relevant to the present application. Thus, it is unlikely that there are any conflicts of interest between Pan American's role as a certificated air carrier and its role as an operator of a predominently general aviation airport which would require disapproval. It would, in fact, be to Pan American's benefit to encourage use of Westchester by general aviation to reduce congestion at the major New York airports. Further, Pan American receives an incentive fee based on airport revenues, so that any restrictive practices could prove to be detrimental to the carrier itself. More fundamentally, any restrictive practices which might result from potential conflicts of interest would be forbidden by provisions of other sections of the Act, as well as the Federal Airport Act, and discriminatory practices are clearly forbidden by the terms of the agreement under consideration.[8] Further, Pan American's role at Westchester will be more limited than the arrangement at Teterboro, where the carrier leased the airport. Here, the County will retain substantial control over airport management and policy. Finally, we note that no air carrier, aviation supplier, general aviation user, or other person has objected to the application.

Specifically, the use of Westchester by a certificated carrier, Allegheny, does not appear to create substantial conflicts of interest. Pan American and Allegheny do not currently significantly compete over any routes,[9] and it appears that Pan American would have no incentive to treat Allegheny unfairly.[10] Moreover, since Pan American is precluded from conducting other than emergency air carrier operations at Westchester, protection of its operations will not be an incentive to discriminate against any air carrier.

Nevertheless, to insure that Pan American's operation has limited anticompetitive effects, we will impose a condition similar to one of those imposed in our approval of the Teterboro operation to prohibit Pan American from engaging on its own behalf in the business of providing aviation services except on a casual, infrequent or emergency basis. The condition will not, however, prohibit Pan American from providing these services in connection with aircraft which it owns or sells or operates. We shall also retain jurisdiction in this proceeding for the purpose of amending or revoking our approval herein, should the public interest so require.

As a final matter, under the agreement, Pan American will be reimbursed for all expenses it incurs pursuant to authorized budgets and will receive at least a guaranteed fixed fee in addition. Thus there is almost no risk that Pan American would incur losses from this activity which would impair its ability to perform its certificate obligations.

Accordingly, it is ordered, That: 1. Subject to the condition specified below, the application of Pan American World Airways, Inc. for approval of its agreement with Westchester County, New York, for the operation of Westchester County Airport (Docket No. 30554) be and it hereby is approved;

2. The approval is subject to the following condition: Except in connection with aircraft which it may sell, own, or operate, or on a casual, infrequent, or emergency basis, Pan American on its own behalf, shall not engage in the aviation service business at Westchester County Airport; *Provided, however*, That Pan American may provide such services for a period up to 90 days if necessitated by failure of persons normally engaged in such activities to provide such services. For the purposes of this order, aviation service business involves principally the following activities: (1) The sale to users of aircraft fuel and lubricants; (2) the delivery of fuel into aircraft; (3) aircraft maintenance and repair; (4) the sale and installation of avionics; (5) the provision of hangar storage and outdoor tiedown locations for aircraft (Pan American reserves the right also to provide hangar facilities and public tiedown services); and (6) the performances of turnaround services; and

3. Except to the extent specifically granted herein, all other requests in the application in Docket 30554 be and they hereby are dismissed.

Jurisdiction is hereby retained for the purpose of amending or revoking with or without hearing, the approval granted herein, as the public interest may require.

This order shall be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board:

Secretary.

[1] Pan American World Airways, Inc., Jurisdiction, 47 CAB 1126 (1967).

[2] Pan American World Airways, Inc., Farmingdale and Teterboro Airports, 49 CAB 107 (1968).

[3] The previous operator is owned by Gulf Oil Corp.

[4] Pan American alleges that Teterboro serves the general aviation market for Manhattan and Bergen and Passaic Counties in New Jersey and that Westchester County Airport serves the Westchester County, New York, and Fairfield County, Connecticut, markets.

[5] As to Pan American's request for a disclaimer of jurisdiction, this issue cannot be definitely resolved on the basis of the limited information in the pleadings before us. Since we have concluded to grant Pan American the relief requested in the form of an approval without hearing, however, no further inquiry on the disclaimer request is required.

[6] Since the Board has decided to grant Pan American's request pursuant to section 408 of the Act, its alternative requests will be dismissed.

[7] Pan American World Airways, Inc., Farmingdale and Teterboro Airports, *supra*.

[8] Section 308 of the Act precludes any exclusive right of airport use. Section 11(1) of the Federal Airport Act requires that the airport be available for public use on fair and reasonable terms and without unjust discrimination. Article 8 of the agreement with the County requires that Pan American comply with all applicable Federal, State and local laws and requires that Pan American keep Westchester available to the public on a nondiscriminatory basis, charging fair and reasonable prices for service provided.

[9] Pan American currently operates fill-up aervice between Detroit and Boston on some of its international flights and Allegheny operates one-stop service in the market. Pan American's operations are so limited in extent, however, that this competition would not appear to give rise to significant conflicts.

[10] It is also noted that Pan American and Allegheny have numerous agreements relating to provision of services by one carrier to the other, including a ground services agreement at JFK International Airport, Agreement CAB 24438, approved by Order 74-7-12, July 2, 1974. Any discriminatory action taken by Pan American would be totally inconsistent with the cooperative relationships indicated by these agreements.

[Order 77-3-153; Doc. 29123; Agreement C.A.B. 26505, R-1 through R-3]

TRAFFIC CONFERENCES OF INTERNATIONAL AIR TRANSPORT ASSOCIATION

Proportional Fares

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 28th day of March 1977.

An agreement has been filed with the Board pursuant to section 412(a) of the Federal Aviation Act of 1958 (the Act) and Part 261 of the Board's Economic Regulations between various air carriers, foreign air carriers, and other carriers embodied in the resolutions of the Traffic Conferences of the International Air Transport Association (IATA). The agreement was adopted at a proportional fares meeting held in New York, February 1-8, 1977, and is proposed for effectiveness April 1, 1977.

Agreement C.A.B.	IATA No.	Title	Application
6505:			
R-1	015	North Atlantic proportional fares North American (amending)	1-2
R-2	015a	South Pacific proportional fares North American (amending)	3-1
R-3	015b	North and Central Pacific proportional fares North American (amending)	3-1

Accordingly, *it is ordered* That: 1. Agreement C.A.B. 26505, R-1 through R-3, be and hereby is approved subject to conditions previously imposed by the Board; and

2. Tariffs implementing Agreement C.A.B. 26505 may be filed on not less than one day's notice for effectiveness not earlier than April 1, 1977. The short notice authority in this paragraph expires May 1, 1977.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board:

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc.77-9803 Filed 3-31-77;8:45 am]

COMMITTEE ON CIVIL RIGHTS

CONNECTICUT ADVISORY COMMITTEE

Meeting; Amendment

Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights, that a planning meeting of the Connecticut Advisory Committee (SAC) of the Commission a notice previously published in the FEDERAL REGISTER Friday, March 11, 1977, (FR Doc. 77-7175) on page 13573 is hereby amended. The meeting will be held on April 14, 1977 instead of April 7, 1977. The time and place of the meeting will remain the same.

Dated at Washington, D.C., March 29, 1977.

JOHN I. BINKLEY,
Advisory Committee Management Officer.

[FR Doc.77-9728 Filed 3-31-77;8:45 am]

Insofar as it would apply in direct air transportation as defined by the Act, the agreement would amend North Atlantic, North/Central Pacific, and South Pacific proportional fares used to construct through international fares to/from U.S. interior points. The changes reflect recently approved general increases in U.S. domestic passenger fares as well as certain changes in domestic first-class fares ordered by the Board as part of Phase 9 of the Domestic Passenger Fares Investigation, and will receive Board approval.

Pursuant to the Federal Aviation Act of 1958 and particularly sections 102, 204(a), and 412 thereof, the Board does not find that the following resolutions, incorporated in Agreement C.A.B. 26505, R-1 through R-3, are adverse to the public interest or in violation of the Act, provided that approval is subject to conditions previously imposed by the Board:

IOWA ADVISORY COMMITTEE

Agenda and Notice of Open Meeting

Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights, that a planning meeting of the Iowa Advisory Committee (SAC) of the Commission will convene at 10 a.m. and will end at 3 p.m. on April 21, 1977, at Estes Residence 944 9th Avenue, Des Moines, Iowa.

Persons wishing to attend this open meeting should contact the Committee Chairperson, or the Central States Regional Office of the Commission, Old Federal Office Building, Room 3103, 911 Walnut Strect, Kansas City, Missouri 64106.

The purpose of this meeting is to plan activities for review of the CETA program in the Greater Des Moines area.

This meeting will be conducted pursuant to the provisions of the rules and regulations of the Commission.

Dated at Washington, D.C., March 29, 1977.

JOHN I. BINKLEY,
Advisory Committee Management Officer.

FEDERAL EMPLOYEES HEALTH BENEFITS PROGRAM

Special Open Season

Notice is hereby given that pursuant to the authority contained in section 8913 of title 5, Chapter 89 of the United States Code and section 301(d)(2) of 5 CFR Part 890, the U.S. Civil Service Commission hereby announces that a special open season will be conducted for Federal employees and annuitants, to be held from May 15 to May 31, 1977. This special open season will be limited to Federal employees and annuitants living in the enrollment areas of comprehensive medical plans recently approved for participation in the Federal Employees Helath Benefits Program. These plans and their respective enrollment areas are as follows:

1. PENN GROUP HEALTH PLAN

Service and enrollment area. This plan is available to persons who live in Allegheny County and the western part of Westmoreland County, Pennsylvania.

2. CENTRAL MEDICAL HEALTH SERVICES, INC.

Service and enrollment area. This plan is available to persons who live in Allegheny County and its five contiguous counties, Armstrong, Beavers, Butler, Washington and Westmoreland, Pennsylvania.

3. PHILADELPHIA HEALTH PLAN

Service area. The service area emanates from the center of Philadelphia along a ten mile radius to encompass most of Philadelphia, parts of the Pennsylvania counties of Delaware and Montgomery, and parts of Camden, Burlington and Gloucester counties in New Jersey.

Enrollment area. The enrollment area is Philadelphia, Delaware, Montgomery, Bucks and Chester counties in Pennsylvania; and Camden, Gloucester and Burlington counties in New Jersey.

4. CHOICECARE HEALTH SERVICES, INC.

Service and enrollment area. The Service and Enrollment area of the plan is Larimer County, Colorado.

5. HEALTH SERVICE PLAN OF PENNSYLVANIA

Service and enrollment area. The Service Area of this Plan includes the County of Philadelphia and portions of the four adjacent counties of Southeastern Pennsylvania: Bucks, Montgomery, Chester and Delaware and portions of Gloucester, Camden and Burlington counties in New Jersey.

During the special open season, an eligible enrolled employee or annuitant may change his or her enrollment from the plan in which he or she is already enrolled to the newly approved plan. The election must be for the same type of coverage (self only or self and family) as the present enrollment, unless a change of type is otherwise authorized.

Change of enrollment during the special open season will take effect on the first day of the first pay period which begins after July 1, 1977.

Federal employees and annuitants may obtain further information from their respective payroll offices or by writing to the Comprehensive Health Plans Office, Bureau of Retirement, Insurance and Occupational Health, U.S. Civil Service Commission, Washington, D.C. 20415.

Dated: April 1, 1977.

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant to the Commissioners.

DEPARTMENT OF COMMERCE

National Fire Prevention and Control Administration

ADVISORY COMMITTEE ON FIRE TRAINING AND EDUCATION FOR NATIONAL ACADEMY FOR FIRE PREVENTION AND CONTROL

Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following committee meeting:

NAME: Advisory Committee on Fire Training and Education for the National Academy for Fire Prevention and Control (Committee).

DATE: April 25-26, 1977.

PLACE: Dogwood-B Room of the Ramada Inn, 1900 North Fort Myer Drive, Arlington, Virginia.

TIME: 9:00 a.m. to 5:30 p.m.

PROPOSED AGENDA: April 25, 1977: Review activities of last meeting; Committee and staff reports; Discussion of accreditation procedures. April 26, 1977: Identify accreditation options available; Assignment of subcommittees.

The Committee was authorized to be established by Section 7(k) of the Federal Fire Prevention and Control Act of 1974 (Pub. L. 93-498, 88 Stat. 1535, 15 U.S.C. 2201 et seq., 278f, 42 U.S.C. 290(a)) to inquire into and make recommendations regarding the desirability of establishing a mechanism for accreditation of fire training and education programs and courses, and the role which the Academy should play if such a mechanism is recommended. The Committee, by law, consists of the Superintendent as Chairman and 18 members selected from among individuals and organizations possessing special knowledge and experience in the field of fire training and education or related fields to insure a balanced representation of interests.

The meeting will be open to the public with approximately 15 seats available on a first-come, first-served basis. If time permits, a period will be set aside for oral comments or questions by the public. Oral comments or questions shall be limited to 10 minutes per comment or question. More extensive questions or comments should be submitted in writing before May 27, 1977, and addressed to: Committee Control Officer, Jane Sornberger, Advisory Committee on Fire Training and Education, National Academy for Fire Prevention and Control, P.O. Box 19518, Washington, D.C. 20036.

Minutes of the meeting will be prepared by the Committee and will be available for public viewing in Room 214, National Fire Prevention and Control Administration, 2400 M Street, N.W., Washington, D.C. Copies of the minutes will be available upon request 30 days after the meeting.

The public may file written statements with the Committee concerning any matter pertaining to the Committee's responsibilities at any time before or after the meeting.

Dated: March 15, 1977.

HOWARD D. TIPTON,
Administrator, National Fire Prevention and Control Administration.

Office of the Secretary

NBS VISITING COMMITTEE

Renewal

In accordance with the provisions of the Federal Advisory Committee Act, 5 U.S.C. App. I, and under the authority of, and as directed by statute, the Department of Commerce has authorized the renewal of the charter of the National Bureau of Standards Visiting Committee.

The NBS Visiting Committee was first established by section 10 of the act of March 3, 1901, which created the National Bureau of Standards. Its statutory purpose is to advise and report to the Secretary of Commerce upon the efficiency of the Bureau's scientific work and the condition of its equipment. The Committee's recommendations have significantly contributed to the overall operations of the institution.

As legally required, the Committee will continue with a balanced representation of five members prominent in the fields of science, engineering, or technology who are not in the employ of the U.S. Government. Balance on the Committee is achieved by maintaining representation from both the business and academic communities and by consideration of primary technical interest (e.g., physics, chemistry, engineering). The appointment of each member of the Committee is for five years, and the periods of service are so arranged that one member retires each year. The Chairman of the Committee is appointed by the Secretary of Commerce and is ordinarily the senior member in terms of service.

The NBS Visiting Committee is uniquely suited to evaluate overall operations and equipment of NBS from an external point of view and report to the Secretary of Commerce. Its function cannot be accomplished by any organizational element or other committee of the Department.

The Visiting Committee functions solely as an advisory body and in compliance with the provisions of the Federal Advisory Committee Act.

Copies of the Committee's revised charter have been filed with appropriate committees of the Congress.

Inquiries or comments may be addressed to the Committee Control Officer, Ms. Elaine D. Bunten, Office of the Associate Director for Programs, Administration Building, Room A–400, National Bureau of Standards, U.S. Department of Commerce, Washington, D.C. 20234, telephone: 301–921–3591.

Dated: March 23, 1977.

GUY W. CHAMBERLAIN, Jr.,
Acting Assistant Secretary for Administration.

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

PROCUREMENT LIST 1977

Proposed Additions

AGENCY: Committee for Purchase from the Blind and ther Severely Handicapped.

ACTION: Proposed Additions to Procurement List.

SUMMARY: The Committee has received a proposal to add to the Procurement List 1977 commodities to be produced by workshops for the blind or other severely handicapped.

COMMENTS MUST BE RECEIVED ON OR BEFORE: May 4, 1977.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, 2009 14th Street North, Suite 610, Arlington, Virginia 22201.

FOR FURTHER INFORMATION CONTACT:

C. W. Fletcher, (703) 557–1145.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2), 85 Stat. 77.

If the Comittee approves the proposed additions, all entities of the Government will be required to procure the commodities listed below from workshops for the blind or other severely handicapped.

It is proposed to add the following commodities to Procurement List 1977, November 18, 1976 (41 FR 50975):

Class 7105

Frame, Picture (GSA Regions 8, 9 and 10 only), 7105–00–053–0170, 7105–00–061–5834, 7105–00–052–8697, 7105–00–052–8695.

Class 6105

Cable Assembly, Power, 6150–00–935–8799, 6150–00–666–0045, 6150–00–117–8867, 6150–00–666–0041.

Class 9905

Sign Kit, Vehicle, 9905–00–565–6267.

C. W. FLETCHER,
Executive Director.

PROCUREMENT LIST 1977

Proposed Deletion

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Proposed Deletion from Procurement List.

SUMMARY: The Committee has received a proposal to delete from Procurement List 1977 a commodity produced by workshops for the blind or other severely handicapped.

COMMENTS MUST BE RECEIVED ON OR BEFORE: May 4, 1977.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, 2009 Fourteenth Street North, Suite 610, Arlington, Virginia 22201.

FOR FURTHER INFORMATION CONTACT:

C. W. Fletcher, (703) 557–1145.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2), 85 Stat. 77.

It is proposed to delete the following commodities from Procurement List 1977, November 18, 1976 (41 FR 50975):

Class 8440

Neckties, 8440–00–926–6604, 8440–00–926–4933, 8440–00–426–1999.

C. W. FLETCHER,
Executive Director.

[FR Doc.77-9760 Filed 3-31-77;8:45 am]

PROCUREMENT LIST 1977

Addition

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Addition to Procurement List.

SUMMARY: This action adds to Procurement List 1977 a commodity to be produced by workshops for the blind or other severely handicapped.

EFFECTIVE DATE: April 1, 1977.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, 2009 Fourteenth Street North, Suite 610, Arlington, Virginia 22201.

FOR FURTHER INFORMATION CONTACT:

C. W. Fletcher, (703) 557–1145.

SUPPLEMENTARY INFORMATION: On January 3, 1977 the Committee for Purchase from the Blind and Other Severely Handicapped published a notice (42 FR 64) of proposed additions to Procurement List 1977, November 18, 1976 (41 FR 50975).

After consideration of all the relevant data presented, the Committee has determined that the commodity listed below is suitable for procurement by the Government under 41 U.S.C. 46–48(c), 85 Stat. 77.

Accordingly, the following commodity is hereby added to Procurement List 1977:

Class 6645

Clock, Wall, 6645–00–935–4243.

C. W. FLETCHER,
Executive Director.

[FR Doc.77-9759 Filed 3-31-77;8:45 am]

COUNCIL ON ENVIRONMENTAL QUALITY

ENVIRONMENTAL IMPACTS OF ALASKA NATURAL GAS TRANSPORTATION SYSTEM ALTERNATIVES

Public Hearing

To be held under the Alaska Natural Gas Transportation Act, P.L. 94–586;

May 16–17 Anchorage, Alaska.
May 23–24 Washington, D.C.

BACKGROUND

Since the discovery of large reserves of natural gas in the Prudhoe Bay fields in Alaska, several routes have been proposed to transport this gas to the lower 48 states. The Arctic Gas pipeline system would traverse Alaska's North Slope, crossing into Canada at the MacKenzie River Delta and running along the river into the Midwest states. The El Paso Alaska system would follow the oil pipeline to Prince William Sound and then transport liquefied natural gas by tanker to southern California. Also paralleling the oil pipeline to Fairbanks, the Alcan Pipeline system would then cross into Canada, with some gas routed in the West Coast through British Columbia, and most going through Alberta and Saskatchewan to eastern and midwestern U.S. markets.

A final environmental impact statement was prepared by the Federal Power Commission for all three proposals, and administrative hearings were held by the Commission in 1976. A final recommendation by the FPC is due on May 1, 1977.

Recognizing an urgent national need for additional natural gas supplies, Congress enacted the Alaska Natural Gas Transportation Act of 1976 to provide the means for a sound and expeditious decision by the President and Congress on which, if any, transportation system should be authorized.

To speed the decision-making process, the Act precludes judicial review of the environmental impact statements required by the National Environmental Policy Act. The Council on Environmental Quality, however, must present to the President its views of the legal and factual sufficiency of environmental impact statements prepared for the pipeline proposals, and may also report on other matters related to environmental impacts.

THE HEARINGS

An important part of CEQ's responsibilities under the Act is to obtain public views, data, and arguments on these issues. To afford interested members of the public an opportunity to present this information, the Council will hold public hearings in Anchorage, Alaska and Washington, D.C.

The Anchorage hearing will be held at the Anchorage Westward Hotel on May 16–17. The hearing in Washington will be held on May 23–24 in the auditorium of the General Services Administration building. At both hearings testimony will be heard by Council Members and staff.

Individuals or groups interested in testifying should notify the Council in writing at the earliest possible date. Written intent to testify should be mailed to Alaska Hearings, Council on Environmental Quality, 722 Jackson Place, NW., Washington, D.C. 20006.

Statements of intent must be received by May 1. Further information will be made available to those interested in testifying or attending.

Witnesses may be asked to limit their remarks, although more detailed statements may be submitted for the record. Individuals unable to attend may submit written statements. If possible, statements should be submitted by May 9 to allow their distribution to panel members. In any case, the hearing record will close on May 27.

Wherever possible, the Council encourages individuals and groups sharing similar interests and views to coordinate their testimony and designate representatives to present testimony as a panel.

Both hearings will be open to the public and the press, and all proceedings will be recorded. The results of the hearings will be incorporated into CEQ's report to the President.

THE ISSUES

The hearings will primarily be concerned with the adequacy of the environmental impact statements prepared for the three proposals. Assessment will focus on the following questions:

Are all reasonable alternatives considered in the EIS's? How well are the impacts of alternatives compared?

Does EIS analysis address significant local, regional, and national impacts over three time periods: construction, operation, and, if significant, for a longer time thereafter?

Is analysis of impacts adequately supported by descriptive material? Are analytic methods accurate and supportable?

Are proposed measures to mitigate adverse impacts adequate? Is sufficient provision made for procedures to ensure that mitigating measures are followed?

Testimony may also address the Federal Power Commissioners' recommendation to the President and how well that decision in supported by the EIS's.

The most important impacts associated with the gas transportation systems are likely to be those described below. While the hearings will focus on these major issues, members of the public may address any other environmental questions of concern to them, as well as any other matter they consider appropriately within the scope of the Council's purview.

Impacts Caused by Pipeline Design and Construction Techniques, including effects of the new "chilled" pipeline on permafrost, geology, soils; construction schedules and impacts on water resources (from pipeline testing), vegetation and wildlife.

Impacts of LNG Systems on Health, Safety and the Environment, including risks of failures in LNG transport and storage, reliability problems, effluent discharge in Alaska and California.

Impacts on Environmentally Sensitive Ecosystems and on Wildlife, including effects on permafrost ecosystems, other unique and fragile systems, endangered species and other wildlife.

Impacts on Public Land Policies in Alaska, including effects on Arctic Wildlife Range from Arctic Gas system and policy precedents set, effects on Chugach National Forest from the El Paso System, and effects on future national forests, parks and wildlife areas that may be established by the Federal government.

Impacts on Short and Long-Range Growth in Alaska, including effects of alternatives on employment, community life, energy supply, local and state public services, land use changes induced, inducements to mineral and timber development. Also to be considered are impacts on Alaskan natives and the potential for "boom and bust" development.

Impacts of Pipeline Alternatives on Canada, including effects on native claims, other socioeconomic impacts, effects on wildlife, energy development.

Impacts on Regional and National Energy Policies, including effects on oil and gas development in other parts of Alaska (Naval Petroleum Reserve No. 4, Arctic Wildlife Range, offshore areas),

V4263 APR 1977 UMI

and effects of pipelines through the lower 48 states on coal gasification. Differences in impacts on energy availability in the Midwest, West and South should be specifically analyzed.

Net National Economic Impacts of Alternative Proposals, including impacts on national employment and productivity.

CHARLES WARREN,
Chairman.

[FR Doc.77-9815 Filed 3-31-77;8:45 am]

ENVIRONMENAL IMPACT STATEMENTS

March 21 Through March 25, 1977

The following is a list of environmental impact statements received by the Council on Environmental Quality from March 21 through March 25, 1977. The date of receipt for each statement is noted in the statement summary. Under Council Guidelines the minimum period for public review and comment on draft environmental impact statements is forty-five (45) days from this FEDERAL REGISTER notice of availability (May 16, 1977). The thirty (30) day period for each final statement begins on the day the statement is made available to the Council and to commenting parties.

Copies of individual statements are available for review from the originating agency. Back copies are also available at 10 cents per page from the Environmental Law Institute, 1346 Connecticut Avenue, Washington, D.C. 20036.

DEPARTMENT OF AGRICULTURE

Contact: Mr. Errett Deck, Coordinator, Environmental Quality Activities, U.S. Department of Agriculture, Room 359-A, Washington, D.C. 20250, (202)-447-6827.

FOREST SERVICE

Draft

Western Spruce Budworm Management Plan, March 21: Proposed is the management of western spruce budworm on 987,319 acres out of a total infestation of 3,151,985 acres. The preferred method of treatment is long-term silvicultural management on 934,019 acres and short-term aerial application of carbaryl (Sevin-4-oil) on 53.300 acres in the spring and summer of 1977. The application of Sevin will result in decline of population of some soil-inhabiting invertebrates, destruction of beneficial insect populations, and the elimination of honeybees in the treated areas. (ELR Order No. 70360.)

Chugach Moose Fire Management Program, Alaska, March 22: Proposed is the treatment by prescribed burning, over a 10-year period beginning in 1977, of a total of about 22,000 acres of land at 139 sites. The purpose is to improve vegetation for use as forage by Alaskan moose on the National Forest portion of the Kenai Peninsula in southcentral Alaska. Prescribed fire will be used in a planned, controlled, natural way to increase moose populations as past wildfires have done by accident. Adverse impacts may occur as a result of changes in vegetation decreased older forest wildlife populations, temporary reduction in air quality, and wildfire hazard. (ELR Order No. 70374.)

Sierra Ski Ranch, Eldorado National Forest, El Dorado County, Calif., March 23: Proposed is the expansion of a ski area near Echo Summit in the Eldorado National Forest. The area is located in El Dorado County, California, and is accessible by U.S. Highway 50. Ultimate development, as proposed by the permittee, would include: 14 chair lifts, maximum capacity of about 9,500 people at one time, 176 acres of ski runs, 2 day lodges, 1 warming hut, parking for 3,000 cars, and associated facilities such as sewage disposal system, water supply, and maintenance buildings. (ELR Order No. 70380.)

Red River Ski Area Expansion, N. Mex., March 22: Proposed is the further development of Red River Ski Area in Red River, New Mexico. The statement discusses three alternatives for expanding ski facilities, and describes the associated impacts. The resort is located on Carson National Forest lands, where a special permit for recreational has been granted. (ELC Order No. 70371.)

Final

Marys Peak Unit, Siuslaw National Forest, Benton and Polk Counties, Oreg., March 22: This statement discusses land use alternatives for the selection of a land use plan for 16,556 acres in the Marys Peak Subunit located in Benton County, and 1,160 acres in the Dallas Watershed Subunit located in Polk County, Oregon. These subunits compose Siuslaw National Forest Planning Unit Number Two. Adverse effects include soil disturbance caused by timber harvesting, and increases in noise and air pollution levels. Comments made by EPA, DOI, HUD, USDA, NASA, and State and local agencies, and concerned citizens. (ELR Order No. 70382.)

Black Hills National Forest Timber Management, Wyoming, and South Dakota, March 23: This statement proposes the revision of the FY 1963-1973 Timber Management Plan (extended to June 1977) for the Black Hills National Forest in Western South Dakota and Northeastern Wyoming. The revision is for the ten years from 1977-1986. The proposed action would apply silvicultural treatment to 39,000 acres and construct and/or improve 80 miles of road and travelways annually. In addition, 161 miles of travelways will be closed and obliterated annually, resulting in an overall reduction of 81 miles of travelways. Environmental impacts of the proposed plan are the cutting of trees and the construction and/or improvement of roads. Comments made by: AHP, EPA, and State and local agencies, and concerned citizens. (ELR Order No. 70381.)

RURAL ELECTRIFICATION ADMINISTRATION

Supplement

Underwood Generating Station (S-2), North Dakota, and Minnesota, March 21: This statement supplements a final EIS filed with CEQ in September, 1974. The proposed action is the construction of the Underwood Generating Station. The project includes two 450 magawatt steam electric generating units, 439 miles of 400 kV transmission lines, 102 miles of 345 kV transmission line, and 12.5 miles of 230 kV transmission line. The supplement describes certain differences in transmission routing in North Dakota. Counties affected by the routing changes are McLean, Burleigh, Kidder, Stutsman, LaMoure, Ransom, Sargent, and Richland. (ELR Order No. 70357.)

SOIL CONSERVATION SERVICE

Final

Little Cache Creek Watershed, Johnson County, Ill., March 21: Proposed is the implementation of a project for watershed protection, flood prevention, and non-agricultural water management in Johnson County, Illinois. This project became effective on December 19, 1963, with conservation land treatment measures having been installed on 75 percent of the land to date. Works of improvement remaining to be installed include 5.1 miles of enlarging existing man-modified perennial streams and a recreational development at structure 12. Adverse effects include temporary increase in stream pollutants, and displacement of the fish population. Comments made by: USDA, USA, HEW, DOI, DOT, and EPA. (ELR Order No. 70362.)

DEPARTMENT OF DEFENSE

ARMY

Contact: Col. Charles Sell, Chief, Environmental Office, Department of the Army, Room 1E673, Pentagon Chief of Staff, Washington, D.C. 20310, 202-694-4269.

Supplement

Toxic Residue Disposal, West Granite Area (S-1), Utah, March 24: This statement supplements a final EIS filed with CEQ in February, 1976, and relates to toxic residue disposal at West Granite Disposal Area, Dugway Proving Ground. The supplement presents the program for detoxifying the chemical agent GB contained in approximately 1515 M139 and eight E139 bomblets at the Tower Grid holding area of Dugway Proving Ground. The proposed method consists of chemically neutralizing the GB agent by adding sodium hydroxide solution to cover bomblets in steel containment tanks. This solution digests the aluminum bomblet shell and then reacts with and detoxifies the GB. (ELR Order No. 70383.)

DEPARTMENT OF COMMERCE

Contact: Dr. Sidney R. Galler, Deputy Assistant Secretary for Environmental Affairs, Department of Commerce, Washington, D.C. 20230, 202-377-2186.

Final

Knoxville International Energy Exposition, Tennessee, March 25: The proposed action is the official recognition of an international exposition themed to energy. This exposition is proposed to be held in the City of Knoxville from May to October in 1982. The purpose of the Exposition is to offer to the citizens of the world a greater comprehension of the effective use of energy and energy resources in the physical field and a more discriminating appreciation of the creative energy in the artistic field. Adverse environmental impacts may include the displacement of the current residents and businesses on the proposed site, and disruption of their lives, lifestyles, and activities. Comments made by: CEQ, DOT, USCG, EPA, HEW, TREA, DOC, COE, USDA, AHP, and State and local agencies, and concerned groups and persons. (ELR order No. 70386.)

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION

Draft

Project STORMFURY—Atlantic, 1977, March 22: Proposed is the seeding of one hurricane in 1977 in the Atlantic during the period August 15-October 15. The primary goal of this project is to test the hypothesis that the maximum winds in hurricanes can be reduced by at least 10 to 15 percent by seeding the proper cloud in specified portions of the storms with freezing nuclei (silver iodide). Impacts of the project will result from the dropping of 3 types of devices from aircraft during the seeding mission: silver iodide flares for hurricane modification; windsondes for measurement of wind, temperature, humidity and pressure; and bathythermographs for sea temperature measurement. (ELR Order No. 70373.)

Final

Oregon Coastal Management Program, March 25: Proposed is the approval of the Coastal Management Program of the State of Oregon. The program will provide an improved decision-making process for determining coastal land and water uses and siting of facilities of national interest. Approval and implementation of the program will restrict or prohibit land and water uses in certain parts of the Oregon coast, while promoting and encouraging development and use activities in other parts. Comments made by: USDA, RC 2, DJUS, ERDA, FEA, NASA, and State and local agencies, and concerned groups and persons. (ELR Order No. 70387.)

DEPARTMENT OF DEFENSE

U.S. CORPS OF ENGINEERS

Contact: Dr. C. Grant Ash, Office of Environmental Policy Department, Attn: DAEN-CWR-P, Office of the Chief of Engineers, U.S. Army Corps of Engineers, 1000 Independence Avenue, S.W., Washington, D.C. 20314, 202-693-6795.

Draft

Cambridge Harbor, Channel and Turning Basin (2), Dorchester County, Md., March 21: The proposed action is the maintenance dredging of the approach channel in Choptank River and Cambridge Creek at the Port of Cambridge in Maryland. The project consists of maintaining a channel 150 feet wide and 25 feet deep and widening the triangular turning basin to 1,400 feet long, 825 feet wide, and 25 feet deep. Approximately 92,000 cubic yards of silty-clay will be removed by hydraulic dredging and pumped to an upland disposal site in Talbot County. Adverse effects include reduction in dissolved oxygen concentration, and destruction of non-motile benthic organisms in the area. (Baltimore District.) (ELR Order No. 70368.)

Muskingum R. Basin, Water Resources Development (2), Ohio, March 22: The proposed interim plan of improvement consists of two components: a Local Protection Project at Killbuck, Ohio, consisting of a levee-flood wall 7,000 feet in length and day use recreation; and a Local Protection Project at Mansfield, Ohio, to include modification of the existing channel of Rocky Fork and Touby Run for a total distance of 12,040 feet and day use recreation. The Killbuck project will require the removal of all stream terrace vegetation and associated wildlife habitat along the project alignment. The Mansfield project will cause the loss of the natural stream in sections. (Huntington District.) (ELR Order No. 70375.)

ENVIRONMENTAL PROTECTION AGENCY

Contact: Please refer to the separate notice published by EPA in this issue of the FEDERAL REGISTER for the appropriate EPA contact.

Draft

El Paso & Teller Co. Water Quality Plan, El Paso and Teller Counties, Colo., March 25: Proposed is a Water Quality Management Plan for El Paso and Teller Counties, Colorado. The plan makes recommendations regarding stream classifications and criteria, wastewater treatment facility needs, and the regulatory/fiscal/institutional programs to implement the plan. The management plan is based on a projected population for the urbanizing area of 550,000 by the year 2000, and addresses the problems of both point and nonpoint sources of water pollution in the two-county area. Natural ecologic systems and open space will be impacted. (Region VIII.) (ELR Order No. 70389.)

FEDERAL POWER COMMISSION

Contact: Dr. Jack M. Heinemann, Acting Assistant Director for Environmental Quality, 825 North Capitol Street, N.E., Washington, D.C. 20426, 202-275-4791.

Final

Bad Creek Pumped Storage Project, South Carolina, March 22: Proposed is the licensing of Duke Power Co. for the construction, operation, and maintenance of a pumped storage project to be located on Bad Creek and West Bad Creek in Oconee County, South Carolina. The project would consist of a 318-acre upper reservoir, a 1.25-mile underground power tunnel, and a 1,000 MW underground powerhouse complex with 4 reversible pump turbine units, and would discharge into the existing 7565-acre lower reservoir, Lake Jocasses. Adverse impacts include clearing of 505 acres of land, elimination of 2.3 miles of trout stream, and disruption of about 315 acres of land. Comments made by: DOI, HEW, COE, USDA, EPA, NRC, TVA, and State and local agencies, and concerned citizens. (ELR Order No. 70372.)

DEPARTMENT OF HUD

Contact: Mr. Richard H. Broun, Director Office of Environmental Quality, Department of Housing and Urban Development, 451 7th Street, S.W., Washington, D.C. 20410, 202-755-6308.

Draft

Amberly Subdivision, DeKalb County, Ga., March 21: The proposed project consists of the development of 2 subdivisions, Amberly and Amberly East, approximately 4.5 miles from Stone Mountain, Georgia. The plan calls for land uses of 648 single-family detached units, on 283.04 acres and a flood plain of 25.5 acres. Completion of the project will result in increased pressure on community services and noise pollution. (ELR Order No. 70358.)

The Colonies Project, Texas, Harris County, Tex., March 21: Proposed is the development of the Colonies Project in Harris County, Texas. The planned community will be composed of single-family homes, apartments, patio homes, and townhomes, to accommodate a population of approximately 9500 people. Adverse impacts include the loss of agricultural land and an increased demand for fossil fuels through heavy dependence on the automobile for transportation. (ELR Order No. 70363.)

Big Country Subdivision, San Antonio; Bexar County, Tex, March 21: Proposed is the acceptance, for HUD home mortgage insurance purposes, of the 764-acre Big Country Subdivision, located 15 miles west of San Antonio, Texas The project will provide 2,500 single family residential homes and 1,400 multifamily units for middle and upper income bracket families. Plans include a 10-acre elementary school site, 60 acres of commercial development, and 148 acres of park, drainage and recreational uses. The primary adverse impact associated with the project is due to the fact that it is not directly adjacent to any built-up sections of San Antonio. (ELR Order No. 70365.)

Golf Resort Joint Venture, Texas, El Paso County, Tex., March 22: The proposed action is for the Department of HUD to accept for HUD/FHA insurance purposes the 1500 acre Golf Resort Joint Venture project. The project site is located near the southeast limits of the City of El Paso above and adjacent to Interstate 10. Over 600 acres will be devoted to single family housing with approximately 280 acres for various commercial development. A small amount of duplex and apartments will be joined by land devoted to industrial, school, park, and ponding areas. (ELR Order No. 70370.)

Pebble Hills Addition, Leavell Development, El Paso County, Tex., March 22: The proposed action is for the Department of HUD to accept for HUD/FHA mortgage insurance purposes the 538 acre Pebble Hills Addition of the Leavell Development. The project site is located in the extreme northeastern most edge of the City of El Paso, Texas, adjacent to U.S. Highway 62 and 180. When completed, this project will involve a total of 1,600 units developed primarily as single-family residential. Adverse effects relate directly to the El Paso International Airport noise contours, and the Archaeological survey which reports two significant concentrations of cultural material in the development area. (ELR Order No. 70378.)

Final

Trailwood Addition Subdivision, Grand Prairie, Dallas County, Tex., March 21: The proposed action is construction of the Trailwood Addition Subdivision in Grand Prairie, Tex., a community of 63,000 inhabitants. The 548-acre project consists of the construction of 1,495 homes with acreage allocated for apartments, small commercial enterprises, parks, schools, and office buildings. This development would result in greater demand for fossil fuels for transportation, loss of good agricultural land, and strain on existing local facilities. Comments made by: HUD, USDA, AHP, EPA, DOI, COE, State and local agencies concerned citizens. (ELR Order No. 70359.)

SECTION 104(h)

Draft

The following are Community Development Block Grant statements prepared and circulated directly by applicants pursuant to section 104(h) of the 1974 Housing and Community Development Act. Copies may be obtained from the office of the appropriate local chief executive. (Copies are not available from HUD).

DeKalb Co., Tenn., 3d year Water Line, DeKalb County Tenn., March 21: Proposed is the installation of 18 miles of 6-inch, 4-inch, and 2-inch plastic potable water line in DeKalb County, Tenn. The project will provide potable water for 135 rural families who have been consuming well water that stands an 80 percent chance of being polluted. Water will also be available in adequate amounts for firefighting purposes. Temporary construction related impacts are expected. (ELR Order No. 70364.)

DEPARTMENT OF INTERIOR

Contact: Mr. Bruce Blanchard, Director, Environmental Project Review, Room 5311, Department of the Interior, Washington, D.C. 20240, 202-343-3891.

BONNEVILLE POWER ADMINISTRATION

Supplement

Ellensburg Service, BPA fiscal year 1978 (S-1), Kittitas County, Wash., March 22: Proposed is the construction of transmission facilities to provide for increasing electrical loads in the Ellensburg Service Area. The alternatives involve the construction of between 2 and 4 miles of new 115 kV transmission line and the addition of a new 115-12.5 kV substation. Depending on the final route location chosen, between 2 and 3 acres of new right-of-way would be required for the line. Disturbances to agricultural lands would occur. (ELR Order No. 70376.)

DEPARTMENT OF LABOR

Contact: Mr. David R. Bell, Chief, Technical Studies Branch, 200 Constitution Avenue, Room N3669, Washington, D.C. 20210, 202-523-7076.

Final

Standards Completion Project, March 24: The Occupational Safety and Health Administration proposes to regulate employee exposure to nearly 350 toxic substances currently found in Table Z-1, Z-2, and Z-3 of 29 CFR 1910.1000. The purpose of these regulations is to reduce the risk of work-related injuries and illnesses due to exposure to toxic substances. The statement indicates no major significant impact is expected on the environment external to the workplace as a result of the promulgation of standards. Comments made by: USDA, USA, USAF,

V 4263 APR 1 77 UMI

ERDA, DOI, DOC, concerned groups and persons. (ELR Order No. 70385.)

NUCLEAR REGULATORY COMMISSION

Contact: Mr. Voss A. Moore, Division of Reactor Licensing, P–722, NRC, Washington, D.C. 20555, 301–443–6965.

Draft

Shoreham Nuclear Power Station, Unit 1, Suffolk County, N.Y., March 24: The proposed action is the issuance of an operating license to the Long Island Lighting Company (LILCO) for the start up and operation of the Shoreham Nuclear Power Station, Unit 1, on a 880-acre site in Brookhaven, New York. The unit will have a net capacity of 820 MWe and will be cooled by a once-through flow of water from the Long Island Sound. Adverse effects include the clearing of 100 acres of woods; impacts to fish due to the high water flow velocities in the intake canal; thermal stress on marine biota; and the risks associated with radiation exposure. (ELR Order No. 70384.)

TENNESSEE VALLEY AUTHORITY

Contact: Dr. Peter Krenkel, Director of Environmental Planning, 720 Edney Building, Chattanooga, Tenn. 37401, 615–755–3161.

Draft

West Point-Miller, 500-kV Transmission Lines, Mississippi and Alabama, March 21: Proposed is the construction and operation of a 500-kV transmission line interconnecting the TVA and Alabama Power Company Systems in Mississippi and Alabama. The project will provide intersystem transmission capacity neceary to maintain adequate reliability margins, improve operating stability, reduce power losses, and on an intersystem basis facilitate reciprocal emergency assistance including short-term and diversity power and energy sales. The major adverse effect is clearing of 1,469 acres of woodland with the resulting loss of animal habitat and timber resources. (ELR Order No. 70367.)

DEPARTMENT OF TRANSPORTATION

Contact: Mr. Marvin Convisser, Director, Office of Environmental Affairs, U.S. Department of Transportation, 400 7th Street, SW., Washington, D.C. 20590, 202–426–4357.

FEDERAL AVIATION ADMINISTRATION

Draft

Asheville Airport Expansion, Buncombe County, N.C., March 25: Proposed is the expansion and improvement of Asheville Airport in Asheville, N.C. The proposed project calls for the construction of a 1,500-ft. runway and parallel taxiway extension on the north end of the existing 6,500-ft. runway, and the following associated items: land acquisition for a runway and parallel taxiway extension; construction and lighting of the 150-ft. X 1,500-ft. runway and parallel taxiway extension; and construction of a glide slope and localizer site. The VASO–4 will be relocated on Runway 1. (ELR Order No. 70388.)

Final

Vernal Airport, Utah, Uintah County, Utah, March 21: Proposed is the approval of a development project at Vernal Airport to construct new and resurface old runways and taxiways, to acquire easements, and to install visual approach slope indicators. Public controversy surrounds the project. Adverse effects include short-term pollution during construction operations, increased noise levels at 9 public gathering places, and increased use of electrical energy. Comments made by: EPA, USDA, COE, HEW, DOI, DOT2, FEA, State and local agencies concerned citizens. (ELR Order No. 70369.)

FEDERAL HIGHWAY ADMINISTRATION

Draft

I–77–U.S.. 74 Connector, Charlotte and Mecklenburg Counties, N.C., March 21: Proposed is the construction of a multi-lane freeway between I–77 and U.S. 74 south of Charlotte, N.C. The 14-mile project is the initial section of the outer circumferential route around Charlotte included in the Charlotte-Mecklenburg Comprehensive Plan. No significant detrimental air quality impacts are expected to occur, and noise impacts will be limited to a relatively small number of structures adjacent to the proposed action. (Region 4.) (ELR Order No. 70366.)

Final

U.S. 2 Bypass of Bemidji, Beltrami County, Minn., March 22: Proposed is the construction of 9 miles of U.S. 2 on new location in Beltrami County. The project would extend from the junction with U.S. 71 approximately 1 mile west of Bemidji, around the west and south of Bemidji, to a junction with inplace U.S. 2 approximately 3 miles southeast of Bemidji (the Bemidji bypass). Major adverse impacts will be increased noise, loss of 385 acres of pastureland, relocation of eight families and three businesses, temporary water degradation and seasonal water pollution due to highway runoff. (Region 5.) Comments made by: DOT, DOI, EPA, COE, USDA, AHP, State and local agencies, concerned citizens. (ELR Order No. 70377.)

U.S. 395 Corridor, Nevada, Washoe County, Nev., March 23: Proposed is the upgrading of U.S. 395 to freeway standards in Washoe County, Nevada. The project would consist of a freeway facility 3.5 miles long and a temporary facility 0.7 mile long between Glendale Avenue and South Virginia Street in Reno. Adverse effects include relocation of 102 residences, visual disruption, and slight increases in carbon monoxide levels along the freeway. (Region 9.) Comments made by: COE, HEW, EPA, DOI, USDA, State and local agencies, concerned citizens. (ELR Order No. 70379.)

NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION

Contact: Mr. Richard C. Carter or Mr. John M. Machey, Office of Automotive Fuel Economy, 755–9384.

Draft

Passenger Auto Average Fuel Economy, March 25: Proposed is the establishment of Average Fuel Economy Standards for passenger automobiles which are manufactured in model years 1981 through 1984. The term "passenger automobile" means any automobile which the Secretary determines, by rule, is manufactured primarily for use in the transportation of not more than 10 individuals. Included in this proposal are large station wagons which exceed 6,000 pounds gross weight, but do not exceed 10,000 pounds gross vehicle weight. Fuel economy will be determined in accordance with procedures established by the EPA. (ELR Order No. 70390.)

Vehicle Occupant Crash Protection (2), March 25: This statement is a modification of a draft EIS filed with CEQ in July, 1976. Proposed are three alternative actions to protect motor vehicle occupants from death or injury resulting from traffic accidents. These proposals are (1) to continue the existing version of Federal Motor Vehicle Safety Standard 208 which requires either seat belts, or passive restraints, or a combination of the two; (2) to require States to take action to increase seat belt use or; (3) to require that manufacturers provide passive restraints on all cars. (ELR Order No. 70391.)

NICHOLAS C. YOST,
General Counsel.

Department of the Air Force

CHEMICAL PROPULSION ADVISORY COMMITTEE (MONOPROPELLANT WORKING GROUP)

Meeting

MARCH 21, 1977.

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Public Law 92–463) announcement is made of the following committee meeting.

Name: Department of Defense Chemical Propulsion Advisory Committee (Monopropellant Working Group).

Date: April 20–21, 1977.

Place: Essex House Motel, 44916 N. 10th St. West, Lancaster, CA.

Time: Initial meeting 8:30 am, April 20.

Proposed Agenda: Not yet finalized but restricted to subcommittee reports on progress towards identified goals of the Advisory Working Group.

Purpose of the Meeting: The working group will review the progress of the individual subcommittees on assigned tasks of monopropellant technology since the last semiannual meeting. The committee will also discuss technical problems identified by the attending engineers and program managers.

Meeting of the Advisory Working Group is open to the public. Public attendance, depending on available space, may be limited to those persons who have notified the Advisory Working Group chairman, in writing at least five (5) days prior to the meeting of their intention to attend.

Any member of the public may file a written statement with the Working Group chairman before, during, or after the meeting. To the extent that time permits, the committee chairman may allow public presentation of oral statements at the meeting.

All communication regarding this Advisory Working Group should be addressed to Mr. F. S. Forbes, Chairman, AFRPL/LKDP, Edwards, CA 93523.

F. S. FORBES,
Chairman, JANNAF Monopropellant Working Group.

ARMED FORCES EPIDEMIOLOGICAL BOARD

Open Meeting; Addendum

In 42 FR 15456, March 22, 1977, a Notice of an Open Meeting for April 15, 1976 was published. The agenda was to be devoted to the consideration of policy for immunization of Armed Forces personnel against smallpox. A decision has been made to add the following subject to the agenda for consideration: Policy for use of Venezuelan Equine Encephalitis vaccine.

Dated. March 30, 1977.

DUANE G. ERICKSON,
LTC, MSC, USA,
Executive Secretary.

ENERGY RESEARCH AND DEVELOPMENT ADMINISTRATION

STUDY GROUP ON GLOBAL ENVIRONMENTAL EFFECTS OF CARBON DIOXIDE

Meeting

In accordance with provisions of Pub. L. 92–463 (Federal Advisory Committee Act), the Study Group on Global Environmental Effects of Carbon Dioxide will hold its third meeting on Saturday, April 30, 1977, from 9:45 a.m. to 4:00 p.m. at the Delta Airport Group Room 7, Atlanta, Georgia Airport. This meeting will be open to the public. The purpose of the meeting will be to review progress to date, discuss reports from the Miami Beach Workshop, and discuss a report on the SCOPE meeting on Biogeochemical Cycling of Carbon, Hamburg, Germany, March 21–26.

The tentative agenda for the meeting is as follows:

9:45	a.m.	Opening Remarks, Alvin Weinberg, Chairman.
10	a.m.	Review of general progress.
11	a.m.	Review and discussions of Miami Beach Workshop.
12	m.	Lunch.
1	p.m.	Continue discussion of Miami Beach Workshop.
2	p.m.	Report of SCOPE meeting in Hamburg and continued discussion of plans for attacking CO_2 problem.
4	p.m.	Adjournment.

Practical considerations may dictate alterations in the above agenda or schedule.

The Chairman is empowered to conduct the meeting in a manner that in his judgment will facilitate the orderly conduct of business.

With respect to public participation in agenda items, scheduled above, the following requirements shall apply:

(a) Persons wishing to submit written statements on agenda items may do so by mailing 12 copies thereof, postmarked no later than April 15, 1977, to Dr. James L. Liverman, Director, Division of Biomedical and Environmental Research, U.S. Energy Research and Development Administration, Washington, D.C. 20545. Comments shall be directly relevant to the above agenda items. Minutes of the meeting will be kept open for 30 days for the receipt of written statements for the record.

(b) Information as to whether the meeting has been rescheduled or relocated can be obtained by a prepaid telephone call on April 27, 1977, to Mr. David H. Slade, Deputy Manager, Environmental Programs, Division of Biomedical and Environmental Research, U.S. Energy Research and Development Administration on (301) 353–4374, between 8:30 a.m. and 5:00 p.m. e.s.t.

(c) Questions at the meeting may be propounded only by members of the Committee and ERDA officials assigned to participate with the Committee in its deliberations.

(d) Seating to the public will be made available on a first-come, first-served basis.

(e) The use of still, movie, and television cameras, the physical installation and presence of which will not interfere with the course of the meeting, will be permitted both before and after the meeting and during the recess. The use of such equipment will not, however, be allowed while the meeting is in session.

(f) Copies of minutes will be made available for copying, following their certification by the Chairman in accordance with the Federal Advisory Committee Act at the U.S. Energy Research and Development Administration's Public Document Room, 20 Massachusetts Avenue, N.W., Washington, D.C. 20545, upon payment of all charges required by law.

HARRY L. PEEBLES,
Deputy Advisory
Committee Management Officer.

[FR Doc.77–9906 Filed 3–31–77;8:45 am]

REVIEW OF ADVISORY COMMITTEES

MARCH 30, 1977.

The Energy Research and Development Administration is conducting a comprehensive review of its advisory committees, in accordance with OMB Circular No. A–63, Transmittal Memorandum No. 5., and public comment is requested.

All agencies have been directed to conduct this review for each committee to determine (a) whether such committee is carrying out its purpose; (b) whether, consistent with the provisions of applicable statutes, the responsibilities assigned to it should be revised; (c) whether it should be merged with other advisory committees; or (d) whether it should be abolished.

The ERDA is now in the process of conducting this review for the following advisory committees:

Advisory Committee on Geothermal Energy
Committee of Senior Reviewers
Environmental Advisory Committee
General Advisory Committee
General Technical Advisory Committee
High Energy Physics Advisory Panel
Historical Advisory Committee
Lignite Advisory Committee
Liquid Metal Fast Breeder Reactor Steering Committee
Personnel Security Review Board Panel
Procurement Policy Advisory Committee
Study Group on Global Environmental Effects of Carbon Dioxide
University Programs Advisory Panel

The ERDA is required to complete its review and submit its determination to the Office of Management and Budget by April 15, 1977. Therefore, any public comments and recommendations should be provided to ERDA not later than April 8, 1977. Interested persons should direct their comments in writing to Harry L. Peebles, Deputy Advisory Committee Management Officer, U.S. Energy Research and Development Administration, Washington, D.C. 20545.

HARRY L. PEEBLES,
Deputy Advisory Committee
Management Officer.

ENVIRONMENTAL PROTECTION AGENCY

[FRL 706–7]

REGULATIONS OF FUELS AND FUEL ADDITIVES

Gasoline Refiners: March 31, 1977 and April 30, 1977 Lead Phase-Down Submittals

Notice is hereby given by the Environmental Protection Agency (EPA) to any refiner operating at least one small refinery (less than or equal to 30,000 bbl/d crude capacity), as of October 1, 1976, in regard to the March 31, 1977, and April 30, 1977, submittals under 40 CFR 80.20(a) (4) (ii) and (v) respectively.

Enforcement against any refiner for failure to comply with § 80.20(a) (4) (v) with respect to a small refinery, will be suspended until 90 days after final promulgation of the Proposed Small Refiner Amendments (42 FR 3183, January 17, 1977), by which time the information must be submitted. EPA will not enforce the 0.8 gram per gallon (gpg) January 1, 1978, standard with respect to a small refinery whose plan pursuant to § 80.20(a) (4) (ii) is submitted after April 30, 1977, so long as the information is submitted within 90 days after promulgation of the Proposed Small Refiner Amendments (42 FR 3183, January 17, 1977), and all other suspension criteria are met. This delay is accorded small refineries while EPA completes its evaluation of separate treatment for the small refiner or small refinery.

A number of inquiries have been received concerning the March 31, 1977, reporting date included in the Proposed Small Refiner Amendments (42 FR 3183, January 17, 1977), by which time small refiners would have been required to inform the Administrator in writing of their intent to either meet the required 1.0 gpg lead pool average by October 1, 1979, or to withdraw from the gasoline production business. This date (March 31, 1977) is a proposed reporting date which will be modified during final promulgation. Submissions, indicating a small refiners' intent to meet the 1.0 gpg standard or withdraw from gasoline production, are not requested prior to the completion of EPA evaluations and final regulation promulgation.

Dated: March 25, 1977.

STANLEY W. LEGRO,
Assistant Administrator
for Enforcement.

[FRL 706-8]

SCIENCE ADVISORY BOARD, ENVIRONMENTAL HEALTH ADVISORY COMMITTEE

Open Meeting

Pursuant to Pub. L. 92-463, notice is hereby given that a two-day meeting of the Environmental Health Advisory Committee of the Science Advisory Board will be held on April 19 and 20, 1977 in Conference Room 4022, Federal Office Building, 550 Main Street, Cincinnati, Ohio. The meeting will start at 9 a.m. on April 19, 1977.

The purpose of the meeting will be (1) to acquaint the members with the programs, facilities, and personnel of EPA's Health Effects Research Laboratory located in Cincinnati; (2) to hear and consider a report of the Study Group on Mutagenicity Testing which reviewed the scientific aspects of draft EPA Guidelines for the registration of pesticides relating to mutagenicity testing; (3) to be briefed on and to discuss certain scientific issues relating to the development of tolerances for pesticides; and (4) to hear brief progress reports of the Committee's Subcommittee and Study Groups. The Agenda will also include (5) brief reports and informational items of current interest to the members.

Item (1) as stated above is planned for April 19 and for the afternoon of April 20; the other items are planned for the morning of April 20.

The meeting will be open to the public. Any member of the public wishing to attend or submit a paper should contact the Secretariat, Science Advisory Board (A-101), U.S. Environmental Protection Agency, Washington, D.C. 20460, by C.O.B. April 14, 1977. Please call Mrs. Ilene F. Stein on (703) 557-7720.

LLOYD T. TAYLOR,
Acting Staff Director,
Science Advisory Board.

MARCH 25, 1977.

WATER QUALITY MANAGEMENT PLAN; EL PASO AND TELLER COUNTIES; COLO.

[FRL 708-3]

Availability of Draft Environmental Impact Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Environmental Protection Agency has prepared a draft environmental impact statement (DEIS) for the Water Quality Management Plan, El Paso and Teller Counties, Colorado.

The proposed action, pursuant to EPA's policies, guidelines and regulations under section 208 of the Federal Water Pollution Control Act, is the EPA approval, conditional approval or disapproval of the proposed Water Quality Management Plan for El Paso and Teller Counties in Colorado. The DEIS consists of a short summary document which discusses the significant environmental issues addressed in the Water Quality Management Plan and EPA's recommended course of action.

This DEIS was transmitted to the Council on Environmental Quality (CEQ) on April 1, 1977. In accordance with CEQ's notice of availability, comments are due on May 16, 1977. Copies of the DEIS are available for review and comment from: Mr. Terry Anderson, Environmental Protection Agency, Region 8, 1860 Lincoln Street, Denver, Colorado 80203 (telephone 303-837-2721).

Copies of the DEIS are available for public inspection at the following locations:

Environmental Protection Agency, Region 8 Library, 1860 Lincoln Street, Denver, Colorado 80203.
Environmental Protection Agency, Public Information Reference Unit, Room 2922, Waterside Mall, 401 M Street SW., Washington, D.C. 20460.
Pikes Peak Area Council of Governments, 27 East Vermijo Street, Colorado Springs, Colorado.

Information copies of the DEIS are available at cost (10¢/page) from the Environmental Law Institute, 1346 Connecticut Avenue NW., Washington, D.C. 20036. Please reference ELR No. 70389.

Copies of the DEIS have been sent to various Federal, State and local agencies, and interested individuals as outlined in the CEQ Guidelines.

Dated: March 28, 1977.

JOSEPH MCCAKE,
Acting Director,
Office of Federal Activities.

FARM CREDIT ADMINISTRATION

[FCA Order No. 800]

DEPUTY GOVERNOR, CREDIT AND OPERATIONS, ET AL.

Authority Delegations

MARCH 25, 1977.

Authority of the deputy governor, credit and operations, and order of precedence of certain officers to act as Deputy Governor, Credit and Operations (revocation of FCA order No. 794).

1. The Deputy Governor, Credit and Operations, shall, subject to the jurisdiction and control of the Governor of the Farm Credit Administration, execute and perform all power, authority, and duties relative to supervision of the credit and operations functions of the institutions of the Farm Credit System and to all matters incidental thereto, and to administration of all provisions of law pertinent to such supervision.

2. In the event the Deputy Governor, Credit and Operations, Farm Credit Administration, is absent or is not able to perform the duties of his office for any other reason, the officer who is highest on the following list and who is available to act is hereby authorized to exercise and perform all functions, power, authority, and duties of the Deputy Governor, Credit and Operations, pertaining to the credit and operations functions:

(1) Director, Supervisory Division
(2) Director, Review Division
(3) Assistant Director, Western Region, Supervisory Division
(4) Assistant Director, Eastern Region, Supervisory Division
(5) Assistant Director, Technical Services, Supervisory Division
(6) Assistant Director, Central Region, Supervisory Division

3. This order shall be effective on March 25, 1977, and revokes Farm Credit Administration Order No. 794, dated September 21, 1976 (41 FR 42227).

DONALD E. WILKINSON,
Governor,
Farm Credit Administration.

[FR Doc.77-9701 Filed 3-31-77;8:45 am]

[FCA Order No. 801]

SECRETARY TO GOVERNOR, ET AL.

Authority Delegations

MARCH 25, 1977.

Authorization of the secretary to the Governor, secretary and legal assistant, and secretary, to authenticate documents, certify official records, and affix seal.

1. Barbara A. McKeever, Secretary to the Governor, P. Patricia Bonnefond, Secretary and Legal Assistant, and Barbara V. Mitchell, Secretary, severally and not jointly, are authorized and empowered:

(a) To execute and issue under the seal of the Farm Credit Administration, statements (1) authenticating copies of, or excerpts from, official records and files of the Farm Credit Administration; (2) certifying, on the basis of the records of the Farm Credit Administration, the effective periods of regulations, orders, instructions, and regulatory announcements; and (3) certifying, on the basis of the records of the Farm Credit Administration, the appointment, qualification, and continuance in office of any officer or employee of the Farm Credit Administration, or any conservator or receiver acting under the supervision or direction of the Farm Credit Administration.

(b) To sign official documents and to affix the seal of the Farm Credit Administration thereon for the purpose of attesting the signatures of officials of the Farm Credit Administration.

2. The provisions of this order shall be effective March 25, 1977, and on that date shall supersede Farm Credit Administration Order No. 795, dated September 30, 1976, 41 FR 44070.

DONALD E. WILKINSON,
Governor, Farm
Credit Administration.

FEDERAL COMMUNICATIONS COMMISSION

[Docket Nos. 21167; 21168]

MICROBAND CORPORATION OF AMERICA AND TEKKOM, INC.

Memorandum Opinion and Order Designating Applications for Consolidated Hearing on Stated Issues

Adopted: March 7, 1977.

Released: March 28, 1977.

In re applications of Microband Corporation of America and Tekkom, Inc. For Construction Permits in the Multipoint Distribution Service for a new station at San Diego, California. Docket No. 21167, File No. 896-CM-P-72; Docket No. 21168, File No. 1985-CM-P-72.

1. The Commission has before it the above-referenced applications[1] of Microband Corporation of America (Microband), filed on August 19, 1971 and Tekkom, Inc. (Tekkom), filed on October 7, 1971. Both applications propose Channel 1 operation in the San Diego, California area, and thus are mutually exclusive and require comparative consideration. Both applications have been amended as a result of informal requests of the Commission staff for additional information, and no petitions to deny or other objections to any of the applications remain to be acted upon.[2]

2. Microband holds MDS licenses in thirteen cities, including Washington, D.C. and has been granted construction permits in various other cities. Tekkom is an MDS licensee in Las Vegas, Nevada and has an interest in the construction permittee in Salt Lake City, Utah.

3. Upon review of the captioned applications, we find that both applicants are legally, technically, financially, and otherwise qualified to provide the services which they propose, and that a hearing will be required to determine, on a comparative basis, which of these applications should be granted.

4. Accordingly, *It is hereby ordered,* That pursuant to Section 309(e) of the Communications Act of 1934, as amended, and Section 0.291 of the Commission's Rules, the above-captioned applications are designated for hearing, in a consolidated proceeding, at a time and place to be specified in a subsequent order, to determine, on a comparative basis, which of the above-captioned applications should be granted in order to best serve the public interest, convenience and necessity. In making such a determination, the following factors shall be considered:[3]

(a) The relative merits of each proposal with respect to service area and efficient frequency use;

(b) The nature of the services and facilities proposed, and whether they will satisfy service requirements, known to exist or likely to exist in the San Diego, California area;

(c) The anticipated quality and reliability of the service proposed, including selection of equipment, installation, subscriber security and maintenance;

(d) The charges, regulations and conditions of the service to be rendered, and their relation to the nature, quality and costs of service; and

(e) The managerial and entrepreneurial qualifications of the applicants.

5. *It is further ordered,* That Microband Corporation of America, Tekkom, Inc. and the Chief, Common Carrier Bureau, are made parties to this proceeding.

6. *It is further ordered,* That parties desiring to participate herein shall file their notices of appearance in accordance with the provisions of § 1.221 of the Commission's Rules.

WALTER R. HINCHMAN,
Chief, Common
Carrier Bureau.

[FR Doc.77-9747 Filed 3-31-77;8:45 am]

[Docket Nos. 21148; 21173]

RONALD E. BRUNK

Order of Consolidation

In the matter of the application of Ronald E. Brunk, 3190 Holiday Drive, S., Salem, Oregon 97302 for Amateur Radio Station and (Novice Class) Operator License and Order to Show Cause Why The License For Radio Station KND-4719 in the Citizens Band Radio Service Should Not Be Revoked.[1]

Adopted: March 18, 1977.

Released: March 22, 1977.

The Chief, Safety and Special Radio Services Bureau, pursuant to delegated authority, has under consideration an Order released March 18, 1977, designating the above-captioned application for hearing and also an Order to Show Cause (SS-132-77) released January 25, 1977, directing Brunk to show cause why the license for Citizens Band radio station KND-4719 should not be revoked.

It appears, that respondent has requested a hearing in the Order to Show Cause proceeding;

It further appears, that the Order designating the application for hearing and the Order to Show Cause involve the same respondent and substantially the same issues.

Accordingly, consolidation of these proceedings will be conducive to the proper dispatch of business and to the ends of justice; and, *It is ordered,* pursuant to § 1.227 of the Commission's Rules, that the proceeding on the issues specified in the Commission's Order designating Brunk's application for hearing, released March 18, 1977, and the proceeding on the issues raised in the Order to Show Cause, released January 25, 1977, are consolidated for hearing.

It is further ordered, That with respect to the application, the burden of proceeding with the introduction of evidence on issues (1) and (3) shall be on the Bureau and the burden of proof on all issues shall be upon the applicant.

It is further ordered, That the burden of proceeding with the introduction of evidence and the burden of proof with respect to all issues raised in the Order to Show Cause shall be upon the Bureau; and

It is further ordered, That a copy of this Order shall be sent by Certified Mail—Return Receipt Requested and by Regular Mail to Brunk at his address of record as shown in the caption.

Chief, Safety and Special Radio Services Bureau.

GERALD M. ZUCKERMAN,
Chief, Legal, Advisory
and Enforcement Division.

1979 WORLD ADMINISTRATIVE RADIO CONFERENCE

Schedule of Meeting

MARCH 29, 1977.

Pursuant to Public Law 92-463, notice is hereby given of the following meeting.

WARC-79 SATELLITE BROADCASTING SERVICE GROUP

Tuesday, April 26, 1977—9:30 a.m. to 12 noon, Room A-110, 1229 20th St., NW., Washington, D.C.

Chairman: Edward E. Reinhart, FCC Liaison: Charles H. Breig.

The Agenda will be as follows:

1. Call to Order by the Chairman
2. Approval of Minutes of Previous Meeting
3. Reports from Task Groups
4. Further Discussion
5. Next Meeting Date and Adjournment

The above meeting is open to broadcast industry representatives and interested members of the general public.

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

[FR Doc.77-9748 Filed 3-31-77;8:45 am]

[1] Microwave Transmission Corporation (MTC) filed a competing application on October 28, 1971 but was dismissed at its own request on January 7, 1977. Also, Imperial Communications Corporation (Imperial) submitted an application on October 20, 1971 but by mutual agreement Tekkom, MTC and Microband reimbursed Imperial $3,300 (its application prosecution expenses) in return for Imperial's voluntary dismissal.

[2] Tekkom filed a motion to dismiss MTC's application on May 17, 1976, raising the issue of the adequacy of MTC's site availability showing. In view of MTC's request for dismissal, all pleadings in the matter are considered moot.

[3] Consideration of these factors shall be made in light of the Commission's discussion in Peabody Telephone Answering Service, et al., 55 F.C.C. 2d 626 (1975).

[1] See 42 FR 15730.

V4263 APR 1977 UMI

RADIO TECHNICAL COMMISSION FOR MARINE SERVICES

Meetings

In accordance with Pub. L. 92-463, "Federal Advisory Committee Act," the schedule of future Radio Technical Commission for Marine Services (RTCM) meetings is as follows:

RTCM Assembly—Notice of 1977 Annual Meeting—Monday, Tuesday, Wednesday, Thursday, April 18–19–20–21, 1977—Business Meeting: Thursday, April 21, 9:30 a.m.—Valley Forge Hilton, 251 West DeKalb Pike, King of Prussia, PA 19606—FCC Commissioner Abbott Washburn, RTCM Chairman.

Technical Papers Sessions: Monday, April 18—"Long Distance Communications for Vessels and Offshore Structures", "New Developments in Maritime Electronic Systems"; Tuesday, April 19—"Short Distance Communications for Commercial and Recreational Vessels"; Wednesday, April 20—"Radio Determination", "Preparation for the 1979 World Administrative Radio Conference"; Thursday, April 21—Business Session Agenda: (1) Introductory remarks; (2) Election of Assembly Member applicants; (3) Election of RTCM Officers; (4) Committee reports; (5) Report of the Executive Secretary; and (6) Other business.

Members of Special Committee No. 65, "Ship Radar"—Notice of 54th Meeting—Monday, April 18, 1977—8:00 a.m.—Valley Forge Hilton, 251 West DeKalb Pike, King of Prussia, PA 19406.

AGENDA

1. Call to Order; Chirman's Report; Adoption of Agenda.
2. Acceptance of SC-65 Summary Records: Appointment of Rapporteur.
3. Progress Report of Collision Avoidance Working Group.
4. Status Reports on Other Working Groups.
5. Other business.
6. Establishment of next meeting date.

Irvin Hurwitz, Chairman, SC-65, Federal Communications Commission, Washington, D.C. 20554, Phone: (202) 632-7197.

Special Committee No. 68, "Marine Radiotelephone Operator Education"—Notice of 20th Meeting—Tuesday, April 19, 1977—8:00 a.m.—Valley Forge Hilton, 251 West DeKalb Pike, King of Prussia, PA 19406.

AGENDA

1. Call to Order; Chairman's Report.
2. Confirmation of Secretary; Adoption of Agenda.
3. Acceptance of SC-68 Summary Records.
4. Review and approval of final report.
5. New business.
6. Establishment of next meeting date.

A. Newell Garden, Chairman, SC-68, Raytheon Company, 141 Spring Street, Lexington, Mass. 02173, Phone: (617) 862-6600 (Ext. 414).

Special Committee No. 70, "Minimum Performance Standards (MPS)—Marine Loran-C Receiving Equipment"—Notice of 1st Meeting—Wednesday, April 20, 1977—8:00 a.m.—Valley Forge Hilton, 251 West DeKalb Pike, King of Prussia, PA 19406.

AGENDA

1. Call to Order; Introduction of Moderator.
2. Introduction of Attendees; Appointment of Secretary.
3. Adoption of Agenda.
4. Discussion on Terms of Reference. (Paper 40-77/SC 70-1.)
5. Discussion on Committee Organization.
6. Discussion on Committee Priorities.
7. Discussion of Problem Areas.
8. Acceptance of Work Assignments.
9. Other Business.
10. Review of Terms of Reference.
11. Establishment of Meeting Schedule.

To comply with advance notice requirements of Public Law 92-463, a comparatively long interval of time occurs between publication of this notice and the actual meeting. Consequently, there is no absolute certainty that the listed meeting room will be available on the day of the meeting. Those planning to attend the meeting should report to the room listed in the notice. If a room substitution has been made, the new meeting room location will be posted at the room listed in this notice.

Agendas, working papers, and other appropriate documentation for the meeting is available at that meeting. Those desiring more specific information may contact either the designated Chairman or the RTCM Secretariat. (Phone (202) 632-6490.)

The RTCM has acted as a coordinator for maritime telecommunications since its establishment in 1947. Problems are studied by Special Committees and the final report is approved by the RTCM Executive Committee. All RTCM meetings are open to the public. Written statements are preferred but by previous arrangement, oral presentations will be permitted within time and space limitations.

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

INTER-CREST MARITIME & ASSOCIATES

Order of Revocation

By letter dated January 11, 1977, Mr. Alfonso Villacres, President, Inter-Crest Maritime & Associates, 427 W. 5th Street, Suite 424, Los Angeles, California 90013 was advised by the Federal Maritime Commission that Independent Ocean Freight Forwarder License No. 1650 would be automatically revoked or suspended unless a valid surety bond was filed with the Commission on or before March 26, 1977.

Section 44(c), Shipping Act, 1916, provides that no independent ocean freight forwarder license shall remain in force unless a valid bond is in effect and on file with the Commission. Rule 510.9 of Federal Maritime Commission General Order 4, further provides that a license will be automatically revoked or suspended for failure of a licensee to maintain a valid bond on file.

Inter-Crest Maritime & Associates has failed to furnish a valid surety bond.

By virtue of authority vested in me by the Federal Maritime Commission as set forth in Manual of Orders, Commission Order No. 201.1 (Revised) Section 5.01 (c) dated June 30, 1975;

It is ordered, That Independent Ocean Freight Forwarder License No. 1650 issued to Inter-Crest Maritime & Associates be returned to the Commission for cancellation.

It is further ordered, That Independent Ocean Freight Forwarder License No. 1650 be and is hereby revoked effective March 26, 1977.

It is further ordered, That a copy of this Order be published in the FEDERAL REGISTER and served upon Inter-Crest Maritime & Associates.

LEROY F. FULLER,
Director, Bureau of Certification and Licensing.

[Independent Ocean Freight Forwarder License No. 581]

INTERNATIONAL SERVICES, INC.

Order of Revocation

By letter dated February 24, 1977, Mr. Donald D. Klinger, President, International Services, Inc., P.O. Box 1643, Indianapolis, Indiana 46204 was advised by the Federal Maritime Commission that Independent Ocean Freight Forwarder License No. 581 would be automatically revoked or suspended unless a valid surety bond was filed with the Commission on or before March 25, 1977.

Section 44(c), Shipping Act, 1916, provides that no independent ocean freight forwarder license shall remain in force unless a valid bond is in effect and on file with the Commission. Rule 510.9 of Federal Maritime Commission General Order 4, further provides that a license will be automatically revoked or suspended for failure of a licensee to maintain a valid bond on file.

International Services, Inc. has failed to furnish a valid surety bond.

By virtue of authority vested in me by the Federal Maritime Commission as set forth in Manual of Orders, Commission Order No. 201.1 (Revised) § 5.01(c) dated June 30, 1975;

It is ordered, That Independent Ocean Freight Forwarder License No. 581 issued to International Services, Inc. be returned to the Commission for cancellation.

It is further ordered, That Independent Ocean Freight Forwarder License No. 581 be and is hereby revoked effective March 25, 1977.

It is further ordered, That a copy of this Order be published in the FEDERAL REGISTER and served upon International Services, Inc.

LEROY F. FULLER,
Director, Bureau of Certification and Licensing.

FEDERAL POWER COMMISSION

[Docket No. CI76-358]

ALMA ORINGDERFF

Order Setting Date for Hearing on Application for Abandonment

MARCH 25, 1977.

On January 27, 1976, Alma Oringderff (Oringderff) [1] filed an application pursuant to Section 7(b) of the Natural Gas Act requesting authorization to abandon a sale of casinghead gas to Northern Natural Gas Company (Northern) from the R.H.T. Morrow and Horizon Cleveland Fields, Ochiltree County, Texas R.R. District No. 10, made under a contract dated June 19, 1964.[2]

Oringderff states that she ceased service to Northern in December 1970, because continued operations had become uneconomical.

Under the terms of the aforementioned contract, Oringderff agreed to sell up to 700 Mcf of casinghead gas per day to Northern for delivery at a central point at a life of contract rate of 15.0 cents per MCf at 14.65 psia. In order to permit delivery into Northern's line, it was necessary for Oringderff to compress the gas. Petitioner alleges that the compressor consumed an excessive amount of gas for fuel, and as a result, production became economically unfeasible. Oringderff then terminated service to Northern in December 1970, removed and sold the compressor, and abandoned in place the line connected to the compressor. Oringderff avers that sales volumes averaged 1,724 Mcf per month during the final 12 months of deliveries.

Petitioner states that if abandonment authorization is granted, she will sell intrastate the approximately 162,000 Mcf of remaining gas resreves to Phillips Petroleum Company. Oringderff estimates that the deliverability rate would be about 3,000 Mcf per month. The gas would be sold under a percentage of proceeds contract with Oringderff guaranteed a minimum rate of 50.0 cents per Mcf.

Notice of Oringderff's application was published on February 13, 1976, and appeared in the FEDERAL REGISTER on February 23, 1976, at 41 FR 7997. No petitions to intervene have been filed.

We find that a hearing is desirable to determine, on the record, whether the present or future public convenience or necessity will be served by permitting the abandonment of service proposed herein. To insure the development of a complete record in this proceeding we are directing Oringderff to submit evidence and testimony concerning but not limited to:

1. The June 19, 1964, gas sales contract between Oringderff and Northern.
2. An evidentiary presentation detailing the additional costs and/or prices which would be required to maintain the production of the remaining producible reserves for the interstate market with full documentation of the unit price at which such undertaking would be feasible.
3. A detailed analysis and presentation of the remaining reserves in the subject wells, including the results of all tests conducted and a complete explanation of the technical data relied upon in arriving at the reserve estimate.
4. An explication by Oringderff of her reasons for not seeking to utilize the special relief procedures available to her under Section 2.76 of the Commission's General Policy and Interpretations in order to obtain an economically compensatory rate.
5. A presentation of the intended disposition of the gas reserves in the event that the proposed abandonment is approved.
6. The monthly rate of production from the subject wells for the years 1968, 1969, and 1970.
7. The anticipated monthly rate of production from the subject wells if service to Northern is resumed.
8. The proposed gas sales contract between Oringderff and Phillips.

The Commission finds: It is in the public interest to set Oringderff's abandonment application for hearing.

The Commission orders: (A) Pursuant to the authority of the Natural Gas Act, particularly Sections 4, 5, 7, 14, and 16 thereof, the Commission's Rules of Practice and Procedure, and the Regulations under the Natural Gas Act (18 CFR Chapter 1), a public hearing shall be held commencing May 3, 1977, at 10 a.m. (e.s.t.) in a hearing room of the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, to determine whether the present or future public convenience or necessity permit the proposed abandonment.

(B) A Presiding Administrative Law Judge to be designated by the Chief Administrative Law Judge for that purpose (See Delegation of Authority, 18 CFR 3.5(d)) shall preside at the hearing in this proceeding, with authority to establish and change all procedural dates, and to rule on all motions (with the sole exception of petitions to intervene, motions to consolidate and sever, and motions to dismiss, as provided for in the Rules of Practice and Procedure).

(C) Oringderff shall file her direct testimony and evidence on or before April 19, 1977. All testimony and evidence shall be served upon the Presiding Administrative Law Judge, the Commission Staff, and all parties to this proceeding.

(D) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.77-9710 Filed 3-31-77;8:45 am]

[Docket No. RP75-107]

GRANITE STATE GAS TRANSMISSION, INC.

Order Approving Rate Settlement

MARCH 24, 1977.

On March 4, 1976, the Presiding Administrative Law Judge certified to the Commission for consideration and disposition a proposed Stipulation and Agreement which, if approved, would resolve all issues in the captioned proceeding. For the reasons set forth below the Commission finds the proposed settle-

[1] Oringderff holds a small producer certificate issued on September 1, 1971, in Docket No. CS71-557.

[2] Additional information concerning the abandonment application was filed by Oringderff on March 16, 1976, and by Phillips Petroleum Company on March 12 and May 25, 1976.

V 42 63 APR 1 7 7 UMI

ment agreement is reasonable and should be approved.

This proceeding originated when Granite State Gas Transmission, Inc. (Granite State) tendered for filing certain revised tariff sheets on May 30, 1975, seeking an increase of approximately $218,000 annually in revenues for jurisdictional natural gas sales and services. Granite State's proposed rate increase was suspended for the maximum statutory period of five months and set for hearing by Commission order issued June 18, 1975. In its order of June 18, the Commission urged all parties to consider the cost classification, allocation, and rate design policies expressed in Opinion No. 671, "United Gas Pipeline Company," 50 FPC 1348 (1973). Thereafter on November 18, 1975, Granite State submitted revised rates purportedly in compliance with "United," *supra*. The revised rates were rejected by the Commission on December 15, 1975, on the ground that the proposed revision to the cost classification and allocation method resulted in an increase in the company's claimed jurisdictional cost of service. Rejection of the November 18 rates was made without prejudice to Granite State's right to refile, within 10 days, revised rates predicated upon "United" not to exceed the originally-claimed cost of service.

On December 22, 1975, Granite State filed revised rates in accordance with the order of December 15. On January 22, 1976, the Commission permitted the rates filed on December 22 to become effective as of December 1, 1975, subject to refund.

Following the conclusion of settlement discussions between Granite State and the Commission staff, the only other party to the proceeding, the proposed settlement agreement was submitted to the Presiding Administrative Law Judge on March 3, 1976, with a request for certification thereof to the Commission. Public notice of the proposed settlement was issued on March 12, 1976. Comments in support of the settlement were filed by the Commission staff on March 30, 1976. No objections or adverse comments were received.

The settlement rates are predicated upon a total cost of service of $4,929,819 as set forth in Appendix A of the settlement agreement and of this order. The settlement cost of service includes a rate of return of 8.48 percent on Granite State's net investment rate base, with a return on common equity of 14 percent. The settlement capitalization and rate of return determinants are set forth in Appendix B of the settlement and of this order. In its original filing Granite State claimed a rate of return of 9.68 percent with a return on common equity of 10.49 percent. However in developing these claimed returns, the company utilized capitalization ratios of 43.1 percent debt and 56.9 percent equity representing its own independently stated capital structure. The settlement rate of return is predicated on the capital structure and resulting capital ratios of Granite State's parent, Northern Utilities, Inc. Northern Utilities' equity ratio is only 25.77 percent. (See Appendix B). This accounts for the fact that while the overall settlement rate of return is lower than that claimed by Granite State, the common equity allowance under the settlement of 14 percent is higher than the originally-claimed equity return of 10.49 percent. The Commission finds the settlement cost of service and resulting rates are reasonable and they are accordingly approved.

Based on a review of the record in this proceeding including the settlement agreement itself and the pleadings, evidence, and comments submitted in support thereof, the Commission finds that the proposed settlement agreement represents a reasonable resolution of the issues in this proceeding in the public interest, and that the agreement should accordingly be approved and adopted, as hereinafter ordered.

The Commission orders. (A) The stipulation and Agreement certified on March 4, 1976, is incorporated herein by reference and is approved and adopted.

(B) Within 15 days from the date of this order, Granite State shall file revised tariff sheets in accordance with the settlement agreement and this order.

(C) As soon as practicable but not later than 60 days after the date of this order. Granite State shall refund all amounts collected in excess of the settlement rates, together with interest at the rate of 9 percent per annum. Granite State shall thereafter submit a report of the refunds and interest to the Commission.

(D) Upon compliance by Granite State with the terms of this order, this proceeding shall be terminated.

(E) This order is without prejudice to any findings or orders which have been made or which may hereafter be made by the Commission, and is without prejudice to any claims or contentions which may be made by the Commission, the staff or any other party or person affected by this order in any proceeding now pending or hereinafter instituted by or against Granite State or any other person or party.

(F) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[Docket No. CP77-298]

NATIONAL FUEL GAS SUPPLY CORP.

Application

MARCH 23, 1977.

Take notice that on March 15, 1977, National Fuel Gas Supply Corporation (Applicant), 308 Seneca Street, Oil City, Pennsylvania 16301, filed in Docket No. CP77-298 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing underground storage of natural gas for Connecticut Natural Gas Corporation (CNG), Elizabethown Gas Company (Elizabethtown), Lowell Gas Company (Lowell) and UGI Corporation (UGI), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to render underground storage service to the four proposed storage customers as follows (all volumes in Mcf):

Customer	Transporter	Top storage capacity	Maximum injection per day [1]	Maximum withdrawal per day [1]	Commence service	Complete service
CNG	Tennessee	1,000,000	6,667	6,667	Apr. 1, 1977	Mar. 31, 1978
Elizabethtown	Transco	1,860,000	10,000	10,000	do	Do.
Lowell	Tennessee	2,000,000	13,333	13,333	do	Do.
UGI	Columbia	2,000,000	13,333	13,333	May 1, 1977	Do.

[1] Maximum injection and withdrawal volumes are to be achieved on a best efforts basis; in its sole discretion, supply may exceed such volumes upon customer request.

Applicant states that the rate to be charged to the proposed customers is $0.4077 per Mcf of top storage capacity. Applicant further states that it has top storage capacity aggregating 59,980,000 Mcf, and that it expects to occupy a maximum of 47,880,000 Mcf of this capacity for its own storage purposes by injections during the summer of 1977. The storage service proposed in this application would occupy 6,500,000 Mcf of the 12,100,000 Mcf top storage capacity remaining, it is said, and that Applicant would continue to have available a margin to 5,600,000 Mcf top storage capacity with which to accept delivery of additional amounts of natural gas which may become available.

Applicant states that each customer has asserted that it would have gas supplies available to inject into storage during the 1977 injection season. Applicant requests authorization to commence storage service for the proposed customers promptly after April 1, 1977. It is asserted that injections must commence early in the season to allow customers the opportunity to inject the full amount of volumes to be husbanded and to afford a measure of flexibility in scheduling deliveries to storage.

Applicant states that no additional facilities are required to be constructed by it to render the proposed storage service. Applicant further states that the proposed authorization to render the underground gas storage service is needed to assist the four proposed customer companies in minimizing curtailments of their higher priority gas customers during the 1977–78 heating season.

Any person desiring to be heard or to make any protest with reference to said application should on or before April 15, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-9590 Filed 3-31-77; 8:45 am]

[Docket No. RP76-22]

SOUTH GEORGIA NATURAL GAS CO.

Order Modifying and Approving Settlement Agreement

MARCH 25, 1977.

On October 10, 1975, South Georgia Natural Gas Company (South Georgia) tendered for filing proposed changes in its FPC Gas Tariff, Original Volume No. 1, intended to provide increased revenues from jurisdictional sales of $1,563,000 annually. By order issued November 7, 1975, the Commission suspended the use of the revised tariff sheets for five months, until April 10, 1976, when they became effective, subject to refund. On September 19, 1976, South Georgia filed a Stipulation and Agreement (Agreement) as a proposed settlement of the issues in this proceeding together with a motion for approval of the agreement and for placing into effect its FPC Gas Tariff, First Revised Volume No. 1. The agreement would provide for a reduction in annual revenues of $597,940 below the rates originally proposed. For the reasons hereinafter stated, the Commission will modify the agreement and, as modified, approve it.

Public notice of the agreement was issued on September 30, 1976. No adverse comments were received.

The settlement rates are based on the settlement cost of service attached below as Appendix A and are proposed to be applied to jurisdictional sales for the period commencing April 10, 1976, for the duration of the agreement. The settlement cost of service includes a rate of return of 10.04 percent on South Georgia's net investment rate base including an allowance of 12.66 percent on common equity, and depreciation expense calculated at the rate of 3.75 percent for transmission plant, structures and equipment, and franchises and consents. The settlement cost of service and rate of return appear reasonable and are approved. In accordance with Article III of the settlement agreement, South Georgia shall be authorized to utilize the settlement depreciation rate until such time as revised in accordance with law.

Article IV of the settlement agreement provides that South Georgia shall limit its PGA filings under the terms of its tariff to semi-annual filings to be effective on January 1 and July 1 of each year. South Georgia would be permitted, however, to make special filings to track increased rates prescribed by the Commission in national rate proceedings. Article IV provides further that South Georgia shall be allowed carrying charges of 9 percent per annum or debit balances in its unrecovered purchased gas cost account and shall be required to pay interest of 9 percent on any credit balances in the account. The agreements contained in Article IV appear reasonable and are approved.

Article II 3(B) of the settlement provides for the offsetting of overpayments by a customer under one rate schedule against underpayments by that customer under another rate schedule for purposes of determining that customer's refunds. If there is a net underpayment by a customer, South Georgia will establish an account receivable for that customer and charge any underpayments to that account. Such account receivable is then to be credited with the customers' share of future refunds to be received from South Georgia's supplier, Southern Natural Gas Company.

The problem of undercollections arises because of a change in the design of South Georgia's rates which is reflected in the settlement rates proposed to be effective commencing on April 10, 1976. In its filing in this docket, South Georgia designed its rates in accordance with historical practice under which its interruptible rate I–1 was set at 1.5 cents above the G–2 general service commodity rate, and the interruptible rate I–2 was set at 2.0 cents above the G–2 commodity rate. However, the Commission staff recommended that South Georgia's I rates be established at the 100 percent load factor level of the G–2. Under the terms of the settlement, the I-1 rate is established at a level equal to the G–2 rate determined at 100 percent load factor. The I–2 rate is equal to the I–1 rate plus the historical differential of one half cent. These rates are higher than the historically designed I rates actually collected by South Georgia since April 10, 1976. South Georgia would therefore experience undercollections for interruptible service in the event the proposed settlement rates were to become effective retroactively as proposed.

The Commission finds no objection to the settlement procedure whereby the overpayments and underpayments of a customer under the G and I rate schedules are permitted to be offset for purposes of determining that customer's refund. However, the Commission is unable to approve the terms of the settle-

V 42 63 APR 1 77 UMI

ment, permitting South Georgia to offset net undercollections against unrelated supplier refunds. *FPC vs. Tennessee Gas Transmission Company*, 371 U.S. 145, 153 (1962); *Bluefield Water Works and Improvement Co. vs. Public Service Commission*, 262 U.S. 679, 694 (1923).

The Commission finds that the rate design proposed in the settlement is reasonable and should be approved. However, in the Commission's judgment, the public interest would not be served by rejecting the settlement solely because of the specified undercollection procedures. Therefore, the Commission finds it would be reasonable under the circumstances of this case to modify the terms of the settlement to provide that the change in design of South Georgia's I rates be made effective prospectively from the date of this order. South Georgia would be permitted to file revised rates for the period April 10, 1976, to the date of this order, based upon the historical rate design adjusted to the revenue levels established by the settlement cost of service plus approved PGA increases. New rates incorporating the settlement rate design would be effective from the date of this order until August 1, 1977, the effective date of South Georgia's superseding rates in Docket No. RP77-32. The above modification would have the effect of eliminating undercollections under the I rate schedules and thereby obviate the need for the settlement undercollection recovery procedures. The Commission finds that the settlement agreement should be so modified.

Based upon a review of the record in this proceeding including the settlement agreement and the pleadings, evidence, and comments submitted in support thereof, the Commission finds that the proposed settlement, as modified by this order, represents a reasonable resolution of the issues in this proceeding in the public interest and that the proposed settlement as modified, should be approved and adopted.

The Commission orders. (A) The Stipulation and Agreement filed by South Georgia September 17, 1976, is incorporated herein by reference and is approved and adopted as hereinafter modified.

(B) South Georgia shall, within 30 days of the date of this order file revised rates to be effective from April 10, 1976, until the date of this order. Such revised rates shall be based upon South Georgia's historical rate design adjusted to the revenue levels established by the settlement cost of service plus approved PGA rate increases.

(C) South Georgia shall also file within 30 days of the date of this order revised rates to be effective from the date of this order until superseded by rates made effective in accordance with law in Docket No. RP77-32. Such revised rates shall be based on the design reflected in the original settlement rates and shall be calculated in accordance with the settlement cost of service plus approved PGA rate increases.

(D) Article III (3) (B) of the settlement agreement is not approved and shall have no force or effect.

(E) Within 15 days following approval of the rates filed pursuant to paragraphs (B) and (C) above, Georgia shall refund to its jurisdictional customers all amounts collected in excess of such rates, together with interest at the rate of 9 percent per annum. South Georgia shall thereafter submit a report of the refunds and interest to the Commission.

(F) Upon compliance with the terms of this order, this proceeding shall be terminated.

(G) This order is without prejudice to any findings or orders which have been made or which may hereafter be made by the Commission, and is without prejudice to any claims or contentions which may be made by the Commission, the staff or any other party or person affected by this order in any proceeding now pending or hereinafter instituted by or against South Georgia or any other person or party.

(H) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[Docket No. E77-79]

EMERGENCY NATURAL GAS ACT OF 1977

Emergency Order

On March 25, 1977, Inexco Oil Company (Inexco), Transwestern Pipeline Company (Transwestern) and Colorado Interstate Gas Company (CIG) filed, pursuant to section 6 of the Emergency Natural Gas Act of 1977 (Act), Pub. L. 95-2 (91 Stat. 4 (1977)), an application for authorization to permit Transwestern to continue an emergency purchase under section 6 from Inexco through July 31, 1977. Subsequent to the emergency purchase, CIG will purchase the remaining reserves from Inexco at the applicable area or national rate prescribed by the Federal Power Commission (FPC), and Inexco and CIG will compromise and settle pending litigation regarding certain gas reserves. For the reasons set forth below, I find that Transwestern may continue this purchase from Inexco and authorize and approve the same and authorize the transportation of this gas for Transwestern.

On or about March 11, 1977, Inexco and CIG executed formal documents providing for the sale and dedication of Inexco's interest in the Madden Field, Fremont County, Wyoming, to CIG. This sale and dedication was subject to Inexco's right to make an emergency sale under the Act. In addition, Inexco and CIG agreed to compromise and settle pending litigation regarding gas reserves in the Madden Field area. On March 11, 1977, Inexco and Transwestern executed an agreement for the purchase of available gas supplies from Inexco's interest in the Madden Field (approximately 15,000 Mcfd).

Contemporaneously with the execution of the contract with Inexco, and at all times prior to such execution, Transwestern reasonably believed that it was qualified to make such purchase under Order No. 6 (February 22, 1977). Transwestern commenced receiving gas from Inexco on March 16, 1977. On or about March 17, 1977, Transwestern was informed that certain of its customers were serving directly or indirectly any uses classified in FPC Priorities 4 through 9 (18 CFR 2.78(a)(1)(iv)-(ix)), and the information obtained indicated that such customers may have been serving uses specified in Priorities 4 through 9 prior to March 11, 1977. Upon receipt of this information, Transwestern ceased receipt of Inexco's gas and notified the Administrator of the foregoing circumstances.[1]

This application presents the question of whether a pipeline, which executed an emergency contract pursuant to section 6 of the Act on the basis of information contemporaneously available to it that it qualified to make such a purchase under Order No. 6, should be permitted to continue to make such purchase where (i) subsequent information indicates that contemporaneously with the execution of the contract that certain of its customers were serving uses prohibited by Order No. 6 and (ii) the long-term dedication of the gas to another interstate pipeline is subject to such emergency sale. Based on the circumstances and facts presented in this case, I find that Transwestern should be permitted to continue the purchase from Inexco. Transwestern reasonably relied upon information contemporaneously available to it when it executed the subject contract. Furthermore, CIG will gain an additional long-term supply of gas if this sale is approved which it might not otherwise obtain.

[1] Transwestern's letter regarding this matter was received on March 28, 1977.

Order No. 6 prescribed a rule of reasonableness not an absolute rule. The circumstances at the time of the execution of the contract are to be looked at to determine if a pipeline's execution of that contract is reasonable in light of the information then practicably available to it. "Columbia Gas Transmission Corporation," Docket No. E77-71 (March 24, 1977). Certain transactions have been authorized where no written contract had been executed but substantial detrimental reliance on the pipeline's eligibility to purchase gas under Order No. 6 has been demonstrated prior to the time the pipeline determined that it was not eligible to make a purchase under Order No. 6. El Paso Natural Gas Company, Docket No. E77-53 (March 10, 1977); Northern Natural Gas Company, Docket No. E77-49 (March 7, 1977); Natural Gas Pipeline Company of America, Docket No. E77-48 (March 4, 1977); United Gas Pipe Line Company, Docket No. E77-33 (March 2, 1977); Colorado Interstate Gas Company, Docket No. E77-31 (February 28, 1977). Transwestern has satisfied these criteria and is hereby authorized to continue to purchase this gas from Inexco notwithstanding Order No. 6.

Transwestern will purchase these supplies at a price of $2.25 per MMBtu inclusive of all state and local taxes and other adjustments. I find this price to be fair and equitable in accordance with Order No. 2.

This gas will be delivered to Transwestern through the existing pipeline facilities of CIG, Northwest Pipeline Corporation (Northwest) and El Paso Natural Gas Company (El Paso). Transwestern shall submit all relevant information regarding transportation charges to the Administrator. Pursuant to section 6(a) of the Act, I hereby authorize Transwestern to continue to purchase gas from Inexco. This authorization is conditioned upon CIG and Inexco submitting to the Administrator and the FPC, within seventy-two (72) hours of this order, a binding contract for the sale of this gas by Inexco to CIG subsequent to July 31, 1977, at a price not to exceed the applicable area or national rate prescribed by the FPC. Pursuant to section 6(c)(1), I authorize CIG, Northwest, and El Paso to transport this gas for Transwestern.

Transwestern shall submit weekly reports as required by Order No. 4.

This order is issued pursuant to the authority delegated to me by the President in Executive Order No. 11969 (February 2, 1977), and shall be served upon Transwestern, Inexco, CIG, Northwest, and El Paso. This order shall also be published in the FEDERAL REGISTER.

This order and authorization granted herein are subject to the continuing authority of the Administrator under Pub. L. 95-2 and the rules and regulations which may be issued thereunder.

RICHARD L. DUNHAM,
Administrator.

MARCH 28, 1977.

[Docket Nos. ER76-149, E-9537]

PUBLIC SERVICE COMPANY OF INDIANA, INC.

Extension of Time

MARCH 28, 1977.

On March 17, 1977, Public Service Company of Indiana, Inc., filed a motion for an extension of time to April 4, 1977, to respond to the motion for summary dismissal filed by Commission Staff Counsel on March 2, 1977, in the captioned proceeding. The motion states that other parties have been contacted and have no objection to the extension of time.

Upon consideration, notice is hereby given that an extension of time is granted to and including April 4, 1977, for filing responses to the March 2 Staff motion.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-9929 Filed 3-31-77;8:45 am]

FEDERAL RESERVE SYSTEM

AMERICAN, INC.

Order Approving Formation of Bank Holding Company and Retention of Credit-Related Insurance Activities

American, Inc., Oswego, Kansas ("Applicant") has applied for prior approval, pursuant to section 3(a)(1) of the Bank Holding Company Act of 1956 (12 U.S.C. 1842(a)(1)) and § 225.3(a) of Regulation Y (12 CFR 225.3(a)), to become a bank holding company through the acquisition of 85.2 percent or more of the voting shares of The American State Bank, Oswego, Kansas ("Bank"). Applicant also has applied, pursuant to section 4(c)(8) of the Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of Regulation Y (12 CFR 225.4(b)(2)), for permission to retain its credit-related insurance agency activities which presently are conducted on the premises of Bank. Such activities have been determined by the Board of Governors of the Federal Reserve System to be closely related to banking (12 CFR 225.4(a)(9)).

The applications have been processed by the Federal Reserve Bank of Kansas City pursuant to authority delegated by the Board of Governors under provisions of § 265.2(f)(22) and (32) of Rules Regarding Delegation of Authority.

Notice of the applications, affording opportunity for interested persons to submit comments and views, has been duly published (42 FR 8214 (1977)). The time for filing comments has expired, and this Reserve Bank has considered the applications and all comments received in light of the factors set forth in section 3(c) of the Act (12 U.S.C. 1842(c)) and the considerations specified in section 4(c)(8) of the Act (12 U.S.C. 1843(c)(8)).

Applicant was incorporated in January 1976 for the purpose of conducting general insurance agency activities on the premises of Bank. However, Applicant will divest itself of any noncredit-related insurance business after approval of its application to become a bank holding company and prior to consummation of the proposed transaction. With total deposits of $4.1 million,[2] Bank is the ninth largest of ten banks in the relevant banking market, which is approximated by Labette County and western Cherokee County in southeastern Kansas. Bank has 3.6 percent of the total deposits of commercial banks in the relevant market. Upon acquisition of Bank, Applicant would control the 458th largest bank in Kansas holding .05 percent of total deposits in commercial banks in the State.

Inasmuch as this proposal represents a restructuring of existing ownership of Bank, and since Applicant has no present operating banking subsidiaries, consummation of the proposal would eliminate neither existing nor potential competition, nor does it appear that there would be any adverse effects on any bank in the area. Thus, competitive considerations are consistent with approval.

The future prospects of Applicant are dependent upon its credit-related insurance sales and upon the financial resources of Bank. Applicant proposes to service its debt over a 12-year period through dividends received from Bank, commissions generated through Applicant's credit-related insurance sales, and tax benefits derived from filing a consolidated return. In light of past and projected earnings of Bank and past commissions generated through credit-related insurance activities, it appears that Applicant will have the necessary financial flexibility to meet its annual debt servicing requirements and to maintain an adequate capital position for Bank. Therefore, considerations relating to banking factors are consistent with approval of the application to form a bank holding company.

Considerations relating to the convenience and needs of the community to be served are consistent with approval. This Reserve Bank, therefore, finds that the proposed transaction is in the public interest and that the application should be approved.

In conjunction with its proposed formation of a bank holding company, Applicant also proposes to continue to act as an agent for the sale of credit-related insurance on the premises of Bank. Applicant currently operates a general insurance agency business on Bank's premises but will divest itself of any noncredit-related insurance business prior to consummation of the acquisition of Bank. This proposal would assure the residents of the Oswego area of the con-

[2] All banking data are as of December 31, 1975.

V4263 APR 1 77 UMI

tinued availability of a convenient source of credit-related insurance, a factor which this Reserve Bank regards as being in the public interest. There is no evidence in the record indicating that consummation of the proposal would result in any undue concentration of resources, unfair competition, conflicts of interests, unsound banking practices or other adverse effects on the public interest.

Based on the foregoing and other considerations in the record, this Reserve Bank has determined that the considerations affecting competitive factors under section 3(c) of the Act and the balance of the public interest factors required to be considered under section 4(c)(8) of the Act favor approval of both of Applicant's proposals.

On the basis of the record, the applications are approved for the reasons summarized above. The acquisition of Bank shall not be consummated (a) before the thirtieth day following the date of this order or (b) later than three months after the effective date of this order, unless such period is extended for good cause by the Board of Governors or by the Federal Reserve Bank of Kansas City pursuant to delegated authority. The determination as to Applicant's insurance activities is subject to the conditions set forth in § 225.4(c) of Regulation Y and to the Board's authority to require reports by, and make examinations of, holding companies and their subsidiaries and to require such modification or termination of the activities of a bank holding company or any of its subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the Act and the Board's regulations and orders issued thereunder, or to prevent evasion thereof.

WILBUR T. BILLINGTON,
Senior Vice President.

MARCH 23, 1977.

[FR Doc.77-9739 Filed 3-31 77;8:45 am]

BANKAMERICA CORP.

To Continue To Engage in Data Processing Activities

BankAmerica Corporation, San Francisco, California, has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to continue to engage in date processing activities for its subsidiaries and a group of insurance companies through its wholly-owned subsidiary, FinanceAmerica, Allentown, Pennsylvania. Notice of the application was published on February 1, 1977, in "The Morning Call," a newspaper circulated in Allentown, Pennsylvania.

Applicant states that the proposed subsidiary would engage in the activities of (1) providing bookkeeping and data processing activities for its direct and indirect subsidiaries, and (2) storing and processing banking, financial, or related economic data for certain insurance companies. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question should be accompanied by a statement summarizing the evidence the person requesting the hearing proposes to submit or to elicit at the hearing and a statement of the reasons why this matter should not be resolved without a hearing.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of San Francisco.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than April 22, 1977.

Board of Governors of the Federal Reserve System, March 25, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

GENERAL ACCOUNTING OFFICE

REGULATORY REPORTS REVIEW

Receipt of Report Proposals

The following request for clearance of reports intended for use in collecting information from the public was received by the Regulatory Reports Review Staff, GAO, on March 24, 1977. See 44 U.S.C. 3512 (c) and (d). The purpose of publishing this notice in the FEDERAL REGISTER is to inform the public of such receipt.

The notice includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number, if applicable; and the frequency with which the information is proposed to be collected.

Written comments on the proposed NRC request are invited from all interested persons, organizations, public interest groups, and affected businesses. Because of the limited amount of time GAO has to review the proposed request, comments (in triplicate) must be received on or before April 19, 1977, and should be addressed to Mr. John M. Lovelady, Acting Assistant Director, Regulatory Reports Review, United States General Accounting Office, Room 5033, 441 G Street NW., Washington, D.C. 20548.

Further information may be obtained from Patsy J. Stuart of the Regulatory Reports Review Staff, 202-275-3532.

NUCLEAR REGULATORY COMMISSION

NRC requests an extension no change clearance of Form NRC-4, Occupational External Radiation Exposure History and 10 CFR 20.102. Form NRC-4 is provided for use by NRC licensees to record an employee's radiation exposure history. As required by 10 CFR 20.102, it must be completed whenever the licensee proposes to expose an employee to a dose exceeding the limits of 10 CFR 20.101(a). Frequency of the use of Form NRC-4 is on occasion. The occupational exposure data on Form NRC-4 are maintained by licensees. NRC estimates that 600 licensees prepare and maintain on file, subject to inspection, an average of 4 forms per licensee annually and respondent burden is estimated to average 1 hour per form.

NRC requests an extension no change clearance of Form NRC-5, Current Occupational External Radiation Exposure and 10 CFR 20401. Form NRC-5 is used by licensees to record the radiation exposures of all individuals for whom personnel monitoring is required under 10 CFR 20.202. The doses entered on the forms are for periods of time not exceeding one calendar quarter. Frequency of the use of Form NRC-5 is on occasion. The exposure data on Form NRC-5 are maintained by licensees. NRC estimates that 6,475 licensees provide personnel monitoring to about 313,000 individuals annually and respondent burden is estimated to average 9⅔ hours annually per respondent.

NORMAN F. HEYL,
Regulatory Reports, Review Officer.

[FR Doc.77-9831 Filed 3-31-77;8:45 am]

REGULATORY REPORTS REVIEW

Notice of Receipt of Report Proposal

The following request for clearance of a report intended for use in collecting information from the public was accepted by the Regulatory Reports Review Staff, GAO, on March 28, 1977. See 44 U.S.C. 3512 (c) and (d). The purpose of publishing this notice in the FEDERAL REGISTER is to inform the public of such receipt.

The notice includes the title of the request received; the name of the agency sponsoring the proposed collection of information; the agency form number, if applicable; and the frequency with which the information is proposed to be collected.

Written comments on the proposed NRC request are invited from all interested persons, organizations, public interest groups, and affected businesses. Because of the limited amount of time GAO has to review the proposed request, comments (in triplicate) must be received on or before April 19, 1977, and should be addressed to Mr. John M. Lovelady, Acting Assistant Director, Regulatory Reports Review, United States General Accounting Office, Room 5033, 441 G Street NW., Washington, D.C. 20548.

Further information may be obtained from Patsy J. Stuart of the Regulatory Reports Review Staff, 202-275-3532.

NUCLEAR REGULATORY COMMISSION

The NRC set the effective date of this Order as March 28, 1977, with a May 25, 1977, reporting deadline for the reporting and recordkeeping requirements contained therein. However, this reporting deadline is contingent upon NRC's compliance with 44 U.S.C. 3512, which precludes the collection of information from ten or more persons until the Comptroller General has had the opportunity to advise that the information

is not presently available from other Federal sources and that the proposed plans or forms are consistent with the provisions of section 3512. This notice represents the beginning of the GAO review.

NRC requests clearance of Requirements for Physical Protection of Licensed Activities in Nuclear Power Reactors Against Industrial Sabotage, 10 CFR 73.55 and 73.70(c). Information in physical security plans, or amended physical security plans, submitted pursuant to 10 CFR 73.55 is reviewed by the NRC to determine whether the general performance requirements of § 73.55(a) and other requirements of § 73.55 will be satisfied by the plan and whether it may be necessary to impose additional requirements. The register of visitors required by § 73.55(d)(6) will be subject to inspection by the NRC staff. NRC estimates that 47 licensees authorized to operate a nuclear power plant will submit amended physical security plans, and approximately four new licensees are expected annually. Respondent burden to prepare an amended physical security plan is estimated at 3,120 hours per response. The estimated annual burden for maintaining the register of visitors is about 50 hours per respondent.

JOHN M. LOVELADY,
Acting Assistant Director, Regulatory Reports Review.

GENERAL SERVICES ADMINISTRATION

REGIONAL PUBLIC ADVISORY PANEL ON ARCHITECTURAL AND ENGINEERING SERVICES

Meeting

MARCH 24, 1977.

Pursuant to Pub. L. 92-463, notice is hereby given of a meeting of the Regional Public Advisory Panel on Architectural and Engineering Services, Region 3, April 21 and 22, 1977, from 9 a.m. to 4 p.m., Room 5651, GSA Regional Office Building, Seventh and D Streets SW., Washington, D.C. The meeting will be devoted to the initial step of the procedures for screening and evaluating the qualifications of architect-engineers under consideration for selection to furnish professional services for the proposed Northside Computer Center Renovation, Central Intelligence Agency Headquarters Building, McLean, Virginia. The meeting will be opened to the public.

JOHN F. GALUARDI,
Regional Administrator.

[FR Doc.77-9693 Filed 3-31-77;8:45 am]

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Health Care Financing Administration

ALTERNATE PROFESSIONAL STANDARDS REVIEW ORGANIZATIONS

Public Hearings

Pursuant to the "Regulatory Policies" of the Secretary of the Department of Health, Education and Welfare (41 FR 34811, August 17, 1976) and in accordance with an approved Regulation Development Plan, it has been determined that public hearings on alternate Professional Standards Review Organizations (PSROs) are appropriate prior to the publication of proposed rules.

Notice is hereby given that public hearings will be held to aid the Department in obtaining a broad level of input for the development of proposed rules on criteria for establishing organizations which may qualify to become PSROs under section 1152(b)(1)(B) of the Social Security Act (42 U.S.C. 1320c-1(b)), where organizations composed of physicians meeting the requirements of section 1152(b)(1)(A) of the Act are not available. Such nonphysician composed organizations have been termed "alternate PSROs" by the Department. Regulations establishing the criteria and other requirements are a prerequisite to the designation of alternate PSROs under section 1152(b)(1)(B). Alternate PSRO Public Hearings have been planned as follows:

APRIL 20, 1977, 9:30 A.M.–5 P.M.

Sheraton Baton Rouge Hotel, 4728 Constitution (off Interstate 10 at College) Baton Rouge, Louisiana.

APRIL 28, 1977, 9:30 A.M.–5 P.M.

Federal Office Building, 219 Dearborn Street, Room 1220, Chicago, Illinois.

MAY 5, 1977, 3 P.M.–7 P.M.

San Diego County Medical Society Meeting Room, 3702 Ruffin Road, San Diego, California.

MAY 6, 1977, 11 A.M.–5 P.M.

Public Health Building, 101 Grove Street, Room 300, San Francisco, California.

Respective DHEW Regional Offices are coordinating hearing arrangements.

Public hearings on alternate PSROs are directed at those geographic regions where, to date, there exists little or no formal physician interest to sponsor the preferred type of PSRO as specified under section 1152(b)(1)(A) of the Social Security Act. If, at a later time, there is a need to conduct additional public hearings in other geographic regions where physician organizations have not formed PSROs, the Department will consider appropriate hearing sites and publish an advance notice of any such hearings.

PURPOSE OF THE HEARINGS

Public hearings on alternate PSROs will be an integral part of the regulation development process. Such hearings will assist the Department in reaching as many concerned individuals, organizations, and potentially affected areas as possible, regarding the development of criteria for establishing alternate PSROs.

ALTERNATE PSRO PUBLIC HEARING PROCEDURES

1. These hearings, open to the public, are divided into two segments—a scheduled witness session and an unscheduled witness session.

2. The scheduled witness session will be to hear witnesses who have notified the appropriate Regional Office PSRO Branch Chief in the Division of Quality and Standards, DHEW, of their intent to present testimony at least five days prior to the hearing date.

3. The unscheduled witness session will be conducted under an "open-mike" format, whereby any attendee will be allowed to testify without prior notice to DHEW on a first come basis.

4. Unscheduled witnesses will be asked to sign up on the sheets provided at the witness tables at the hearing room door. These witnesses will be called in the order they signed up, subject only to a time limit and order rulings from the moderator.

5. The exact time limit for unscheduled witnesses will be announced at the beginning of the session and will depend on the number of witnesses who wish to testify.

6. Each witness may be asked questions from the hearing moderator and the members of the Federal resource panel.

7. All witnesses are encouraged to submit written statements or exhibits in addition to oral testimony. Written statements will carry the same weight as oral presentations and will be made part of the hearing record. Written material should be handed to the stenographer, and it should be clearly marked with the name and address of the witness.

8. Witnesss are requested to summarize their written testimony when making an oral presentation. A court stenographer will incorporate written testimony into the record.

9. Scheduled witnesses should generally be prepared to keep their presentations limited to 20 minutes; however, time allotted may be reduced if necessary to accommodate all scheduled witnesses.

BACKGROUND INFORMATION ON ALTERNATE PSROs.

Given the possibility that there may be no qualified physician organizations as specified under section 1152(b)(1)(A) of the Act in some of the designated areas by January 1, 1978, the Department must determine eligibility criteria which will be used in designating alternate PSROs. Under section 1152(c) of the Act (42 U.S.C. 1320-1(c)), on January 1, 1978, the Secretary may commence designating qualified organizations other than the statutorily preferred type of physician organizations designated under section 1152(b)(1)(A) of the Act to serve as PSROs.

Beginning on this date, the Secretary is authorized to designate as PSROs, as provided in section 1152(b)(1)(B) of the Act:

• • • such other public, nonprofit private or other agency or organization, which the Secretary determines, in accordance with criteria prescribed by him in regulations, to be of professional competence and otherwise suitable;

Section 1152(b)(1)(B) of the Social Security Act and the Senate Finance Committee Report (No. 92-1230, 92nd Congress, 2nd Session, 1972) offer some assistance in determining appropriate eligibility criteria for selecting alternate PSROs, as follows:

V 4263 APR 1 77 UMI

(1) Each alternate PSRO must be a "• • • public, nonprofit private, or other agency or organization • • •" (Section 1152(b)(1)(B) of the Social Security Act.)

(2) The alternate organization must "be of professional competence" (Section 1152(b)(1)(B) of the Social Security Act.)

(3) The Secretary may seek alternative applicants from "among other medical organizations, State and local health departments, medical schools, and failing all else, carriers, intermediaries or other health insurers" (Senate Finance Committee Report No. 92-1230 pp. 259-260.)

(4) Each alternate organization must possess the willingness and capability to perform "in an effective, timely and objective manner and at a reasonable cost, the duties, functions and activities of a Professional Standards Review Organization • • •" (Section 1152(b)(2) of the Social Security Act.)

In response to a request made by the National Professional Standards Review Council, the formation and responsibilities of which are mandated in section 1163 of the Social Security Act, the Department has drafted a preliminary policy paper concerning alternate PSROs. Although this paper suggests possible criteria which could be used to designate alternate PSROs, it should not be interpreted to represent the Department's final position and policies concerning alternate PSROs. Public input may cause substantial revision in the views developed by the Department thus far. Those parties interested in securing a copy of this paper should contact either Michael J. Goran, M.D., Director, Bureau of Quality Assurance, Room 16A-55, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857; or the appropriate Regional Office PSRO Branch Chief, Division of Quality and Standards, DHEW.

The Department has developed the following preliminary criteria which could be used to designate alternate PSROs:

I. Each alternate PSRO must not make a profit (i.e., reimbursement for more than the actual cost) from its PSRO activities.

II. No organized medical society or association or organization "controlled" by such organizations can be designated an alternate PSRO.

III. Each alternate PSRO must have or demonstrate the capability to obtain the services of individuals with medical expertise to competently perform review activities.

IV. Each alternate PSRO must have the capability to adequately service the PSRO area.

V. Each alternate PSRO must not have inherent conflicts of interest that affect its role as a reviewer of health care.

These potential criteria should not be interpreted as definitive Department policy but rather as a preliminary attempt to stimulate discussion and interest in this area of concern. The Department invites public comment on these tentative criteria for establishing alternate PSROs. Moreover, the Department desires to solicit additional or alternative potential criteria which could supplement, complement and/or replace those suggested above and which will ensure that organizations designated by the Secretary as alternate PSROs could function effectively in this capacity.

Attendance at the April 20, April 28, May 5 and May 6 hearings is open to the interested public, but limited to the space available. For further information concerning these hearings contact either

Kenneth Schneider, M.D., PSRO Branch Chief, DHEW, Region VI, 1220 Main Tower Building, Room 1725, Dallas, Texas 75202; Telephone (214-655-3005);

Mr. Robert Goodnow, PSRO Branch Chief, DHEW, Region V, 300 South Wacker Drive, Room 3300, Chicago, Illinois 60607; Telephone (312-866-3643); or

Arnold Milstein, M.D., PSRO Branch Chief, DHEW Region IX, United Nations Plaza, 50 Fulton Street, Room 308, San Francisco, California 94102; Telephone (415-556-8700).

Dated: March 28, 1977.

DON WORTMAN,
Acting Administrator, Health Care Financing Administration.

Food and Drug Administration

[Doc. No. 76N-0231]

HESS & CLARK

Furaltadone (NF-260); Withdrawal of Approval of New Animal Drug Application

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration withdraws an approval for furaltadone (NF-260).

DATES: Effective April 11, 1977.

FOR FURTHER INFORMATION CONTACT:

David P. Ducharme, Bureau of Veterinary Medicine (HFV-140), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857, 301-443-2280.

SUPPLEMENTARY INFORMATION: In a notice published in the FEDERAL REGISTER of August 17, 1976 (41 FR 34891), the Director of the Bureau of Veterinary Medicine offered an opportunity for a hearing on the proposal to withdraw approval of certain new animal drug applications (NADA's): No. 14-283, Hess & Clark, Division of Rhodia, Inc., 7th and Orange St., Ashland, OH 44805, and Nos. 12-738 and 65-059, Eaton Laboratories, Division of Morton-Norwich Products, Inc., P.O. Box 181, Norwich, N.Y. 13815, for the use of furaltadone (NF-260) in food-producing animals. The basis was that new evidence not available when the applications were approved, evaluated together with the evidence available at the time of approval, shows that furaltadone is not shown to be safe for use under either the approved or currently labeled conditions of use.

In FR Doc. 76-23620, also in the FEDERAL REGISTER of August 17, 1976 (41 FR 34884), the Director proposed to revoke the appropriate provisions of sections of Chapter I of Title 21 of the Code of Federal Regulations (CFR). Holders of approved NADA's were given until September 16, 1976 to submit requests for a hearing in accordance with § 514.200 (21 CFR 514.200), giving the reasons why approval of the applications should not be withdrawn and providing a well-organized and full-factual analysis of the scientific and other investigational data such holder would be prepared to provide in support of its opposition to the Director's proposal. The time for requesting a hearing and submitting data was subsequently extended to November 16, 1976.

Hess & Clark, Division of Rhodia, Inc., holder of NADA 14-283 did not file a written appearance of election as provided by said notice. The failure to file such an appearance constitutes election not to avail itself of the opportunity for a hearing.

The Director of the Bureau of Veterinary Medicine, under the Federal Food, Drug, and Cosmetic Act (section 512, 82 Stat. 343-351 (21 U.S.C. 360b)) and under authority delegated to the Commissioner (21 CFR 5.1) and redelegated to the Director of the Bureau of Veterinary Medicine (21 CFR 5.29), finds, on the basis of new evidence not available when the applications were approved, evaluated together with the evidence available at the time of approval, that furaltadone is not shown to be safe for use under either the approved or currently labeled conditions of use.

Therefore, pursuant to the foregoing finding, approval of NADA 14-283, and all amendments and supplements applying thereto, is withdrawn, effective April 11, 1977.

Dated: March 25, 1977.

C. D. VAN HOUWELING,
Director, Bureau of Veterinary Medicine.

[FR Doc.77-9714 Filed 3-31-77;8:45 am]

[Docket No. 76N-0494]

SAFETY OF CERTAIN FOOD INGREDIENTS

Opportunity for Public Hearing

AGENCY: Food and Drug Administration (FDA).

ACTION: Notice.

SUMMARY: The Commissioner of Food and Drugs announces an opportunity for public hearing on the safety of certain glutamates and protein hydrolysates, caffeine, and lard and lard oil to determine if they are generally recognized as safe (GRAS) or subject to a prior sanction.

DATES: Requests to make oral presentations at the public hearing must be postmarked on or before May 2, 1977.

ADDRESSES: Requests to Hearing Clerk, Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT:

Corbin I. Miles, Bureau of Foods (HFF-335), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C St. SW., Washington, DC 20204 (202-472-4750).

SUPPLEMENTARY INFORMATION: The Commissioner issued, in the FEDERAL REGISTER of July 26, 1973 (38 FR 20053), a notice advising the public that an opportunity would be provided for oral presentation of data, information, and views at public hearings to be conducted by the Select Committee on GRAS Substances of the Life Sciences Research Office, Federation of American Societies for Experimental Biology (hereinafter referred to as the Select Committee), about the safety of ingredients used in food to determine if they are generally recognized as safe (GRAS) or subject to a prior sanction.

The Commissioner now gives notice that the Select Committee is prepared to conduct a public hearing on the following categories of food ingredients: Glutamates (L-glutamic acid, monoammonium L-glutamate, monopotassium L-glutamate and monosodium L-glutamate); protein hydrolysates (enzymatic casein hydrolysates, vegetable protein hydrolysates, animal protein hydrolysates other than enzymatic casein hydrolysates); caffeine; and lard and lard oil. The public hearing will provide an opportunity, before the Select Committee reaches its final conclusions, for any interested person(s) to present scientific data, information, and views on the safety of these substances, in addition to those previously submitted in writing pursuant to notices published in the FEDERAL REGISTER of July 26, 1973 (38 FR 20051, 20053) and April 17, 1974 (39 FR 13796, 13798).

The Select Committee has reviewed all the available data and information on the categories of food ingredients listed above and has reached one of the five following tentative conclusions on the status of each:

1. There is no evidence in the available information that demonstrates or suggests reasonable grounds to suspect a hazard to the public when it is used at levels that are now current or that might reasonably be expected in the future.

2. There is no evidence in the available information that demonstrates or suggests reasonable grounds to suspect a hazard to the public when it is used at levels that are now current and in the manner now practiced. However, it is not possible to determine, without additional data, whether a significant increase in consumption would constitute a dietary hazard.

3. Although no evidence in the available information demonstrates a hazard to the public when it is used at levels that are now current and in the manner now practiced, uncertainties exist requiring that additional studies be conducted.

4. The evidence is insufficient to determine that the adverse effects reported are not deleterious to the public health when it is used at levels that are now current and in the manner now practiced.

5. The information available is not sufficient to make a tentative conclusion. (This finding does not apply to the substances covered by this notice.)

The following table lists each ingredient, the Select Committee's tentative conclusion (keyed to the five types of conclusions listed above), and the available information on which the Select Committee reached its conclusions.

Substance	Select committee tentative conclusion	Scientific literature review: Order number	Scientific literature review: Cost	Animal study report: Order number	Animal study report: Cost	Other information

Lard oil (in cotton and cotton fabric dry food packaging materials).						c. Evaluation of the health aspects of tallow and stearic acid as food ingredients (SCOGS-54), submitted by FASEB.

Reports in the table with "PB" prefixes may be obtained from the National Technical Information Service, U.S. Department of Commerce, 5285 Port Royal Rd., Springfield, VA 22151.

In addition to the information contained in the documents listed in the table above, the Select Committee supplemented, where appropriate, their reviews with specific information from specialized sources as announced in a previous hearing opportunity notice published in the FEDERAL REGISTER of September 23, 1974 (39 FR 34218).

The Select Committee's tentative reports on (1) Glutamates (L-glutamic acid, monoammonium L-glutamate, monopotassium L-glutamate and monosodium L-glutamate), (2) protein hydrolysates (enzymatic casein hydrolysates, vegetable protein hydrolysates, animal protein hydrolysates other than enzymatic casein hydrolysates), (3) caffeine, and (4) lard and lard oil are available for review in the office of the Hearing Clerk, Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857. In addition, all reports and documents used by the Select Committee to review the ingredients are available for review in the office of the Hearing Clerk.

To schedule the public hearing, the Select Committee must be informed of the number of persons who wish to attend and the length of time requested

to give their views. Accordingly, any interested person who wishes to appear at the public hearing to make an oral presentation shall so inform the Select Committee in writing, addressed to: The Select Committee on GRAS Substances, Life Sciences Research Office, Federation of American Societies for Experimental Biology, 9650 Rockville Pike, Bethesda, MD 20014. A copy of each such request shall be sent to the Hearing Clerk, address noted above, and all requests shall be placed on public display in that office. Any such request must be postmarked on or before May 2, 1977, shall state the substance(s) on which an opportunity to present oral views is requested, and shall state how much time is requested for the presentation. As soon as possible thereafter, a notice announcing the date, time, place, and scheduled presentations for any public hearing that may be requested will be published in the FEDERAL REGISTER.

The purpose of the public hearing is to receive data, information, and views not previously available to the Select Committee about the substances listed above. Information already contained in the scientific literature reviews and in the tentative Select Committee report shall not be duplicated, although views on the interpretation of this material may be presented.

Depending on the number of requests for opportunity to make oral presentations, the Select Committee may reduce the time requested for any presentation. Due to time limitations, individuals and organizations with common interests are urged to consolidate their presentations. Any interested person may, in lieu of an oral presentation, submit written views which shall be considered by the Select Committee. Three copies of such written views shall be addressed to the Select Committee at the address noted above, and must be postmarked not later than 10 days before the scheduled date of the hearing. A copy of any written views shall be sent to the Hearing Clerk, Food and Drug Administration, and shall be placed on public display in that office.

A public hearing will be presided over by a member of the Select Committee. Hearings will be transcribed by a reporting service, and a transcript of each hearing may be purchased directly from the reporting service and will also be placed on public display in the office of the Hearing Clerk, Food and Drug Administration.

Dated: March 17, 1977.

SHERWIN GARDNER,
Acting Commissioner of Food and Drugs.

[Docket No. 76N-0070]

ACRYLONITRILE COPOLYMERS USED TO FABRICATE BEVERAGE CONTAINERS

Hearing and Prehearing Conference

AGENCY: Food and Drug Administration (FDA).

ACTION: Notice of Hearing and Prehearing Conference.

SUMMARY: This notice announces that a formal evidentiary public hearing will be held on the factual issues related to the order of the Commissioner of Food and Drugs staying those portions of certain food additive regulations that permit acrylonitrile copolymers to be used to fabricate beverage containers. This notice also announces a prehearing conference. The Comimssioner's order, which was published in the FEDERAL REGISTER of March 11, 1977 (42 FR 13546), was ordered stayed on March 18, 1977 by the United States Court of Appeals for the District of Columbia Circuit in *Monsanto Company* v. *Sherwin Gardner et al.*, (No. 77-1245). In its order, the Court directed FDA to "hold the required public hearing promptly and issue final findings and conclusions by said May 18, 1977." (Order at 6, footnotes omitted.)

DATES: Written notices of participation by April 11, 1977; prehearing conference on April 11, 1977 at 10 a.m. in Rm. 4A-35, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT:

Ted Herman, Compliance Regulations Policy Staff (HFC-10), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857 (301-443-3480).

SUPPLEMENTARY INFORMATION: Since 1958, FDA has approved various food-contact uses of acrylonitrile copolymers through issuance of food additive regulations under section 409 of the Federal Food, Drug, and Cosmetic Act, 21 U.S.C. 348. These include the following regulations which permit acrylonitrile copolymers to be used to fabricate beverage containers: 21 CFR 177.1480, 177.1050, 177.1030, 177.1040, and 177.1020 (formerly 21 CFR 121.2614, 121.2625, 121.2627, 121.2629, and 121.2633, respectively, prior to recodification, published in the FEDERAL REGISTER of March 15, 1977 (42 FR 14302)). In late 1973, concern about the safety of acrylonitrile copolymers in contact with food was heightened by the receipt of data which showed a delayed extraction problem with acrylonitrile copolymer bottles stored at elevated temperature for an extended period of time. These data, and a subsequent review by FDA of all safety data available on acrylonitrile, led, in November 1974, to the issuance of a proposed interim food additive regulation for all food-contact uses of acrylonitrile copolymers (published in the FEDERAL REGISTER of November 4, 1974 (39 FR 38907)). The final interim regulation was promulgated in the FEDERAL REGISTER of June 14, 1976 (41 FR 23940) and included a 0.3 part per million (ppm) limit on the amount of acrylonitrile permitted to migrate from acrylonitrile copolymers to food-simulating solvents under specified test conditions and conditioned continued use of acrylonitrile copolymers on the undertaking of necessary toxicological studies. The Natural Resources Defense Council filed timely objections to the interim regulation.

Reports on the required toxicological studies have been submitted to FDA and, after evaluation of those studies and consideration of recently acquired data on the migration of acrylonitrile from acrylonitrile copolymer beverage containers to food-simulating solvents, the Commissioner decided to: (1) Stay the food additive regulations that permit acrylonitrile copolymers to be used to fabricate beverage containers, and (2) to propose to reduce the amount of acrylonitrile monomer permitted to migrate from nonbeverage container uses of acrylonitrile copolymers to food-simulating solvents from the currently permitted level of 0.3 ppm to 0.05 ppm. The documents implementing these conclusions were signed by the Commissioner on March 4, 1977, and published in the FEDERAL REGISTER of March 11, 1977 (42 FR 13546 and 13562).

On March 7, 1977, the Monsanto Company filed suit in the United States Court of Appeals for the District of Columbia Circuit (No. 77-1245), challenging the Commissioner's order and seeking a stay of that order. On Friday March 11, 1977, the Court stayed the Commissioner's order pending disposition on the merits and scheduled oral argument on the matter for March 16, 1977. On March 18, 1977, following argument, the Court issued an order that, inter alia, continued the judicial stay in effect and directed FDA to "hold the required public hearing promptly and issue final findings and conclusions by May 18, 1977." This notice implements the Court of Appeals' order.

MODIFICATION OF PROCEDURES

In view of the strict time limitation imposed by the Court of Appeals and pursuant to FDA's Administrative Practices and Procedures regulations, 21 CFR

V 4263 APR 1 77 UMI

10.19 and 10.20 (formerly 2.5 and 2.25, prior to recodification published in the FEDERAL REGISTER of March 22, 1977 (42 FR 15553)), the following modifications of the procedures are hereby tentatively adopted to expedite the hearing in this matter:

1. Section 10.20(e) (formerly 2.5(e)) is modified to require all filings and submissions to be received on or before the due date thereof, without reference to any postmark;

2. Section 12.35(a)(4) and (5) (formerly § 2.118(a) (4) and (5)) is hereby modified to require only a brief statement of the issues in the Notice of Hearing and for the determination of issues at the prehearing conferences, subject to interlocutory appeal to the Commissioner;

3. Section 12.45 (formerly § 2.131) is hereby modified so as to provide for the filing of written notices of participation within 10 days after publication of the notice of hearing;

4. Section 12.85 (formerly § 2.153) is hereby modified so as to alleviate the necessity of documentary submissions to the Hearing Clerk and require the joint exchange of all underlying documentary evidence among participants as required by the Administrative Law Judge at the prehearing conference.

5. Section 12.120 (formerly § 2.180) is hereby waived pursuant to section 557 (b)(2) of the Administrative Procedure Act (5 U.S.C. 557(b)(2)).

6. Section 12.130 (formerly § 2.182 is hereby modified so as to provide for a final decision to be issued by the Commissioner and served on all participants, with notice thereof published in the FEDERAL REGISTER, and with copies available from the Hearing Clerk.

ISSUES FOR THE HEARING

Broadly speaking, the issues for the hearing will be:

1. Are acrylonitrile copolymers used to fabricate beverage containers food additives within the meaning of section 201 (s) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321(s))?

2. Have those acrylonitrile copolymers been shown to be safe, within the meaning of section 409 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 348)?

The hearing will take place in the Hearing Room, Rm. 4A-35, 5600 Fishers Lane, Rockville, Md. 20857. The presiding Administrative Law Judge will be Daniel Davidson. The hearing will convene on April 18, 1977 at 9:30 a.m., unless ordered otherwise by the Administrative Law Judge. Written notices of participation must be received by the Hearing Clerk, Food and Drug Administration, Rm. 4-65, 5600 Fisher Lane, Rockville, Md. 20857, not later than April 11, 1977. To facilitate identification, the envelope containing the written notices of participation should be clearly labeled with the phrase "Acrylonitrile Hearing."

Participants will be required to present direct testimony in the form of prepared statements which will be exchanged in advance with other participants, and subsequently marked as exhibits at the time the witness appears at the hearing. Additional oral direct testimony will be permitted only upon a showing of good cause.

All participants must appear at the prehearing conference which will be held at 10 a.m. on April 11, 1977 in Rm. 4A-35, 5600 Fishers Lane, Rockville, Md. 20857.

The parties to the hearing, as of this date, shall be the Bureau of Foods of the United States Food and Drug Administration, Monsanto Company, and the Natural Resources Defense Council.

The hearing will be open to the public. Any participant may appears in person, or with counsel or other qualified representative, and may be heard with respect to matters relevant to the issues under consideration.

Dated: March 29, 1977.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Compliance.

TOPICAL ANALGESIC PANEL

Meeting Cancellation

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: This notice announces cancellation of the Topical Analgesic Panel meeting rescheduled for April 13 and 14, 1977.

SUPPLEMENTARY INFORMATION: Pursuant to the Federal Advisory Committee Act of October 4, 1972 (Pub. L. 92-463, 86 Stat. 770-776 (5 U.S.C. App. I)), the Food and Drug Administration announced in a notice published in the FEDERAL REGISTER of February 11, 1977 (42 FR 8709) (notice of rescheduling published in the FEDERAL REGISTER of March 4, 1977 (42 FR 12515)) advisory committee meetings and other required information in accordance with provisions set forth in section 10(a) (1) and (2) of the act.

Notice is hereby given that the meeting of the Topical Analgesic Panel scheduled for April 13 and 14, 1977, in Conference Rm. A, Parklawn Bldg., 5600 Fishers Lane, Rockville, Md., has been canceled.

Dated: March 29, 1977.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Compliance.

National Institutes of Health

NATIONAL CANCER COMMUNICATIONS CONFERENCE

Meeting

The fourth national cancer communications conference, sponsored jointly by the National Cancer Institute and the American Cancer Society, will be held June 20-21, 1977, in Chicago, Illinois at the Pick-Congress Hotel.

The purpose of the meeting is to encourage development and coordination of cancer communications programming, to motivate participants to support common communications projects, and to exchange information about successful projects undertaken by a variety of organizations.

In addition to representatives from the two sponsoring organizations, communications persons from other cancer-related institutions are being asked to attend, such as comprehensive and specialized cancer centers, and voluntary, nonprofit associations, and other health agencies that have an interest in cancer communications.

The format is a two-day program of plenary sessions and workshops designed to give participants an overview of important developments in cancer science, communications research, and specific community programs, with an emphasis on practical cancer information and educational activities.

Inquiries are invited from commercial exhibitors who feel that their products would be of interest to this audience. For further information call Barbara Blumberg Turner, 301-496-6631, by May 1, 1977.

J. PAUL VAN NEVEL,
Associate Director for Cancer Communications, National Cancer Institute.

NATIONAL INSTITUTE OF GENERAL MEDICAL SCIENCES

Workshop

Notice is hereby given of a Workshop on Revision of the Guidelines sponsored by the Recombinant DNA Molecule Program Advisory Committee at the National Institutes of Health, Westwood Building, Room 9A12, 5333 Westbard Avenue, Bethesda, Maryland 20014, April 15-16, 1977 from 9:30 a.m. to 5:00 p.m.

Further information may be obtained from Dr. William J. Gartland, Executive Secretary, Recombinant DNA Molecule Program Advisory Committee, Building 31, Room 4A52, telephone 301/496-2323.

This workshop will be open to the public. Attendance by the public will be limited to space available.

Dated: March 29, 1977.

SUZANNE L. FREMEAU,
Committee Management Officer. National Institutes of Health.

Office of the Secretary

OFFICE OF INSPECTOR GENERAL

Statement of Organization, Functions, and Delegations of Authority

Part A (formerly Part 1) of the Statement of Organization, Functions, and Delegations of Authority of the Department of Health, Education, and Welfare is amended by adding Part AF, "The Office of Inspector General," to reflect establishment of that office by Pub. L. 94-505, approved on October 15, 1976. The Office of Inspector General will have responsibility for those functions now performed by the HEW Audit Agency and the Office of Investigations. Part ABF (formerly Part 1B60), "Office of Investigations," (40 FR 58489, dated December 17, 1975) and Part ACR (formerly Part 1W13), "HEW Audit Agency," (39 FR 42408-90, dated December 5, 1974) have been deleted.

Section 1. *Functional statement.* The functional statement for the Office of Inspector General reads as follows:

AF.00 *Mission.* The Office of Inspector General, under the general supervision of the Secretary, is responsible for:

(1) Conducting and supervising audits and investigations relating to programs and operations of the Department;

(2) Providing leadership and coordination for, and recommending policies and corrective actions concerning activities designed to:

(A) Promote economy and efficiency in the administration of, and (B) prevent and detect fraud and abuse in, the Department's program and operations; and

(3) Providing a means for keeping the Secretary and the Congress fully and currently informed about problems and deficiencies relating to the administration of such programs and operations, and the necessity for the progress of corrective action.

AF.10 *Organization.* The Office of Inspector General, under the supervision of an Inspector General, consists of:

Office of the Inspector General (AFA).
Office of the Deputy Inspector General (AFB).
Office of the Assistant Inspector General for Auditing/HEW Audit Agency (AFC).
Division of Audit Coordination (AFCA).
Division of Social Security Audits (AFCB).
Division of State and Local Audits (AFCC).
Division of University and Non-Profit Audits (AFCD).
Regional Audit Offices (AFC [1-X]1).
Office of The Assistant Inspector General for Investigations (AFE).
Division of Investigations (AFEA).
Division of Inspection, Training and Review (AFEB).
Division of Law Enforcement Coordination and Data Collection (AFEC).
Regional Investigations Office (AFE [1-X]1).
Office of Assistant Inspector General for Health Care and Systems Review (AFF).

AF.20 *Functions.*

A. *Office of the Inspector General* (AFA). The Inspector General operates under the general supervision of the Secretary or the Under Secretary, and (1) supervises, coordinates and provides policy direction for auditing and investigative activities relating to programs and operations of the Department and undertaken by the Office of Inspector General; (2) recommends policies for, and conducts, supervises, or coordinates other activities carried out or financed by, the Department for the purpose of promoting economy and efficiency in the administration of, or detection and prevention of fraud and abuse in the programs and operations of the Department; (3) recommends policies for, and conducts, supervises, or coordinates relationships between the Department and other Federal agencies, State and local governmental agencies and other nongovernmental entities with respect to audit and investigative matters relating to (a) the promotion of economy and efficiency in the administration of, or the prevention and detection of fraud and abuse in, programs and operations administered or financed by the Department or (b) the identification and prosecution of participants in such fraud and abuse; (4) keeps the Secretary and the Congress fully and currently informed concerning fraud and other serious problems, abuses, and deficiencies in the administration of programs and operations administered or financed by the Department, recommends corrective actions concerning such problems, abuses and deficiencies and reports on the progress made in implementing such corrective action; (5) delivers reports (with, in the case of reports required by Section 204 (a) and (b), copies to the Secretary at least twenty days prior to delivery to Congress and appropriate committees or subcommittees thereof, and in case of reports pursuant to Section 204(d), copies to the Secretary at least ten days prior to delivery to others) to the Secretary, Congress and others as required by Section 204 of Pub. L. 94-505; (6) to avoid duplication and provide efficient use of time and funds, gives particular regard to the activities of the Comptroller General of the United States; (7) gives prior notice to the Secretary of major investigations to be undertaken with respect to programs and operation of the Department; and (8) in general, coordinates investigation activities with the Office of General Counsel.

B. *The Office of the Deputy Inspector General.* Assists the Inspector General (AF) in the administration of the office, and during the absence or temporary incapacity of the Inspector General, or during a vacancy in the office, acts as the Inspector General.

C. *The Office of the Assistant Inspector General for Auditing/HEW Agency (AFC).* The Assistant Inspector General for Auditing serves as the Director of the HEW Audit Agency, and each Division of this Office and each Regional Audit Office is under the supervision of the Assistant Inspector General for Auditing, who is responsible to the Deputy Inspector General and the Inspector General.

1. The HEW Audit Agency:

(a) Provides audit services to all management levels within the Department through the conduct of comprehensive audits which include examinations of the Department, and its grantees and contractors;

(b) Develops policies, procedures, standards, and criteria relating to audit activities at all levels within the Department;

(c) Develops general and special audit programs as may be necessary to provide appropriate audit and examination of programs and activities performed by the Department and its Principal Operating Components (POCs);

(d) Determines when audits and examinations can be most appropriately carried out by organizations outside AFC including other agencies of Government, or by private organizations;

(e) Evaluates the adequacy of aduits performed for the Department by organizations outside the AFC to determine that such audits are being conducted in consonance with Department objectives;

(f) Prepares and disseminates reports of audits, examinations, and studies to the Secretary, POCs, Regional Directors (RDs) and others who may be concerned with a particular audit or study;

(g) Accumulates and provides key officials with data concerning audit reports and unresolved audit findings (such data to serve as the basis for each POC Stewardship Report to the Secretary), evaluates the Stewardship Report and provides, through the Inspector General, to the Secretary and other key Department officials and analysis of actions being taken to resolve matters disclosed by audit;

(h) Conducts followups and special analyses to determine propriety of action taken on previous audit findings and recommendations;

(i) Reviews legislative and program proposals for audit implications and evaluates their conformity and consistency with established audit policy;

(j) As requested by the Department's POCs, performs special reviews of grant or contract proposals for the purpose of determining financial capabilities of grantees or contractors;

(k) In the interest of economy and interdepartmental cooperation, performs audits of programs and activities administered by other Federal departments and agencies that involve participation by institutions of higher education and State and local governments;

(l) Provides necessary Departmental liaison with the General Accounting Office and other Federal, State, local, and private auditing organizations on all matters pertaining to audits. With respect to General Accounting Office audits and investigations of Department activities:

(i) Reviews drafts and final reports concerning Department activities and through the Inspector General advises the Secretary and his staff of significant findings.

(ii) Reviews all replies to GAO reports prior to release and on behalf of the Inspector General, secures necessary clearance within the Office of the Secretary.

(iii) Performs followup reviews to determine propriety of action taken with respect to GAO recommendations.

(iv) Maintains liaison with representatives of the Office of Management and Budget and others regarding General Accounting Office reports; and

(m) Provides assistance to appropriate Assistant Secretaries in the development of grants and procurement management policy, and in formulation of policy to

V 42 63 APR 1 77 UMI

govern establishment of indirect cost rates.

2. Functions of HEW Audit Agency Divisions are as follows:

(a) Division of Audit Coordination (AFCA):

(i) Develops agency-wide audit policies, procedures and instructions;

(ii) Develops agency-wide plans, audit schedules, and audit priority adjustments for budgetary and operating purposes;

(iii) Coordinates processing of GAO reports and letters; and

(iv) Maintains liaison with other Federal audit organizations in determining audit cognizance and arranging for cross-servicing.

(b) Division of Social Security Audits (AFCB):

(i) Develops technical standards and policies for audit of programs and activities of the Social Security Administration;

(ii) Develops audit programs to evaluate effectiveness of all aspects of the administration of Social Security programs;

(iii) Reviews issued audit reports and visits regional offices and audit sites to appraise technical adequacy of and provide technical assistance on Social Security audits;

(iv) Develops consolidated reports to top management based on audit findings on Social Security activities; and

(v) Maintains liaison with headquarters officials on Social Security audit matters.

(c) Division of State and local Audits (AFCC) Division of University and Nonprofit Audits (CFCD) assigned area for:

(i) Developing technical standards and policies for audits;

(ii) Developing audit programs to evaluate effectiveness of operations.

(iii) Reviewing issued audit reports and visiting regional offices and audit sites to appraise technical adequacy of audits and to provide technical assistance on audits;

(iv) Developing consolidated reports and other reports to top management based on audit findings; and

(v) Maintaining liaison with headquarters officials on audit matters.

(d) Regional Audit Offices (AFC (1–X)) Carry out the full range duties and responibilities of AFC in their assigned geographic areas.

D. *The Office of the Assistant Inspector General for Investigations.* The Assistant Inspector General for investigations serves as the director of the Office of the Assistant Inspector General for Investigations, and each Division of this office and each Regional Investigations Office is under the supervision of the Assistant Inspector General for Investigations, who is responsible to the Deputy Inspector General and the Inspector General.

1. The Office of Assistant Inspector General for Investigations (AFE):

(a) Provides leadership, policy direction, planning, coordination and management of the investigative program of the Department;

(b) Reports the results of investigations to the Inspector General;

(c) Provides line supervision to the office divisions in headquarters and in the Regional offices;

(d) Provides technical assistance and advice to program staff in identifying areas which might lend themselves to possible fraud;

(e) Reports information, allegations, or complaints received in the Department relating to violations of Title 18, U.S. Code, involving Department employees to the Attorney General of the United States, as required by section 535, Title 28, U.S.C.; and

(f) Advises affected program and staff offices of the Department of the results of any investigation, including the disposition by the Department of Justice of a matter referred to that Department for possible criminal prosecution.

2. The functions of the Division of AFE are as follows:

a. Division of Investigations (AFEA):

(i) Provides direction and coordination to the Regional Investigations Offices (AFE (1–X) 1) concerning investigations;

(ii) Implements guidelines and policies for the detection and investigation of actual or suspected criminal activity by Departmental grantees or contractors or by Departmental employees in the performance of their official duties;

(iii) Reviews investigative reports for completeness, accuracy, and compliance with AFE policies and guidelines;

(iv) Disseminates investigative reports to prosecutive agencies;

(v) Maintains liaison with Department staff offices, principal operating components and other investigative and law enforcement agencies regarding investigative matters undertaken by the Division;

(vi) Prepares and disseminates reports of investigation, through the Inspector General, to the Secretary; and

(vii) Is responsible for investigation of cases of alleged fraud and abuse in programs and operations administered or financed by the Department, including allegations of fraud and abuse by Department contractors, grantees, or other entities or individuals funded or supported by the Department, but excluding investigations relating to tort claims filed against the Department, employee security programs, employee equal employment opportunity complaints, matters under Title VI of the Civil Rights Act of 1964 and Title IX of the Education Amendments of 1972, and similar activities which are under the jurisdiction of other offices of the Department.

b. Division of Inspection, Training, and Review (AFEB):

(i) Performs inspections including internal personnel investigations of AFE facilities, procedures, methods, and operations to ensure compliance with AFE instructions and procedures;

(ii) Conducts operations of AFE related to training programs, employee development, investigator handbook preparation and manual issuances, development of forms, paperwork management, and the development of office operations and staff performance instructions and procedures for AFE (1–X)1;

(iii) Reviews completed reports of criminal investigations for Department management and programmatic deficiencies and makes recommendations for corrective changes in policies and procedures;

(iv) Handles requests for AFE investigative information under the Freedom of Information Act and the Privacy Act; and

(v) Reviews and evaluates statutes, legal options, court decisions, and other professional and government reports and publications for applicability to AFE operations and investigative procedures.

c. Division of Law Enforcement Coordination and Data Collection (AFEC): Accumulates data on a continuing basis on the activities of Federal, State, and local law enforcement agencies in the investigation and prosecution of cases related to such critical programs as Medicaid, Medicare, and student assistance.

d. Regional Investigations Offices (AFE (1–X) 1):

(1) Maintain liaison with Department employees and representatives of other agencies with respect to, and receive from the public information relating to fraud and abuse in programs and operations financed or administered by the Department;

(ii) Make recommendations to the AFE that investigations be initiated;

(iii) Conduct investigations when approved;

(iv) Prepare reports of investigations;

(v) Present AFE cases to local United States Attorneys or their assistants for criminal prosecutive opinion; and

(vi) Recommend selective distribution of completed investigative reports.

E. *The Office of the Assistant Inspector General for Health Care and Systems Review (AFF).* The Assistant Inspector General for Health Care and Systems Review is responsible to the Deputy Inspector General and the Inspector General. The Office studies and makes recommendations regarding the management of programs administered or financed by the Department and the operating and control systems of the Department in order to promote efficiency and economy and to prevent fraud and abuse. The staff of this Office contains specialists in the Department's principal programs, including specifically personnel who will devote their full time and attention to anti-fraud and anti-abuse in the Medicaid, Medicare, renal disease and maternal and child health programs.

SEC. 2. *Continuation of Regulations.* Except as inconsistent with this statement, all regulations, rules, orders, statements of policy or procedures or interpretations thereof heretofore issued and in effect prior to the date of this statement or to become effective subsequent to said date, are continued in full force and effect.

SEC. 3. *Prior Statement of Organization, Functions, and Delegations of Authority.* To the extent inconsistent with this statement all previous statements of organization, functions, and delegations of authority, as well as applicable present chapters of the Department's Organization Manual are hereby superseded by this statement, except that, all delegations in effect immediately prior to the effective date of this statement shall continue in effect until new delegations are made.

SEC. 4. *Effective date:* This statement shall be effective March 29, 1977.

Dated: March 29, 1977.

JOSEPH A. CALIFANO, JR.,
Secretary.

[FR Doc.77-9800 Filed 3-30-77;10:10 am]

HUMAN SUBJECTS

Submission of Assurances and Certificates Concerning Protection

On May 20, 1975, the Department of Health, Education, and Welfare published in the FEDERAL REGISTER (40 FR 22019) a notice concerning submission of certification of institutional review and approval of grants and contracts in support of activities involving human subjects. Such certification is required by §§ 46.111 and 46.112 of 45 CFR Part 46.

The notice of May 20, 1975, was to be reevaluated by November 20, 1976, to determine whether there was any need for further modification.

The Department's regulations on protection of human subjects (45 CFR Part 46) require (1) that each institution submit in or with any application or proposal for support of an activity involving human subjects an assurance that the institution has established an Institutional Review Board satisfying the requirements of Part 46, and (2) that each institution also submit a certification that the application or proposal has been reviewed and approved by the Institutional Review Board. However, §§ 46.111 and 46.112 of Title 45 authorizes the Secretary to permit institutions to delay review and approval of applications or proposals by their Institutional Review Boards until after the applications or proposals have been submitted to DHEW. The notice issued on May 20, 1975, permitted delays in the submission of certifications by institutions with general assurances of up to 90 days following the actual submission date of the application or proposal.

Experience since issuance of the May 20, 1975 notice indicates that this period is unnecessarily long and often results in delays in the receipt of certification until evaluation of applications and proposals as required by § 46.115 is well advanced. It has, therefore, been determined that delay in submission of certifications by such institutions should not be permitted for more than 60 days as provided for below.

GENERAL ASSURANCES

Institutions having on file with DHEW an approved general assurance must submit certification within 30 days of the receipt of a written request therefor; and, in any event, these institutions must submit such certification within 60 days after the receipt date or deadline for which the application or proposal was submitted or, if no receipt date or deadline is specified, within 60 days following the actual submission date of the application or proposal.

SPECIAL ASSURANCES

Institutions not having on file an approved general assurance must submit in or with the application or proposal for activities covered by 45 CFR Part 46, a special assurance that: (a) Identifies the specific application or proposal by its full title and by the name of the activity director, principal investigator or other person immediately responsible for the conduct of the activity, and (b) includes a statement executed by an appropriate institutional official indicating that the institution has established an Institutional Review Board satisfying the requirements of §§ 46.106(b) and 46.107(b) of Part 46. This statement may take the following form:

> Assurance is hereby given that this institution will comply with the requirements of the DHEW Regulations on Protection of Human Subjects (45 CFR Part 46), that it has established an Institutional Review Board for the protection of human subjects which meets these requirements, and that it will submit to DHEW, upon request, such additional documentation and assurance of compliance with these requirements as may be deemed necessary by DHEW.

Institutions having submitted such a statement must submit additional assurances of compliance and a certification of review and approval of the application or proposal by its Institutional Review Board, as well as required documentation, within 30 days of the receipt of a written request for the submission of any such additional assurances, certification, and documentation.

This provision shall become effective on May 1, 1977. For further information, contact Dr. Donald Chalkey, Director, Office for Protection from Research Risks, NIH (301–496–7005).

Approved: March 28, 1977.

JOSEPH A. CALIFANO, JR.,
Secretary.

[FR Doc.77-9826 Filed 3-31-77;8:45 am]

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[ES 16958]

ALABAMA

Notice of Proposed Withdrawal and Reservation of Lands

MARCH 24, 1977.

The Forest Service, U.S. Department of Agriculture has filed application ES 16358 for the withdrawal of the land described below from settlement, sale location or entry under all of the general land laws, including the mining and mineral leasing laws, excepting leasing for oil and gas, subject to valid existing rights:

HUNTSVILLE MERIDIAN, ALABAMA

T 13 S., R. 9 E.,
Section 28; SE¼.

The area described contains 160.00 acres and is located in Calhoun County.

The Forest Service proposes to include the subject tract within the Talladega National Forest for purposes of watershed protection and timber production. As part of a national forest, the lands would be administered in accordance with applicable laws and regulations for national forest lands.

For a period of 30 days from the date of publication of this notice, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal may present their views in writing to the undersigned officer of the Bureau of Land Management.

Pursuant to section 204(h) of the Federal Land Policy and Management Act of 1976, notice is hereby given that an opportunity for a public hearing is afforded in connection with the proposed withdrawal. All interested persons who desire to be heard on the proposed withdrawal must submit a written request for a hearing to the undersigned officer of the Bureau of Land Management on or before May 9, 1977.

Notice of a public hearing will be published in the FEDERAL REGISTER giving the time and place of such hearing. The public hearing will be scheduled and conducted in accordance with BLM Manual, Section 2351.16B.

The regulations of the Department of the Interior provide that the authorized officer of the Bureau of Land Management will undertake such investigations as are necessary to determine the existing and potential demands for the lands and their resources. He will also undertake negotiations with the applicant agency with the view of adjusting the application to reduce the area to the minimum essential to meet the applicant's needs, to provide for the maximum concurrent utilization of the lands for purposes other than the applicant's, and to reach agreement on the concurrent management of the land and its resources.

The authorized officer will also prepare a report for consideration by the Secretary of the Interior who will determine whether or not the land will be withdrawn as requested by the applicant agency. The determination of the Secretary will be published in the FEDERAL REGISTER. A separate notice will be sent to each interested party of record.

For a period two years from the date of publication of this notice in the FEDERAL REGISTER, the land will be segregated from entry, as specified above unless the application is rejected or the

V 4263 APR 1 77 UMI

withdrawal is approved prior to that date. If the withdrawal is approved by the Secretary, it will be for an indefinite period, and the land will remain segregated.

All communications in connection with this withdrawal should be addressed to the Director, Eastern States Office, Bureau of Land Management, 7981 Eastern Avenue, Silver Spring, Maryland 20910.

LOWELL J. UDY,
Director, Eastern States.

Fish and Wildlife Service

NORTH CAROLINA STATE UNIVERSITY, DEPARTMENT OF ZOOLOGY

Endangered Species Permit; Receipt of Application

Notice is hereby given that the following application for a permit is deemed to have been received under section 10 of the Endangered Species Act of 1973 (Pub. L. 93-205).

Applicant: North Carolina State University, Department of Zoology, P.O. Box 5577, Raleigh, North Carolina 27607. Dr. John Vandenbergh, Head.

OMB NO. 42-R1673.

DEPARTMENT OF THE INTERIOR
U.S. FISH AND WILDLIFE SERVICE

FEDERAL FISH AND WILDLIFE LICENSE/PERMIT APPLICATION

1. APPLICATION FOR (*To indicate only one*): ☐ IMPORT OR EXPORT LICENSE ☒ PERMIT

2. BRIEF DESCRIPTION OF ACTIVITY FOR WHICH REQUESTED LICENSE OR PERMIT IS NEEDED:
We propose to live-capture alligators (with snares), mark, measure and release these animals and conduct night censuses of alligators on prescribed transect routes.

3. APPLICANT. (*Name, complete address and phone number of individual, business, agency, or institution for which permit is requested*)
Dr. John Vandenbergh, Head
Department of Zoology, Box 5577
North Carolina State University
Raleigh, North Carolina 27607
Phone - 919-737-2741

4. IF "APPLICANT" IS AN INDIVIDUAL, COMPLETE THE FOLLOWING:
☐ MR. ☐ MRS. ☐ MISS ☐ MS. | HEIGHT | WEIGHT
DATE OF BIRTH | COLOR HAIR | COLOR EYES
PHONE NUMBER WHERE EMPLOYED | SOCIAL SECURITY NUMBER
OCCUPATION

5. IF "APPLICANT" IS A BUSINESS, CORPORATION, PUBLIC AGENCY, OR INSTITUTION, COMPLETE THE FOLLOWING:
EXPLAIN TYPE OR KIND OF BUSINESS, AGENCY, OR INSTITUTION
Educational and Research Institution

ANY BUSINESS, AGENCY, OR INSTITUTIONAL AFFILIATION HAVING TO DO WITH THE WILDLIFE TO BE COVERED BY THIS LICENSE/PERMIT:
1. N. C. Wildlife Resources Commission
2. U.S. Fish & Wildlife Service
3. U.S. Forest Service
4. N.C. Museum of Natural History

NAME, TITLE, AND PHONE NUMBER OF PRESIDENT, PRINCIPAL OFFICER, DIRECTOR, ETC.: Dr. John G. Vandenbergh, Head, Dept. Zoology, 919-737-2741

IF "APPLICANT" IS A CORPORATION, INDICATE STATE IN WHICH INCORPORATED:

6. LOCATION WHERE PROPOSED ACTIVITY IS TO BE CONDUCTED:
a) Survey transects will be conducted in several North Carolina coastal counties.
b) Habitat and capture studies will be conducted in Croatan National Forest.

7. DO YOU HOLD ANY CURRENTLY VALID FEDERAL FISH AND WILDLIFE LICENSE OR PERMIT? ☐ YES ☒ NO
(*If yes, list license or permit numbers*)

8. IF REQUIRED BY ANY STATE OR FOREIGN GOVERNMENT, DO YOU HAVE THEIR APPROVAL TO CONDUCT THE ACTIVITY YOU PROPOSE? ☒ YES ☐ NO
(*If yes, list jurisdictions and type of documents*) N.C.Wildlife Resources Comm. - verbal approval as of Jan. 1977; written permit application has been made (Feb. 3, 1977)

9. CERTIFIED CHECK OR MONEY ORDER (*If applicable*) PAYABLE TO THE U.S. FISH AND WILDLIFE SERVICE ENCLOSED IN AMOUNT OF: $

10. DESIRED EFFECTIVE DATE: May 1, 1977

11. DURATION NEEDED: 2 years

12. ATTACHMENTS. THE SPECIFIC INFORMATION REQUIRED FOR THE TYPE OF LICENSE/PERMIT REQUESTED (*See 50 CFR 13.12(b)*) MUST BE ATTACHED. IT CONSTITUTES AN INTEGRAL PART OF THIS APPLICATION. LIST SECTIONS OF 50 CFR UNDER WHICH ATTACHMENTS ARE PROVIDED.

CERTIFICATION

I HEREBY CERTIFY THAT I HAVE READ AND AM FAMILIAR WITH THE REGULATIONS CONTAINED IN TITLE 50, PART 13, OF THE CODE OF FEDERAL REGULATIONS AND THE OTHER APPLICABLE PARTS IN SUBCHAPTER B OF CHAPTER I OF TITLE 50, AND I FURTHER CERTIFY THAT THE INFORMATION SUBMITTED IN THIS APPLICATION FOR A LICENSE/PERMIT IS COMPLETE AND ACCURATE TO THE BEST OF MY KNOWLEDGE AND BELIEF. I UNDERSTAND THAT ANY FALSE STATEMENT HEREIN MAY SUBJECT ME TO THE CRIMINAL PENALTIES OF 18 U.S.C. 1001.

SIGNATURE (*In ink*): John G Vandenbergh | DATE: Feb. 7, 1977

(1) American alligator. *Alligator mississippiensis*. An object of this proposed study is to capture, mark, sex and subsequently recapture alligators at Lake Ellis Simon, North Carolina. Animals will be held no longer than twelve hours and will be released at the capture sites.

(2) This study will involve only animals from the wild which will be released after marking and recording data.

(3) Accepted and practiced methods of capturing alligators will be employed by the researchers. These include use by "Murphy traps", noose snares, landing nets, and a small harpoon made from an 8/0 fish hook. Chabreck (1963, 1965, 1966) has captured alligators in Louisiana with snares. Jones (1965) has employed the landing net and small harpoon technique in Florida with no alligator mortality. A live trap using a baited snare was developed by Murphy and Fendley (1974) to capture nuisance animals. In addition, the principal investigators, Dr. Phillip D. Doerr, Dr. O. T. Sanders, and graduate student Manley Fuller have participated in noose snaring of alligators at Lake Ellis Simon during the summer of 1976, under the guidance of U.S. Fish and Wildlife service technician, Charles A. Ross.

(4) Animals will not be removed from the wild.

(5) See No. 4 above.

(6) (I) Not applicable.

(II) Participants have field experience in capturing alligators and anticipate gaining greater experience in capturing alligators at the Rockefeller Wildlife Refuge, Louisiana and the Savannah River Ecology Laboratory, South Carolina prior to initiation of this study.

(III) Not applicable.

(IV) Some animals may be kept overnight in a storage room 8×10 feet with a 5½' ceiling at Lake Ellis-Simon. Adequate ventilation and temperature control are provided. Any alligator captured which is too large to fit inside this structure will be kept in a larger storage room 10'×20' with an 8' ceiling. The animals will at no time be exposed to high temperature, i.e. greater than 90° F temperatures. These structures were employed by U.S. Fish and Wildlife Service personnel during the summer of 1976 for identical purposes.

(V) The applicants have observed no mortality with alligators captured by the snare techniques illustrated by Charles A. Ross. However, Assistant Unit Leader H. Randolph Perry of Louisiana Cooperative Wildlife Research Unit reported in personal communication that rough treatment has led to some mortality of animals in Louisiana. Jones (1965) has reported some problems of delayed mortality associated with snaring and recommended a barb technique of capturing animals employing a straightened 8/0 fish hook inserted into the neck scales. However, a literature survey and personal observations of U.S. F. and W. Service field techniques indicate that noose snaring is the most commonly employed means of capturing alligators. A "break-away" snare will be employed on alligators greater than six feet in length and this should act to decrease potential damage to the animals. The investigators plan to visit Louisiana and South Carolina to gain greater first hand experience with alligator capture techniques which should diminish the chances of injury to animals.

(VII) Dr. Phillip Doerr resume; Mr. Manley Fuller resume; Dr. O. T. Sanders, resume. Field Technician to be designated and supervised directly by principle investigators. Copy of N.C. internship proposal. Copy of research proposal.

(VIII) All of these are included in attached research proposal.

Documents and other information submitted in connection with this application are available for public inspection during normal business hours at the Service's office in Room 512, 1717 H Street NW., Washington, D.C.

Interested persons may comment on this application by submitting written data, views, or arguments, preferably in triplicate, to the Director (FWS/WPO), U.S. Fish and Wildlife Service, Washington, D.C. 20240. This application has been assigned File Number PRT 2-634-07; please refer to this number when submitting comments. All relevant comments received by May 2, 1977, will be considered.

Dated: March 28, 1977.

DONALD G. DONAHOO,
Chief, Permit Branch, Federal Wildlife Permit Office, U.S. Fish and Wildlife Service.

(1) The species of turtle to be employed in these studies is *Eretmochelys imbricata*, or the Hawksbill Turtle. The turtles will be collected at random and thus will be of variable age and sex. The experiments to be conducted with these anamals are designed to elucidate the "diving reflex" found in these animals. These experiments will not require the sacrifice of the animal.

(2) The turtles are to be collected.

(3) The animals will be caught using traps and nets.

(4) N.A.

(5) The Marine Station on Isla Magueyes, near La Parguera, Puerto Rico, will be the site at which the animals will be kept. This facility is operated and maintained by the University of Puerto Rico at Mayaguez. The experiments to be conducted with these animals will be carried out at the Marine Station and in the hyperbaric chamber located at Concepción Hospital in San Germán, Puerto Rico. This chamber is operated in conjunction with the Hospital.

(6) i. The animals will be housed in wire mesh cages approximately 3×3×5 ft. that will be placed in the sea in the area of the Marine Station.

ii. The animals will be cared for by the graduate students working in the Physiology Laboratory at the Marine Station. These students are at the M.S. and Ph.D. levels, and have the required expertise.

iii. While we would be willing to participate in a breeding program, we do not intend to breed or raise these animals.

iv. If the animals need to be transported, such transport will be done utilizing large aquaria (×24×2 ft.) containing an appropriate amount of seawater.

v. We have not worked with this animal prior to this application.

(7) We have not applied for research funds to cover the initial phase of this project. In the event that the initial work warrants such application, we will apply to the National Geographic Society and the National Institutes of Health.

(8) i. Experiments will be conducted to determine whether this animal displays a "diving reflex" when exposed to hydrostatic pressure. The response in this case involves an alteration in the circulatory system of the animal, accompanied by changes in the oxygen consumption of the organism. In other diving animals this response can be elicited by very small changes in hydrostatic pressure and in some cases by simply immersing the head of the animal in water.

ii. The hyperbaric chamber will be utilized in part of this work. The circulation and oxygen consumption of the animal will be monitored indirectly through the implantation of electrodes.

iii. The results of this work will enable us to better understand the diving habits of this organism. The ability of this organism to dive no doubt enhances its survival.

iv. The animals employed in this work will be released upon completion of the study.

UNIVERSITY OF PUERTO RICO, DEPARTMENT OF MARINE SCIENCES, FACULTY OF ARTS AND SCIENCES

Mayagüez, Puerto Rico, February 10, 1977.

Mr. DONALD G. DONAHOO,
Federal Wildlife Permit Office,
Fish and Wildlife Service,
U.S. Department of the Interior,
Washington, D.C.

DEAR MR. DONAHOO: I am in receipt of your letter of 10 December 1976, concerning the permit that I submitted regarding the use of the Hawksbill Turtle to examine the "diving reflex" in this organism. I am of course interested in pursuing this matter. I would like to answer your questions in the order they were presented.

1. The turtles employed in this study will be taken from the coral reefs in the area of the south-west coast of Puerto Rico. Approximately 10 turtles will be collected, ranging from 6 to 8 lbs. each. I believe the number of turtles employed in this case will not affect the local population.

2. The graduate student involved in this study has had ample experience in observing the habits of this animal in the field. Of course he has not had experience doing the EKG, oxygen consumption and blood lactate determinations on this animal. These determinations will be made utilizing indirect, in most part external sensing systems. I will be directing the study. During the course of my training I have worked in several Physiology and Pharmacology Departments in several medical schools. We will also have available the advice of other investigators at present

V4263 APR 1 77 UMI

working in medical schools in the continental United States. The animals employed in this study are not to be sacrificed.

3. Far and above the most populous species of turtle in this immediate area is the Hawksbill Turtle. The "diving reflex" has been reported in the green turtle (Pacific subspecies, *Chelonia mydas*). The Hawksbill Turtle is ominivorous and apparently more active than the green turtle. The green turtle is not common here.

4. I have made repeated attempts to contact the representatives in the local government here and to date have not been successful. I have discussed this matter with the Fish and Wildlife here. I am sure that I will be able to contact the appropriate officials in the Commonwealth Government.

Documents and other information submitted in connection with this application are available for public inspection during normal business hours at the Service's office in Room 512, 1717 H Street, N.W., Washington, D.C.

Interested persons may comment on this application by submitting written data, views, or arguments, preferably in triplicate, to the Director (FWS/WPO), U.S. Fish and Wildlife Service, Washington, D.C. 20240. This application has been assigned File Number PRT 2-472-07; please refer to this number when submitting comments. All relevant comments received by May 2, 1977 will be considered.

Dated: March 28, 1977.

DONALD G. DONAHOO,
Chief, Permit Branch, Federal Wildlife Permit Office, U.S. Fish and Wildlife Service.

INTERNATIONAL TRADE COMMISSION

BROOM CORN BROOMS; CONSUMPTION

Report to the President

MARCH 28, 1977.

In accordance with Executive Order 11377 of October 23, 1967 (copy attached), to assist the President in the exercise of his authority under headnote 3 to schedule 7, part 8, subpart A, of the Tariff Schedules of the United States (TSUS) (79 Stat. 948; 19 U.S.C. 1202), the U.S. International Trade Commission herein reports its judgment as to the estimated domestic consumption of broom corn brooms for the year 1976, the basis for that estimate, and information on U.S. consumption, production, imports, and exports of other types of brooms considered to be competitive with broom corn brooms. For convenience, the Commission also reports corresponding data for broom corn brooms for the years 1965 and 1975 and data for competitive brooms for 1968.

ESTIMATED CONSUMPTION OF BROOM CORN BROOMS

In the judgment of the Commission, consumption of brooms wholly or in part of broom corn in the calendar years 1965, 1975, and 1976 was as shown in the table below:

Brooms wholly or in part of broom corn: U.S. consumption, 1965, 1975, and 1976

[In dozens]

Type of broom	1965 [1]	1975 [2]	1976
Whiskbrooms of a kind provided for in TSUS items 750.26 to 750.28, inclusive	470,612	376,025	391,593
Other brooms of a kind provided for in TSUS items 750.29 to 750.31, inclusive	2,878,995	2,270,010	2,159,285

[1] As reported to the President on May 2, 1968.
[2] As reported to the President on Mar. 17, 1976.

BASIS FOR THE COMMISSION'S JUDGMENT WITH RESPECT TO BROOM CORN BROOMS

The Commission estimated consumption of broom corn brooms in 1976 by the same methods it used to estimate consumption in its previous reports pursuant to Executive Order 11377. Apparent annual consumption was determined by adding the quantity of shipments by domestic producers to the quantity of imports and then subtracting the quantity of exports. Data on imports were obtained from the U.S. Customs Service; data on shipments and exports were estimated from responses to questionnaires sent to all known domestic producers of broom corn brooms.

The data for each of the components used in the computation of apparent annual consumption of broom corn brooms were as shown in the table below:

Whiskbrooms provided for in TSUS items 750.26 to 750.28, inclusive, and other brooms provided for in TSUS items 750.29 to 750.31, inclusive: U.S. producers' shipments, imports, exports, and apparent consumption, 1965, 1975, and 1976

[In dozens]

Item	1965 [1]	1975 [2]	1976
	Wiskbrooms provided for in TSUS items 750.26 to 750.28, inclusive		
U.S. producers' shipments	318,691	255,379	257,473
Imports	152,686	121,102	134,338
Exports	765	456	218
Apparent consumption	470,612	376,025	391,593
	Other brooms provided for in TSUS items 750.29 to 750.31, inclusive		
U.S. producers' shipments	2,596,457	2,120,341	2,045,094
Imports	296,897	153,638	116,357
Exports	14,359	3,969	4,166
Apparent consumption	2,878,995	2,270,010	2,159,285

[1] As reported to the President on May 2, 1968.
[2] As reported to the President on Mar. 17, 1976.

BROOMS CONSIDERED COMPETITIVE WITH BROOM CORN BROOMS

As reported to the President on May 23, 1969, the Commission concluded that whiskbrooms of all fibers other than broom corn are competitive with whiskbrooms made of broom corn, and that upright brooms of all fibers other than broom corn are competitive with upright broom corn brooms. The Commission further concluded that push brooms 16 inches or less in width generally are competitive with upright broom corn brooms. The "competitive" brooms identified above are generally used for the same purpose as, and are generally substitutable for, broom corn brooms.

The Commission estimates that domestic shipments, imports, exports, and apparent consumption in 1968 [1] and 1976 of the brooms considered to be competitive with broom corn brooms were as shown in the table below:

[1] As reported to the President on May 23, 1969.

Brooms competitive with broom corn brooms: Estimated U.S. producers' shipments, imports, exports, and apparent consumption, 1968 and 1976

[In thousands of dozens]

Type of broom	Producers' shipments		Imports		Exports		Apparent consumption	
	1968	1976	1968	1976	1968	1976	1968	1976
Wiskbrooms:								
Plastic fiber	36	74	8	22	(1)	1	44	95
Other fiber	59	[2] 3	.....	5	(1)	(1)	59	[2] 8
Other (upright) brooms:								
Plastic fiber	193	699	131	120	6	24	318	795
Other fiber	95	59	.....	47	2	1	93	105
Push brooms (16 in or less in width)	269	179	.....	13	1	3	268	189

[1] Less than 500 doz.
[2] The absence of any substantial production in 1976 of whiskbrooms of fibers other than plastics or broom corn is attributable in large measure to the substitution of plastics for "other fiber" in the production of whiskbrooms since 1968.

SOURCE: Compiled from data furnished by domestic producers and official statistics of the Bureau of the Census.

Issued: March 28, 1977.

By order of the Commission.

KENNETH R. MASON,
Secretary.

[For immediate release; Oct. 23, 1967]

OFFICE OF THE WHITE HOUSE
PRESS SECRETARY,
THE WHITE HOUSE, *October 24, 1967.*

EXECUTIVE ORDER 11377—PROVIDING FOR TARIFF COMMISSION REPORTS REGARDING THE ESTIMATED CONSUMPTION OF CERTAIN BROOMS

By virtue of the authority vested in me by the Constitution and the statutes, including section 332 of the Tariff Act of 1930 (19 U.S.C. 1332), it is hereby ordered as follows:

1. In order to assist the President in the exercise of his authority under headnote 3 to schedule 7, part 8, subpart A, of the Tariff Schedules of the United States (79 Stat. 948; 19 U.S.C. 1202), the United States Tariff Commission shall keep under review developments with regard to whiskbrooms of a kind provided for in items 750.26 to 750.28, inclusive, of the tariff schedules, and other brooms of a kind provided for in items 750.29 to 750.31, inclusive, of such schedules, and shall annually report to the President, as early as practicable in each calendar year, its judgment as to the estimated annual consumption of each such kind of brooms during the immediately preceding calendar year, together with the basis therefor. The first report by the Commission under this paragraph shall contain estimates for the calendar year 1967, and also similar estimates for the calendar year 1965, together with the basis therefor.

2. At the time of its report of the estimates under paragraph 1 of this order for 1968, and biennially thereafter, in addition to the matters described in paragraph 1, the Commission shall report to the President available information as to the production of and trade in other types of brooms which it considers to be competitive with those identified in paragraph 1 and, if practicable, estimates as to the annual consumption of such other brooms.

/s/ LYNDON B. JOHNSON.

DEPARTMENT OF LABOR

Employment and Training Administration

EMPLOYMENT TRANSFER AND BUSINESS COMPETITION DETERMINATIONS UNDER THE RURAL DEVELOPMENT ACT

Applications

The organizations listed in the attachment have applied to the Secretary of Agriculture for financial assistance in the form of grants, loans, or loan guarantees in order to establish or improve facilities at the locations listed for the purposes given in the attached list. The financial assistance would be authorized by the Consolidated Farm and Rural Development Act, as amended, 7 U.S.C. 1924(b), 1932, or 1942(b).

The Act requires the Secretary of Labor to determine whether such Federal assistance is calculated to or is likely to result in the transfer from one area to another of any employment or business activity provided by operations of the applicant. It is permissible to assist the establishment of a new branch, affiliate or subsidiary, only if this will not result in increased unemployment in the place of present operations and there is no reason to believe the new facility is being established with the intention of closing down an operating facility.

The Act also prohibits such assistance if the Secretary of Labor determines that it is calculated to or is likely to result in an increase in the production of goods, materials, or commodities, or the availability of services or facilities in the area, when there is not sufficient demand for such goods, materials, commodities, services, or facilities to employ the efficient capacity of existing competitive commercial or industrial enterprises, unless such financial or other assistance will not have an adverse effect upon existing competitive enterprises in the area.

The Secretary of Labor's review and certification procedures are set forth at 29 CFR Part 75. In determining whether the applications should be approved or denied, the Secretary will take into consideration the following factors:

1. The overall employment and unemployment situation in the local area in which the proposed facility will be located.

2. Employment trends in the same industry in the local area.

3. The potential effect of the new facility upon the local labor market, with particular emphasis upon its potential impact upon competitive enterprises in the same area.

4. The competitive effect upon other facilities in the same industry located in other areas (where such competition is a factor).

5. In the case of applications involving the establishment of branch plants or facilities, the potential effect of such new facilities on other existing plants or facilities operated by the applicant.

All persons wishing to bring to the attention of the Secretary of Labor any information pertinent to the determinations which must be made regarding these applications are invited to submit such information in writing within two weeks of publication of this notice to: Deputy Assistant Secretary for Employment and Training, 601 D St. NW., Washington, D.C. 20213.

Signed at Washington, D.C. this 28th day of March, 1977.

ERNEST G. GREEN,
Assistant Secretary for Employment and Training.

Applications received during the week ending March 25, 1977

Name of applicant	Location of enterprise	Principal product or activity
Triple A Sugar Corp.	Easton, Maine	Processing of sugar beet into white sugar.
Saint Francis College	Biddeford, Maine	College higher education leading to B.A. and B.S. degrees.
Vastill Corp. (tenant of Essex County Industrial Development Agency).	Plattsburg, N.Y.	Manufacture of self-watering planters.
Greenbrier Estates	Lewisburg, W. Va.	Mobile home park.
Ramada Inn	Harlan, Ky.	Motel and restaurant.
Benton Electric Corp.	Madison County, Ga.	Manufacture of vacuum formed plastic fiberglass signs and sign faces.
Coshocton Pipe Co.	Coshocton County, Ohio.	Transportation and sale of natural gas to ultimate industrial consumers.
John W. Thompson	Taylor, Tex.	Motel.
Rigid Tanks, Inc.	Throckmorton, Tex.	Manufacture of welded steel tanks for oil and salt water storage.
Mount Rushmore Hotel Associates	Rapid City, S.D.	Motel—food and beverage.
Manchester Packaging Co. (tenant of City of St. James).	St. James, Mo.	Manufacture of poly bags.
American Olivine Corp. (tenant of Jackson County).	Dillsboro, N.C.	Mining and processing of olivine ore.
Barry County Lumber Co.	Hastings, Mich.	Lumber, paint and building materials sales.

MISSISSIPPI

Availability of Federal Supplemental Benefits

This notice announces the beginning of a new Federal Supplemental Benefit Period in the State of Mississippi, effective March 27, 1977, but only on the condition that the benefit program is extended by an act of Congress.

BACKGROUND

The Emergency Unemployment Compensation Act of 1974 (Pub. L. 93-572, enacted December 31, 1974) (the Act) created a temporary program of supplementary unemployment benefits (referred to as Federal Supplemental Benefits) for unemployed individuals who have exhausted their rights to regular and extended benefits under State and Federal unemployment compensation laws. Federal Supplemental Benefits are payable during a Federal Supplemental Benefit Period in a State which has entered into an Agreement under the Act with the U.S. Secretary of Labor. A Federal Supplemental Benefit Period is triggered on in a State when unemployment in the State or in the State and the nation reaches the high levels set in the Act. During a Federal Supplemental Benefit Period the maximum amount of Federal Supplemental Benefits which are payable under the current law to eligible individuals are up to 13 weeks or 26 weeks, depending upon the level of the rate of insured unemployment in the State.

There is a Federal Supplemental Benefit "on" indicator in a State for a week if the U.S. Secretary of Labor determines with respect to the State that, (a) there is a State or National "on" indicator for the week, as determined for the purposes of payment of extended benefits under the Federal-State Extended Unemployment Compensation Act of 1970, as amended, and (b) the employment security agency of the State has determined that the average rate of insured unemployment in the State for the period consisting of that week and the immediately preceding 12 weeks equalled or exceeded 5.0 percent. The Federal Supplemental Benefit Period actually begins with the third week following the week for which there is an "on" indicator, and under the current law lasts for a minimum period of not less than 26 weeks; however, no benefit period will begin in Mississippi unless the program is extended, because under the current law the program terminates on March 26, 1977.

Similarly, an "off" indicator ending a Federal Supplemental Benefit Period occurs in a week when the Secretary of Labor determines that the average rate of insured unemployment (as determined by the State employment security agency) for the period consisting of that week and the immediately preceding 12 weeks is less than 5.0 percent. The Federal Supplemental Benefit Period actually ends with the third week after the week in which there is an "off" indicator. Only if the program is extended will this have any bearing on Mississippi, and in any extension of the program there may be changes in those provisions.

DETERMINATION OF "ON" INDICATOR

The Secretary of Labor has determined under section 203(d) of the Federal-State Extended Unemployment Compensation Act of 1970, as amended, and 20 CFR 615.13(a), (Title 20 of the Code of Federal Regulations, section 615.13(a)), that there is a National "on" indicator in effect which is applicable to every State, as announced in the notice published in the FEDERAL REGISTER on February 21, 1975, at 40 FR 7722. The employment security agency of the State of Mississippi has determined under the Act and 20 CFR 618.19(a)(2) (published in the FEDERAL REGISTER on March 23, 1976, at 41 FR 12151, 12157) that the average rate of insured unemployment in the State for the period consisting of the week ending on March 12, 1977, and the immediately preceding 12 weeks, equaled or exceeded 5.0 percent.

Therefore, on the condition that the program is extended by an act of Congress, I have determined in accordance with the Act and 20 CFR 618.19(a), and as authorized by the Secretary of Labor's Order 4-75, dated April 16, 1975 (published in the FEDERAL REGISTER on April 28, 1975, at 40 FR 18515), that there was a Federal Supplemental Benefit "on" indicator in the State of Mississippi for the week ending on March 12, 1977, and that a Federal Supplemental Benefit Period therefore commenced in that State with the week beginning on March 27, 1977.

INFORMATION FOR CLAIMANTS

The duration of Federal Supplemental Benefits payable in the new Federal Supplemental Benefit Period, if it takes effect, and the terms and conditions on which they are payable, will be governed by amendments that are made in any act extending the program.

If the program is extended, the State employment security agency will furnish a written notice of potential entitlement to Federal Supplemental Benefits to each individual who is an "exhaustee" (as defined in the Act and 20 CFR 618.5) of regular and extended benefits payable under State and Federal unemployment compensation laws, and to each individual who has a previously established Federal Supplemental Benefit Account in which there is any balance as of the beginning of the new Federal Supplemental Benefit Period.

Persons who believe they may be entitled to Federal Supplemental Benefits in the State of Mississippi, or who wish to inquire about their rights under this program, should contact the nearest State Employment Office of the Mississippi Employment Security Commission in their locality.

Signed at Washington, D.C., on March 29, 1977.

ERNEST G. GREEN,
Assistant Secretary for Employment and Training.

[FR Doc.77-9840 Filed 3-31-77;8:45 am]

UTAH

Availability of Federal Supplemental Benefits

This notice announces the beginning of a new Federal Supplemental Benefit Period in the State of Utah, effective March 27, 1977, but only on the condition that the benefit program is extended by an act of Congress.

BACKGROUND

The Emergency Unemployment Compensation Act of 1974 (Pub. L. 93-572, enacted December 31, 1974) (the Act) created a temporary program of supplementary unemployment benefits (referred to as Federal Supplemental Benefits) for unemployed individuals who have exhausted their rights to regular and extended benefits under State and Federal unemployment compensation laws. Federal Supplemental Benefits are payable during a Federal Supplemental Benefit Period in a State which has entered into an Agreement under the Act with the United States Secretary of Labor. A Federal Supplemental Benefit Period is triggered on in a State when unemployment in the State or in the State and the nation reaches the high levels set in the Act. During a Federal Supplemental Benefit Period the maximum amount of Federal Supplemental Benefits which are payable under the current law to eligible individuals are up to 13 weeks or 26 weeks, depending upon the level of the rate of insured unemployment in the State.

There is a Federal Supplemental Benefit "on" indicator in a State for a week if the United States Secretary of Labor determines with respect to the State that (a) there is a State or National "on" indicator for the week, as determined for the purposes of payment of extended benefits under the Federal-State Extended Unemployment Compensation Act of 1970, as amended, and (b) the employment security agency of the State has determined that the average rate of insured unemployment in the State for the period consisting of that week and the immediately preceding twelve weeks equalled or exceeded 5.0 percent. The Federal Supplemental Benefit Period actually begins with the third week following the week for which there is an "on" indicator, and under the current law lasts for a minimum period of not less than 26 weeks; however, no benefit period will begin in Utah unless the program is extended, because under the current law the program terminates on March 26, 1977.

Similarly, an "off" indicator ending a Federal Supplemental Benefit Period occurs in a weeks when the Secretary of Labor determines that the average rate of insured unemployment (as determined by the State employment security agency) for the period consisting of that week and the immediately preceding twelve weeks is less than 5.0 percent. The Federal Supplemental Benefit Period actually ends with the third week after the week in which there is an "off" indicator. Only if the program is extended will this have any bearing on Utah, and in any extension of the program there may be changes in those provisions.

DETERMINATION OF "ON" INDICATOR

The Secretary of Labor has determined under section 203(d) of the Federal-State Extended Unemployment Compensation Act of 1970, as amended, and 20 CFR 615.13(a), (Title 20 of the Code of Federal Regulations, section 615.13(a)), that there is a National "on" indicator in effect which is applicable to every State, as announced in the notice published in the FEDERAL REGISTER on February 21, 1975, at 40 FR 7722. The employment security agency of the State of Utah has determined under the Act and 20 CFR 618.19(a)(2) (published in the FEDERAL REGISTER on March 23, 1976, at 41 FR 12151, 12157), that the average rate of insured unemployment in the State for the period consisting of the week ending on March 12, 1977, and the immediately preceding twelve weeks, equalled or exceeded 5.0 percent.

Therefore, on the condition that the program is extended by an act of Congress, I have determined in accordance with the Act and 20 CFR 618.19(a), and as authorized by the Secretary of Labor's Order 4-75, dated April 16, 1975 (published in the FEDERAL REGISTER on April 28, 1975, at 40 FR 18515), that there was a Federal Supplemental Benefit "on" indicator in the State of Utah for the week ending on March 12, 1977, and that a Federal Supplemental Benefit Period therefore commenced in that State with the week beginning on March 27, 1977.

INFORMATION FOR CLAIMANTS

The duration of Federal Supplemental Benefits payable in the new Federal Supplemental Benefit Period, if it takes effect, and the terms and conditions on which they are payable, will be governed by amendments that are made in any act extending the program.

If the program is extended, the State employment security agency will furnish a written notice of potential entitlement to Federal Supplemental Benefits to each individual who is an "exhaustee" (as defined in the Act and 20 CFR 618.5) of regular and extended benefits payable under State and Federal unemployment compensation laws, and to each individual who has a previously established Federal Supplemental Benefit Account in which there is any balance as of the beginning of the new Federal Supplemental Benefit Period.

Persons who believe they may be entitled to Federal Supplemental Benefits in the State of Utah, or who wish to inquire about their rights under this program, should contact the nearest Employment Security Office of the Utah Industrial Commission in their locality.

Signed at Washington, D.C., on March 29, 1977.

ERNEST G. GREEN,
Assistant Secretary for Employment and Training.

Occupational Safety and Health Administration

NATIONAL ADVISORY COMMITTEE ON OCCUPATIONAL SAFETY AND HEALTH

Request for Nomination of Members

The Assistant Secretary of Labor for Occupational Safety and Health requests nominations for membership on the National Advisory Committee on Occupational Safety and Health. The function of this Committee is to advise the Assistant Secretary on policy matters and on the implementation of the Occupational Safety and Health Act.

The current terms of six members of the twelve member Committee expire on June 30, 1977. Vacancies on the Committee will be in the following categories: one public representative; one employee representative; one employer representative; one safety representative and two health representatives. Terms of office are two years.

Any interested person or organization may nominate one or more qualified persons for membership. Please identify nominees by name, occupation or position, address and telephone number. Specify the field or group which the candidate would represent and include a resume of the nominee's background, experience and qualifications. In addition, the nomination should state that the nominee is aware of the nomination and is willing to serve as a Committee member.

Nominations should be submitted to Joanne Goodell, Acting Director, Division of Consumer Affairs, Room N-3635, Department of Labor Building, 3rd Street and Construction Avenue, NW, Washington, D.C. 20210, no later than April 30, 1977.

Signed at Washington, D.C. this 25th day of March 1977.

J. GOODELL,
Executive Secretary.

[V-77-6]

PITTSBURGH-DES MOINES STEEL CO.

Application for Variance and Interim Order; Grant of Interim Order

I. *Notice of application.* Notice is hereby given that Pittsburgh-Des Moines Steel Company, 1015 Tuttle Street, Des Moines, Iowa 50308 has made application pursuant to section 6(d) of the Occupational Safety and Health Act of 1970 (84 Stat. 1596; 29 U.S.C. 655) and 29 CFR 1905.11 for a variance, and interim order pending a decision on the application for a variance, from the standards prescribed in 29 CFR 1926.552(c) concerning personnel hoists and 1926.451(1) (4) and (5) concerning boatswain's chairs.

The addresses of the places of employment that will be affected by the application are:

Southern Illinois Power Plant, County Road, E., Marion, Illinois.

and all future stack erection sites in States under Federal jurisdiction.

The applicant certifies that employees who would be affected by the variance have been notified of the application by giving a copy of it to their authorized employee representative, and by posting a copy at all places where notices to employees are normally posted. Employees have also been informed of their right to petition the Assistant Secretary for a hearing.

Regarding the merits of the application, the applicant contends that it is providing a place of employment as safe as that required by §§ 1926.451(1) (4) and (5) and 1926.552(c).

The applicant is engaged in the construction of stack liners. In erecting the liner, work must be performed at elevations to 400' or more. The applicant contends that at such heights access ladders are impractical. There is not sufficient room inside a stack to erect a construction hoist tower, and the erection of one outside the stack would present serious problems due to the necessary height of the tower and the tapering of the stack. In addition, at times the use of a boatswain's chair is necessary. However, the applicant states that the use of block and falls is impractical for transporting an employee to and from these elevations.

Therefore, the applicant proposes to transport personnel to and from the elevated work platforms utilizing a special workman's hoist, including the hoist machine and a two-man safety cage. The applicant further proposes to transport personnel one at a time to and from the elevated work platform utilizing a boatswain's chair while substituting a materials hoist for a block and falls. The applicant has submitted detailed procedures which it will follow in transporting personnel by these means.

A copy of the application will be made available for inspection and copying upon request at the Office of Variance Determination, Occupational Safety and Health Administration, U.S. Department of Labor, 200 Constitution Avenue, N.W., Room N-3668, Washington, D.C. 20210, and at the following Regional and Area Offices:

U.S. Department of Labor, Occupational Safety and Health Administration, 911 Walnut Street, Room 3000, Kansas City, Missouri 64106.

U.S. Department of Labor, Occupational Safety and Health Administration, 210 Walnut Street, Room 638, Des Moines, Iowa 50309.

U.S. Department of Labor, Occupational Safety and Health Administration, 32nd Floor, Room 3263, 230 S. Dearborn Street, Chicago, Illinois 60604.

U.S. Department of Labor, Occupational Safety and Health Administration, 228 N.E. Jefferson, 3rd Floor, Peoria, Illinois 61603.

All interested persons, including employers and employees, who believe they would be affected by the grant or denial of the application for a variance are invited to submit written data, views and arguments relating to the pertinent application no later than May 2, 1977. In addition, employers and employees who believe they would be affected by a grant

V4263 APR 1 77 UMI

or denial of the variance may request a hearing on the application no later than May 2, 1977, in conformity with the requirements of 29 CFR 1905.15. Submission of written comments and requests for a hearing should be in quadruplicate, and must be addressed to the Office of Variance Determination at the above address.

II. *Interim order.* It appears from the application for a variance and interim order that, as required by section 6(d) of the Act, the use of a special workman's hoist to transport employees and the substitution of a materials hoist for block and fall on a boatswain's chair will provide to the affected employees a place of employment as safe as that which would be provided if the applicant complied with 29 CFR 1926.451 (1)(4) and (5) and 1926.552(c). It further appears that an interim order is necessary to prevent undue hardship to the applicant and its employees pending a decision on the variance. Therefore it is ordered, pursuant to the authority in section 6(d) of the Occupational Safety and Health Act of 1970, in 29 CFR 1905.11(c), and in Secretary of Labor's Order No. 8–76 (41 FR 25059), that Pittsburgh-Des Moines Steel Company be, and it is hereby, authorized to utilize a special workman's hoist consisting of a hoist machine and a special two-man safety cage to transport employees to and from the work platforms, and to use a boatswain's chair to transport employees one at a time while substituting a materials hoist for the block and falls, *Provided*, That the following conditions are complied with:

a. *Hoist machine.* (1) The hoist machine shall be designated as a portable man hoist.

(2) The hoist machine shall be powered both in the up and down direction.

(3) The hoist machine shall be located far enough from the footblock to obtain correct fleet angle or proper spooling on the hoist drum.

(4) The hoisting machine shall be a type of which the car hoisting drum is driven in both directions of rotation and is automatically stopped and held rotationless upon loss of applied power so that the drum cannot be in a freewheeling condition. A drive system of which the hoisting drum can be placed into a freewheeling position for the purpose of lowering the car by use of the braking system or a system of which the velocity of the car being lowered is reduced by increasing the engine or motor speed shall not be allowed.

(5) The hoist machine shall be equipped with a "dead-man" control switch in top of operating lever or in conventional foot-type location which shall stop the hoist immediately if released.

(6) The hoist machine shall be equipped with a winding drum of not less than 30 times the diameter of rope used, with rope not to be spooled closer than two inches to edge of flange.

(7) The hoist machine shall be equipped with a line speed indicator maintained in good working condition.

(8) The hoist machine shall be equipped with either two independently operated brakes each capable of holding the load as follows:

(i) An externally contracting band type brake mounted directly on the hoist drum. A foot pedal shall be located near the operator's seat for sit down control.

(ii) An electromagnetic braking device, capable of holding 150 percent of the rated load, which shall be automatically applied upon cessation of power. The electromagnetic brake shall be properly located in the drive between the power source and the drum.

or two independent band type brakes in conjunction with hydraulic braking, each capable of holding the load as follows:

(i) Two independent band type brakes, one mounted directly on the hoist drum, the second mounted directly on the hydraulic motor which are spring engaged and hydraulically disengaged and will automatically engage upon cessation of power and capable of withstanding 150 percent of the rated load.

(ii) Hydraulic braking system which is concurrent with hand control lever.

(9)(i) The hoist machine frame shall be self-supporting rigid, welded steel frame with skid base and holding brackets for anchor lines located at corners, as well as legs for anchor bolts.

(ii) The hoisting machine shall be securely anchored to prevent machine displacement, movement or dislodgment.

(10) Hoist machine wiring shall be equipped with terminal blocks for connections with limit switches that are placed at upper and lower end of travel to prevent the bottom of the cage from being taken above the platform level of the top scaffold or below the bottom loading platform. The hoist shall stop automatically if limit switch contact is opened.

(11) All electrical equipment shall be waterproof.

(12) The hoisting machine shall be electrically grounded.

(13) Single lever control for both speed and direction shall be used.

b. *Operating control.* (1) The operator of the hoist shall be an experienced operator.

(2) The hoist shall not be operated in excess of 250 ft/min. when carrying personnel.

(3) Signals shall consist of two-way radio or wired intercom between hoist operator, the lower landing and the upper landing.

c. *Hoist rope.* (1) The hoisting rope shall be improved plow steel or equivalent quality of nonrotating type or regular lay rope with proper swivel and shall be not less than one-half inch diameter. It shall be attached to the cage by a closed hook or hook with locking swivel safety latch.

(2) Where clip fasterner is used, the clips shall be installed in accordance with Table H–20, 29 CFR 1926.251(a)(2) and they shall be installed with "U" of clip on dead end of rope. Spacing clip-to-clip shall be six times the diameter of the rope.

(3) The load end of the hoist rope shall be weighted to prevent line run.

d. *Footblock.* (1) The footblock shall construction type of solid single piece ball, which will prevent rope escapement due to sheave failure, and provide for rope return.

(2) The line diameter of the footblock shall be not less than 24 times the rope diameter.

(3) The change in directions of hoist rope at the footblock shall be approximately 90°.

e. *Cathead.* (1) The overhead sheave supports shall be securely fastened together by bolts or weld to prevent spreading. The sheaves shall be installed between the supporting members and shall rotate on a fixed shaft or the shaft shall revolve in pillow block bearings.

(2) The sheaves used on cathead shall have a minimum diameter equal to 24 times diameter of rope when travel of rope on the sheaves is approximately 90°. When using ½ inch diameter rope, the corresponding minimum sheave diameter shall be 12 inches.

f. *Safety cables.* (1) There shall be two steel safety cables suitable for use with safety clamps, as described in paragraph (g) (6), (7) and (8), or equivalent.

(2) One end shall be fastened to an overhead support which is supported independently of the overhead support for the hoist rope and the bottom end securely attached with approximately 100 pound tension in ropes. Safety cables shall be ½ inch diameter.

g. *Cage.* (1) The cage shall be of welded construction of two-man capacity.

(2) The framework of the cage shall be covered with aluminum expand-x or equivalent.

(3) The floor shall be one inch thick plywood securely fastened in place or equivalent.

(4) The roof shall be slanted and of ⅛ inch thick aluminum or equivalent.

(5) The entrance to the cage shall have positive mechanical locking.

(6) Safety clamps shall be of a type that are portable and can be attached or detached from the lifeline. The clamps shall be fabricated 100 percent of stainless steel, have instant holding action and a solid self-locking pin, spring loaded, for locking the two parts together.

(7) The safety clamp attached on opposite sides of the cage shall grip the safety cables in case of emergency.

(8) The safety clamps shall operate on the broken rope principle.

h. *Capacity.* The maximum of two-man cage shall be two men or 400 pounds. A sign stating capacity shall be posted in the cage.

i. *Emergency escape.* An emergency escape device with accommodations for each man in the cage with a minimum of 5/16 inch braided nylon rope or better, long enough to reach the bottom landing from the highest escape point below the upper landing shall be securely attached to the inside of the cage. Not more than one man shall use the escape means at a time.

j. *Welding.* All welding shall be done by welders in accordance with § 1926.556(b)(5).

k. *Inspection.* (1) Visual inspection shall be performed daily on the manlift system.

(2) A drop test shall be performed before initial use at each job and monthly thereafter for the duration of the job.

Pittsburgh-Des Moines Steel Co., shall give notice of this interim order to employees affected thereby by the same means required to be used to inform them of the application for variance.

Effective date: This interim order shall be effective as of April 1, 1977, and shall remain in effect until a decision is rendered on the appliaction for variance.

Signed at Washington, D.C., this 25th day of March 1977.

B. M. CONCKLIN,
Deputy Assistant Secretary of Labor.

[FR Doc.77–9842 Filed 3–31–77;8:45 am]

OREGON STATE STANDARDS

Approval

1. *Background.* Part 1953 of Title 29, Code of Federal Regulations prescribes procedures under section 18 of the Occupational Safety and Health Act of 1970 (hereinafter called the Act) by which the Regional Administrator for Occupational Safety and Health (hereinafter called the Regional Administrator) under a delegation of authority from the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter called the Assistant Secretary) (29 CFR 1953.4) will review and approve standards promulgated pursuant to a State plan which has been approved in accordance with section 18(c) of the Act and 29 CFR Part 1902. On December 28, 1972, notice was published in the FEDERAL REGISTER (37 FR 28628) of the approval of the Oregon plan and the adoption of Subpart D to Part 1952 containing the decision.

The Oregon plan provides for the adoption of State standards which are at least as effective as comparable Federal standards promulgated under section 6 of the Act. Section 1953.20 provides that "where any alteration in the Federal program could have an adverse impact on the at least as effective as status of the State program, a program change supplement to a State plan shall be required."

In response to Federal standards changes, the State has submitted by letter dated November 2, 1976 from Keith Wilson, Chairman, Workmens Compensation Board, to James Lake, Regional Administrator, and incorporated as part of the plan, State standards comparable to 29 CFR § 1910.183, Helicopters, as published in the FEDERAL REGISTER (40 FR 13440) dated March 20, 1976.

These State standards, which are contained in the Oregon Safety Code Chapter 11 Section 7, were promulgated after public hearings held on August 4, 1976.

2. *Decision.* Having reviewed the State submission in comparison with the Federal standards, it has been determined that the State standards are at least as effective as the comparable Federal standards and accordingly should be approved. On its own initiative, the State has a standard requiring that flight paths be arranged so that suspended loads will not pass over ground personnel and clarified intent of § 1910.183(i), Hooking and Unhooking Loads. The detailed standards comparison is available at the locations specified below.

3. *Location of supplement for inspection and copying.* A copy of the standards supplement, along with the approved plan, may be inspected and copied during normal business hours at the following locations: Office of the Regional Administrator, Occupational Safety and Health Administration, Room 6003, Federal Office Building, 909 First Avenue, Seattle, Washington 98174; Workmen's Compensation Board, Labor and Industries Building, Room 204, Salem, Oregon 97310; and the Technical Data Center, Room N3620, 200 Constitution Avenue NW., Washington, D.C. 20210.

4. *Public participation.* Section 1953(c)(1) of this chapter provides that where State standards are identical to or "at least as effective" as comparable Federal standards and have been promulgated in accordance with State law, approval may be effective upon publication without an opportunity for further public participation. As the standards under consideration are "at least as effective" as the Federal standards and have been promulgated in accordance with State law including an opportunity for public comment and a public hearing, they are approved without an opportunity for further public comment.

This decision is effective April 1, 1977.

(Sec. 18, Pub. L. 91–596, 84 Stat. 1608 (29 U.S.C. 667).)

Signed at Seattle, Washington this 24th day of February 1977.

JAMES W. LAKE,
Regional Administrator—OSHA.

[FR Doc.77–9844 Filed 3–31–77;8:45 am]

WASHINGTON STATE STANDARDS

Approval

1. *Background.* Part 1953 of Title 29, Code of Federal Regulations prescribes procedures under section 18 of the Occupational Safety and Health Act by which the Regional Administrator for Occupational Safety and Health (hereinafter called the Regional Administrator) under a delegation of authority from the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter called the Assistant Secretary), (29 CFR 1953.4) will review and approve standards promulgated pursuant to a State plan which has been approved in accordance with section 18(c) of the Act and 29 CFR Part 1902. On January 26, 1973, notice was published in the FEDERAL REGISTER (38 FR 2421) of the approval of the Washington plan and the adoption of Subpart F to Part 1952 containing the decision.

The Washington plan provides for the adoption of Federal standards as State standards after public hearing. Section 1953.20 provides that "where any alteration in the Federal program could have an adverse impact on the at least as effective as "status of the State program, a program change supplement to a State plan shall be required." In response to Federal standards changes, the State has submitted by letter dated October 6, 1976 from John Hillier, Assistant Dirctor, to James Lake, Regional Administrator, and incorporated as part of the plan, a State standard comparable to 29 CFR 1910.184(e)(9)(i), Slings, as published in the FEDERAL REGISTER (40 FR 31598) dated July 20, 1975.

This State standard, which is contained in WAC 296–24 General Safety and Health Standards, was promulgated after public hearing held on September 1, 1976, pursuant to Chapter 34.04 RCW and of the Open Public Meetings Act of 1971, Chapter 42.30 RCW.

2. *Decision.* Having reviewed the State submission in comparison with the Federal standard, it has been determined that the State standard is identical to the Federal standard.

3. *Location of supplement for inspection and copying.* A copy of the standards supplement, along with the approved plan, may be inspected and copied during normal business hours at the following locations: Office of the Regional Administrator, Occupational Safety and Health Administration, Room 6003 Federal Office Building, 909 First Avenue, Seattle, Washington 98174; Department of Labor and Industries, General Administration Building, Olympia, Washington 98504; and the Technical Data Center, Room N3620, 200 Constitution Avenue, Washington, D.C. 20210.

4. *Public participation.* Section 1953.2(c) of this chapter provides that when a State standard is identical to or "at least as effective" as comparable Federal standard and has been promulgated in accordance with State law, approval may be effective upon publication without an opportunity for further public participation. As the standard under consideration is identical to the Federal standard and has been promulgated in accordance with State law, it is approved without public comment.

This decision is effective April 1, 1977.

(Sec. 18, Pub. L. 91–596, 84 Stat. 1608 (29 U.S.C. 667).)

Signed at Seattle, Washington, this 2nd day of February 1977.

JACK R. JONES,
Acting Regional Administrator—OSHA.

LEGAL SERVICES CORPORATION

GRANTS AND CONTRACTS

MARCH 28, 1977.

The Legal Services Corporation was established pursuant to the Legal Services Corporation Act of 1974, Pub. L. 93-355, 88 Stat. 378, 42 U.S.C. 2996-2996*l*. Section 1007(f) provides: "At least thirty days prior to the approval of any grant application or prior to entering into a contract or prior to the initiation of any other project, the Corporation shall announce publicly, and shall notify the Governor and the State Bar Association of any State where legal assistance will thereby be initiated, of such grant, contract, or project. . ."

The Legal Services Corporation hereby announces publicly that it is considering the grant application submitted by:

Legal Aid Society of the City and County of St. Louis, St. Louis, Missouri, to serve the counties of St. Charles, Jefferson, Franklin, Washington and Warren.

Interested persons are hereby invited to submit written comments or recommendations concerning the above application to the Regional Office of the Legal Services Corporation at:

Chicago Regional Office, 310 South Michigan Avenue, 24th Floor, Chicago, Illinois 60604.

THOMAS EHRLICH,
President.

NATIONAL ADVISORY COMMITTEE ON OCEANS AND ATMOSPHERE

MEETING

MARCH 29, 1977.

Pursuant to Sec. 10(a)(2) of the Federal Advisory Committee Act, 5, U.S.C. App I (Supp V, 1975), notice is hereby given that the National Advisory Committee on Oceans and Atmosphere (NACOA) will hold a meeting Monday and Tuesday, April 18-19, 1977. These sessions will be open to the public and will be held in Room 4832 of the U.S. Department of Commerce Building, 14th Street between Constitution Avenue and E Street, N.W., Washington, D.C., beginning at 9 a.m. on both days.

The Committee, consisting of 25 non-Federal members appointed by the President from State and local governments, industry, science and other appropriate areas, was established by Congress by Public Law 92-125, on August 16, 1971, as amended. Its duties are to (1) undertake a continuing review of national ocean policy, coastal zone management and the progress of the marine and atmospheric science and service programs of the United States, (2) submit a comprehensive annual report to the President and to the Congress setting forth an overall assessment of the status of the Nation's marine and atmospheric activities on or before 30 June of each year, and (3) advise the Secretary of Commerce with respect to the carrying out of the purpose of the National Oceanic and Atmospheric Administration.

The Agenda will include the following topics:

APRIL 18, 1977

MORNING

0900 Opening Remarks.
0915 NOAA's Office of Ocean Engineering—Mr. Stephen Anastasion, Acting Director.
1000 Review of possible topics for NACOA Sixth Annual Report including: National goals, marine transportation, marine education, ocean engineering, National Weather Service emergency operations, air pollution monitoring, OCS oil and gas, nonfossil energy from the sea, deepsea mining, distant water fisheries, distant water research, national fisheries management, aquaculture, Dept. of State and marine issues, international agencies academic fleet, coastal zone management, national data centers.
1700 Adjournment.

APRIL 19, 1977

MORNING

0900 Opening Remarks.
0915 Annual Report topics review (continued).

Adjournment at approximately 1:30 p.m.

The public is welcome at these sessions and will be admitted to the extent of the seating available. Persons wishing to make formal statements should notify the Chairman in advance of the meeting. The Chairman retains the prerogative to place limits on the duration of oral statements and discussions. Written statements may be submitted before or after each session.

Additional information concerning this meeting may be obtained through the Committee's Executive Director, Dr. Douglas L. Brooks, whose mailing address is: National Advisory Committee on Oceans and Atmosphere, Department of Commerce Building, Room 5225, Washington, D.C. 20230. The telephone number is 377-3343.

DOUGLAS L. BROOKS,
Executive Director.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

MUSIC ADVISORY PANEL

Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given that a closed meeting of the Music Advisory Panel (Composer-Librettist Section) to the National Council on the Arts will be held on April 21-22, 1977, from 9:30 a.m. to 5:30 p.m., in the 12th Floor Screening Room, Columbia Plaza Building, 2401 E Street, NW., Washington, D.C.

This meeting is for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by grant applicants. In accordance with the determination of the Chairman published in the FEDERAL REGISTER of March 17, 1977. These sessions may be closed to the public pursuant to subsection (c) (4), (6) and 9(B) of section 552b of Title 5, United States Code.

Further information with reference to this meeting can be obtained from Mr. Robert M. Sims, Advisory Committee Management Officer, National Endowment for the Arts, Washington, D.C. 20506, or call (202) 634-6377.

ROBERT M. SIMS,
Administrative Officer, National Endowment for the Arts, National Foundation on the Arts and the Humanities.

MARCH 25, 1977.

NATIONAL SCIENCE FOUNDATION

LEGISLATION & REGULATION COMMITTEE OF THE NSF SCIENCE INFORMATION ACTIVITIES TASK FORCE

Open Meeting

In accordance with the Federal Advisory Act, Pub. L. 92-463, the National Science Foundation announces the following meeting:

Name: Legislation & Regulatory Committee of the Science Information Activities Task Force.
Date: April 19, 1977.
Time: 1:00 p.m. to 4:00 p.m.
Type of meeting: Open.
Place: Engineers Joint Council (Conf. Room 110, Lobby), 345 East 47th Street, New York, NY 10017.
Contact: Dr. Lee G. Burchinal, Director, Division of Science Information, Room 1201, National Science Foundation, Washington, DC 20550. Telephone: (202) 632-5824.

Persons planning to attend should notify Dr. Burchinal prior to this meeting.

Summary minutes: May be obtained from the Committee Management Coordination Staff, Division of Personnel and Management, Room 248, National Science Foundation, Washington, DC 20550.
Purpose of the Task Force: To provide advice and recommendations concerning the appropriate roles and responsibilities of the National Science Foundation regarding the communication and use of scientific and technical information. This committee, one of four established by the Task Force, will explore the Legislative and Regulatory aspects pertinent to the Task Force's charge.

AGENDA

1:00 p.m.—Welcome and Introductory Remarks by Chairman.
1:15 p.m.—Discussion on New Copyright Legislation Affecting Scientific Journal Publication.
2:30 p.m.—Discussion on Regulatory Environments Applicable to Science Information Systems.
3:00 p.m.—Open Public Participation.
4:00 p.m.—Adjourn.

M. REBECCA WINKLER,
Acting Committee Management Officer.

MARCH 29, 1977.

NUCLEAR REGULATORY COMMISSION

ENVIRONMENTAL SURVEY OF THE REPROCESSING AND WASTE MANAGEMENT PORTIONS OF THE LWR FUEL CYCLE

Availability of Public Comments and Responses

Notice is hereby given that a report, "Public Comments and Task Force Responses Regarding the Environmental Survey of the Reprocessing and Waste Management Portions of the LWR Fuel Cycle," NUREG-0216, prepared by the Commission's Office of Nuclear Material Safety and Safeguards, and a Staff paper entitled "Response to Comments on a Paper Entitled 'Impacts of Later Reversing a Decision to Adopt or Not to Adopt an Interim Rule Permitting Construction or Operation of Nuclear Power Plants'" (hereinafter "Response to Comments on Impacts Document") are available for inspection by the public in the Commission's Public Document Room at 1717 H Street, N.W., Washington, D.C., and in local public document rooms associated with individual nuclear power plants.

On October 18, 1976, the Commission published in the FEDERAL REGISTER a notice of a proposed revision to Table S-3 of 10 CFR Part 51 and announced at the same time the availability of the document on which the proposed revision would be based—"Environmental Survey of the Reprocessing and Waste Management Portions of the LWR Fuel Cycle," NUREG-0116. In addition, in the notice the Commission referenced an analysis entitled "Impacts of Later Reversing a Decision to Adopt or Not to Adopt an Interim Rule Permitting Construction or Operation of Nuclear Power Plants." This notice solicited comments on the proposed rule change, NUREG-0116, and the impact analysis.

NUREG-0216, which is now being made available, contains responses to the comments received on NUREG-0116 from Federal, State, and local officials and from interested members of the public. It also provides additional information on the environmental impacts of reprocessing and waste management which has either become available since the publication of NUREG-0116 or which adds requested clarification to the information in that document.

Copies of NUREG-0216 may be purchased from the National Technical Information Service, Springfield, Virginia 22161; printed copy, $11.75; microfiche, $3.

Single copies of "Responses to Comments on Impacts Document" may be obtained without charge, to the extent of supply, by writing the Division of Document Control, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.

Dated at Silver Spring, Maryland, this 18th day of March 1977.

For the Nuclear Regulatory Commission.

WILLIAM P. BISHOP,
Chief, Waste Management Branch, Division of Fuel Cycle and Material Safety.

SECURITIES AND EXCHANGE COMMISSION

[Administrative Proceeding File No. 3-5191; File No. 2-37401 22-6087]

AMERICAN AIRLINES, INC.

Application and Opportunity for Hearing

MARCH 24, 1977.

Notice is hereby given that American Airlines, Inc. (the "Applicant") has filed an application under clause (ii) of section 310(b)(1) of the Trust Indenture Act of 1939, as amended (the "Act"), for a finding by the Securities and Exchange Commission (the "Commission") that the trusteeships of Bankers Trust Company under certain existing indentures involving American Airlines, Inc. ("American") hereinafter described and under an Equipment Trust Agreement (the "New Indenture") of American not to be qualified under the Act are not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify Bankers Trust Company from acting as trustee under the New Indenture.

Section 310(b) of the Act provides, in part, that if a trustee under an indenture qualified under the Act has or shall acquire any conflicting interest, it shall within ninety days after ascertaining that it has such conflicting interest, either eliminate such conflicting interest or resign. Subsection (1) of such section provides, in effect, with certain exceptions, that a trustee under a qualified indenture shall be deemed to have a conflicting interest if such trustee is trustee under another indenture under which any other securities of the same issuer are outstanding. However, under clause (ii) of subsection (1), there may be excluded from the operation of this provision another indenture under which other securities of the issuer are outstanding, if the issuer shall have sustained the burden of proving, on application to the Commission and after opportunity for hearing thereon, that the trusteeships under such qualified indenture and such other indenture are not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify such trustee from acting as trustee under either of such indentures.

The Applicants allege the following: (1) American, a Deleware Corporation, intends to finance a part of the acquisition cost of twelve Boeing Model 727-223 aircraft (the "Aircraft") through the placement with institutional investors of approximately $98,000,000 principal amount of equipment trust certificates which certificates are expected to be issued pursuant to the New Indenture. It is anticipated that the certificates to be issued under the New Indenture will include approximately $20,000,000 principal amount of Interim Equipment Trust Certificates maturing on the earlier of August 31, 1977 or the first closing of the sale of the Short Term and Long Term Equipment Trust Certificates referred to below and of approximately $32,500,000 principal amount of Short Term Equipment Trust Certificates (5 year maturity) and approximately $65,500,000 principal amount of Long Term Equipment Trust Certificates (15 year maturity). American will guarantee the due and punctual payment of principal and interest on the Interim Equipment Trust Certificates. The Equipment Trust Certificates to be issued under the New Indenture will be secured by the Aircraft and American's obligation to pay rent therefore, all as provided in the New Indenture. Copies of the proposed New Indenture will be filed by an amendment to the Applicant's Application promptly upon its availability.

(2) Applicant desires to appoint Bankers Trust Company, a New York Corporation, to act as trustee under the New Indenture.

(3) Bankers Trust Company presently is acting as trustee under the following indentures of American: (a) a trust agreement dated as of October 20, 1967 ("1967 Indenture"), (b) a Trust agreement dated as of September 15, 1969 ("1969 Indenture"), (c) a trust indenture and mortgage dated as of June 1, 1970, as amended and supplemented ("1970 Indenture"), (d) a trust agreement dated as of November 15, 1971 ("1971 Indenture"), (e) a trust indenture and mortgage dated as of April 1, 1975 ("1975 Indenture"), (f) a trust indenture and mortgage dated as of April 1, 1976 ("First 1976 Indenture") and (g) a trust indenture and mortgage dated as of May 1, 1976 (the "Second 1976 Indenture"), relating to the financing of twenty-seven Boeing Model 727-223 aircraft, two Boeing Model 727-223 aircraft, seven Boeing Model 747-123 aircraft, two McDonnell Douglas DC-10 aircraft, six Boeing Model 727-223 aircraft, five Boeing Model 727-223 aircraft and three Boeing Model 727-223 aircraft, respectively, leased to American. 6½ percent Equipment Trust Loan Certificates were issued under the 1967 Indenture in the original principal amount of $114,371,636.03, of which $77,383,386.72 remain outstanding; final payment is due on January 1, 1987. 9½ percent Equipment Trust Loan Certificates were issued under the 1969 Indenture in the original principal amount of $9,079,642.40, of which $6,155,742.00 remain outstanding; final payment is due July 29, 1984. Guaranteed Loan Certificates, Series A, B, Interim C, Second Interim C and C, were issued under the 1970 Indenture

V42 63 APR 1 77 UMI

and remain outstanding in the following respective principal amounts: $47,850,000.00 original principal amount of 11 percent Series A, due December 1, 1988, presently outstanding in the principal amount of $40,295,000.00; $31,800,000.00 original principal amount of 10⅞ percent Series B, due December 1, 1988, presently outstanding in the principal amount of $26,714,000.00; $15,564,000 original principal amount of 9½ percent Interim Series C, due June 1, 1980, none of which is presently outstanding; $15,689,000.00 original principal amount of 9½ percent Second Interim Series C, due June 1, 1989, none of which is presently outstanding; and $32,000,000.00 original principal amount of 10 percent Series C, due June 1, 1989, presently outstanding in the principal amount of $27,203,000.00. 9¼ percent Equipment Trust Loan Certificates were issued under the 1971 Indenture in the original principal amount of $19,513,754.67, of which $18,171,561.81 remain outstanding. 11⅝ percent Equipment Trust Loan Certificates were issued under the 1975 Indenture in the original principal amount of $32,031,409.80, of which $29,935,497.92 remain outstanding. 11 percent Short Term Equipment Trust Loan Certificates were issued under the First 1976 Indenture in the original principal amount of $14,039,261.05, of which $13,253,661.43 remain outstanding, and 9⅛ percent Long Term Equipment Trust Loan Certificates were issued under the First 1976 Indenture in the original principal amount of $14,778,166.51, all of which remain outstanding. 11 percent Short Term Equipment Trust Loan Certificates were issued under the Second 1976 Indenture in the original principal amount of $8,392,164.42, of which $8,239,856.87 remain outstanding, and 9⅛ percent Long Term Equipment Trust Loan Certificates were issued under the Second 1976 Indenture in the original principal amount of $8,833,855.48, all of which remain outstanding. Copies of the trust agreement, lease and other documents (combined as a single document) setting forth the terms and provisions governing the certificates issued under the 1967 Indenture were filed as Exhibit 2 to American's Application dated March 3, 1970 under Section 310(b)(1)(ii) of the Act in connection with American's Registration Statement on Form S-7 under the Securities Act of 1933 (No. 2-37401) and are incorporated herein by reference. Copies of the trust agreement, lease and other documents (combined as a single document) setting forth the terms and provisions governing the certificates issued under the 1969 Indenture were filed as Exhibit 3 to such Application dated March 3, 1970 and are incorporated herein by reference. Copies of the trust indenture and mortgage, lease and other documents, as amended and supplemented, setting forth the terms and provisions governing the certificates issued under the 1970 Indenture were filed as exhibits to American's Registration Statements under the Securities Act of 1933 (Nos. 2-37401, 2-38352 and 2-39380) and are incorporated herein by reference. Copies of the trust agreement, lease and other documents (combined as a single document) setting forth the terms and provisions governing the certificates issued under the 1971 Indenture were filed as Exhibit A to American's Application dated March 25, 1975 under section 310(b)(1)(ii) and are incorporated herein by reference. Copies of the trust indenture and mortgage, lease and other documents (combined as a single document) setting forth the terms and provisions governing the certificates issued under the First 1976 Indenture were filed as Exhibit A to American's Application dated June 8, 1976 under section 310(b)(1)(ii) of the Act and are incorporated herein by reference. Copies of the trust indenture and mortgage, lease and other documents (combined as a single document) setting forth the terms and provisions governing the certificates issued under the Second 1976 Indenture were filed as Exhibit A to the Applicant's Application dated March 2, 1977 under section 310(b)(1)(ii) of the Act, and are incorporated herein by reference. The 1970 Indenture is qualified under the Act and the Commission has determined in response to applications of American that the trusteeships of Bankers Trust Company under the other indentures of American referred to above are not so likely to involve a material conflict of interest as to make it necessary to disqualify Bankers Trust Company from acting as trustee under such indentures.

(4) The certificates issued under the 1967 Indenture, the 1969 Indenture, the 1970 Indenture, the 1971 Indenture, the 1975 Indenture, the First 1976 Indenture (which in the case of the Long Term Loan Certificates are also secured by the letter of credit referred to in the First 1976 Indenture) and the Second 1976 Indenture (which in the case of the Long Term Loan Certificates are also secured by the purchase obligation of C.I.T. Corporation referred to in American's Application dated June 8, 1976 under section 310(b)(1)(ii) of the Act), are, and the certificates to be issued under the New Indenture will be, secured by separate lots of identified Aircraft, so that should the trustee have occasion to proceed against the security under one of these trusts, such action would not affect the security, or the use of any security, under any other trust. Thus, the existence of the other trusteeships should in no way inhibit or discourage the trustee's actions.

(5) American is not in default under any of its equipment obligations.

The Applicant has waived notice of hearing, hearing on the issues raised by its application and all rights to specify procedures under Rule 8(b) of the Rules of Practice of the Securities and Exchange Commission in connection with this matter.

For a more detailed statement of the matters of fact and law asserted, all persons are referred to said application, which is a public document on file in the Commission's Public Reference Section, 1100 L Street NW., Washington, D.C. 20549.

Notice is further given that any interested person may, not later than April 20, 1977, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application which he desires to controvert, or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. At any time after said date, the Commission may issue an order granting the application, upon such terms and conditions as to the Commission may seem necessary or appropriate in the public interest and the interest of investors, unless a hearing is ordered by the Commission.

For the Commission, by the Division of Corporation Finance, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Rel. No. 19949; 70-5986]

AMERICAN ELECTRIC POWER COMPANY, INC.

Proposed Amendments to Dividend Reinvestment and Stock Purchase Plan and Order Authorizing Solicitation of Proxies in Connection Therewith

Notice is hereby given that American Electric Power Company, Inc. ("AEP"), 2 Broadway, New York, New York 10004, a registered holding company, has filed a declaration and amendments thereto with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating sections 6(a), 7 and 12(e) of the Act and Rule 62 promulgated thereunder as applicable to the proposed transaction. All interested persons are referred to the declaration, as amended, which is summarized below, for a complete statement of the proposed transaction.

AEP proposes to amend its Dividend Reinvestment and Stock Purchase Plan ("Plan"). The proposed amendments to the Plan (1) would permit participants in the Plan to invest optional cash payments not more frequently than once a month on an investment date to be set by the board of directors, rather than quarterly as at present, subject to the same $3,000 (or such other amount not greater than $5,000 as the board of directors shall approve) quarterly limit per participant, but without any allotment requirement (where shares to be purchased with optional cash payments would exceed shares not purchased by the reinvestment of dividends), and (2) would permit employees of AEP subsidiaries to purchase shares through the plan at 100 percent of the then current market price average through periodic payroll deductions of not more than 10 percent of the employee's basic compensation.

It is stated that amending the Plan to permit monthly reinvestment of optional cash payments will make the plan more convenient to shareholders than it is at present in that it would permit participants to make optional cash payments at times which may be more convenient for them, while assuring them that they will not have to wait more than one month for their funds to be invested.

It is further stated that AEP now has in effect a stock purchase plan for AEP system employees, but the payroll deductions of participants are used to purchase shares in the open market. It is believed that permitting the employees to purchase shares under the Plan through payroll deductions will benefit AEP and its shareholders because it will provide another source of equity capital on an ongoing basis. All full-time AEP System employees who have completed a probationary period (approximately 20,000 persons at present) would be eligible to participate in the amended Plan. The existing employee stock purchase plan has approximately 14,000 participants, and participants purchased a total of 24,693 shares of common stock during 1976. It is proposed that the present stock purchase plan for AEP system employees will be discontinued if the proposed amendment is adopted.

AEP intends to submit the proposal for the amendments to its Dividend Reinvestment and Stock Purchase Plan to its shareholders for their consideration and approval at the annual meeting to be held on April 27, 1977. In connection therewith, AEP proposes to solicit proxies from the holders of its common stock through the use of solicitation material which sets forth the proposal in detail. AEP also proposes to solicit proxies for the election of directors and for the approval of the selection of auditors. The proposal for the amendments to the Dividend Reinvestment and Stock Purchase Plan requires an affirmative vote of a majority of the shares present or represented at the meeting.

The fees and expenses to be incurred by AEP in connection with the solicitation of proxies are estimated at $192,000. Additional information as to the fees and expenses to be incurred in connection with the proposed amendments to the Plan will be filed by amendment. It is stated that no state commission and no federal commission, other than this Commission, has jurisdiction over the proposed transaction.

Notice is further given that any interested person may, not later than April 18, 1977, request in writing that a hearing be held with respect to the proposed transaction, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said declaration, as amended, which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the declarant at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the declaration, as amended or as it may be further amended, may be permitted to become effective as provided in Rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

It is appearing to the Commission that the declaration, as amended, insofar as it proposes the solicitation of proxies from AEP's common stockholders, should be permitted to become effective forthwith pursuant to Rule 62:

It is ordered, That the declaration, as amended, regarding the proposed solicitation of proxies from AEP's common stockholders be, and it hereby is, permitted to become effective forthwith pursuant to Rule 62 and subject to the terms and conditions prescribed in Rule 24 under the Act.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Release No. 34-13460; File No. SR-BSPS-77-3]

BRADFORD SECURITIES PROCESSING SERVICES, INC.

Proposed Rule Change by Self-Regulatory Organizations

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on March 10, 1977, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

The proposed rule change is the change in St. Louis, Missouri and Kansas City, Kansas facilities from correspondent arrangements to BSPS branch clearance facilities in St. Louis, Missouri and Kansas City, Missouri. These facilities are similar to the additional branches approved by the Commission in Rel. No. 34-12915 dated October 12, 1976.

STATEMENT OF BASIS AND PURPOSE

The basis and purpose of the foregoing proposed rule change is as follows:

The purpose is to insure present and potential customers timely clearance of securities transactions in each of these locations.

These facilities will help to provide for the continued prompt and accurate clearance of security transactions in each of the regional locations. It will allow for any qualified bank or broker/dealer to utilize these facilities for the prompt and accurate clearance of their respective securities transactions.

Verbal comments received from existing customers and potential customers indicate a continued need for our services in these cities.

BSPS is of the opinion that converting these facilities will not impose any burden on competition.

On or before May 6, 1977, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(A) by order approve such proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street NW., Washington D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before April 22, 1977.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

CAROLINA PALMETTO INCOME INVESTORS

Filing of Application for an Order Declaring That Carolina Palmetto Investors Has Ceased To Be an Investment Company

Notice is hereby given that Carolina Palmetto Income Investors ("Applicant"), Suite 1709, Bankers Trust Towers, P.O. Box 11877, Columbia, South Coralina 29211, registered as a closed-end diversified management investment company under the Investment Company Act of 1940 ("Act"), filed an application on December 16, 1976 and an amendment thereto on March 3, 1977, pursuant to section 8(f) of the Act, for an order of the Commission declaring that it has ceased to be an investment company as defined in the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicant, a South Carolina limited partnership, registered under the Act on September 21, 1973. Applicant states that it neither raised any capital nor conducted any business whatsoever except the filing of its registration under the Act and its application herein. Applicant states that it has no assets.

Applicant represents that its general partners met on December 1, 1975 and unanimously resolved to terminate the partnership and apply for an order declaring that Applicant has ceased to be an investment company.

Section 8(f) of the Act provides, in pertinent part, that whenever the Commission, upon application, finds that a registered investment company has ceased to be an investment company, it shall so declare by order and upon taking effect of such order the registration of such company shall cease to be in effect.

Notice is further given that any interested person may, not later than April 15, 1977, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicant at the address stated above. Proof of such service (by affidavit, or in case of an attorney-at-law by certificate) shall be filed contemporaneously with the request. As provided by Rule 0-5 of the rules and regulations promulgated under the Act, an order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Release No. 9690; 812-4100]

CENTRAL STATES, SOUTHEAST AND SOUTHWEST AREAS PENSION FUND

Filing of Application of the Act for Extension of Exemption

MARCH 22, 1977.

Notice is hereby given that Central States, Southeast and Southwest Areas Pension Fund ("Applicant"), 8550 West Bryn Mawr Avenue, Chicago, Illinois 60631, has filed an application on March 3, 1977 for an order of the Commission pursuant to sections 6(c) and 6(e) of the Investment Company Act of 1940 ("Act"), to extend the termination date of the order previously requested by Applicant (File No. 812-4026) until the earlier of April 30, 1977 or such date as the Internal Revenue Service ("IRS") shall have made a final administrative agency determination of Applicant's status under Internal Revenue Code ("Code") section 401. All interested persons are referred to the application on file with the Commission for a statement of the representations made therein, which are summarized below.

Applicant submits that the IRS probably will not have made a final administrative agency determination as to its Code section 401 status by March 31, 1977, which is the date upon which the exemptive order previously requested of the Commission will terminate. Applicant believes that, in such event, its status under the Act again will be uncertain, and that such situation will seriously inhibit and interfere with Applicant's ability to retain independent professional investment advisers and custodians.

On March 22, 1977, subsequent to the date Applicant filed the present application, an order (Investment Company Act Release No. 9687) was issued granting exemption retroactively from specified provisions of the Act and exemption, effective September 10, 1976 until the earlier of March 31, 1977 or the final administrative determination by the IRS of Applicant's status under Code section 401, from sections 7, 8, 10(e), 13(a), 15(a), 15(c), 16, 17(a), 17(d), 17(g), 18, 21(a), 24(b), 30, 31, and 32 of the Act, provided that: (1) The exemption from section 17(a) shall not apply to any transaction in which the terms are not reasonable or fair to Applicant or which involves overreaching by the party to the transaction other than Applicant, or which is a prohibited transaction under the Employees Retirement Income Security Act of 1974 ("ERISA") section 406, unless exempt under ERISA section 408; (2) the exemption from section 17(d) shall not apply to any transaction in which the participation by Applicant is on a basis less advantageous than that of the other participant, or which is a prohibited transaction under ERISA section 406, unless exempt under ERISA section 408; (3) Applicant shall furnish to the Commission, upon request, copies of any and all reports, schedules, records, analyses and financial statements produced and maintained by either Applicant or its custodian bank relating to Applicant's assets, investments, purchases or sales of securities, mortgage loans, or renewals or revisions thereof; (4) the Commission, or any member or representative delegated by the Commission, shall have the right to conduct, at any time and from time to time, such reasonable periodic, special, or other examinations, as the Commission may prescribe, of all records the Applicant maintains; and (5) during the term of the order, Applicant, its investment managers, and all other presons in their transactions with or on behalf of the Applicant shall be subject to and comply with (a) all provisions of the Act, and rules and regulations thereunder, from which no exemption has been granted, as though Applicant were a registered investment company, and (b) the terms and conditions of the order.

Section 6(c) of the Act provides in part that the Commission by order upon application may conditionally or unconditionally exempt any person or or transaction from any provision or provisions of the Act if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Section 6(e) of the Act provides that if, in connection with any rule, regulation, or order under this section exempting any investment company from any provision of section 7, the Commission deems it necessary or appropriate in the public interest or for the protection of investors that certain specified provisions of this Act pertaining to registered investment companies shall be applicable in respect of such company, the provisions so specified shall apply to such company, and to other persons in their transactions and relations with such company, as though such company were a registered investment company.

Applicant submits that the issuance of the order requested hereby is consistent with the public interest and the purposes fairly intended by the policy and provisions of the Act, particularly in light of its limited duration and coordination with the termination date for certain temporary relief granted by the IRS.

Notice is further given that any interested person may, not later than April 11, 1977, at 12:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to

be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicant at the address stated above. Proof of such service (by affidavit, or in case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0-5 of the rules and regulations promulgated under the Act, an order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[FR Doc.77-9768 Filed 3-31-77;8:45 am]

[Release No. 13398; SR-CBOE-76-24]

CHICAGO BOARD OPTIONS EXCHANGE, INC.

Approval of Proposed Rule Change

On December 8, 1976, the Chicago Board Options Exchange, Incorporated, LaSalle at Jackson, Chicago, Illinois 60604, filed with the Commission, pursuant to Section 19(b) of the Securities Exchange Act of 1934 (the "Act"), as amended by the Securities Acts Amendments of 1975, and Rule 19b-4 thereunder copies of a proposed rule change. The filing was amended on March 11, 1977. The rule change would allow the option price to more accurately reflect the price change in the underlying issue.

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by publication of a Commission Release (Securities Exchange Act Release No. 13079 (December 16, 1976) and by publication in the FEDERAL REGISTER (41 FR 55956) (December 23, 1976)).

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to registered national securities exchanges, and in particular, the requirements of section 6 and the rules and regulations thereunder.

It is therefore ordered, Pursuant to section 19(b)(2) of the Act, that the proposed rule change filed with the Commission on December 8, 1976, be, and it hereby is, approved.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[FR Doc.77-9778 Filed 3-31-77;8:45 am]

[Rel. No. 9691; 811-1647]

COLUMBINE FUND, INC.

Filing of Application of the Act for an Order Declaring That Company Has Ceased To Be an Investment Company

Notice is hereby given that The Columbine Fund, Inc. ("Applicant"), 789 Sherman Street, Suite 410, Denver, Colorado 80202, an open-end, diversified management investment company registered under the Investment Company Act of 1940 ("Act"), filed an application on October 18, 1976, and an amendment thereto on February 25, 1977, pursuant to section 8(f) of the Act for an order of the Commission declaring that the Applicant has ceased to be an investment company as defined in the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicant was organized as a corporation under the laws of Maryland, and engaged in a public offering of its shares of common stock from July 24, 1970, to shortly before October 1, 1973 pursuant to an effective registration statement under the Securities Act of 1933.

On September 13, 1974, Applicant's Board of Directors unanimously resolved that it was advisable that Applicant be voluntarily dissolved. On September 19, 1975, the shareholders of Applicant approved the dissolution. Thereafter, Articles of Dissolution were prepared and filed and accepted for filing in Maryland during February 1976. As of September 1, 1976, Applicant was not conducting business operations except for activities involved in connection with its dissolution and distribution of its assets.

Applicant has distributed its assets to all of its shareholders except one and is in the process of locating its one remaining shareholder to make distribution to him. As of February 9, 1977, Applicant had 139.908 shares outstanding, held by the sole remaining shareholder, and assets of $881. The $881 will be held in trust in a non-interest bearing account by Computech Fund Services, Inc., Applicant's transfer agent, until such time as under Maryland law such sum will escheat to that State, or until such shareholder is found and amounts owed are distributed to him, whichever is sooner.

Section 8(f) of the Act provides in part that whenever the Commission, upon application, finds that a registered investment company has ceased to be an investment company, it shall so declare by order and upon the taking effect of such order, the registration of such company shall cease to be in effect.

Notice is further given that any interested person may, not later than April 18, 1977, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicant at the address stated above. Proof of such service (by affidavit, or in case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0-5 of the rules and regulations promulgated under the Act, an order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[FR Doc.77-9780 Filed 3-31-77;8:45 am]

[Release No. 34-13401]

COMMENCEMENT OF PILOT PROGRAMS IN PUT OPTIONS TRADING

Letter Sent; Pending Proposals

Upon authorization by the Commission, the Division of Market Regulation, on March 4, 1977, sent letters to the chief executive officers of the American Stock Exchange, Inc., Chicago Board Options Exchange, Incorporated, Midwest Stock Exchange, Incorporated, Pacific Stock Exchange Incorporated and the Philadelphia Stock Exchange, Inc. concerning their pending proposals for the commencement of puts option trading on their respective exchanges (SR-Amex-76-11, SR-CBOE-75-7, SR-MSE-76-26, SR-PSE-76-8 and SR-PHLX-76-10, respectively).

The text of the letter is as follows (The bracketed material appeared only in the letter to the American Stock Exchange, Inc.; the double bracketed material appeared in letters to the American Stock Exchange, Inc. and the Chicago Board Options Exchange, Incorporated):

The Commission has determined it will approve the Exchange's proposed rule changes to permit put options trading on a pilot basis on the Exchange (the "Puts Proposal"), provided that the Exchange satisfactorily amends its filing in the respects described below and, in addition, that the Exchange satisfies the Commission, by representations in writing prior to such approval, that it has adequately addressed itself to the other matters mentioned below.

To ensure a sufficient period for completing the appropriate educational and training efforts, and for the implementation of internal exchange procedures for surveillance of its marketplace and member firms, which will be necessary prior to the commencement of put options trading, the Puts Proposal should state the Exchange's intention not to begin such trading before June 1, 1977.

The Commission believes that the size of the initial puts pilot should be more limited than has been proposed and that, to the maximum extent feasible, experience should

V4263 APR 1 77 UMI

be gained prior to further expansion. First, the Commission believes that the initially authorized put classes should be upon underlying stocks as to which the Exchange will have already experienced at least one expiration date in call options. Second, the Commission wishes to limit to approximately five, the number of underlying securities on which put options trading may be commenced at this time. Third, the Commission recognizes that the Exchange may wish to expand its puts pilot at an appropriate time in the future. In this regard, we expect to review by November 7, 1977, the experience of each of the options exchanges commencing puts pilots and the progress each makes in substantially resolving the concerns the Commission has with respect to the surveillance and other regulatory efforts of the respective options exchanges. At such time and upon satisfaction of those concerns, the Commission will consider a further expansion of each of the puts pilots.

The Commission believes it is undesirable to prohibit the listing of put options in dually traded classes. However, it also recognizes that, during the puts pilot, the limitation on the authorized number of put classes may have inequitable competitive effects should one or more exchanges authorized to trade put options do so on dually traded options while the other exchange(s) also trading that option class are precluded, by the limitation on the number of put classes mentioned previously, from also trading put options on that class. With the foregoing points in mind, the Commission requests that you contact, Mr. Martin Moskowitz, Assistant Director of the Office of Self-Regulatory Oversight of this Division, to discuss the most appropriate method of resolving this problem. Following these conversations, the Exchange will be expected to file appropriate amendments to its Puts Proposal.

With respect to position limits, the Puts Proposal should be amended such that all participants [, including options specialists,] trading options on the Exchange are subject to uniform position limits of a maximum of 1,000 contracts on the same side of the market. That is, the Puts Proposal should provide for an Exchange rule which unambiguously states that no person, or group of persons acting together, may hold more than 1,000 long call options or 1,000 short put options (or any combination of long call options or short put options not to exceed an aggregate of 1,000 contracts) and 1,000 short call options or 1,000 long put options (or any combination of short call options and long put options not to exceed an aggregate of 1,000 contracts). There are to be no exceptions for options positions covered by stock or spread positions. The current Exchange rule limiting positions to 500 contracts per expiration period, except for covered and spread positions, may be eliminated. Of course, the Commission expects to review those limits in the light of further experience.

With the increase in trading volume and the added complexity in trading that may be anticipated as a result of the commencement of trading in put options, the Commission is concerned that Exchange members be able to complete transactions in standardized options in a timely and accurate manner. Accordingly, the Commission expects that, prior to the commencement of trading in put classes, the Exchange will have assured itself that its members have the capacity to compare, clear, settle and identify to customer accounts all transactions in standardized options in accordance with the rules of the Exchange and the Options Clearing Corporation and with sound business practice. In addition, the Commission would expect the Exchange to determine that its member firms promptly reconcile or otherwise resolve uncompared trades and trades not identified to customer orders.

With respect to customer margin requirements, the Exchange may wish to consult with the other options exchanges in order to arrive at a uniform allocation procedure for the computation of margin, thereby minimizing the number of calculations required when put options are traded in conjunction with call options. Furthermore, the Exchange should review its present margin rules in light of the recently adopted uniform margin rule of the Federal Reserve Board in order to determine whether there are any inconsistencies which should be resolved. In addition, the Exchange should allocate additional resources for monitoring its members' margin calculation and supervisory procedures to ensure that such member firms have a complete understanding of the margin rules and that appropriate margin is required.

During the course of the Commission's recent investigations of various options selling practices, it was noted that problems exist regarding the procedures for identifying and retrieving data on a particular options transaction. The problem appears to have arisen because of computer programming techniques which did not allow for identification of records of a specific options series. Since it is our understanding that technology is presently available to correct this problem, the Exchange should consider the prompt adoption of record-keeping requirements.

[The staff has previously expressed to the Amex the Commission's concern that the Amex institute as promptly as possible a reliable audit trail to enable the Amex to trace back a particular reported trade to the parties consummating it. Such an audit trail is essential to the effective and efficient surveillance of options trading on the Amex. We understand from a letter from Mr. Robert J. Birnbaum, Executive Vice President of the Amex, dated December 13, 1976, and subsequent telephone conversations, that the Amex has instituted, as an interim measure, a system whereby the selling party to each reported transaction can be identified by a manual retrieval of mark sense cards. While we have not yet received evaluation reports of that system nor have we had the opportunity to inspect the system's on-floor operation, we anticipate that the described features of this audit trail system will be satisfactory as a preliminary matter. You should be further advised that the Commission will approve your proposed rule change (SR–Amex–75–15) to establish a new class of memberships to be known as options principal members when we have concluded that there is satisfactory evidence that the Amex has implemented such an audit trail.]

[However, the Commission notes that the Amex's current version of an audit trail system will not produce for each reported trade on an easily observable computer print-out the identities of the executing members on both sides of each transaction, including the clearing firms, correlated to reported transactions. While we realize that other systems designed to produce such accountability in a computer readable format may sacrifice some efficiency in the speed of reporting, we believe it imperative that the Amex move to attain such capability in an audit trail at the earliest opportunity.]

To avoid undue procedural delays, we encourage your prompt attention to the preceding points. [[Some of these concerns were addressed in the Division's letter of January 31, 1977, and are being considered by you now.]] Should you have any questions, please feel free to contact members of this Division.

Sincerely,

LEE A. PICKARD,
Director.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Rel. No. 19947; 70-5976]

EASTERN UTILITIES ASSOCIATES

Proposed Increase in Number of Authorized Shares of Common Stock; and of Proposed Amendment of Declaration of Trust and Order Authorizing Solicitation of Proxies in Connection Therewith

Notice is hereby given that Eastern Utilities Associates ("EUA"), P.O. Box 2333, Boston, Massachusetts, 02107, a registered holding company, has filed a declaration with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act") designating sections 6(a), 7 and 12(e) of the Act and Rule 62 promulgated thereunder as applicable to the following proposed transaction. All interested persons are referred to the declaration, which is summarized below, for a complete statement of the proposed transaction.

EUA proposes, subject to obtaining shareholder approval, to amend its Declaration of Trust ("Charter") in several respects. EUA proposes that the maximum number of shares of authorized $5 common stock be increased from 4,000,000 to 7,000,000. Presently, there are 3,600,000 such shares outstanding.

EUA states that it now expects, subject to market conditions and other factors which may effect such financing, that it will offer for public sale 600,000 common shares in May, 1977 and is likely to offer for public sale approximately 600,000 to 700,000 common shares in each of the years 1978, 1979, 1980 and 1981.

EUA states that construction requirements for the EUA System are presently estimated at $23 million, $27 million, $30 million, $34 million and $34 million for the years 1977, 1978, 1979, 1980 and 1981, respectively.

EUA further proposes to amend the Charter provisions concerning pre-emptive rights to permit the Trustees, should they find it desirable, to authorize the issuance and sale of additional shares of common stock pursuant to a plan whereby any shareholder can purchase such shares by reinvesting dividends or by making limited optional cash payments or pursuant to a plan for ownership of shares by employees of EUA and its direct and indirect subsidiaries.

EUA states that this amendment would provide the Trustees with added flexibility in raising its capital requirements.

EUA further proposes to amend the Charter to provide that action may be taken by the Trustees without a meeting if all the Trustees consent in writing to such action and/or that the Trustees or members of any committee of Trustees may participate in meetings by means of a conference telephone. EUA states that such provisions are expressly permitted by the Massachusetts corporate statutes.

EUA proposes to call an annual shareholders meeting of stockholders on or about April 25, 1977. EUA proposes to solicit proxies from its common shareholders of record as of March 11, 1977, through the use of proposed proxy materials, to obtain the requisite approval of the proposed amendments to the Charter. The proposed form of proxy also solicits proxies either for or against the election of a specified slate of trustees for the ensuing year.

The favorable vote of at least a majority of EUA's common stock outstanding and entitled to vote is required to increase the number of authorized shares of common stock. Passage of the other two proposed amendments requires the affirmative vote of at least two-thirds of EUA's common stock outstanding and entitled to vote.

Fees, commission and expenses to incurred in connection with the proposed transaction, will be supplied by amendment. It is stated that no state and no federal commission, other than this Commission, has jurisdiction over the proposed transaction.

Notice is further given that any interested person may, not later than April 14, 1977, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said declaration, as amended, which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the declarant at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the declaration, as amended, or as it may be further amended, may be permitted to become effective as provided in Rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

It appearing to the Commission that the declaration, as amended, insofar as it proposes to solicitation of proxies from EUA's stockholders, should be permitted to become effective forthwith pursuant to Rule 62:

It is ordered, That the declaration, as amended, regarding the proposed solicitation of proxies of EUA's stockholders be, and it hereby is, permitted to become effective forthwith pursuant to Rule 62 and subject to the terms and conditions prescribed in Rule 24 under the Act.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Rel. No. 9688; 812-4071]

KANSAS VENTURE CAPITAL, INC.

Filing of Application for Order Exempting Company From All Provisions of the Act

MARCH 22, 1977.

Notice is hereby given that Kansas Venture Capital, Inc. ("Applicant"), 1030 First National Bank Building, Topeka, Kansas 66603, a Kansas corporation, filed an application on December 27, 1976, and an amendment thereto on March 18, 1977, pursuant to section 6(c) of the Investment Company Act of 1940 ("Act") for an order exempting Applicant from all provisions of the Act. All interested persons are referred to the application which is on file with the Commission for a statement of the representations therein, which are summarized below.

Applicant rperesents that it was organized solely for the purpose of operating as an investment company under the Small Business Investment Act of 1958 ("SBIA"), as amended, and that it has filed an application with the Small Business Administration for a license under the SBIA. Such application is pending. Applicant intends to provide equity capital and to make long-term loans to small business concerns in the State of Kansas.

Applicant's authorized capital of $2,500,000 is represented by 250,000 shares of common stock with a par value $10 per share. To date, none of its common stock has been sold. It is planned that Applicant will issue and sell approximately 55,100 shares of its common stock to Kansas Development Credit Croporation, Inc. ("KDCC"), a Kansas corporation, at a price of $10 per share. It is contemplated that subsequent to that transaction Applicant will sell its common stock solely to state and national banks located in and doing business in the State of Kansas in such a manner that KDCC will be the majority stockholder of Applicant at all times. Applicant represents that there are 613 national and state banks within the State of Kansas, and that 188 banks have indicated an interest in the formation of Applicant and of becoming stockholders of Applicant. The stock will be sold at its par value of $10 per share and no commission or other remuneration for solicitation or sale of the stock will be paid. No stock will be sold to individuals. Applicant represents that after the sale of common stock to KDCC and to such state and national banks within the State of Kansas that initially purchase stock of Applicant, there is no intention to offer any stock of Applicant in the future.

Applicant represents that the law of the State of Kansas authorizes Kansas state banks to subscribe to, buy and own stock in not more than one small business investment company in Kansas, except that in no event shall any such bank hold shares in such company in an amount aggregating more than 1 percent of its capital and surplus. Applicant represents that the amount of common stock of Applicant sold to any Kansas bank will not exceed ¼ of 1 percent of that bank's capital and surplus.

Applicant represents that such state and national banks, as well as KDCC, are sophisticated in securities matters and will purchase such stock for investment purposes only and not for the purpose of resale. All stock certificates will be appropriately legended. Applicant represents that KDCC does not and will not own securities of any other small business investment company and there is no stockholder owning 10 percent or more of KDCC's voting stock. Applicant further represents that each bank investor will have access to Applicant's books and records.

KDCC and the Kansas state banks which are proposed purchasers of the common stock of Applicant are subject to examination, supervision and control by the Bank Commissioner of the State of Kansas. The national banks within the State of Kansas which are proposed purchasers are subject to examination, supervision and control by the Comptroller of the Currency. Applicant represents that all of the proposed purchasing state banks are engaged in safe and sound banking practices.

All directors of Applicant shall be residents of the State of Kansas. Two-thirds of the directors shall be elected by the stockholders in such a manner that at least one director of said two-thirds shall be a resident of each of the geographical areas represented by the various Kansas Bankers Association's groups. One-third of the directors shall be elected by stockholders, at large.

Since Applicant will be primarily engaged in the business of investing, reinvesting, holding and owning securities, Applicant is an investment company within the definition of section 3(a) of the Act and is required to register unless exempted pursuant to section 6(c) of the Act. Section 6(c) of the Act provides, in part, that the Commission may conditionally or unconditionally exempt any person from any provision or provisions of the Act or of any rule or regulation under the Act if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested person may, not later than April 18, 1977, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter, accompanied by a statement as to the nature of his interest, the reason for such request and the issues of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order

V 4263 APR 1 77 UMI

a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon the Applicant at the address stated above. Proof of such service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0–5 of the rules and regulations promulgated under the Act, an order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

[FR Doc.77-9769 Filed 3-31-77;8:45 am]

[Release No. 9686; 812-3963]

MONTGOMERY STREET INCOME SECURITIES, INC.

Application for an Order of the Act for Exemption

Notice is hereby given that Montgomery Street Income Securities, Inc. ("Applicant"), 315 Montgomery Street, San Francisco, California 94137, a Delaware corporation which is registered under the Investment Company Act of 1940 ("Act") as a diversified, closed-end management investment company, has filed an application on June 1, 1976 and amendments thereto on July 23, 1976, November 2, 1976, March 9, 1977 and March 21, 1977, pursuant to section 6(c) of the Act, for an order of exemption from section 18(c) of the Act to permit Applicant to have outstanding privately arranged indebtedness while engaging in the lending of its portfolio securities. All interested persons are referred to the application on file with the Commission for a statement of Applicant's representations which are summarized below.

Section 18(c) of the Act states in part that it shall be unlawful for any registered closed-end investment company to issue or sell any senior security representing indebtedness if immediately thereafter such company will have outstanding more than one class of senior security representing indebtedness.

Section 18(g) of the Act in part states that "senior security" means any bond, debenture, note, or similar obligation or instrument constituting a security and evidencing indebtedness and "senior security representing indebtedness" means any senior security other than stock.

Applicant represents that it is engaged in lending of portfolio securities and that such loans are secured by cash and other collateral. Applicant requests that, assuming only for the purpose of this application that an obligation to return collateral deposited to secure the return of borrowed securities creates a senior security within the meaning of section 18(g) of the Act, it be exempted from section 18(c) of the Act to permit Applicant to engage in portfolio lending activities while having outsanding privately arranged indebtedness.

Applicant has agreed that the requested order may be effective only with respect to securities loan transactions effected in compliance with the following conditions:

(1) At the time of a loan, Applicant receives from or on behalf of a borrower collateral, consisting of cash or securities issued or guaranteed by the United States Government or its agencies, or any combination thereof, equal to not less than 100 percent of the market value of the securities loaned;

(2) A borrower agrees to add to collateral to cover increases in the market value of loan securities over the amount of the cash collateral on deposit or, in the case of non-cash collateral, over the market value thereof, or, if the original collateral is reasonably calculated to cover such increases, the borrower is obligated to deposit additional collateral when the collateral on deposit, as theretofore adjusted, appears to be inadequate, and Applicant shall require the deposit of additional collateral not later than the business day following the business day on which a collateral deficiency occurs or collateral appears to be inadequate, as the case may be;

(3) Upon termination of a loan, whether by a borrower or Applicant, a borrower shall be obligated to redeliver the borrowed securities; if Applicant terminates a loan, a borrower shall be obligated to effect such a redelivery within not more than five business days after notice;

(4) The borrower agrees (a) that Applicant is to receive all dividends, interest or other distributions on loaned securities and (b) to pay to Applicant a reasonable return on such loan either in the form of a loan fee or premium (which gives proper weight to prevailing interest rates) or from the retention by Applicant of part or all of the earnings and profits realized by Applicant from the investment of cash collateral (which Applicant has undertaken to the Commission will be invested only in bank certificates of deposit or other short-term instruments);

(5) Applicant shall not be required to pay any fees in connection with a loan, except (a) reasonable fees to a custodian where such fees are negotiated between the Applicant and the custodian, reduced to a written contract, and approved by the Applicant's directors, and (b) fees to a loan broker provided (i) the broker has disclosed to the Applicant that it is possible to loan portfolio securities without incurring such fees, (ii) neither the loan broker nor any of its affiliates is an affiliated person of Applicant, its investment adviser or any principal underwriter of Applicant, (iii) the loan broker receives a written representation of Applicant that Applicant's Board of Directors, or either a committee thereof or Applicant's investment adviser, acting within the general guidelines established by Applicant's Board of Directors, has determined that such fee is reasonable and based solely on the services rendered by such loan broker, and (iv) if under the terms of a specific loan transaction there is to be a payment by Applicant, either directly or through a loan broker from any fee paid by Applicant, to the borrower (a loan transaction may or may not include such a payment) Applicant's Board of Directors, or either a committee thereof or Applicant's investment adviser, acting within general guidelines established by Applicant's Board of Directors, shall separately consider (before making such a payment to comply with the terms governing the transaction) the reasonableness of any such payment and the reasonableness of the return to Applicant after giving effect to such a payment;

(6) In the event management has knowledge that a material event will occur affecting an investment on loan and in respect of which the holder of such investment, as such, will be entitled to vote or consent, Applicant will call the loan in time to vote or consent or will otherwise obtain rights to vote or consent;

(7) Applicant will not make a loan if, as a result, more than one-third of its total asset value (at market value computed at the time of making a loan) would be on loan; and

(8) Applicant make appropriate disclosures regarding securities loans in any prospectus it may be required to provide under the Securities Act of 1933, and effect any such loan only in accordance with the policies contained in its registration statement filed under the Act, unless otherwise authorized by shareholder vote.

Section 6(c) of the Act provides that the Commission may conditionally or unconditionally exempt any person or transaction from any provision under the Act or of any rule or regulation under the Act if and to the extent that such exemption is necessary or appropriate in the pubhlic interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested person may, not later than April 15, 1977, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission orders a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon the Applicant at the address stated above. Proof of such service (by affidavit, or in the case of any attorney-at-law by certificate) shall be filed contemporaneously with the request. As

provided by Rule 0–5 of the rules and regulations promulgated under the Act, an order disposing of the application herein will be issued as of course following said date, unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing or advice as to whether a hearing is ordered, will receive any notices and orders issued in the matter, including the date of the hearing (if ordered) and any postponements thereof.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

[FR Doc.77-9775 Filed 3-31-77;8:45 am]

[Release No. 9693; 812-4104]

NEL TAX EXEMPT BOND FUND, INC. AND NEL EQUITY SERVICES CORP.

Filing of Application of the Act for an Order Exempting Applicants

MARCH 24, 1977.

Notice is hereby given that NEL Tax Exempt Bond Fund, Inc. ("Fund"), a diversified, open-end investment company registered under the Investment Company Act of 1940 ("Act"), and NEL Equity Services Corporation ("Services") (collectively referred to as "Applicants"), 501 Boylston Street, Boston, Massachusetts 02117, filed an application on March 7, 1977 for an order, pursuant to section 6(c) of the Act, exempting Applicants from section 22(d) of the Act to the extent necessary to permit the application of amounts payable under insurance contracts issued by New England Mutual Life Insurance Company ("New England Life") to purchase shares of the Fund at reduced sales loads. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

The Fund was organized as a Massachusetts corporation on December 22, 1976, by New England Life, and has filed a registration statement on Form S–5 which has not yet been declared effective. The application states that the Fund intends to commence a continuous offering of its shares not less than 60 days after completion of its initial offering which will be for a period of approximately 45 days. It is stated that Services, a wholly owned subsidiary of New England Life, is the principal underwriter for the shares of the Fund, and will receive on the sale of Fund shares the underwriting discount or sales charge described in the then current prospectus of the Fund.

According to the application, shares of the Fund will be offered to the public during the Fund's initial offering period on the following basis:

Amount of purchase	Public offering price	Underwriting discount		
		Dollar amount	Percentage of—	
			Public offering price	Net amount invested
Less than $25,000	$10.00	$.45	4.50	4.71
$25,000 but less than $50,000	9.95	.40	4.02	4.19
$50,000 but less than $100,000	9.90	.35	3.54	3.66
$100,000 but less than $250,000	9.85	.30	3.05	3.14
$250,000 but less than $500,000	9.80	.25	2.55	2.62
$500,000 but less than $1,000,000	9.75	.20	2.05	2.09
$1,000,000 and over	9.65	.10	1.04	1.05

The Applicants represent that during the continuous offering the Fund intends to offer its shares at net asset value per share plus a maximum sales charge of 4.5 percent of the public offering price. It is asserted that shares of the Fund will be sold exclusively by New England Life insurance agents who are registered representatives of Services.

Section 22(d) of the Act provides, in pertinent part, that no registered investment company or principal underwriter shall sell any redeemable security to any person except at a current public offering price described in the prospectus. This section has been construed to prohibit variations in the sales load except as permitted by rule or order.

Applicants request an exemption from section 22(d) of the Act to permit the application of amounts payable under insurance contracts (other than such contracts which constitute securities of an "open-end investment company" as defined under the Act) issued by New England Life (e.g., the death benefit under life policies, the maturity value of endowment contracts and the cash surrender value of life insurance and annuity contracts) to purchase shares of the Fund at reduced underwriting discounts or sales charges equal to one-half the rate otherwise applicable.

Applicants represent that the premiums paid on the insurance contracts which constitute the source of the insurance proceeds will already have been subjected to sales charges, and that the sales efforts involved in sales of this type will be markedly reduced as compared with sales to new prospects. Therefore, the Applicants assert that the proposed exemption does not involve unfair discrimination and is in fact necessary to avoid unnecessary and inequitable duplication of sales charges to purchasers of this class. Applicants further assert that the proposed exemption presents no significant threat to the orderly distribution of redeemable investment company securities. Accordingly, Applicants submit that the requested exemption is necessary and appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Section 6(c) of the Act provides, in pertinent part, that the Commission, by order upon application, may conditionally or unconditionally exempt any person, security or transaction, or any class or classes of persons, securities or transactions, from any provision or provisions of the Act or rules and regulations promulgated thereunder, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested person may, not later than April 19, 1977, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicant(s) at the address(es) stated above. Proof of such service (by affidavit, or in case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0–5 of the rules and regulations promulgated under the Act, an order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[FR Doc.77-9765 Filed 3-31-77;8:45 am]

[Release No. 19955; 70–5754]

OHIO EDISON CO.

Proposed Issuance and Sale of Common Stock Pursuant to a Dividend Reinvestment and Stock Purchase Plan

MARCH 24, 1977.

Notice is hereby given that Ohio Edison Company ("Ohio Edison"), 76 South Main Street, Akron, Ohio 44308, a registered holding company, has filed a post-effective amendment to the application-declaration previously filed with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act") designating sections 6(a) and 7 of the Act and Rule 50 promulgated thereunder as applicable to the proposed transac-

V 4263 APR 1 77 UMI

tion. All interested persons are referred to the application-declaration, which is summarized below, for a complete statement of the proposed transaction.

Ohio Edison Company ("Ohio Edison") proposes to issue and sell not more than 275,000 shares of its authorized but unissued common stock, par value $9 per share (the "Additional Common Stock") pursuant to its Dividend Reinvestment and Stock Purchase Plan (the "Plan"). It is anticipated that the shares of Additional Common Stock will be issued and sold from time to time through April 30, 1979, the majority of such shares being sold on or prior to April 30, 1978.

By order dated March 31, 1976 (HCAR No. 19454) the Commission authorized the issuance and sale through April 30, 1977 pursuant to the Plan of not more than 250,000 shares of the Company's common stock. Although no precise number will be known until April 30, 1977, the Company currently estimates that, of the 250,000 shares, approximately 25,000 shares will remain unsold as of April 30, 1977. Therefore, Ohio Edison also proposes to add any such shares which remain unsold to the Additional Common Stock and to sell all such shares pursuant to the Plan, as amended, no later than April 30, 1979.

The Additional Common Stock will be offered to all of Ohio Edison's common stockholders pursuant to a voluntary plan whereby such stockholders may elect to (a) have dividends on their shares of common stock reinvested or (b) can continue to receive their cash dividends on shares registered in their names and invest by making optional cash payments of not less than $10 per payment nor more than a total of $5,000 per quarter or (c) invest both their cash dividends and such optional cash payments.

No service charge or commission will be paid by participants in connection with purchases under the Plan, and participants will retain all voting rights relating to shares purchased under the Plan. A participant will be able to withdraw from the Plan at any time upon written notice.

The purchase price of the Additional Common Stock will be the average of the closing sale price for the Ohio Edison's common stock, as quoted in The Wall Street Journal report of NYSE-Composite Transactions, during the five New York Stock Exchange trading days ending with the investment date (or the next preceding day on which the New York Stock Exchange is open, if it is closed on the investment date). Investment dates will be the last business day of each month. No shares will be sold under the Plan at less than the par value of such shares.

The reason for the proposed issuance of the Additional Common Stock is to provide funds which will enable Ohio Edison to continue its ongoing construction program and to repay a portion of unsecured short-term debt. Ohio Edison estimates its total plant additions for 1977 at $353,587,000 including $352,861,000 in electric plant additions.

Ohio Edison states that, as of the end of February 1977, proceeds from the Plan have totaled $3,623,314.86. Ohio Edison further states that, through February 1977, they have incurred costs of $111,000, including legal fees, in administering the Plan.

The Public Utilities Commission of Ohio has jurisdiction over any issue and sale of the Additional Common Stock. No other state commission and no federal commission, other than this Commission has jurisdiction over the proposed transaction. The fees, and expenses incurred directly or indirectly, in connection with the issuance and sale of the Additional Common Stock will be supplied by amendment.

Ohio Edison considers that the issuance and sale of shares of the Additional Common Stock through the reinvestment of dividends would be excepted from the requirements of paragraphs (b) and (c) of Rule 50 by virtue of paragraph (a) (1) of said Rule. With respect to the issuance and sale of shares of the Additional Common Stock in connection with any optional cash payment provision of the Plan, Ohio Edison hereby requests that the Commission make a finding under paragraph (a) (5) of Rule 50 which would except such issuance and sale from the competitive bidding requirements of Rule 50.

Notice is further given that any interested person may, not later than April 19, 1977, request in writing that a hearing be held on such matter, stating the nature of his interest, and reasons for such request, and the issues of fact or law raised by said post-effective amendment to the application-declaration which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the applicant-declarant at the above-stated address and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request.

At any time after said date, the application-declaration, as amended by the post effective amendment or as it may be further amended, may be granted and permitted to become effective as provided in Rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[FR Doc.77-9764 Filed 3-31-77;8:45 am]

[Rel. No. 19954;70-5988]

PUBLIC SERVICE COMPANY OF OKLAHOMA

Proposed Change in Deductions Used To Determine Earned Surplus for Purposes of Common Stock Dividend Limitations and Proposed Issuance and Sale of $50,000,000 in First Mortgage Bonds at Competitive Bidding

Notice is hereby given that Public Service Company of Oklahoma ("PSO"), P.O. Box 201, Tulsa, Oklahoma 74102, an electric utility subsidiary of Central and South West Corporation, a registered holding company, has filed an application-declaration with this Commission designating sections 6(a), 6(b) and 7 of the Public Utility Holding Company Act of 1935 ("Act") and Rule 50 promulgated thereunder as applicable to the proposed transaction. All interested persons are referred to the application-declaration, which is summarized below, for a complete statement of the proposed transaction.

PSO states that the Supplemental Indentures dated March 1, 1966, January 1, 1969, March 1, 1972, January 1, 1974, and June 1, 1975 (the "Supplemental Indentures"), under which The First National Bank and Trust Company of Tulsa is Trustee (the "Indenture"), prohibit the payment of common stock dividends (with stated exceptions) in each case in excess of the sum of (a) earned surplus determined as provided in the Supplemental Indentures after a specified date, (b) a stated dollar amount of earned surplus at such specified date and (c) such additional amount as may be authorized or approved, upon application of the Company (PSO), by the Securities and Exchange Commission, or any successor commission thereto, under the Public Utility Holding Company Act of 1935. The determination of earned surplus requires that a deduction from gross income be made for maintenance, repairs and as charges for depreciation, retirements, renewals, replacements and/or amortization in an amount not less than 15 percent of PSO's gross operating revenues for the period in question.

PSO states that inasmuch as it has fuel adjustment clauses covering virtually all of its sales, which enable it to recover in general substantially all of the higher fuel costs, its operating revenues have been greatly inflated over the period—and with them the maintenance and renewal fund requirement and the related earnings test deduction.

PSO states that, for the years 1972–1976 fuel costs as a percentage of operating revenues (less purchased power) has risen from 22.9 percent to 50.8 percent. PSO anticipates that this inflation will restrict its historical dividend payout ratio beginning sometime later in 1977. PSO requests authorization to pay common stock dividends out of earned surplus earned after December 12, 1976, determined as provided in the Supplemental Indentures but after deducting on account of depreciation, retirement, renewals, replacements and or amortization an amount equal to 13 percent of the average amount of its depreciable bondable property as of the specified data. PSO states that it would accept a further limitation upon such authorization to the effect that no common stock dividend payment could be made out of such additional earned surplus except to the extent that such surplus had been earned during the 12 calendar months immediately preceding the payment of such dividend.

PSO further states that the dividend restriction in effect under section 16 of Article III of the Indenture, which is incorporated into the Supplemental Indentures and applies to all presently outstanding series of bonds other than the Series N bonds, aggregating $191,500,000 in principal amount and maturing from 1978 through 2004, does not contain separate provisions expressly permitting the Commission to authorize payment of common stock dividends out of otherwise restricted amounts of earned surplus. This restriction similarly involves minimum deductions for maintenance, repairs and depreciation based on operating revenues, and these present potentially the same threat to PSO's ability to maintain its dividend pay-out ratios as do the restrictions in later Supplemental Indentures. In the case of the early Supplemental Indentures, however, since earned surplus is in every case calculated on a cumulative, historical basis, there is a substantial cushion of unrestricted surplus accumulated in prior years in which deductions for maintenance, repairs and depreciation did not exceed actual expenditures or accruals for these purposes. If this cushion is exhausted before the maturity of the series of bonds issued under the early Supplemental Indentures, PSO would have to redeem the bonds involved prior to maturity, attempt legal action to permit deviation from the terms of the Indenture and Supplemental Indenture covenants or seek other, presently undetermined remedies.

PSO also proposes to issue and sell, pursuant to competitive bidding, up to $50,000,000 principal amount of its First Mortgage Bonds ("Bonds"), Series O, to mature May 1, 2007. The price of the Bonds, which will not be less than 99 percent or more than 102.75 percent of the principal amount and the interest rate, which will be a multiple of ⅛ of 1 percent, will be determined by the competitive bidding.

The bonds will be issued under and secured by the Indenture, as amended and to be further amended by a proposed supplemental indenture to be dated May 1, 1977 and will not be refundable through the use of lower cost money until May 1, 1982.

The proceeds to be derived by PSO from the sale of the Bonds will be used by PSO to finance 1977 capital expenditures. The proposed consolidated capital expenditures of PSO for the calendar year 1977 are presently estimated as follows:

	1977
Generation	$110,000,000
Transmission	12,000,000
Distribution	17,000,000
Fuel exploration and development	27,000,000
Other	8,000,000
Total	181,000,000

No proceeds, however, will be utilized to pay the cost of facilities which would be needed to provide service to customers of PSO if it were not part of the Central and South West System nor will any expenditures be made by PSO for the construction or acquisition of any facility not so needed prior to the time all of such proceeds have been expended.

In addition, PSO states that no expenditures will be made in 1977 on construction of a transmission line from Lawton to the Red River and the terminal for that line prior to the approval by the Commission of a transfer to West Texas Utilities Company of a portion of PSO's Northeastern Units 3 and 4 or the giving of a notice as represented by PSO in the proceedings "In the Matter of Central and South West Corporation, et al." (Admin. Proc. File No. 3-4951).

It is stated that no state commission and no federal commission other than this Commission has jurisdiction over the proposed additional dividend transaction. It is also stated that no state commission other than the Corporation Commission of the State of Oklahoma, and no federal commission, other than this Commission has jurisdiction over the proposed issuance and sale of the Bonds.

It is stated that the fees and expenses to be incurred in connection with the proposed transaction are estimated at $145,000 including $17,500 in legal fees.

Notice is further given that any interested person may, not later than April 18, 1977, request in writing that a hearing be held on such matter, stating the nature of his interest, and reasons for such request, and the issues of fact or law raised by said application-declaration which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the applicant-declarant at the above-stated address and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request.

At any time after said date, the application-declaration, as filed or as it may be amended, may be granted and permitted to become effective as provided in Rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Release No. 19951; 70-5989]

SOUTHERN CO.

Proposed Issuance and Sale of Common Stock Pursuant to a Dividend Reinvestment Plan and an Employee Savings Plan

Notice is hereby given that The Southern Company ("Southern"), Perimeter Center East, P.O. Box 720071, Atlanta, Georgia 30346, a registered holding company, has filed a declaration with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating sections 6(a) and 7 of the Act and Rule 50(a)(5) promulgated thereunder as applicable to the following proposed transactions. All interested persons are referred to the declaration, which is summarized below, for a complete statement of the proposed transactions.

Southern proposes to issue and sell from time to time through April 30, 1979, a maximum of 2,375,000 shares of its authorized but unissued common stock, par value $5 per share, pursuant to a Dividend Reinvestment and Stock Purchase Plan ("Dividend Plan"). Southern intends to apply the proceeds from the sale of the proposed common stock (such proceeds estimated not to exceed $38,300,000) for further equity investments as authorized by this Commission (See File No. 70-5978.) and for other corporate purposes.

In addition, the Commission has authorized the issuance and sale through

V4263 APR 1 77 UMI

March 31, 1977, pursuant to the Dividend Plan of not more than 2,250,000 shares of Southern's common stock (HCAR No. 19498 (April 26, 1976)). Southern estimates that of the 2,250,000 shares, approximately 525,000 shares will remain unsold as of March 31, 1977. Southern proposes to add any shares which remain unsold to the 2,375,000 shares discussed in the preceding paragraph and to sell all such shares (the aggregate of the 2,375,000 shares and any remaining unsold shares being hereinafter referred to as the "Additional Common Stock") pursuant to the Dividend Plan, as amended, no later than April 30, 1979.

The Additional Common Stock will be offered to all holders of record of Southern's common stock pursuant to a voluntary plan whereby shareholders may elect to (1) have dividends on all of their shares of Southern common stock automatically reinvested in shares of Additional Common Stock at a price equal to 95 percent of the average of the closing sale price of Southern's common stock for the five New York Stock Exchange trading days ending with the dividend payment date, or (2) reinvest less than all of their dividends in shares of Additional Common Stock at a price equal to 95 percent of said closing price average, or (3) reinvest all or less than all of their dividends as described above and, in addition, make optional cash payments (not less than $25 per payment nor more than a total of $3,000 per quarter) to invest in shares of Additional Common Stock at a price equal to 100 percent of the closing price average, or (4) continue to receive cash dividends on all shares registered in their names and invest only optional cash payments. The First National Bank of Atlanta will administer the Dividend Plan and make purchases of shares as agent for the participants. No service charge or commission will be paid by participants in connection with purchases under the Dividend Plan.

Participants will retain all voting rights relating to shares purchased under the Dividend Plan and credited to their accounts, and shares will be voted in accordance with the instructions of the participant to whose account they are credited. A participant will be able to withdraw from the Dividend Plan at any time upon written notice. Upon withdrawal, the participant will be issued, without charge, a certificate for the number of shares credited to his account and will receive a cash payment for the value of any fractional share. Without withdrawing from the Dividend Plan, a participant will be entitled to demand and receive a certificate representing the full shares of common stock credited to his account. Southern reserves the right to suspend, modify (subject to Commission approval), or terminate the Dividend Plan at any time.

Southern also proposes to issue and sell a maximum of 600,000 shares of its authorized but unissued common stock, par value $5 per share, ("New Stock") pursuant to the Employee Savings Plan for The Southern Company System (the "Savings Plan") from time to time through April 30, 1979. Southern intends to apply the proceeds from the sale of the New Stock (estimated not to exceed approximately $9,675,000) for further equity investments authorized by this Commission (See File No. 70-5978.) and for other corporate purposes.

The New Stock will be offered to employees of Southern's subsidiaries pursuant to a voluntary plan under which employees may contribute, through payroll deductions, not less than 2 percent nor more than 12 percent of their compensation (base salary or wages). Each employing company will contribute, on behalf of each of the Savings Plan members in its employ, an amount equal to 50 percent of such of the member's contributions as are not in excess of 6 percent of the member's compensation. The First National Bank of Atlanta acts as Trustee for the trust which is part of the Savings Plan, and the Savings Plan is administered by the Savings Plan Committee, the members of which are appointed by the Board of Directors of Southern Company Services, Inc.

Each Savings Plan member must direct that his contributions be invested in one or more of three funds: (1) Company Stock Fund—consisting of Southern's common stock; (2) Equity Fund—consisting of common or capital stocks and securities convertible into common or capital stock (other than securities issued by or convertible into securities issued by Southern or any of its subsidiaries), short-term investments, and investments in certain commingled trust funds; (3) Fixed Income Fund—consisting of direct obligations of the U.S. Government and its agencies, corporate bonds, debentures, notes, certificates of indebtedness of Southern or its subsidiaries or affiliates, savings account deposits, and investments in certain commingled trust funds. All employing company contributions are invested in the Company Stock Fund.

The Trustee will vote the shares of common stock of Southern held by it in accordance with written directions received from the individual members on whose behalf such shares are held and will not vote any such shares for which voting instructions are not received. The Trustee has the authority to vote all other securities in its discretion. If a pending charter amendment proposal with respect to preemptive rights is approved by Southern's shareholders, the Trustee will be permitted to make purchases of common stock, at a price not greater than the last sale price or current independent bid price (whichever is higher) for such stock on the New York Stock Exchange, directly from Southern other than through the Dividend Plan. Should the charter amendment proposal not be approved by the shareholders, the Trustee will purchase no original issue common stock from Southern except through the Dividend Plan.

Fees and expenses to be incurred in connection with the proposed transactions are to be filed by amendment. It is stated that no State or Federal commission, other than this Commission, has jurisdiction over the proposed transactions.

Notice is further given that any interested person may, not later than April 14, 1977, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said declaration which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the declarant at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the declaration, as filed or as it may be amended, may be permitted to become effective as provided in Rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Rel. No. 9692; 811-1632]

TWENTY FIVE FUND, INC.

Filing of Application of Act for an Order Declaring That Company Has Ceased To Be an Investment Company

Notice is hereby given that The Twenty Five Fund, Inc. ("Applicant"), 789 Sherman Street, Suite 410, Denver, Colorado 80202, an open-end, diversified management investment company registered under the Investment Company Act of 1940 ("Act"), filed an application on October 18, 1976, and an amendment thereto on February 25, 1977, pursuant section 8(f) of the Act for an order of the Commission declaring that the Applicant has ceased to be an investment company as defined in the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicant was organized as a corporation under the laws of Maryland, and engaged in a public offering of its shares of common stock from May 7, 1969, to shortly before July 1, 1973, pursuant to an effective registration statement under the Securities Act of 1933. Prior to July 1, 1973, Applicant ceased offering its shares for sale to the public.

On September 13, 1974, Applicant's Board of Directors unanimously resolved that it was advisable that Applicant be voluntarily dissolved. On October 17, 1975, Applicant's shareholders approved the dissolution. Thereafter, Articles of Dissolution were prepared and filed and accepted for filing in Maryland during February 1976. As of September 1, 1976, Applicant was not conducting business operations except for activities involved in connection with its dissolution and the liquidation of its assets.

Applicant has distributed its assets to most of its shareholders and is in the process of locating its two remaining shareholders to make distributions to them. As of February 9, 1977, Applicant had assets of $668 which will be held in trust for the two shareholders in a non-interest bearing account by Computech Fund Services, Inc., Applicant's transfer agent, until such time as under Maryland law such sum will escheat to that State, or until such shareholders are found and amounts owed are distributed to them, whichever is sooner.

Section 8(f) of the Act provides in part that whenever the Commission, upon application, finds that a registered investment company has ceased to be an investment company, it shall so declare by order and upon the taking effect of such order, the registration of such company shall cease to be in effect.

Notice is further given that any interested person may, not later than April 18, 1977, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communications should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicant at the address stated above. Proof of such service (by affiavit, or in case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0-5 of the rules and regulations promulgated under the Act, an order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

NATIONAL MARKET ADVISORY BOARD

Meeting

This is to give notice, pursuant to section 10(a) of the Federal Advisory Committee Act, 5 U.S.C. App. 1 10(a), that the National Market Advisory Board will conduct open meetings on April 18 and 19, 1977, in Room 776, 500 North Capitol Street, Washington, D.C., and on May 16 and 17, and June 20 and 21, 1977, at locations to be determined later. Initial notice of the April meeting was published in the FEDERAL REGISTER on January 27, 1977.

The summarized agenda for the May and June meetings will be published in the FEDERAL REGISTER at a later date. The summarized agenda for the April meeting is as follows:

1. Discussion of the Board's report to the Securities and Exchange Commission regarding restrictions on off-board transactions in listed securities by exchange members.
2. Discussion of possible pilot projects relevant to issues considered, or to be considered, by the Board.
3. Requested report of the National Market Association and discussion thereof.
4. Discussion of such other matters as may properly be brought before the Board.

Further information may be obtained by writing Martin L. Budd, Executive Director, National Market Advisory Board Staff, Securities and Exchange Commission, Washington, D.C. 20549.

GEORGE A. FITZSIMMONS,
Secretary.

[Application No. 06/06-5185]

KAR-MAL VENTURE CAPITAL, INC.

Application for a License To Operate as a Small Business Investment Company

An application for a license to operate as a small business investment company under section 301(d) of the Small Business Investment Act of 1958, as amended (Act) (15 U.S.C. 661 et seq.) has been filed by Kar-Mal Venture Capital, Inc. (Applicant) with the Small Business Administration (SBA) pursuant to 13 CFR 107.102 (1976).

The officers and directors are as follows:

Thomas A. Karam, President and Director, 3901 Cedar Hill Road, Little Rock, Arkansas 72202.

Raymond A. Pritchett, Secretary and Director, No. 18 Hogan Loop, North Little Rock, Arkansas 72209.

Max J. Probst, Treasurer and Director, 2302 West 42nd, Pine Bluff, Arkansas 71601.

Idell K. Smith, Director, Lake Shore Motel, Inc., Lake Village, Arkansas 71653.

The Applicant, an Arkansas corporation, will maintain an office in the Park Plaza Shopping Center, University and Markham, Little Rock, Arkansas 72205, and will begin operations with $150,000 of paid-in capital and paid-in surplus derived from the sale of 50 shares of common stock to Kar-Mal, Incorporated, engaged in the wholesale business of men's clothing. Thomas A. Karam is a board member and General Manager of Kar-Mal, Incorporated and is paid a salary for his services.

As a small business investment company under Section 301(d) of the Act, the Applicant has been organized and chartered solely for the purpose of performing the functions and conducting the activities contemplated under the Act, as amended, from time to time, and will provide assistance solely to small business concerns which will contribute to a well-balanced national economy by facilitating ownership in such concerns by persons whose partici-

V 4263 APR 1 77 UMI

pation in the free enterprise system is hampered because of social or economic disadvantages.

Matters involved in SBA's consideration of the Applicant include the general business reputation and character of the proposed owners and management and the probability of successful operations of the Applicant under this management, including adequate profitability and financial soundness, in accordance with the Act and SBA Rules and Regulations.

Applicant proposes to provide assistance to socially and/or economically disadvantaged small businesses engaged in retailing men's clothing and operating under the trade name "Tommy's". Merchandise will be purchased by "Tommy's stores" from Kar-Mal, Incorporated. However, not more than 75 percent of the funds provided by the applicant will be used by these stores to purchase goods and services from the parent or any other associates of the applicant.

Any person may, not later than April 18, 1977, submit to SBA written comments on the proposed Applicant. Any such communication should be addressed to the Deputy Associate Administrator for Investment, 1441 L Street, N.W., Washington, D.C. 20416.

A copy of this notice shall be published in a newspaper of general circulation in Little Rock, Arkansas.

(Catalog of Federal Domestic Assistance Program No. 59.011, Small Business Investment Companies.)

Dated: March 25, 1977.

PETER F. MCNEISH,
Deputy Associate Administrator for Investment.

SHIPPING COORDINATING COMMITTEE, SUBCOMMITTEE ON SAFETY OF LIFE AT SEA

Meeting

The working group on life-saving appliances of the Subcommittee on Safety of Life at Sea, a subcommittee of the Shipping Coordinating Committee, will hold an open meeting at 10:00 a.m. on Wednesday, April 27, 1977, in Room 8240 of the Department of Transportation, 400 Seventh Street, SW., Washington, D.C.

The purpose of the meeting will be to discuss a draft text of Chapter 3, SOLAS 1960 and consider a U.S. response to the proposal.

Requests for further information on the meeting should be directed to Mr. N. W. Lemley, U.S. Coast Guard. He may be reached by telephone on 202-426-1444.

The Chairman will entertain comments from the public as time permits.

CARL TAYLOR, JR.,
Acting Director, Office of Maritime Affairs.

MARCH 23, 1977.

[Public Notice CM-7/48]

SHIPPING COORDINATING COMMITTEE, SUBCOMMITTEE ON SAFETY OF LIFE AT SEA

Meeting

The working group on international multimodal transport and containers of the Subcommittee on Safety of Life at Sea, a subcommittee of the Shipping Coordinating Committee, will hold an open meeting from 9:30 a.m. to 5:00 p.m. on Wednesday, April 27, 1977, in Room 8334 of the Department of Transportation, 400 Seventh Street, SW., Washington, D.C.

The purpose of the meeting is to discuss matters germane to multimodal transport and containers. The following items will appear on the agenda:

Discussion of legislation and regulations regarding the Intergovernmental Maritime Consultative Organization (IMCO) International Convention on Safe Containers (1972);

Discussion of the July 1977, meeting of the IMCO Subcommittee on Containers and Cargoes;

Report of the January 1977, meeting of the ECE Group of Rapporteurs on Container Transport;

Report on the status of Implementation of the ECE Agreement on the International Carriage of Perishable Foodstuffs and on the Special Equipment to be used for Such Carriage (ATP);

Update on Intergovernmental Group on Container Standards (UNCTAD);

Debriefing on Third Intergovernmental Preparatory Group on International Multimodel Transport (UNCTAD); and

Update on IMCO/CCC Customs Convention on Containers (1972).

Any questions concerning this meeting should be directed to either Mr. M. H. Allen, U.S. Coast Guard (202/426-1577) or Mr. Richard E. Johe, Department of State (202-632-1313).

Comments from the public will be welcomed.

CARL TAYLOR, JR.,
Acting Director, Office of Maritime Affairs.

MARCH 24, 1977.

[Public Notice CM-7/49]

UNITED STATES ADVISORY COMMISSION ON INTERNATIONAL EDUCATIONAL AND CULTURAL AFFAIRS

Meeting

The United States Advisory Commission on International Educational and Cultural Affairs will meet in open session on Monday, April 25, in Room 1410 of the State Department, 2201 C Street, NW., Washington, D.C.

There will be two items on the agenda, in addition to any old or new business which members may wish to raise.

1. 9:30 a.m.—12:30 p.m. A discussion of a proposal for the establishment of a "Western Hemisphere Forum."

2. 2:00 p.m.—4:30 p.m. Examination of a proposal for the establishment of a currency convertibility program to encourage the sale abroad of American cultural materials.

Members of the general public may attend and participate in the discussion subject to the instructions of the Chairman. They will be accommodated up to the seating capacity of the room.

For purposes of fulfilling building security requirements, anyone wishing to attend the meeting must advise the Staff Director of the Commission by close of business Thursday, April 21, 1977, of his intention to attend. He may be reached by telephone at 202-632-2764.

Dated: March 24, 1977.

W. E. WELD, JR.,
Staff Director.

DEPARTMENT OF THE TREASURY

Customs Service

CHISELS, PUNCHES, HAMMERS AND SLEDGES (WITH OR WITHOUT HANDLES), VISES, C-CLAMPS, AND BATTERY SERVICE TOOLS FROM JAPAN

Antidumping Duties

AGENCY: United States Customs Service, Treasury.

ACTION: Notice of petition filed by American manufacturer, producer or wholesaler.

SUMMARY: This notice is to advise the public that a petition has been filed by an American manufacturer requesting that antidumping duties be assessed with regard to chisels, punches, hammers and sledges (with or without handles), vises, c-clamps, and battery service tools from Japan. In addition, it was requested that the scope of the term "battery service tools" be expanded to include that which was initially contained in the class or kind of merchandise under investigation. Interested persons are invited to comment on this action.

EFFECTIVE DATE: This notice is effective on April 1, 1977.

FOR FURTHER INFORMATION CONTACT:

Michael Lublinski, Classification and Value Division, U.S. Customs Service. 1301 Constitution Avenue, NW., Washington, D.C. 20229 (202-566-2938).

On March 15, 1977, a petition was received in proper form, pursuant to section 516(a) of the Tariff Act of 1930, as amended by the Trade Act of 1974 (19 U.S.C. 1516(a)), from counsel acting on behalf of certain American manufacturers and wholesalers of chisels, punches, hammers and sledges, vises, c-clamps and battery service tools, among other things, asserting that a finding of dumping be issued and antidumping duties be assessed on those entries of the abovementioned hand tools from Japan where it has been determined that sales were being made at prices less than the foreign market (or constructed) value, within the meaning of the Antidumping Act of 1921, as amended (19 U.S.C. 160 et seq.). As a result of a negative determinaton of injury by the International Trade Commission on December 2, 1975 (40 FR 57517), a finding of dumping was not made in this matter, and therefore merchandise of the class or kind in question was not subject to appraisement under the Antidumping Act.

Additionally, the petition asserted that the term "battery service tools" should include battery post and terminal cleaning brushes, battery terminal spreaders, angle-nose pliers, booster cables and battery service kits (terminal puller, cleaning brush and two terminals), as well as battery terminal lifters. An amendment of the determination of sales at less than fair value, made with regard to the importation of chisels, punches, hammers and sledges (with or without handles), vises, c-clamps, and battery service tools from Japan and published in the Federal Register on October 21, 1975 (40 FR 49111), excluded from the scope thereof all battery service tools other than battery terminal lifters.

The petition requested the following relief:

1. The Secretary of the Treasury or his delegate should conclude that he erred, as a matter of law, when on October 21, 1975, he published an amendment to his Determination of Sales at Less Than Fair Value ("LTFV") in the case of certain nonpowered hand tools from Japan (40 FR 49111), by excluding from the term "battery service tools" all tools other than battery terminal lifters;

2. The Secetary of the Treasury or his delegate should conclude that the International Trade Commission ("Commission") erred by eliminating from the class or kind of merchandise under investigation in the subject Antidumping Act case all battery service tools other than battery terminal lifters;

3. The Secretary of the Treasury or his delegate should conclude that the Commission erred, as a matter of law, when it concluded that an industry in the United States was not being injured or likely to be injured or prevented from being established by reason of imports of certain chisels, punches, hammers and sledges (with or without handles), vises, c-clamps, and battery service tools from Japan sold at LTFV;

4. The Secretary of the Treasury or his delegate should publish a finding of dumping forthwith with respect to chisels, punches, hammers and sledges (with or without handles), vises, c-clamps, and battery service tools from Japan, other than hammers from Imoto Hamono Co., Ltd., and Kyoto Tool Co., Ltd., sledges from Hirota Tekko K.K., angle nose pliers and terminal spreaders from Tashiro Siesakusho, and battery post and terminal cleaning brushes from Japan Export Brush Co., Ltd.,

5. Appropriate Customs officers should make Antidumping Act appraisements (foreign market (or constructed) value and purchase (or exporter's sales) price) for every entry of nonpowered hand tools from Japan described in (4) above; and

6. Appropriate Customs Officers should assess antidumping duties on those entries of nonpowered hand tools from Japan described in (4) above where it has been determined that the foreign market (or constructed) value exceeds the purchase (or exporter's sales) price.

In accordance with the provisions of § 175.21(a) of the Customs Regulations (19 CFR 175.21(a)), notice is hereby given that a domestic producer has filed a petition requesting that antidumping duties be assessed with regard to chisels, punches, hammers and sledges (with or without handles), vises, c-clamps, and battery service tools from Japan. Before a decision is made with regard to this petition, consideration will be given to any relevant data, views or arguments submitted in writing. Submissions should be addressed to the Commissioner of Customs, 1301 Constitution Avenue, NW., Washington, D.C. 20229, in time to be received by this office not later than April 8, 1977.

Written submissions will be available for public inspection in accordance with § 103.8(b) of the Customs Regulations (19 CFR 103.8(b)), at the Classification and Value Division, Headquarters, United States Customs Service, Washington, D.C., during regular business hours.

G. R. DICKERSON,
Acting Commissioner of Customs.

MARCH 28, 1977.

Office of the Secretary

DEBT MANAGEMENT ADVISORY COMMITTEES

Meetings

Notice is hereby given, pursuant to Section 10 of Pub. L. 92-463, that meetings will be held in Washington on April 26 and 27, 1977, of the following debt management advisory committees:

American Bankers Association Government Borrowing Committee.
Public Securities Association U.S. Government and Federal Agencies Securities Committee.

The agenda for the meetings provides for working sessions by two committees on April 26, a report to the Secretary of the Treasury and Treasury staff by the American Bankers Association Government Borrowing Committee on April 26 and a report to the Secretary of the Treasury and Treasury staff by the Public Securities Association U.S. Government and Federal Agencies Securities Committee on April 27.

Pursuant to the authority placed in Heads of Departments by section 10(d) of Pub. L. 92-463, and vested in me by Treasury Department Order 190, revised, I hereby determine that these meetings are concerned with information exempt from disclosure under section 552b(c)(4) and (9)(A) of Title 5 of the United States Code, and that the public interest requires that such meetings be closed to the public.

My reasons for this determination are as follows. The Treasury Department requires frank and full advice from representatives of the financial community prior to making its final decision on major financing operations. Historically, this advice has been offered by debt management advisory committees established by the several major segments of the financial community, which committees are utilized by this Department at meetings called by representatives of the Office of the Secretary. When so utilized they are recognized to be advisory committees under Pub. L. 92-463. The advice provided consists of commercial and financial information given and received in confidence. As such these debt management advisory committee activities concern matters which fall within the exemption covered by section 552b(c)(4) of Title 5 of the United States Code for matters which are "trade secrets and commercial or financial information obtained from a person and privileged or confidential".

Although the Treasury's final announcement of financing plans may or may not reflect the advice provided in reports of these committees, premature disclosure of these reports would lead to significant financial speculation in the securities market. Thus, these meetings also fall within the exemption covered by 552b(c)(9)(A) of Title 5 of the United States Code.

The Assistant Secretary (Capital Markets and Debt Management) shall be responsible for maintaining records of the meetings of these committees and for providing annual reports setting forth a summary of their activities and such other matters as may be informative to the public consistent with the policy of 5 U.S.C. 552b.

Dated: March 25, 1977.

HENRY C. STOCKELL,
Acting General Counsel.

V 4263 APR 1 77 UMI

POLYVINYL CHLORIDE SHEET AND FILM FROM THE REPUBLIC OF CHINA

Antidumping Proceeding Notice

AGENCY: United States Treasury Department.

ACTION: Initiation of Antidumping Investigation.

SUMMARY: This notice is to advise the public that a petition in proper form has been received and an antidumping investigation is being initiated for the purpose of determining whether imports of polyvinyl chloride sheet and film from the Republic of China are being, or are likely to be, sold at less than fair value within the meaning of the Antidumping Act, 1921, as amended. Sales at less than fair value generally means that the prices of the merchandise sold for exportation to the United States are less than the prices of such or similar merchandise sold in the home market.

EFFECTIVE DATE: This investigation will begin on April 1, 1977.

FOR FURTHER INFORMATION CONTACT:

Richard Rimlinger, Duty Assessment Division, United States Custom Service, 1301 Constitution Avenue NW., Washington, D.C. 20229 (202–566–5492).

SUPPLEMENTARY INFORMATION: On February 24, 1977, information was received in proper form pursuant to §§ 153.26 and 153.27, Customs Regulations (19 CFR 153.26, 153.27), from counsel acting on behalf of the Plastic Imports Action Committee (PIAC), indicating a possibility that polyvinyl chloride sheet and film from the Republic of China are being, or are likely to be, sold at less than fair value within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 et seq.). The PIAC is an ad hoc group consisting of the following United States producers of the subject articles: The Goodyear Tire and Rubber Company; Harte and Company, Inc., a subsidiary of Diamond Shamrock Corporation; Tenneco Chemicals, Inc., a subsidiary of Tenneco; Pantasote Co. of New York, Inc.; W. R. Grace and Co., Hatco Plastics Division; and Hooker Chemicals and Plastic Corp., Ruco Division.

For purposes of this notice the term "polyvinyl chloride sheet and film" means unsupported, flexible, calendered polyvinyl chloride sheet, film and strips over 6 inches in width and over 18 inches in length, and at least 0.002 inches, but not over 0.020 inches in thickness.

There is evidence on record concerning injury to, or the likelihood of injury to, or prevention of establishment of an industry in the United States. This evidence indicates that imports of the subject merchandise from the Republic of China have increased sharply since 1974, both in absolute terms and in terms of market share, and that such increase has been due in part to significant underselling by those imports. Available information further indicates that production, sales, capacity utilization and employment within the domestic industry have all declined in recent years as a result, in part, of possible less-than-fair value imports from the Republic of China. In addition, it appears that the alleged less-than-fair-value prices have contributed to some suppression of prices of the domestic product, which in turn has led to low profit levels for the United States industry.

Having conducted a summary investigation as required by § 153.29 of the Customs Regulations (19 CFR 153.29) and having determined as a result thereof that there are grounds for so doing, the U.S. Customs Service is instituting an inquiry to verify the information submitted and to obtain the facts necessary to enable the Secretary of the Treasury to reach a determination as to the fact or likelihood of sales at less than fair value.

A summary of price information received from all sources is as follows:

The information received tends to indicate that the prices of the merchandise sold for exportation to the United States are less than the prices for home consumption.

This notice is published pursuant to § 153.30 of the Customs Regulations (19 CFR 153.30).

JOHN H. HARPER,
Acting Assistant Secretary of the Treasury.

MARCH 28, 1977.

ADVISORY COMMITTEE ON REFORM OF THE INTERNATIONAL MONETARY SYSTEM

Meeting

Notice is hereby given that the Advisory Committee on Reform of the International Monetary System will meet at the Treasury Department on April 19, 1977.

The meeting is called in order to obtain the full and frank opinions of the participants in the Advisory Committee regarding international monetary questions to be discussed at international meetings on April 28 and 29 of the Interim Committee of the Board of Governors of the International Monetary Fund.

A determination as required by Section 10(d) of the Federal Advisory Committee Act (Pub. L. 92–463) has been made that this meeting is for the purpose of considering matters falling within the exemption to public disclosure set forth in 5 U.S.C. 552b(c)(1) and that the public interest requires such meeting be closed to public participation.

Any comment or inquiry with respect to this notice can be addressed to Donald Syvrud, Director, Office of International Monetary Affairs, U.S. Department of the Treasury, Washington, D.C. 20220, 202–566–5365.

Dated: March 28, 1977.

HENRY C. STOCKELL, Jr.,
Acting General Counsel.

Office of the Secretary

METAL-WALLED ABOVE-GROUND SWIMMING POOLS FROM JAPAN

Antidumping; Determination of Sales at Less Than Fair Value

AGENCY: United States Treasury Department.

ACTION: Determination of Sales at Less Than Fair Value.

SUMMARY: This notice is to advise the public that an anti-dumping investigation has been completed and that it has been determined that metal-walled above-ground swimming pools from Japan are being, or likely to be, sold at less than fair value within the meaning of the Antidumping Act, 1921, as amended. Sales at less than fair value generally occur when the prices of the merchandise sold for exportation to the United States are less than the prices in the home market or to third countries. This case is being referred to the International Trade Commission for it to determine whether a United States industry is being injured.

EFFECTIVE DATE: This determination will be effective on April 1, 1977.

FOR FURTHER INFORMATION CONTACT:

Mary S. Clapp, Duty Assessment Division, United States Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229 (202–566–5492).

SUPPLEMENTARY INFORMATION: Information was received in proper form on March 18, 1976, from counsel acting on behalf of Muskin Corporation, Colton, California, alleging that metal-walled above-ground swimming pools from Japan were being sold at less than fair value, thereby causing injury to, or the likelihood of injury to, or the prevention of the establishment of an industry in the United States, within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 et seq.) (referred to in this notice as "the Act"). On the basis of this information and subsequent preliminary investigation by the Customs Service, an "Antidumping Proceeding Notice" was published in the FEDERAL REGISTER of April 21, 1976 (41 FR 16667).

The Secretary concluded that a tentative determination could not reasonably be made within the usual 6-month period. The period in this case was therefore extended to no more than 8 months, and a "Notice of Extension of Investigatory Period" to that effect was published in the FEDERAL REGISTER of October 7, 1976 (41 FR 44197).

A "Notice of Tentative Discontinuance of Antidumping Investigation" was published in the FEDERAL REGISTER of December 27, 1976 (41 FR 56248), with regard to metal-walled above-ground swimming pools from Japan. However, information gathered and analyzed subsequent to the tentative discontinuance indicates that metal-walled above-ground swimming pools from Japan are being, or likely to be, sold at less than fair value.

A "Withholding of Appraisement Notice" is being published concurrently with this notice.

DETERMINATION OF SALES AT LESS THAN FAIR VALUE

I hereby determine that, for the reasons stated below, metal-walled above-ground swimming pools from Japan are being, or are likely to be, sold at less than fair value within the meaning of section 201(a) of the Act (19 U.S.C. 160(a)).

STATEMENT OF REASONS ON WHICH THIS DETERMINATION IS BASED

The reasons and bases for the above determination are as follows:

a. *Scope of the investigation.* Approximately 90 percent of the imports of the subject merchandise from Japan are manufactured by Asahi Chemical Industry Co., Inc., Soka City, Japan. Therefore, the investigation was limited to this manufacturer.

b. *Basis of comparison.* For the purposes of considering whether the merchandise in question is being, or is likely to be, sold at less than fair value within the meaning of the Act, the proper basis of comparison is between the purchase price and the third-country price of such or similar merchandise. Purchase price, as defined in section 203 of the Act (19 U.S.C. 162), was used since all export sales to the United States appear to be made to nonrelated customers. Third-country price, as defined in § 153.3, Customs Regulations (19 CFR 153.3), was used since such or similar merchandise was not sold by Asahi in the home market in sufficient quantities to provide a basis for fair value. Sales to Canada were made in quantities most similar to those sales made to the United States.

In accordance with § 153.31(b), Customs Regulations (19 CFR 153.31(b)), pricing information was obtained concerning imports and third-country sales during the period November 1, 1975, through April 30, 1976.

c. *Purchase price.* For the purposes of this determination of sales at less than fair value, since all merchandise was purchased or agreed to be purchased prior to the time of exportation, by the persons by whom or for whose account it was imported, within the meaning of section 203 of the Act, the purchase price has been calculated on the basis of the f.o.b. price to unrelated United States purchasers with deductions for inland freight and shipping costs, as appropriate.

d. *Third-Country price.* For the purposes of this determination of sales at less than fair value, the third-country price has been calculated on the basis of the f.o.b. price to unrelated Canadian purchasers. Adjustments have been made for inland freight and shipping costs and for differences in the following costs associated with Asahi's sales to Canada and to the United States: interest expense, bank charges, packing, commissions, and merchandise.

Adjustments for differences in interest expense, bank charges, commissions, and packing were made in accordance with § 153.10, Customs Regulations (19 CFR 153.10). Each of the foregoing costs was directly related to the sales under consideration.

Adjustments for differences in merchandise relate to the difference in direct production costs between similar pools sold to Canada and to the United States and were made in accordance with § 153.-11, Customs Regulations (19 CFR 153.-11).

The petition contained an allegation that sales of the subject merchandise to third countries were being made at less than the cost of producing the merchandise as defined in section 205(b) of the Act (19 U.S.C. 164(b)). An analysis of the Japanese manufacturer's production costs, which were taken from actual records reflecting material, labor, and general expenses related to the production of the subject merchandise, has not supported that allegation. The additional information which had been requested and was referred to in the "Notice of Tentative Discontinuance of Antidumping Investigation" was furnished and did not alter the finding with regard to the allegation of sales at less than the cost to produce.

A claim has been made that certain inland freight costs and shipping charges accrued relative to pools for export to the United States should be disregarded as being unusual costs. Section 203 of the Act requires the deduction of all costs, charges, and expenses incident to bringing the merchandise from the place of shipment in the country of exportation to the place of delivery in the United States when included in the price. The actual costs incurred have been deducted in accordance with this provision.

e. *Result of fair value comparisons.* Using the above criteria, comparisons were made on virtually all of the sales of the subject merchandise to the United States by Asahi Chemical Industry Co., Inc., during the representative period and those comparisons indicated that the purchase price was less than the third-country price of such or similar merchandise. Margins were found ranging from less than 1 to 32 percent on 47 percent of the sales to the United States. The weighted-average margin when weighted over 100 percent of the sales compared amounted to 3.5 percent.

The Secretary has provided an opportunity to known interested persons to present written and oral views pursuant to § 153.40, Customs Regulations (19 CFR 153.40).

The United States International Trade Commission is being advised of this determination.

This determination is being published pursuant to section 201(d) of the Act (19 U.S.C. 160(d)).

JOHN H. HARPER,
Assistant Secretary of the Treasury.

MARCH 28, 1977.

V 4263 APR 1 77 UMI

METAL-WALLED ABOVE-GROUND SWIMMING POOLS FROM JAPAN

Antidumping; Withholding of Appraisement Notice

AGENCY: United States Treasury Department.

ACTION: Withholding of Appraisement.

SUMMARY: This notice is to advise the public that appraisement is being withheld for 3 months on entries of metal-walled above-ground swimming pools from Japan since there is reason to believe or suspect that such pools are being, or likely to be sold at less than fair value within the meaning of the Antidumping Act, 1921, as amended. Sales at less than fair value generally occur when the prices of the merchandise sold for exportation to the United States are less than the prices in the home market or to third countries.

EFFECTIVE DATE: This notice will be effective on April 1, 1977.

FOR FURTHER INFORMATION CONTACT:

Mary S. Clapp, Duty Assessment Division, United States Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229 (202-566-5492).

SUPPLEMENTARY INFORMATION: Information was received in proper form on March 18, 1976, from counsel acting on behalf of Muskin Corporation, Colton, California, alleging that metal-walled above-ground swimming pools from Japan were being sold at less than fair value, thereby causing injury to, or the likelihood of injury to, or the prevention of the establishment of an industry in the United States, within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 et seq.) (referred to in this notice as "the Act"). On the basis of this information and subsequent preliminary investigation by the Customs Service, an "Antidumping Proceeding Notice" was published in the FEDERAL REGISTER of April 21, 1976 (41 FR 16667).

The Secretary concluded that a tentative determination could not reasonably be made within the usual 6-month period. The period in this case was therefore extended to no more than 8 months, and a "Notice of Extension of Investigatory Period" to that effect was published in the FEDERAL REGISTER of October 7, 1976 (41 FR 44197).

A "Notice of Tentative Discontinuance of Antidumping Investigation" was published in the FEDERAL REGISTER of December 27, 1976 (41 FR 56248), with regard to metal-walled above-ground swimming pools from Japan. However, information gathered and analyzed subsequent to the tentative discontinuance indicates that metal-walled above-ground swimming pools from Japan are being, or likely to be, sold at less than fair value. Accordingly, a "Determination of Sales at Less Than Fair Value" is being published concurrently with this notice, wherein a statement of reasons for such determination is provided.

Pursuant to section 201(b) of the Act (19 U.S.C. 160(b)), notice is hereby given that there are reasonable grounds to believe or suspect that the purchase price, as defined in section 203 of the Act (19 U.S.C. 162), of metal-walled above-ground swimming pools from Japan is less, or is likely to be less, than the fair value, and thereby the foreign market value, of such or similar merchandise.

Customs officers are being directed to withhold appraisement of metal-walled above-ground swimming pools from Japan in accordance with § 153.48, Customs Regulations (19 CFR 153.48).

The Secretary has provided an opportunity to interested persons to present written and oral views pursuant to § 153.40, Customs Regulations (19 CFR 153.40).

This notice, which is published pursuant to § 153.35(a), Customs Regulations (19 CFR 153.35(a)), shall become effective on April 1, 1977. It shall cease to be effective at the expiration of 3 months from the date of this publication unless previously revoked.

JOHN H. HARPER,
Assistant Secretary of the Treasury.

Office of the Secretary

INTERNATIONAL BOYCOTT

List of Countries Requiring Cooperation

In order to comply with the mandate of section 999(a)(3) of the Internal Revenue Code of 1954, the Department of Treasury is publishing a current list of countries which may require participation in, or cooperation with, an international boycott. This list is the same as the list published in the February 15, 1977, FEDERAL REGISTER.

Pursuant to the requirement of section 999(a)(3) of the Internal Revenue Code of 1954, the Department of the Treasury has compiled a list of countries which may require participation in, or cooperation with, an international boycott (within the meaning of section 999(b)(3) of the Internal Revenue Code of 1954).

On the basis of the best information currently available to the Department of the Treasury, the following countries may require participation in, or cooperation with, an international boycott (within the meaning of section 999(b)(3) of the Internal Revenue Code of 1954):

Bahrain	Qatar
Egypt	Saudi Arabia
Iraq	Syria
Jordan	United Arab Emirates
Kuwait	Yemen Arab Republic
Lebanon	Yemen, Peoples Democratic Republic of
Libya	
Oman	

Dated: March 29, 1977.

INTERSTATE COMMERCE COMMISSION

[Notice No. 359]

ASSIGNMENT OF HEARINGS

MARCH 29, 1977.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

MC 139381 (Sub-4), Spirit of '76 Overland Express, Inc., now assigned April 20, 1977 at Washington, D.C., has been postponed indefinitely.

MC 142045 (Sub-No. 1), McNeil Transport Limited, now assigned May 9, 1977, at Buffalo, N.Y. is canceled and reassigned for May 9, 1977 (1 week); 2nd Floor, U.S. Courtroom, U.S. Post Office Building, 431 State Street, Ogdensburg, N.Y.

MC 134323 (Sub-91), Jay Lines, Inc., now being assigned May 9, 1977 (1 day) at New Orleans, Louisiana, in a hearing room to be later designated.

MC-F-12672, East Texas Motor Freight Lines, Inc. d.b.a. ETMF Systems—Purchase (Portion)—Transamerican Freight Lines, Inc., MC 41432 (Sub-No. 148), East Texas Motor Freight Lines, Inc. and MC 10761 (Sub-No. 281), Transamerican Freight Lines, Inc., now being assigned for continued hearing on April 12, 1977 (9 days) in Room 330, U.S. Post Office and Courthouse, Bryan and Ervay Streets, Dallas, Texas.

MC 138237 (Sub-No. 5), Metro Hauling, Inc., application dismissed.

MC-F-12623, Anderson Trucking Service, Inc.—Purchase (Portion)—Jenkins Truck Line, Inc. and MC 95876 (Sub-No. 179), Anderson Trucking Service, Inc., now assigned April 13, 1977, at Seattle, Washington, will be held in Court Room 514, Federal Building, 915 Second Avenue.

MC 141532 (Sub-No. 11), Pacific States Transport, Inc., now assigned April 12, 1977, at Seattle, Washington, will be held in Court Room 514, Federal Building, 915 Second Avenue.

MC 141824 (Sub-No. 1), William E. Egbert, d.b.a. Bill Egbert Horse Transportation, now assigned April 18, 1977, at Seattle, Washington, will be held in Court Room 514, Federal Building, 915 Second Avenue.

ROBERT L. OSWALD,
Secretary.

FOURTH SECTION APPLICATIONS FOR RELIEF

MARCH 29, 1977.

An application, as summarized below, has been filed requesting relief from the requirements of section 4 of the Interstate Commerce Act to permit common carriers named or described in the application to maintain higher rates and charges at intermediate points than those sought to be established at more distant points.

Protests to the granting of an application must be prepared in accordance with Rule 40 of the General Rules of Practice (49 CFR 1100.40) and filed by April 18, 1977.

FSA No. 43346—*Joint Water-Rail Container Rates*—Sea-Land Service, Inc. Filed by Sea-Land Service, Inc., (No. 92), for itself and interested rail carriers.

Rates on general commodities, from rail carrier's terminal at Baton Rouge, Louisiana, to ports in Japan, Korea, Hong Kong, Taiwan, Philippines, Thailand, Malaysia and Singapore.

Grounds for relief—Water competition.

Tariffs—Pacific Westbound Conference Westbound Intermodal, tariff No. 8, I.C.C. No. 1, and Pacific Straits Conference Westbound Intermodal Freight tariff No. 9, I.C.C. No. 1. Rates are published to become effective on April 27, 1977.

FSA No. 43347—*Petroleum Alkylate Detergent Intermediate to St. Louis, Missouri.* Filed by Southwestern Freight Bureau, Agent, (No. B-668), for and on behalf of the Missouri Pacific Railroad Company.

Rates on petroleum alkylate detergent intermediate, in tank-car loads, as described in the application, from Chocolate Bayou, Texas, to St. Louis, Missouri.

Grounds for relief—Market competition.

Tariff—Supplement 1 to Southwestern Freight Bureau, Agent, tariff 12-K, I.C.C. No. 5272. Rates are published to become effective on May 1, 1977.

FSA No. 43348—*Joint Water-Rail Container Rates—States Steamship Company.* Filed by States Steamship Company, (No. 104), for itself and interested rail carriers.

Rates on general commodities, between ports in Hong Kong, Japan, Korea, Philippines, Taiwan and Thailand, and railstations on the U.S. Atlantic and Gulf Seaboard ports.

Grouds for relief—Water competition.

By the Commission.

ROBERT L. OSWALD,
Secretary.

[Amdt. No. 2 to I.C.C. Order No. 10 Under Service Order No. 1252]

REROUTING TRAFFIC

MARCH 29, 1977.

To all railroads:

Upon further consideration of I.C.C. Order No. 10 (San Diego & Arizona Eastern Railway Company) and good cause appearing therefor:

It is ordered, That: I.C.C. Order No. 10 be, and it is hereby, amended by substituting the following paragraph (g) for paragraph (g) therof:

(g) Expiration date: This order shall expire at 11:59 p.m., September 30, 1977, unless otherwise modified, changed, or suspended.

It is further ordered, That this amendment shall become effective at 11:59 p.m., March 31, 1977, and that this order shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that it be filed with the Director, Office of the Federal Register.

Issued at Washington, D.C., March 24, 1977.

[Notice No. 140]

MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

APRIL 1, 1977.

Synopses of orders entered by the Motor Carrier Board of the Commission pursuant to sections 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act, and rules and regulations prescribed thereunder (49 CFR Part 1132), appear below:

Each application (except as otherwise specifically noted) filed after March 27, 1972, contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application. As provided in the Commission's Special Rules of Practice any interested person may file a petition seeking reconsideration of the following numbered proceedings on or before April 21, 1977. Pursuant to Section 17(8) of the Interstate Commerce Act, the filing of such a

V4263 APR 1 77 UMI

petition will postpone the effective date of the order in that proceeding pending its disposition. The matters relied upon by petitioners must be specified in their petitions with particularity.

No. MC–FC–35450. By order entered March 24, 1977 the Motor Carrier Board approved the lease by Pride Transport Company, a corporation, Abilene, Tex., of the operating rights of B. L. Ellis, doing business as Ellis Pros., Dallas, Tex., set forth in Certificate of Registration No. MC 99931 (Sub-No. 3), issued May 3, 1972, for a period of five years, as follows: Petroleum and petroleum products in bulk in tank trucks over irregular routes and on irregular schedules between all cities, towns, points, oil fields, refineries, bulk stations, filling stations, terminals, and all intermediate points within the State of Texas. Mike Cotten, P.O. Box 1148, Austin, Tex. 78767. attorney for lessee and Leroy Hallman, 4555 First National Bank Building, Dallar, Tex. 75202, attorney for lessor.

IRREGULAR ROUTE MOTOR COMMON CARRIERS OF PROPERTY

Elimination of Gateway Applications

MARCH 25, 1977.

The following applications to eliminate gateways for the purpose of reducing highway congestion, alleviating air and noise pollution, minimizing safety hazards, and conserving fuel have been filed with the Interstate Commerce Commission under the Commission's Gateway Elimination Rules (49 CFR 1065(d)(2)), and notice thereof to all interested persons is hereby given as provided in such rules.

Carriers having a genuine interest in an application may file an original and three copies of verified statements in opposition with the Interstate Commerce Commission within 30 days from the date of publication. (This procedure is outlined in the Commission's report and order in Gateway Elimination, 119 M.C.C. 530). A copy of the verified statement in opposition must also be served upon applicant or its named representative. The vertified statement should contain all the evidence upon which protestant relies in the application proceeding including a detailed statement of protestant's interest in the proposal. No rebuttal statements will be accepted.

No. MC 111320 (Sub-No. 68G), filed February 10, 1977. Applicant: KEEN TRANSPORT, INC., 2001 Barlow Road, P.O. Box 668, Hudson, Ohio 44236. Applicant's representative: Michael Spurlock, 275 East State Street, Columbus, Ohio 43215. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, in the transportation of (I) *Self-propelled road building equipment and parts thereof*, in Driveaway and Truckaway service; (a) Between points in Massachusetts, on the one hand, and, on the other, points in that part of Ohio east of Ohio Highway 77.

(b) Between points in Maine, Massachusetts, New Hampshire and Vermont, on the one hand, and, on the other, points in that part of Tennessee on and east of a line beginning at the Virginia-Tennessee State line, thence along U.S. Highway 25E to junction Tennessee Highway 33, thence along Tennessee Highway 33 to junction U.S. Highway 129, thence along U.S. Highway 129 to the Tennessee-North Carolina State line.

(c) Between points in that part of Pennsylvania on and south of a line beginning at the Pennsylvania-Ohio State line, thence along U.S. Highway 22 to junction U.S. Highway 119, thence along U.S. Highway 119 to junction Interstate Highway 80, thence along Interstate Highway 80 to junction U.S. Highway 220, thence along U.S. Highway 220 to the Pennsylvania-New York State line, on the one hand, and, on the other, points in that part of Tennessee on and east of a line beginning at the Tennessee-Virginia State line, thence along U.S. Highway 25E to junction U.S. Highway 33, thence along U.S. Highway 33 to junction U.S. Highway 411, thence along U.S. Highway 411 to the Tennessee-Georgia State line.

(d) Between points in that part of Pennsylvania on and south of Interstate Highway 80, on the one hand, and, on the other, points in that part of Kentucky on and east of a line beginning at the Ohio-Kentucky State line, thence along U.S. Highway 68 to junction Interstate Highway 75, thence along Interstate Highway 75 to junction U.S. Highway 25E to the Tennessee-Kentucky State line.

(e) Between points in that part of West Virginia on and east of a line beginning at the Ohio-West Virginia State line, thence along West Virginia Highway 2 to junction West Virginia 20, thence along West Virginia Highway 20 to junction U.S. Highway 19, thence along U.S. Highway 19 to junction West Virginia Highway 39, then along West Virginia Highway 39 to the West Virginia-Virginia State line, on the one hand, and, on the other, points in that part of Missouri on and east of a line beginning at the Missouri-Arkansas State line, thence along Missouri Highway 5 to junction U.S. Highway 54, thence along U.S. Highway 54 to junction U.S. Highway 63, thence along U.S. Highway 63 to the Missouri-Iowa State line.

(f) Between points in that part of West Virginia on, south, and west of a line beginning at the West Virginia-Virginia State line, thence along U.S. Highway 60 to junction West Virginia Highway 16, thence along West Virginia Highway 16 to junction West Virginia Highway 5, thence along West Virginia Highway 5 to junction West Virginia Highway 14, thence along West Virginia Highway 14 to the Ohio-West Virginia State line, on the one hand, and, on the other, points in Kansas and Iowa (except from Cedar Rapids, Iowa).

(g) Between points in that part of Ohio on west, and south, of a line beginning at the Ohio-West Virginia State line, thence along U.S. Highway 22 to junction U.S. Highway 250, thence along U.S. Highway 250 to junction U.S. Highway 30, thence along U.S. Highway 30 to junction U.S. Highway 23, thence along U.S. Highway 23 to the Ohio-Michigan State line, on the one hand, and, on the other, points in Alabama.

(h) Between points in that part of Ohio, on, south, and west of a line beginning at the Ohio-West Virginia State line, thence along Interstate Highway 70 to junction Interstate Highway 77, thence along Interstate Highway 77 to junction U.S. Highway 36, thence along U.S. Highway 36 to junction U.S. Highway 23, thence along U.S. Highway 23 to the Ohio-Michigan State line, on the one hand, and, on the other, points in Arkansas.

(i) Between points in that part of Ohio on and west of a line beginning at the Ohio-Michigan State line, thence along U.S. Highway 23 to junction Interstate Highway 75, thence along Interstate Highway 75 to junction U.S. Highway 35, thence along U.S. Highway 35 to junction U.S. Highway 23, thence along U.S. Highway 23 to the Ohio-Kentucky State line, on the one hand, and, on the other, points in Colorado.

(j) Between points in that part of Ohio on, south, and west of a line beginning at the Ohio-West Virginia State line, thence along U.S. Highway 22 to junction U.S. Highway 250, thence along U.S. Highway 250 to junction U.S. Highway 36, thence along U.S. Highway 36 to junction U.S. Highway 33, thence along U.S. Highway 33 to the Ohio-Indiana State line, on the one hand, and, on the other, points in Florida.

(k) * * * at the Ohio-West Virginia State line, thence along U.S. Highway 22 to junction Interstate Highway 77, thence along Interstate Highway 77 to junction Ohio Highway 60, thence along Ohio Highway 60 to junction U.S. Highway 36, thence along U.S. Highway 36 to junction U.S. Highway 68, thence along U.S. Highway 68 to junction Interstate Highway 75, thence along Interstate Highway 75 to junction U.S. Highway 23, thence along U.S. Highway 23 to junction U.S. Highway 30N, thence along U.S. Highway 30N to junction U.S. Highway 30, thence along U.S. Highway 30 to junction U.S. Highway 250, thence along U.S. Highway 250 to the Ohio-West Virginia State line, on the one hand, and, on the other, points in that part of Georgia west and north of U.S. Highway 19.

(l) Between points in that part of Ohio west and south of a line beginning at Lake Erie, thence along Ohio Highway 57 to junction Interstate Highway 76, thence along Interstate Highway 76 to junction U.S. Highway 21, thence along U.S. Highway 21 to junction U.S. Highway 30, thence along U.S. Highway 30 to the Ohio-West Virginia State line, on the one hand, and, on the other, points in Indiana.

(m) Between points in that part of Ohio on and west of a line beginning at Lake Erie, thence along U.S. Highway 250 to junction Ohio Highway 13, thence along Ohio Highway 13 to junction U.S. Highway 33, thence along U.S. Highway 33 to the Ohio-West Virginia State line, on the one hand, and, on the other, points in that part of Michigan on and south of a line beginning at Lake Michigan, thence along Interstate Highway 96 to junction Michigan Highway 21, thence along Michigan Highway 21 to junction Michigan Highway 52, thence along Michigan Highway 52 to junction Michigan Highway 46, thence along Michigan Highway 46 to Lake Huron.

(n) Between points in that part of Ohio on, west, and south of a line beginning at Lake Erie, thence along Ohio Highway 4 to junction U.S. Highway 224, thence along U.S. Highway 224 to the Ohio-Pennsylvania State line, on the one hand, and, on the other, points in Kentucky;

(o) Between points in that part of Ohio on and east of Interstate Highway 77, on the one hand, and, on the other, points in that part of New York on and south of a line beginning at the New York-Pennsylvania State line, thence along New York Highway 17 to junction New York Highway 52, thence along New York Highway 52 to junction U.S. Highway 209, thence along U.S. Highway 209 to junction U.S. Highway 44, thence along U.S. Highway 44 to the New York-Connecticut State line.

(p) * * * Ohio-Indiana State line, thence along U.S. Highway 6 to junction U.S. Highway 20, thence along U.S. Highway 20 to junction Interstate Highway 80, thence along Interstate Highway 80 to junction Interstate Highway 271, thence along Interstate Highway 271 to junction Interstate Highway 90, thence along Interstate Highway 90 to the Ohio-Pennsylvania State line, on the one hand, and, on the other, points in that part of West Virginia on and west of Interstate Highway 77.

(q) Between points in that part of Ohio west and south of a line beginning at the Ohio-Michigan State line, thence along U.S. Highway 23 to junction Interstate Highway 75, thence along Interstate Highway 75 to junction U.S. Highway 6, thence along U.S. Highway 6 to junction U.S. Highway 23, thence along U.S. Highway 23 to junction U.S. Highway 30N, thence along U.S. Highway 30N to junction U.S. Highway 30, thence along U.S. Highway 30 to junction U.S. Highway 250, thence along U.S. Highway 250 to the Ohio-West Virginia State line, on the one hand, and, on the other, points in that part of Georgia west and north of U.S. Highway 19.

(r) Between points in that part of Ohio on, west, and south of a line beginning at Lake Erie, thence along U.S. Highway 250 to junction U.S. Highway 22, thence along U.S. Highway 22 to the Ohio-West Virginia State line, on the one hand, and, on the other, points in Illinois.

(s) Between points in that part of Ohio on and west of a line beginning at the Michigan-Ohio State line, thence along U.S. Highway 23 to junction U.S. Highway 33, thence along U.S. Highway 33 to junction Ohio Highway 93, thence along Ohio Highway 93 to the Ohio-West Virginia State line, on the one hand, and, on the other, points in Nebraska;

(t) Between points in that part of Ohio on and west of a line beginning at the Ohio-Michigan State line, thence along Ohio Highway 109 to junction Ohio Highway 65, thence along Ohio Highway 65 to junction Interstate Highway 75, thence along Interstate Highway 75 to junction U.S. Highway 33, thence along U.S. Highway 33 to junction U.S. Highway 68, thence along U.S. Highway 68 to junction Ohio Highway 73, thence along Ohio Highway 73 to the Ohio-Kentucky State line, on the one hand, and, on the other, points in that part of Nebraska on and east of U.S. Highway 83.

(u) Between points in that part of Ohio on, west, and south of a line beginning at the Ohio-Michigan State line, thence along U.S. Highway 23 to junction Interstate Highway 75, thence along Interstate Highway 75 to junction U.S. Highway 68, thence along U.S. Highway 68 to junction U.S. Highway 30S, thence along U.S. Highway 30S to junction U.S. Highway 23, thence along U.S. Highway 23 to junction U.S. Highway 36, thence along U.S. Highway 36 to junction Ohio Highway 13, thence along Ohio Highway 13 to junction Interstate Highway 70, thence along Interstate Highway 70 to the Ohio-West Virginia State line, on the one hand, and, on the other, points in Oklahoma.

(v) Between points in that part of Ohio on and south of a line beginning at the Ohio-Pennsylvania State line, thence along Ohio Highway 558 to junction

V 4263 APR 1 77 UMI

Ohio Highway 517, thence along Ohio Highway 517 to junction U.S. Highway 30, thence along U.S. Highway 30 to junction U.S. Highway 30N, thence along U.S. Highway 30N to junction U.S. Highway 23, thence along U.S. Highway 23 to junction Ohio Highway 15, thence along Ohio Highway 15 to junction U.S. Highway 224, thence along U.S. Highway 224 to the Ohio-Indiana State line, on the one hand, and, on the other, points in South Carolina.

(w) Between points in that part of Ohio on and west of a line beginning at the Ohio-Michigan State line, thence along U.S. Highway 23 to junction Interstate Highway 75, thence along Interstate Highway 75 to junction U.S. Highway 68, thence along U.S. Highway 68 to junction U.S. Highway 22, thence along U.S. Highway 22 to junction Ohio Highway 73, thence along Ohio Highway 73 to junction U.S. Highway 62, thence along U.S. Highway 62 to the Ohio-Kentucky State line, on the one hand, and, on the other, points in South Dakota.

(x) Between points in that part of Ohio on and west of a line beginning at the Ohio-Michigan State line, thence along U.S. Highway 23 to junction Interstate Highway 75, thence along Interstate Highway 75 to junction U.S. Highway 68, thence along U.S. Highway 68 to junction U.S. Highway 30S, thence along U.S. Highway 30S to junction U.S. Highway 23, thence along U.S. Highway 23 to junction U.S. Highway 33, thence along U.S. Highway 33 to the Ohio-West Virginia State line, on the one hand, and, on the other, points in that part of Texas on and east of a line beginning at the Texas-Oklahoma State line, thence along U.S. Highway 69 to junction Texas Highway 19, thence along Texas Highway 19 to junction U.S. Highway 287, thence along U.S. Highway 287 to the Gulf of Mexico.

(y) Between points in that part of Ohio on and west of a line beginning at Lake Erie, thence along U.S. Highway 250 to junction Ohio Highway 13, thence along Ohio Highway 13 to junction U.S. Highway 33, thence along U.S. Highway 33 to the Ohio-West Virginia State line, on the one hand, and, on the other, points in Wisconsin.

(z) Between points in that part of Ohio on, south, & west of a line beginning at the Ohio-West Virginia State line, thence along Interstate Highway 70 to junction Ohio Highway 13, thence along Ohio Highway 13 to junction U.S. Highway 30N, thence along U.S. Highway 30N to junction U.S. Highway 23, thence along U.S. Highway 23 to the Michigan-Ohio State line, on the one hand, and, on the other, points in that part of Mississippi on and south of a line beginning at the Mississippi-Arkansas State line, thence along an imaginary line directly east to Clarksdale, Miss., thence along Mississippi Highway 6 to junction U.S. Highway 76, thence along U.S. Highway 76 to the Mississippi-Alabama State line.

(aa) Between points in that part of Ohio on, west, and south of a line beginning at Lake Erie, thence along U.S. Highway 250 to junction Ohio Highway 13, thence along Ohio Highway 13 to junction Interstate Highway 70, thence along Interstate Highway 70 to the Ohio-West Virginia State line, on the one hand, and, on the other, points in that part of Missouri on and east of a line beginning at the Illinois-Missouri State line, thence along Missouri Highway 19 to junction Missouri Highway 28, thence along Missouri Highway 28 to junction Missouri Highway 72, thence along Missouri Highway 72 to junction Missouri Highway 19, thence along Missouri Highway 19 to junction U.S. Highway 60, thence along U.S. Highway 60 to junction U.S. Highway 67, thence along U.S. Highway 67 to the Missouri-Arkansas State line.

(bb) Between points in that part of Ohio on and west of a line beginning at Lake Erie, thence along U.S. Highway 250 to junction Ohio Highway 13, thence along Ohio Highway 13 to junction Interstate Highway 70, thence along Interstate Highway 70 to junction Interstate Highway 77, thence along Interstate Highway 77 to the Ohio-West Virginia State line, on the one hand, and, on the other, points in Iowa, except from Cedar Rapids, Iowa.

(cc) Between points in that part of Ohio on and west of a line beginning at the Ohio-Michigan State line, thence along U.S. Highway 23 to junction Interstate Highway 75, thence along Interstate Highway 75 to junction U.S. Highway 6, thence along U.S. Highway 6 to junction U.S. Highway 23, thence along U.S. Highway 23 to junction U.S. Highway 30 N, thence along U.S. Highway 30 N to junction Ohio Highway 13, thence along Ohio Highway 13 to junction U.S. Highway 36, thence along U.S. Highway 36 to junction Ohio Highway 60, thence along Ohio Highway 60 to the Ohio-West Virginia State line, on the one hand, and, on the other, points in Kansas.

(dd) Between points in that part of Ohio on and south of a line beginning at the Ohio-Indiana State line, thence along U.S. Highway 224 to junction U.S. Highway 68, thence along U.S. Highway 68 to junction U.S. Highway 30 N, thence along U.S. Highway 30 N to junction U.S. Highway 62, thence along U.S. Highway 62 to junction Ohio Highway 14, thence along Ohio Highway 14 to the Ohio-Pennsylvania State line, on the one hand, and, on the other, points in that part of North Carolina on and west of U.S. Highway 21.

(ee) Between points in that part of Ohio on and west of a line beginning at the Ohio-Michigan State line, thence along U.S. Highway 23 to junction Interstate Highway 75, thence along Interstate Highway 75 to junction U.S. Highway 68, thence along U.S. Highway 68 to the Ohio-Kentucky State line, on the one hand, and, on the other, points in North Dakota.

(ff) Between points in that part of Ohio on, east and south of a line beginning at Lake Erie, thence along Interstate Highway 271 to junction Interstate Highway 71, thence along Interstate Highway 71 to junction U.S. Highway 30, thence along U.S. Highway 30 to junction U.S. Highway 30 N, thence along U.S. Highway 30 N to junction U.S. Highway 23, thence along U.S. Highway 23 to junction Ohio Highway 15, thence along Ohio Highway 15 to junction U.S. Highway 224, thence along U.S. Highway 224 to the Ohio-Indiana State line, on the one hand, and, on the other, points in that part of Virginia on and west of a line beginning at the Virginia-West Virginia State line, thence along U.S. Highway 60 to junction U.S. Highway 220, thence along U.S. Highway 220 to the Virginia-North Carolina State line.

(gg) Between points in that part of Ohio on and south of a line beginning at the Ohio-West Virginia State line, thence along U.S. Highway 22 to junction U.S. Highway 250, thence along U.S. Highway 250 to Lake Erie, on the one hand, and, on the other, points in that part of Tennessee on and north of a line beginning at the Kentucky-Tennessee State line, thence along Tennessee Highway 69 to junction U.S. Highway 79, thence along U.S. Highway 79 to junction Alternate U.S. Highway 41, thence along Alternate U.S. Highway 41 to junction U.S. Highway 40, thence along U.S. Highway 40 the Tennessee-North Carolina State line.

(hh) Between points in Connecticut and Rhode Island, on the one hand, and, on the other, points in that part of Tennessee on and east of U.S. Highway 127.

(ii) Between points in Connecticut, on the one hand, and, on the other, points in that part of Kentucky on and east of a line beginning at the Kentucky-West Virginia State line, thence along U.S. Highway 23 to junction Kentucky Highway 30, thence along Kentucky Highway 30 to junction Kentucky Highway 80, thence along Kentucky Highway 80 to junction Kentucky Highway 90, thence along Kentucky Highway 90 to junction U.S. Highway 127, thence along U.S. Highway 127 to the Kentucky-Tennessee State line.

(jj) Between points in Maryland, on the one hand, and, on the other, points in that part of Kentucky on and east of a line beginning at the Kentucky-Ohio State line, thence along U.S. Highway 62 to junction U.S. Highway 68, thence along U.S. Highway 68 to junction U.S. Highway 127, thence along U.S. Highway 127 to the Kentucky-Tennessee State line.

(kk) Between points in New Jersey, on the one hand, and, on the other, points in that part of Kentucky on and east of a line beginning at the Kentucky-Ohio State line, thence along U.S. Highway 62 to junction U.S. Highway 68, thence along U.S. Highway 68 to junction U.S. Highway 127, thence along U.S. Highway 127 to the Kentucky-Tennessee State line.

(ll) Between points in Connecticut, on the one hand, and, on the other, points in that part of Ohio on and east of a line beginning at Lake Erie, thence along Interstate Highway 271 to junction Interstate Highway 77, thence along Interstate Highway 77 to junction U.S. Highway 62, thence along U.S. Highway 62 to junction Ohio Highway 76, thence along Ohio Highway 76 to junction Ohio Highway 60, thence along Ohio Highway 60 to junction U.S. Highway 22, thence along U.S. Highway 22 to junction Ohio Highway 13, thence along Ohio Highway 13 to junction Ohio Highway 93, thence along Ohio Highway 93 to junction Ohio Highway 139, thence along Ohio Highway 139 to junction U.S. Highway 52, thence along U.S. Highway 52 to the Ohio-Kentucky State line.

(mm) Between points in Rhode Island, on the one hand, and, on the other, points in that part of Ohio on and east of Interstate Highway 77.

(nn) Between points in Delaware, on the one hand, and, on the other, points in that part of Ohio on and east of a line beginning at Lake Erie, thence along Interstate Highway 77 to junction Interstate Highway 271, thence along Interstate Highway 271 to junction Interstate Highway 71, thence along Interstate Highway 71 to the Ohio-Kentucky State Line.

(oo) Between points in Maryland, on the one hand, and, on the other, points in that part of Ohio on, east and south of a line beginning at Lake Erie, thence along Interstate Highway 77 to junction Interstate Highway 71, thence along Interstate Highway 71 to junction U.S. Highway 224, thence along U.S. Highway 224 to junction Ohio Highway 61, thence along Ohio Highway 61 to junction Ohio Highway 98, thence along Ohio Highway 98 to junction U.S. Highway 4, thence along U.S. Highway 4 to junction U.S. Highway 36, to the Ohio-Indiana State line.

(pp) Between points in New Jersey, on the one hand, and, on the other, points in that part of Ohio on and east of a line beginning at Lake Erie, thence along Interstate Highway 77 to junction Interstate 271, thence along Interstate Highway 271 to junction Interstate Highway 71, thence along Interstate Highway 71 to junction Ohio Highway 3, thence along Ohio Highway 3 to junction U.S. Highway 23, thence along U.S. Highway 23 to the Ohio-Kentucky State line.

(qq) Between points in that part of Virginia on, south and west of a line beginning at the West Virginia-Virginia State line, thence along U.S. Highway 250 to junction U.S. Highway 301, thence along U.S. Highway 301 to the Virginia-North Carolina State line, on the one hand, and, on the other, points in that part of Missouri on, south and east of a line beginning at the Illinois-Missouri State line, thence along U.S. Highway 50 to junction Interstate Highway 44, thence along Interstate Highway 44 to junction U.S. Highway 65, thence along U.S. Highway 65 to the Missouri-Arkansas State line.

(rr) Between points in that part of Virginia on, south and west of a line beginning at the West Virginia-Virginia line, thence along U.S. Highway 250 to junction U.S. Highway 301, thence along U.S. Highway 301 to the Virginia-North Carolina State line, on the one hand, and, on the other, points in Kansas.

(ss) Between points in that part of Virginia south and west of a line beginning at the West Virginia-Virginia State line, thence along U.S. Highway 250 to junction U.S. Highway 301, thence along U.S. Highway 301 to the Virginia-North Carolina State line, on the one hand, and, on the other, points in that part of Illinois on and south of a line beginning at the Indiana-Illinois State line, thence along U.S. Highway 40 to junction Illinois Highway 37 thence along Illinois Highway 37 to junction U.S. Highway 50, thence along U.S. Highway 50 to the Illinois-Missouri State line.

(tt) Between points in that part of Virginia south and west of a line beginning at the Virginia-West Virginia State line, thence along U.S. Highway 250 to junction U.S. Highway 301, thence along U.S. Highway 301 to the Virginia-North Carolina State line, on the one hand, and on the other, points in that part of Indiana on and south of a line beginning at the Indiana-Ohio State line, thence along Indiana Highway 28 to junction U.S. Highway 67, thence along U.S. Highway 67 to junction Interstate Highway 70, thence along Interstate Highway 70 to the Indiana-Illinois State line.

(uu) Between points in New Mexico, on the one hand, and, on the other, points in that part of Ohio on and west of a line beginning at the Ohio-Michigan State line, thence along U.S. Highway 127 to junction U.S. Highway 24, thence along U.S. Highway 24 to junction Ohio Highway 15, thence along Ohio Highway 15 to junction Ohio Highway 65, thence along Ohio Highway 65 to junction Interstate Highway 75, thence along Interstate Highway 75 to junction U.S. Highway 35, thence along U.S. Highway 35 to junction U.S. Highway 68, thence along U.S. Highway 68 to junction Ohio Highway 73, thence along Ohio Highway 73 to junction U.S. Highway 62, thence along U.S. Highway 62 to the Ohio-Kentucky State line.

(vv) Between points in that part of New Mexico on and east of U.S. Highway 54 beginning at the Texas-New Mexico State line to junction U.S. Highway 70, to the Texas-New Mexico State line near Texico, N. Mex., on the one hand, and, on the other, points in that part of Virginia on and west of Interstate Highway 77;

(ww) Between points in that part of Wyoming on and east of a line beginning at the Colorado-Wyoming State line, thence along U.S. Highway 287 to junction Wyoming Highway 34, thence along Wyoming Highway 34 to junction Interstate Highway 25, thence along Interstate Highway 25 to junction U.S. Highway 20, thence along U.S. Highway 20 to junction U.S. Highway 85, thence along U.S. Highway 85 to the Wyoming-South Dakota State line, on the one hand, and, on the other, points in Ohio.

(xx) Between points in that part of California on and south of a line beginning at Ventura, Calif., thence along California Highway 33 to junction California Highway 119, thence along California Highway 119 to junction California Highway 99, thence along California Highway 99 to junction California Highway 58, thence along California Highway 58 to junction California Highway 178, thence along California Highway 178 to junction U.S. Highway 395, thence along U.S. Highway 395 to junction U.S. Highway 6, thence along U.S. Highway 6 to the California-Nevada State line, on the one hand, and, on the other, points in that part of Kentucky on and west of a line beginning at the Kentucky-Indiana State line, thence along U.S. Highway 421 to junction Interstate Highway 75, thence along Interstate Highway 75 to junction U.S. Highway 25E, thence along U.S. Highway 25E to the Kentucky-Tennessee State line.

(yy) Between points in that part of California on and south of a line beginning at Ventura, Calif., thence along California Highway 33 to junction California Highway 119, thence along California Highway 119 to junction California Highway 99, thence along California Highway 99 to junction California Highway 58, thence along California Highway 58 to junction California Highway 178, thence along California Highway 178 to junction U.S. Highway 395, thence along U.S. Highway 395 to junction U.S. Highway 6, thence along U.S. Highway 6 to the California-Nevada State line, on the one hand, and, on the other, points in that part of Kentucky on and west of a line beginning at the Kentucky-Indiana State line, thence along U.S. Highway 421 to junction Interstate Highway 75, thence along Interstate Highway 75 to junction U.S. Highway 25E, thence along U.S. Highway 25E to the Kentucky-Tennessee State line.

(zz) Between points in Idaho, on the one hand, and, on the other, points in that part of Kentucky on and west of a line beginning at the Kentucky-Indiana State line, thence along U.S. Highway 31W to junction Kentucky Highway 61, thence along Kentucky Highway 61 to junction Kentucky Highway 55, thence along Kentucky Highway 55 to junction U.S. Highway 127, thence along U.S. Highway 127, to the Kentucky-Tennessee State line.

(a') Between points in Montana, on the one hand, and, on the other, points in that part of Kentucky on and west of a line beginning at the Kentucky-Ohio State line, thence along U.S. Highway 127 to the Kentucky-Tennessee State line.

(b') Between points in Montana, on the one hand, and, on the other points in that part of Florida on and west of a line beginning at the Florida-Georgia State line, thence along U.S. Highway 221 to junction Alternate U.S. Highway 27, thence along Alternate U.S. Highway 27 to junction Florida Highway 361, thence along Florida Highway 361 to the Gulf of Mexico.

(c') Between points in Nevada, on the one hand, and, on the other, points in that part of Kentucky on and west of a line beginning at the Ohio-Kentucky State line, thence along Interstate Highway 75 to the Kentucky-Tennessee State line.

(d') Between points in Oregon, on the one hand, and, on the other, points in that part, of Indiana on and west of a line beginning at the Indiana-Michigan

V4263 APR 1 77 UMI

State line, thence along U.S. Highway 31 to the Indiana-Kentucky State line.

(e') Between points in Oregon, on the one hand, and, on the other, points in that part of Kentucky on and west of a line beginning at the Kentucky-Indiana State line, thence along U.S. Highway 31W to junction Interstate Highway 64, thence along Interstate Highway 64 to junction Interstate Highway 75, thence along Interstate Highway 75 to the Kentucky-Tennessee State line.

(f') Between points in Oregon, on the one hand, and, on the other, points in that part of Florida on and west of a line beginning at the Florida-Georgia State line, thence along U.S. Highway 319 to Lanark, Florida.

(g') Between points in that part of Ohio on and west of a line beginning at Huron, Ohio, thence along Ohio Highway 13 to junction U.S. Highway 33 to the Ohio-West Virginia State line, on the one hand, and, on the other, points in Michigan.

(h') Between points in that part of Pennsylvania west and south of a line beginning at the Pennsylvania-West Virginia State line, thence along U.S. Highway 119 to junction U.S. Highway 22, thence along U.S. Highway 22 to the Pennsylvania-West Virginia State line, on the one hand, and, on the other, points in that part of Ohio on and east of a line beginning at the Michigan-Ohio State line, thence along U.S. Highway 23 to junction Interstate Highway 71, thence along Interstate Highway 71 to the Ohio-Kentucky State line.

(i') Between points in that part of West Virginia on and west of U.S. Highway 250, on the one hand, and, on the other, points in Illinois.

(j') Between points in that part of West Virginia on and west of U.S. Highway 250, on the one hand, and, on the other, points in that part of Indiana on and south of a line beginning at the Indiana-Ohio State line, thence along Indiana Highway 17 to junction Indiana Highway 18, thence along Indiana Highway 18 to junction Indiana Highway 37, thence along Indiana Highway 37 to junction Indiana Highway 22, thence along Indiana Highway 22 to junction Indiana Highway 29, thence along Indiana Highway 29 to junction Indiana Highway 28, thence along Indiana Highway 28 to the Indiana-Illinois State line.

(k') Between points in that part of West Virginia on and west of Interstate Highway 77 on the one hand, and, on the other, points in Michigan.

(l') Between points in that part of New Mexico on and east of U.S. Highway 54 beginning at the Texas-New Mexico State line to Junction U.S. Highway 70, to the Texas-New Mexico State line near Texico, New Mexico on the one hand, and on the other, points in that part of Virginia on and west of Interstate Highway 77.

(m') Between points in that part of Ohio on and west of a line beginning at Lake Erie, thence along Ohio Highway 4 to junction U.S. Highway 23, thence along U.S. Highway 23 to junction U.S. Highway 62, thence along U.S. Highway 62 to the Ohio-Kentucky State line, on the one hand, and, on the other, points in that part of Minnesota on, south, and east of a line beginning at the Wisconsin-Minnesota State line, thence along U.S. Highway 35 to junction U.S. Highway 218, thence along U.S. Highway 218 to the Minnesota-Iowa State line.

(n') Between points in Alabama, on the one hand, and, on the other, points in Delaware, Illinois, Indiana, Iowa, Maryland, Minnesota, Montana, North Dakota, New Jersey, Oregon, Pennsylvania, Rhode Island, South Dakota, Wisconsin, and Wyoming.

(o') Between points in Arkansas, on the one hand, and, on the other, points in Michigan, Virginia, and West Virginia.

(p') Between points in Arizona, on the one hand, and on the other, points in Kentucky, Michigan, North Carolina, South Carolina, and Tennessee.

(q') Between points in California, on the one hand, and on the other, points in Florida, Michigan, and South Carolina.

(r') Between points in Colorado, on the one hand, and on the other, points in Indiana, Michigan, North Carolina, and South Carolina.

(s') Between points in Connecticut, on the one hand, and on the other, points in Florida, Georgia, North Carolina, South Carolina, Virginia, and West Virginia.

(t') Between points in Delaware, on the one hand, and, on the other, points in Florida, Georgia, Kentucky, and Tennessee.

(u') Between points in Florida, on the one hand, and on the other, points in Arizona, Colorado, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Maryland, Michigan, Minnesota, Missouri, Montana, Nebraska, Nevada, New Mexico, New Jersey, North Dakota, Oregon, Pennsylvania, Rhode Island, South Dakota, Utah, West Virginia, Virginia, Wisconsin, and Wyoming.

(v') Between points in Georgia, on the one hand, and on the other, points in Illinois, Indiana, Iowa, Maryland, Michigan, Minnesota, Nebraska, Nevada, New Jersey, North Dakota, Pennsylvania, Rhode Island, South Dakota, West Virginia, Wisconsin, and Wyoming.

(w') Between points in Illinois, on the one hand, and on the other, points in Indiana, Kentucky, Louisiana, Michigan, and Mississippi.

(x') Between points in Indiana, on the one hand, and on the other, points in Kentucky, Louisiana, Michigan, Minnesota, Mississippi, Missouri, North Carolina, South Carolina, Washington, Wisconsin, and Wyoming.

(y') Between points in Iowa, on the one hand, and on the other, points and places in Kentucky, Michigan, North Carolina, South Carolina, and Tennessee.

(z') Between points in Kansas, on the one hand, and on the other, points and places in Kentucky, Michigan and North Carolina.

(a'') Between points in Kentucky, on the one hand, and on the other, points in Michigan, Minnesota, Utah, Virginia, West Virginia, Wisconsin, and Wyoming.

(b'') Between points in Louisiana, on the one hand, and on the other, points in Michigan, Minnesota, Virginia, West Virginia, and Wisconsin.

(c'') Between points in Maryland, on the one hand, and on the other, points in Tennessee and West Virginia.

(d'') Between points in Michigan, on the one hand, and on the other, points in Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Mexico, North Carolina, North Dakota, Oklahoma, Oregon, South Carolina, South Dakota, Tennessee, Texas, Utah, Washington, Wisconsin, and Wyoming.

(e'') Between points in Minnesota, on the one hand, and on the other, points in Mississippi, North Carolina, South Carolina, and Tennessee.

(f'') Between points in Mississippi, on the one hand, and on the other, points in West Virginia and Wisconsin.

(g'') Between points in Missouri, on the one hand, and on the other, points in North Carolina.

(h'') Between points in Montana, on the one hand, and on the other, points in Tennessee.

(i'') Between points in Nebraska, on the one hand, and on the other, points and places in North Carolina and South Carolina.

(j'') Between points in Nevada, on the one hand, and on the other, points in South Carolina and Tennessee.

(k'') Between points in New Jersey, on the one hand, and on the other, points in North Carolina, South Carolina, Tennessee, and West Virginia.

(l'') Between points in New Mexico, on the one hand, and on the other, points in Kentucky, North Carolina, South Carolina, and Tennessee.

(m'') Between points in North Carolina, on the one hand, and on the other, points in North Dakota, Oklahoma, Pennsylvania, South Dakota, Texas, and Wisconsin.

(n'') Between points in North Dakota, on the one hand, and on the other, points in Indiana, Kentucky, South Carolina, and Tennessee.

(o'') Between points in Oklahoma, on the one hand, and on the other, points in South Carolina, Virginia, and West Virginia.

(p'') Between points in Oregon, on the one hand, and on the other, points in Alabama and Tennessee.

(q'') Between points in Pennsylvania, on the one hand, and on the other, points in South Carolina and West Virginia.

(r'') Between points in Rhode Island, on the one hand, and on the other, points in North Carolina, South Carolina, and West Virginia.

(s'') Between points in South Carolina, on the one hand, and on the other, points in South Dakota, Utah, and Wisconsin.

Carolina Highway 98 to junction U.S. Highway 64, thence along U.S. Highway 64 to the Atlantic Ocean. (8) Between points in Alabama excluding those in Barbour County (Eufaula), on the one hand, and, on the other, points in North

Carolina on and west of a line beginning at the North Carolina-Tennessee State line, and extending along U.S. Highway 23, to junction Interstate Highway 26, thence along Blue Ridge Parkway to the Virginia-North Carolina State line, and those points on and north of a line beginning at the Tennessee-North Carolina State line, and extending along U.S. Highway 321 to junction U.S. Highway 421, to junction Interstate Highway 40, to junction Interstate Highway 85, to junction North Carolina Highway 86, thence along North Carolina Highway 86 to the North Carolina-Virginia State line. (9) Between points in Alabama excluding those in or east of Henry, Dale, and Geneva Counties, on the one hand, and, on the other, points in North Carolina in or north of Watauga, Wilkes, Yadkin, Stokes, Rockingham, Caswell, Person, Granville, Vance and Warren Counties. (10) Between points in Alabama, on the one hand, and, on the other, points in North Carolina in or north of Watauga, Wilkes, Surry Counties. (B) (1) Between all points in Alabama, on the one hand, and, on the other, all points in Virginia. The purpose of this filing is to eliminate the gateway of Knoxville, Tenn.

(II) *Road building and earth moving equipment,* in truckaway service, *and parts of and attachments for* road building and earth moving equipment, (a) From the facilities of Caterpillar Tractor, located at Decatur, Ill., to points in Virginia; (b) From the facilities of Caterpillar Tractor located in Decatur, Ill., to points in that part of Virginia on and west of Interstate Highway 77; (c) From the facilities of Caterpillar Tractor located in Decatur and Peoria, Ill., to points in North Carolina on and east of Interstate Highway 77; (d) From the facilities of Caterpillar Tractor located in Decatur, Ill., to points in South Carolina; (e) From the facilities of Caterpillar Tractor located in Decatur and Peoria, Ill., to points in Georgia; (f) From the facilities of Caterpillar Tractor located in Decatur and Peoria, Ill., to points in Florida; (g) From the facilities of Caterpillar Tractor located in Aurora and Joliet, Ill., to points in Florida on and east of U.S. Highway 319; and (h) From the facilities of Caterpillar Tractor located in Decatur, Ill., to points in Tennessee on and west of U.S. Highway 11. The purpose of this filing is to eliminate the gateway of Findlay, Ohio.

(III) *Used, damaged, rejected, or defective trucks, trailers, and other types* of motor vehicles (except pasenger automobiles), *but including self-propelled road building and contractors' vehicles or machinery* in Driveaway and Truckaway service.

(a) Between points *in Rhode Island,* on the one hand, and, on the other, points in that *part of Pennsylvania* on and east of a line beginning at the Pennsylvania-New York State line, thence along U.S. Highway 219 to junction Pennsylvania Highway 879, thence along Pennsylvania Highway 879 to junction Pennsylvania Highway 144, thence along Pennsylvania Highway 144 to junction Pennsylvania Highway 120, thence along Pennsylvania Highway 120 to junction U.S. Highway 220, thence along U.S. Highway 220 to Pennsylvania-Maryland State line.

(b) Between points in that *part of Connecticut* on, south, and west of a line beginning at the New York-Connecticut State line, thence along Interstate Highway 85 to junction Connecticut Highway 34, thence along Connecticut Highway 34 to Long Island Sound, on the one hand, and, on the other, points in that *part of Pennsylvania* on and east of a line beginning at the Pennsylvania-Maryland State line, thence along U.S. Highway 220 to junction Pennsylvania Highway 144, thence along Pennsylvania Highway 144 to junction U.S. Highway 6 to junction Pennsylvania Highway 14, thence along Pennsylvania Highway 14 to he Pennsylvania-New York State line.

(c) Between points in that *part of New Jersey* on and south of a line beginning at the Pennsylvania-New Jersey State line, thence along U.S. Highway 22 to junction Interstate Highway 287, thence along Interstate Highway 287 to junction U.S. Highway 9, thence along U.S. Highway 9 to the Atlantic Ocean, on the one hand, and, on the other, points in that *part of Pennsylvania* on and south of a line beginning at Lake Erie, thence along U.S. Highway 6 to junction Pennsylvania Highway 14, thence along Pennsylvania Highway 14 to the New York-Pennsylvania State line.

(i) Between points in that part of New York on and west of a line beginning at the Pennsylvania-New York State line, thence along New York Highway 36 to junction New York Highway 21, thence along New York Highway 21 to Lake Ontario, on the one hand, and, on the other, points in Michigan.

(j) Between points in that part of New York on and west of a line beginning at the Pennsylvania-New York State line, thence along New York Highway 36 to junction New York Highway 21, thence along New York Highway 21 to Lake Ontario, on the one hand, and, on the other, points in Indiana.

(k) Between points in that part of New York on and west of a line beginning at the New York-Pennsylvania State line, thence along New York Highway 36 to junction New York Highway 21, thence along New York Highway 21 to Lake Ontario, and on and south of a line beginning at the New York-New Jersey State line, thence along U.S. Highway 6 to the New York-Connecticut State line, on the one hand, and, on the other, points in that part of West Virginia on and north of West Virginia Highway 7.

(l) Between points in that part of New York on south, and west of a line beginning at the New York-Pennsylvania State line, thence along New York Highway 16 to Lake Erie, and, on and south of a line beginning at Hale Eddy, N.Y., thence along New York Highway 17 to junction New York Highway 10, thence along New York Highway 10 to junction New York Highway 7, thence along New York Highway 7 to junction U.S. Highway 20, thence along U.S. Highway 20 to the Massachusetts-New York State line, on the one hand, and, on the other, points in North Carolina.

(m) Between points in New York on, west and south of a line beginning at New York-Pennsylvania State line, thence along U.S. Highway 62 to junction New York Highway 438, thence along New York Highway 438 to Lake Erie, on the one hand, and, on the other, points in Texas.

(n) Between points in that part of Vermont on and south of U.S. Highway 4, on the one hand, and, on the other, points in that part of Maryland on and east of a line beginning at the Pennsylvania-Maryland State line, thence along Interstate Highway 83 to junction Interstate Highway 695, thence along Interstate Highway 695 to Sparrows Point, Maryland.

(o) Between points in that part of New York on and west of a line beginning at the New York-Pennsylvania State line, thence along New York Highway 62 to junction New York Highway 75, thence along New York Highway 75 to Lake Erie, and on and south of a line beginning at the New York-New Jersey State line, thene along Interstate Highway 84 to the New York-Connecticut State line, on the one hand, and, on the other, points in Georgia.

(p) Between points in that part of New York, on and west of a line beginning at Lake Erie, thence along New York Highway 16 to the New York-Pennsylvania State line, on the one hand, and, on the other, points in Oklahoma.

(q) Between points in that part of New York on and west of a line beginning at the Pennsylvania-New York State line, thence along New York Highway 19 to junction New York Highway 63, thence along New York Highway 63 to junction New York Highway 98, thence along New York Highway 98, to Lake Ontario, on the one hand, and, on the other, points in Minnesota and Alabama.

(r) Between points in that part of New York on the west of a line beginning at the Pennsylvania-New York State line, thence along New York Highway 16 to junction New York Highway 78, thence along New York Highway 78 to Lake Ontario, on the one hand, and, on the other, points in Nebraska.

(s) Between points in that part of New York on and west of a line beginning at the New York-Pennsylvania State line, thence along New York Highway 16 to junction New York Highway 78, thence along New York Highway 78 to Lake Ontario, on the one hand, and, on the other, points in Kansas.

(t) Between points in that part of New York on and west of a line beginning at the New York-Pennsylvania State line, thence along New York Highway 16 to junction New York Highway 78, thence along New York Highway 78 to Lake Ontario, and on and south of a line beginning at Hancock, New York, thence along New York Highway 17 to junction New York Highway 30, thence along New

V 4263 APR 1 77 UMI

York Highway 30 to junction New York Highway 7, thence along New York Highway 7 to the New York-Vermont State line on the one hand, and, on the other, points in Virginia.

(u) Between points in that part of New York on and south of a line beginning at Hancock, New York, thence along New York Highway 17 to junction New York Highway 52, thence along New York Highway 52 to junction U.S. Highway 44, thence along U.S. Highway 44 to the New York-Connecticut State line, on the one hand, and, on the other, points in South Carolina.

(v) Between points in that part of New York on and east of a line beginning at the New York-Pennsylvania State line, thence along New York Highway 14 to junction New York Highway 13, thence along New York Highway 13 to junction New York Highway 34, thence along New York Highway 34 to junction New York Highway 38, thence along New York Highway 38 to junction New York Highway 104, thence along New York Highway 104 to Lake Ontario, on the one hand, and, on the other, points in that part of New Jersey on and north of a line beginning at the New York-New Jersey State line, thence along U.S. Highway 202 to junction Interstate Highway 80, thence along Interstate Highway 80 to the Hudson River.

(w) Between points in that part of New York on and east of a line beginning at the New York-Pennsylvania State line, thence along New York Highway 14 to junction New York Highway 96, thence along New York Highway 96 to junction New York Highway 250, thence along New York Highway 250 to Lake Ontario, on the one hand, and, on the other, points in Connecticut and Rhode Island.

(x) Between points in New Jersey on and south of New Jersey Highway 33, on the one hand, and, on the other, points in Kentucky on and east of a line beginning at the Kentucky-Ohio State line, thence along Interstate Highway 75 to junction Kentucky Highway 461, thence along Kentucky Highway 461 to junction Kentucky Highway 80, thence along Kentucky Highway 80 to junction U.S. Highway 27, thence along U.S. Highway 27 to the Kentucky-Tennessee State line.

(y) Between points in Connecticut, on the one hand, and, on the other, points in Tennessee on and east of a line beginning at the Kentucky-Tennessee State line, along U.S. Highway 127 to junction U.S. Highway 40, thence along U.S. Highway 40 to junction U.S. Highway 11, thence along U.S. Highway 11 to the Tennessee-Alabama State line.

(z) Between points in New Jersey, on the one hand, and on the other, points in Tennessee on and east of Interstate Highway 65.

(aa) Between points in that part of New Jersey on and south of New Jersey Highway 33 on the one hand, and on the other, points in that part of Ohio on and east of a line beginning at Lake Erie, thence along Interstate Highway 77 to junction Interstate Highway 271, thence along Interstate Highway 271 to junction Interstate Highway 71, thence along Interstate Highway 71 to junction U.S. Highway 36, thence along U.S. Highway 36 to the Ohio-Indiana State line.

(bb) Between points in Maine, on the one hand, and, on the other, points in that part of North Carolina on and east of a line beginning at the North Carolina-Virginia State line, thence along U.S. Highway 13 to junction U.S. Highway 17, thence along U.S. Highway 17 to junction U.S. Highway 70, thence along U.S. Highway 70 to the Atlantic Ocean.

(cc) Between points in Massachusetts on and south of a line from Boston along Interstate Highway 90 to junction U.S. Highway 20, thence along U.S. Highway 20 to junction Interstate Highway 90, thence along Interstate Highway 90 to the Massachusetts-New York State line, on the one hand, and, on the other, points in North Carolina on and north of a line from the Atlantic Ocean along U.S. Highway 421 to junction U.S. Highway 64, thence along U.S. Highway 64 to junction U.S. Highway 40, thence along U.S. Highway 40 to the North Carolina-Tennessee State line.

(dd) Between points in New Hampshire, on the one hand, and, on the other, points in North Carolina on and north of a line from the Atlantic Ocean along U.S. Highway 117 to junction North Carolina Highway 58, thence along North Carolina Highway 58 to junction North Carolina Highway 561, thence along North Carolina Highway 561 to junction U.S. Highway 158, thence along U.S. Highway 158 to junction U.S. Highway 52, thence along U.S. Highway 52 to the North Carolina-Virginia State line.

(ee) Between points in Maine, on the one hand, and, on the other, points in Virginia east of a line from the North Carolina-Virginia State line, along U.S. Highway 15 to junction U.S. Highway 33, thence along U.S. Highway 33 to junction Interstate Highway 81, thence along Interstate Highway 81 to the Virginia-West Virginia State line.

(ff) Between points in New Hampshire, on the one hand, and, on the other, points in that part of Virginia on and east of a line beginning at the Virginia-West Virginia State line, thence along U.S. Highway 17 to junction U.S. Highway 340, thence along U.S. Highway 340 to the Virginia-North Carolina State line.

(gg) Between points in Maine, on the one hand, and, on the other, points in that part of Pennsylvania on and east of a line beginning at the Pennsylvania-New York State line, thence along U.S. Highway 220 to junction Pennsylvania Highway 147, thence along Pennsylvania Highway 147 to junction Interstate Highway 83, thence along Interstate Highway 83 to the Pennsylvania-Maryland State line.

(hh) Between points in that part of Massachusetts, on and south of Interstate Highway 90, on the one hand, and, on the other, points in Pennsylvania.

(ii) Between points in New Hampshire, on the one hand, and, on the other, points in that part of Pennsylvania on and east of U.S. Highway 220.

(jj) Between points in Vermont, on the one hand, and, on the other, points in that part of Pennsylvania on and east of a line beginning at the Pennsylvania-New York State line, thence along U.S. Highway 220 to junction Pennsylvania Highway 147, thence along Pennsylvania Highway 147 to junction Interstate Highway 83, thence along Interstate Highway 83 to the Pennsylvania-Maryland State line.

(kk) Between points in that part of Maine on and south of a line beginning at the Maine-New Hampshire State line, thence along U.S. Highway 2 to junction Maine Highway 9, thence along Maine Highway 9 to the United States-Canada International Boundary line, on the one hand, and, on the other, points in that part of Maryland on and east of a line beginning at the Pennsylvania-Maryland State line, thence along interstate Highway 83 to junction Interstate Highway 695, thence along Interstate Highway 695 to junction Interstate Highway 95, thence along Interstate Highway 95 to the District of Columbia.

(ll) Between points in New Hampshire, on the one hand, and, on the other, points in that part of Maryland on and east of a line beginning at the Pennsylvania-Maryland State line, thence along Interstate Highway 83 to Junction Interstate Highway 695, thence along Interstate Highway 695 to junction Interstate Highway 95, thence along Interstate Highway 95 to the District of Columbia.

(mm) Between points in that part of New York on and east of a line beginning at Lake Ontario, thence along New York Highway 98 to junction New York Highway 63, thence along New York Highway 63 to junction U.S. Alternate Highway 20, thence along U.S. Alternate Highway 20 to junction U.S. Highway 15, thence along U.S. Highway 15 to junction New thence along New York Highway 17 York Highway 17 to junction New York Highway 14, thence along New York Highway 14 to the New York-Pennsylvania State line, on the one hand, and, on the other, points in Massachusetts, Vermont, New Hampshire, and Maine.

(nn) Between points in that part of New York, on and west of a line beginning at Lake Ontario, thence along New York Highway 98 to junction New York 63, thence along New York Highway 63 to junction New York Highway 19, thence along New York Highway 19 to the New York-Pennsylvania State line, on the one hand, and, on the other, points in Arkansas.

(oo) Between points in that part of New York, on and west of a line beginning at Lake Ontario, thence along New York Highway 19 to the New York-Pennsylvania State line, on the one hand, and, on the other, points in Iowa (except Cedar Rapids, Iowa).

(pp) Between points in that part of New York on and west of a line beginning at Lake Erie, thence along New York Highway 319 to junction U.S. Highway 219, thence along U.S. Highway 219 to the New York-Pennsylvania State line, on the one hand, and, on the other, points in North Dakota.

(qq) Between points in that part of New York on and west of line beginning at Lake Erie, thence along New York Highway 319 to junction U.S. Highway 219, thence along U.S. Highway 219 to the New York-Pennsylvania State line, on the one hand, and, on the other, points in Louisiana and Colorado.

(rr) Between points in that part of New York on and west of a line beginning at Lake Erie, thence along U.S. Highway 219, thence along U.S. Highway 219 to the New York-Pennsylvania State line, on the one hand, and, one the other, points in that part of Mississippi on and north-east of a line beginning at the Mississippi-Tennessee State line, thence along U.S. Highway 51 to junction Highway 16, thence along Mississippi Highway 16 to the Mississippi-Alabama State line.

(ss) Between points in that part of New York on and west of a line beginning at Lake Ontario, thence along New York Highway 57 to junction New York Highway 13, thence along New York Highway 13 to junction New York Highway 36, thence along New York Highway 38 to junction New York Highway 17, thence along New York Highway 17 to junction New York Highway 282, thence along New York Highway 282 to the New York-Pennsylvania State line, on the one hand, and, on the other, points in that part of Ohio on and east of a line beginning at Lake Erie, thence along Interstate Highway 77 to the Ohio-West Virginia State line

(tt) Between points in that part of New York south of a line beginning at the Pennsylvania-New York State line, thence along New York Highway 17 to junction New York Highway 30, thence along New York Highway 30 to junction New York Highway 23, thence along New York Highway 23 to the New York-Massachusetts State line, on the one hand, and, on the other, points in that part of Tennessee on and east of a line beginning at the Kentucky-Tennessee State line, thence along Interstate Highway 75 to junction U.S. Highway 129, thence along U.S. Highway 129 to the Tennessee-North Carolina State line.

(uu) Between points in that part of New York, on and west of a line beginning at Lake Ontario, thence along New York Highway 78 to junction New York Highway 16, thence along New York Highway 16 to the Pennsylvania-New York State line, on the one hand, and, on the other, points in Wisconsin.

(vv) Between points in New York, on and west of a line beginning at the New York-Pennsylvania State line, thence along U.S. Highway 219 to junction New York Highway 319, thence along New York Highway 319 to Lake Erie, on the one hand, and, on the other, points in South Dakota.

(ww) Between points in that part of New York on and west of a line beginning at the New York-Pennsylvania State line, thence along New York Highway 36 to junction New York Highway 17, to junction New York Highway 98, to junction New York Highway 39, to junction New York Highway 16, to junction Interstate Highway 290, to junction Interstate Highway 190, to Lake Ontario, on the one hand, and, on the other, points and places in that part of Maryland on and west of U.S. Highway 15.

(xx) Between points in Alabama, on one hand, and on the other, points in Connecticut, Delaware, New Jersey, Pennsylvania and Rhode Island.

(yy) Between points in Connecticut on the one hand, and on the other, points in in the District of Columbia, Florida, Georgia, Maryland, North Carolina, New York, South Carolina, Virginia and West Virginia.

(zz) Between points in Delaware, on the one hand, and on the other, points in Florida, Georgia, Maine, Massachusetts, New Hampshire, New York, Pennsylvania, Rhode Island and Vermont.

(a') Between points in the District of Columbia, on the one hand, and on the other, points in Maine, Massachusetts, New Hampshire, New York, Rhode Island and Vermont.

(b') Between points in Florida, on the one hand, and on the other, points in Pennsylvania and Rhode Island.

(c') Between points in Georgia, on the one hand, and on the other, points in New Jersey, Pennsylvania and Rhode Island.

(d') Between points in Maine, on the one hand, and on the other, points in Maryland, New Jersey and Virginia.

(e') Between points in Maryland, on the one hand, and on the other, points in Massachusetts, New Hampshire, New Jersey, Rhode Island and Vermont.

(f') Between points in Massachusetts, on the one hand, and on the other, points in New Jersey, North Carolina and Virginia.

(g') Between points in New Hampshire, on the one hand, and on the other, points in New Jersey.

(h') Between points in New Jersey, on the one hand, and on the other, points in Rhode Island and Vermont.

(i') Between points in New York, on the one hand, and on the other, points in Pennsylvania and West Virginia.

(j') Between points in North Carolina, on the one hand, and on the other, points in Pennsylvania and Rhode Island.

(k') Between points in Pennsylvania, on the one hand, and on the other, points in South Carolina, Virginia and West Virginia.

(l') Between points in Rhode Island, on the one hand, and on the other, points in South Carolina and West Virginia.

(m') Between points in Vermont, on the one hand, and on the other, points in Virginia. The purpose of this filing is to eliminate the gateway at Elmira Heights, N.Y.

No. MC 124174 (Sub-No. 109G), filed November 2, 1976. Applicant: MOMSEN TRUCKING CO., a Corporation, 2405 Hiway Boulevard, Spencer, Iowa 51301. Applicant's representative: Karl E. Momsen, 13811 "L" Street, P.O. Box 37490, Omaha, Nebr. 68137. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) (a) *Hides, skins, and pieces thereof, tannery products, tannery by-products, and supplies* (except commodities in bulk, in tank vehicles), from points in Colorado, Kansas, Montana, North Dakota, Oklahoma, and Wyoming, to points in Illinois; Indiana; Iowa (except Sioux City); Kentucky; Maine; Maryland; Massachusetts; Michigan; Minnesota (except St. Paul); Nebraska; New Hampshire; New Jersey; New York; Ohio; Pennsylvania; Tennessee; Vermont; Virginia; Texas; Wisconsin; West Virginia; New Orleans, La.; and Buford, Ga.; (b) *hides and tannery products* (except commodities in bulk, in tank vehicles), from the origin states in (1) (a) above, to points in South Dakota; and (c) *hides and skins* (except commodities in bulk, in tank vehicles), from points in the origin states in (1) (a) above, to Hazelwood, N.C. and points in Delaware. The purpose of this filing is to eliminate the gateways of Sioux City, Iowa; Solomon, Kans.; St. Paul, Minn.; Hastings and Omaha, Nebr.; St. Joseph and St. Louis, Mo.; Oklahoma City, Okla.; Omaha and Grand Island, Nebr.; and Rochelle and beginning at the International Boundary between the United States and Canada, and extending along Interstate Highway 75, thence along Interstate Highway 75 to junction Michigan Highway 20, thence along Michigan Highway 20 to junction U.S. Highway 131, thence along U.S. Highway 131 to the Michigan-Indiana State line, on the one hand, and, on the other, points in Tennessee.

(f) Between points in Michigan, on the one hand, and, on the other, those points in Tennessee on and west of a line beginning at Clarksville, Tenn., near the Kentucky-Tennessee State line, and extending along Tennessee Highway 13, thence along Tennessee Highway 13 to the Tennessee-Mississippi State line; (g) between those points in Michigan on and west of a line beginning at Sault St. Marie, Mich., at the International Boundary line between the United States and Canada, and extending along Interstate Highway 75 to junction U.S. Highway 31, thence along U.S. Highway 31 to junction U.S. Highway 131, thence along U.S. Highway 131 to the Michigan-Indiana State line, on the one hand, and, on the other, to those points in Kentucky on the west of a line beginning at Louisville, Ky., at or near the Indiana-Kentucky State line, and extending along U.S. Highway 150, thence along U.S. Highway 150 to Daniel Boone Parkway, thence along Daniel Boone Parkway to Kentucky Highway 80, thence along Kentucky Highway 80 to junction Kentucky Highway 15, Michigan; Ohio; West Virginia; Virginia; Maryland; Pennsylvania; New Jersey; New York; Massachusetts; Maine; Vermont; New Hampshire; and Buford, Ga.; (b) *hides and tannery products* (except commodities in bulk, in tank vehicles), from the origin points in (3) (a) above, to points in South Dakota and Missouri (except Butler); and (c) *hides and skins* (except commodities in bulk, in tank ve-

V 42 63 APR 1 77 UMI

hicles), from the origin points in (3) (a) above, to Hazelwood, N.C. and points in Delaware.

The purpose of this filing is to eliminate the gateways of points in Texas; Chicago, Ill.; Evansville, Ind.; Detroit, Mich.; Buffalo, N.Y.; Chattanooga and Kingsport, Tenn.; Richmond and Norfolk, Va.; and Buford, Ga. (4) (a) *Hides, skins, and pieces thereof, tannery products, tannery by-products, and supplies* (except commodities in bulk, in tank vehicles), between points in Tennessee; Texas; Virginia; New Orleans, La.; Hazelwood, N.C.; and points in Nebraska; Minnesota; Iowa; Wisconsin; Illinois; Kentucky; Tennessee; Michigan; Indiana; Ohio; West Virginia; Virginia; Pennsylvania; New York; Maryland; New Jersey; New Hampshire; Maine; New York; Massachusetts and Vermont; (b) *hides and tannery products* (except commodities in bulk, in tank vehicles), between points in South Dakota, Kansas, Missouri (except Butler), and points named in (4) (a) above; and (c) *hides and skins*, (except commodities in bulk, in tank vehicles), from points named in (4) (a) and (4) (b) above, to points in Delaware. The purpose of this filing is to eliminate common points in Tennessee; Texas; Virginia; Minnesota; Iowa; Nebraska; Buford, Ga.; Rochelle and Chicago, Ill.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Omaha, Nebr.

No. MC 133485 (Sub-No. 19G) (correction), filed January 27, 1977, published in the FEDERAL REGISTER issue of March 10, 1977, as MC 133485 Sub 19, republished as corrected this issue. Applicant: INTERNATIONAL DETECTIVE SERVICE, INC., 1828 Westminster Street, Providence, R.I. 02909. Applicant's representative: Morris J. Levin, 1620 Eye Street, NW., Washington, D.C. 20006. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Bullion, coins and precious metals*, in armored vehicles escorted by armed guards, between ports of entry on the International Boundary Line between the United States and Canada located in Maine, New York and Vermont, on the one hand, and, on the other, Chicago, Ill., and points in Connecticut, New Jersey, New York, and Barnstable, Bristol, Middlesex, Norfolk, Plymouth, Suffolk and Worcester Counties, Mass.

NOTE.—The purpose of this republication is to indicate docket number 133485 Sub No. 19 should be MC 133485 Sub 19G, gateway elimination proceeding. This filing is to eliminate the gateway at Providence, R.I. Common control may be involved. If a hearing is deemed necessary, the applicant requests that it be held at either New York, N.Y. or Providence, R.I.

The following letter-notices of proposals to eliminate gateways for the purpose of reducing highway congestion, alleviating air and noise pollution, minimizing safety hazards, and conserving fuel have been filed with the Interstate Commerce Commission under the Commission's *Gateway Elimination* Rules (49 CFR 1065), and notice thereof to all interested persons is hereby given as provided in such rules.

An original and two copies of protests against the proposed elimination of any gateway herein described may be filed with the Interstate Commerce Commission by April 11, 1977. A copy must also be served upon applicant or its representative. Protests against the elimination of a gateway will not operate to stay commencement of the proposed operation.

Successively filed letter-notices of the same carrier under these rules will be numbered consecutively for convenience in identification. Protests, if any, must refer to such letter-notices by number.

No. MC-1222 (Sub-No. E2) (correction), filed June 3, 1974, published in the FEDERAL REGISTER issue of June 5, 1975, and republished, as corrected, this issue. Applicant: REINHARDT TRANSFER COMPANY, 1410 10th Street, Portsmouth, Ohio 45662. Applicant's representative: Robert H. Kinker, P.O. Box 464, Frankfort, Ky. 40601. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Iron and steel articles*, from Huntington, W. Va., to points in Tennesse west and south of Scott, Campbell, Union, Grainger, Hawkins, Sullivan and Johnson Counties, and points in Kentucky west of Hancock, Breckinridge, Grayson, Edmonson, Barren, Metcalfe, and Cumberland Counties. The purpose of this filing is to eliminate the gateway of New Boston, Ohio. (2) *Iron and steel articles* as described in Appendix V to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209, except commodities which by reason of their size or weight require the use of special equipment or special handling, from the plant sites and warehouses of the Kankakee Electric Steel Company, Swanson Manufacturing Company, and Jones & McKnight, Inc., in Kankakee County, Ill., to point in Tennessee east of Claiborne, Grainger, Hamblen and Cocke Counties. The purpose of this filing is to eliminate the gateway of New Boston, Ohio. (3) *Iron and steel aritcles* (except those which because of size or weight, require the use of special equipment), from the plant site of Jones & Laughlin Steel Corporation in Putnam County, Ill., to points in West Virginia and points in Tennessee east of Campbell, Scott, Morgan, Roane, Loudon, Blount and Sevier Counties. The purpose of this filing is to eliminate the gateway of New Boston, Ohio. (4) *plastic foam shapes and forms*, (1) from the plant site of Dow Chemical Company, near Hanging Rock, Ohio, to points in Wisconsin, (2) from Ironton, Portsmouth and Hamilton Township, Ohio to points in Wisconsin, and (3) from Findlay, Ohio to points in Wisconsin. The purpose of this filing is to eliminate the gatway of Decatur, Ind.

NOTE.—The purpose of this correction is to correct the letter-notice previously published in error.

No. MC-35890 (Sub-No. E83), filed September 16, 1976. Applicant: BLODGETT FURNITURE SERVICE, INC., Thirty-Sixth St. SE., Grand Rapids, Mich. 49508. Applicant's representative: John F. Freel (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *New furniture, uncrated*, from points in Warren County, Pa., to points in Kansas. The purpose of this filing is to eliminate the gateway of Grand Rapids, Mich.

No. MC-35890 (Sub-No. E84), filed September 16, 1976. Applicant: BLODGETT FURNITURE SERVICE, INC., Thirty-Sixth St. SE., Grand Rapids, Mich. 49508. Applicant's representative: John F. Freel (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *New furniture, uncrated*, from points in Warren County, Pa., to points in Texas. The purpose of this filing is to eliminate the gateway of Grand Rapids, Mich.

No. MC 35890 (Sub-No. E85), filed September 16, 1976. Applicant: BLODGETT FURNITURE SERVICE, INC., Thirty-Sixth St. S.E., Grand Rapids, Mich. 49508. Applicant's representative: John F. Freel (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *New furniture, uncrated*, from points in Warren County, Pa., to points in Oklahoma. The purpose of this filing is to eliminate the gateway of Grand Rapids, Mich.

No. MC 35890 (Sub-No. E86), filed September 16, 1976. Applicant: BLODGETT FURNITURE SERVICE, INC., Thirty-Sixth St. S.E., Grand Rapids, Mich. 49508. Applicant's representative: John F. Freel (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *New furniture, uncrated*, from points in New York on and north and west of a line beginning at the Pennsylvania-New York State line, and extending east along New York Highway 17 to junction with New York Highway 30, thence northeast along New York Highway 30 to junction with New York Highway 81, thence over New York Highway 81 to junction with Interstate Highway 87, thence north along Interstate Highway 87 to junction with Interstate Highway 90, thence over Interstate Highway 90 to New York-Massachusetts State line, to those points in Mississippi on and west of a line beginning at the Tennessee-Mississippi State line, and extending south along Interstate Highway 55 to junction U.S. Highway 51, thence south along U.S. Highway 51 to the Mississippi-Louisiana State line. The purpose of this filing is to eliminate the gateway of Grand Rapids, Mich.

No. MC 35890 (Sub-No. E87), filed September 16, 1976. Applicant: BLODGETT FURNITURE SERVICE, INC., Thirty-Sixth St. S.E., Grand Rapids, Mich. 49508. Applicant's representative: John F. Freel (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *New furniture, uncrated*, from points in Onandago County, N.Y., to those points in Mississippi on and south and west of a line beginning at the Mississippi-Tennessee State line, and extending along U.S. Highway 78, thence along U.S. Highway 78 to the Alabama-Mississippi State line. The purpose of this filing is to eliminate the gateway of Grand Rapids, Mich.

No. MC 35890 (Sub-No. E88), filed September 16, 1976. Applicant: BLODGETT FURNITURE SERVICE, INC., Thirty-Sixth St., S.E., Grand Rapids, Mich. 49508. Applicant's representative: John F. Freel (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *New furniture, uncrated*, from points in New York on, and north and west of a line beginning at the Pennsylvania-New York State line, and extending east along New York Highway 17 to junction New York Highway 30, thence northeast along New York Highway 30 to junction New York Highway 81, thence along New York Highway 81 to junction Interstate Highway 87, thence north along Interstate Highway 87 to junction Interstate Highway 90, thence along Interstate Highway 90 to the New York-Massachusetts State line, to those points in Mississippi on and west of a line beginning at the Tennessee-Mississippi State line, and extending south along Interstate Highway 55 to junction U.S. Highway 51, thence south along U.S. Highway 51 to the Mississippi-Louisiana State line. The purpose of this filing is to eliminate the gateways of Warren County, Pa., and Grand Rapids, Mich.

No. MC 35890 (Sub-No. E89), filed September 16, 1976. Applicant: BLODGETT FURNITURE SERVICE, INC., Thirty-Sixth St. S.E., Grand Rapids, Mich. 49508. Applicant's representative: John F. Freel (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *New furniture, uncrated*, from points in New York on and north and west of a line beginning at the Pennsylvania-New York State line, and extending along New York Highway 17 to junction with New York Highway 30, thence northeast along New York Highway 30 to junction with New York Highway 81, thence over New York Highway 81 to junction with Interstate Highway 87, thence north along Interstate Highway 87 to junction with Interstate Highway 90, thence over Interstate Highway 90 to New York-Massachusetts State line, to those points in Mississippi on and west of a line beginning at the Tennessee-Mississippi State line, and extending south along Interstate Highway 55 to junction U.S. Highway 51, thence south along U.S. Highway 51 to the Mississippi-Louisiana State line. The purpose of this filing is to eliminate the gateway of Grand Rapids, Mich.

No. MC 41406 (Sub-No. E3) (Correction), filed May 15, 1974, published in the FEDERAL REGISTER issue of September 2, 1975, and republished, as corrected, this issue. Applicant: ARTIM TRANSPORTATION SYSTEM, INC., P.O. Box 2176, Hammond, Ind. 46323. Applicant's representative: William J. Walsh (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel articles*, as described in Appendix V to the report in Descriptions in Motor Carrier Certificates, 61 M.C.C. 209, (c) between points in that part of Illinois on and north of a line beginning at the Iowa-Illinois State line and extending along U.S. Highway 34 to Galesburg, thence to junction U.S. Highway 6, thence along U.S. Highway 6 to Joliet, thence along U.S. Highway 30 to the Illinois-Indiana State line, on the one hand, and, on the other, to those points in Indiana on, north and east of a line beginning at the Illinois-Indiana State line and extending along U.S. Highway 6 to junction U.S. Highway 41, thence along U.S. Highway 41 to junction U.S. Highway 30, thence along U.S. Highway 30 to junction U.S. Highway 35, thence along U.S. Highway 35 to junction U.S. Highway 31 through Kokomo, to junction Indiana Highway 26, thence along Indiana Highway 26 to the Indiana-Ohio State line. The purpose of this filing is to eliminate the gateway of Gary, Ind.

NOTE.—The purpose of this partial correction is to indicate the correct "between" movements. The remainder of this letter-notice remains as previously published.

No. MC 41406 (Sub-No. E1) (Correction), filed May 15, 1974, published in the FEDERAL REGISTER issue of October 21, 1975, and partially republished in the FEDERAL REGISTER issue of January 28, 1976, and partially republished, as corrected, this issue. Applicant: ARTIM TRANSPORTATION SYSTEM, INC., P.O. Box 2176, Hammond, Ind. 46323. Applicant's representative: William J. Walsh (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel articles*, as described in Appendix V to the report in Descriptions in Motor Carrier Certificates, 61 M.C.C. 209, (e) between points in that part of Illinois on and north of a line beginning at the Iowa-Illinois State line and extending along U.S. Highway 34 to Galesburg, thence to junction U.S. Highway 6, thence along U.S. Highway 6 to Joliet, thence along U.S. Highway 30 to the Illinois-Indiana State line, on the one hand, and, on the other, to those points in Indiana on, north and east of a line beginning at the Illinois-Indiana State line and extending along U.S. Highway 6 to junction U.S. Highway 41, thence along U.S. Highway 41 to junction U.S. Highway 30, thence along U.S. Highway 30 to junction U.S. Highway 35, thence along U.S. Highway 35 to junction U.S. Highway 31 through Kokomo, to junction Indiana Highway 26, thence along Indiana Highway 26 to the Indiana-Ohio State line. The purpose of this filing is to eliminate the gateway of Gary, Ind.

No. MC 107107 (Sub-No. E30) (Correction), filed April 6, 1975, published in the FEDERAL REGISTER issues of June 13, 1975, and March 2, 1977, and republished, as corrected, this issue. Applicant: ALTERMAN TRANSPORT LINES, INC., P.O. Box 425, Opa Locka, Fla. 33054. Applicant's representative: Ford W. Sewell (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meat, meat products, and meat by-products*, as defined by the Commission, from Wichita, Kans., to those points in Alabama on and south of a line beginning at the Alabama-Georgia State line and extending long U.S. Highway 84 to junction Interstate Highway 65, thence along Interstate Highway 65 to junction U.S. Highway 80, thence along U.S. Highway 80 to the Alabama-Mississippi State line, and those in Georgia on and south of U.S. Highway 280, restricted to commodities requiring temperature control in transit when moving to Savannah, Ga. The purpose of this filing is to eliminate the gateways of Florida and Jacksonville, Fla.

NOTE.—The purpose of this correction is to state the correct territorial description.

No. MC 107515 (Sub-No. E641), filed December 20, 1976. Applicant: REFRIGERATED TRANSPORT CO., INC., P.O. Box 308, Forest Park, Ga. 33050. Applicant's representative: R. M. Tettlebaum, Suite 375, 3379 Peachtree Rd. N.E., Atlanta, Ga. 30326. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Meats, meat products, and meat by-products, dairy products, and such articles distributed by meat packing houses as are foodstuffs*, as described in Sections A, B, and C of Appendix I to the Report in Descriptions in Motor Carrier Certificates, 61 M.C.C. 209 and 766 (except commodities in bulk, in tank vehicles, and hides), in vehicles equipped with mechanical refrigeraion, from points in Iowa, to points in Florida; points in Alabama on, south and east of a line beginning at the Alabama-Florida State line and extending along U.S. Highway 29 to junction U.S. Highway 31, thence over U.S. Highway 31 to junction Interstate Highway 65, thence over Interstate Highway 65 to junction U.S. Highway 231, thence over U.S. Highway 231 to junction Alternate U.S. Highway 231, thence over Alternate U.S. Highway 231 to junction Alabama Highway 77, thence over Alabama Highway 77 to junction U.S. Highway 411, thence over U.S. Highway 411 to the Georgia-Alabama State line; and Suffolk, Va., (2) *meats, meat products, and meat by-products, dairy products, and such articles distributed by meat packing houses, as are foodstuffs* as described in Sections A, B, and C of Appendix I to the Report in Descriptions in Motor Carrier, Certificates, 61 M.C.C. 209 and 766 (except commodities in bulk, in tank vehicles, and hides) in vehicles equipped with mechanical refrigeration, from points in Iowa on, south and west of a line begin-

V 42 63 APR 1 77 UMI

ning at the Iowa-Illinois State line and extending along Iowa Highway 2 to junction U.S. Highway 218, thence along U.S. Highway U.S. Highway 63, thence along U.S. Highway 63 to junction Iowa Highway 163, thence along Iowa Highway 163 to junction Interstate Highway 80, thence along Interstate Highway 80 to junction U.S. Highway 169, thence along U.S. Highway 169 to junction U.S. Highway 18, thence along U.S. Highway 18 to junction Iowa Highway 4, thence along Iowa Highway 4 to the Iowa-Minnesota State line, to Norfolk, Va., (3) *meats, meat products, and meat by-products, dairy products, and articles distributed by meat packing houses as are foodstuffs*, as described in Sections A, B, and C of Appendix I to the Report in Descriptions in Motor Carrier Certificates, 61 M.C.C. 209 and 766 (except commodities in bulk, in tank vehicles, and hides), in vehicles equipped with mechanical refrigeration, from Sioux City, Iowa, to Chattanooga, Tenn., and (4) *meats, meat products, and meat by-products, dairy products, and such articles distributed by meat packing houses as are foodstuffs*, as described in Sections A, B, and C of Appendix I to the Report in Descriptions in Motor Carrier Certificates, 61 M.C.C. 209 and 766 (except commodities in bulk, in tank vehicles, and hides), in vehicles equipped with mechanical refrigeration, from Iowa on and north of a line beginning at the Iowa-Wisconsin State line and extending along U.S. Highway 18 to junction Iowa Highway 4, thence along Iowa Highway 4 to junction Iowa Highway 3, thence along Iowa Highway 3 to junction Iowa Highway 31, thence along Iowa Highway 31 to junction U.S. Highway 20, thence along U.S. Highway 20 to Sioux City, Iowa, to points in Alabama on, south and east of a line beginning at the Alabama-Georgia State line and extending along Interstate Highway 59 to junction Interstate Highway 65, thence along Interstate Highway 65 to Mobile, Ala. The purpose of this filing is to eliminate the gateway of the facilities of Refrigerated Transport Co., Inc. at Doraville, Ga.

No. MC 108341 (Sub-No. E12 (Partial Correction), filed May 13, 1974, published in the FEDERAL REGISTER issue of September 4, 1975, and republished, as corrected, this issue. Applicant: MOSS TRUCKING CO., INC., P.O. Box 8409, Charlotte, N.C. 28208. Applicant's representative: Jack F. Counts (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Turbines, steam condensers, feed water heaters, weldments, and heat exchangers and parts* of the commodities above; and *iron and steel castings and forgings*, restricted to the transportation of commodities which because of size or weight require the use of special equipment and contractors' materials, supplies and equipment, commodities which do not require the use of special equipment in mixed loads with commodities which because of size or weight require the use of special equipment, * * * The purpose of this filing is to eliminate the gateway of Charlotte, N.C.

NOTE.—The purpose of this partial correction is to correct the commodity description. The remainder of this letter-notice remains as previously published.

No. MC 108676 (Sub-No. E3), filed June 4, 1974. (Part I—Sec. A and B) Applicant: A. J. METLER HAULING & RIGGING, 117 Chicamauga Avenue, Knoxville, Tennessee 37917. Applicant's representative: A. J. Metler (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel articles, consisting of contractors' equipment and coal and coke mining equipment, iron and steel articles, consisting, of construction equipment, and parts, accessories and attachments therefor* (not including contractors' equipment), *maintenance equipment, and parts, accessories, and attachments, therefor* (not including contractors' equipment), *power distribution equipment, and parts, accessories and attachments therefor* (not including contractors' equipment), *and plant equipment, and parts, accessories and attachments therefor* (not including contractors' equipment). *Iron and steel articles, consisting of signs, sign poles and parts and accessories*, (A) (1) Between points in Alabama on and west of Jackson, Marshall, Blount, Jefferson, Tuscaloosa, Hale, Marengo, Clarke and Washington Counties, on the one hand, and, on the other, points in North Carolina. (2) Between points in Alabama on and north of a line beginning at the Alabama-Georgia State line, and extending along Interstate Highway 59 to the Alabama-Mississippi State line, and those points on and west of Tuscaloosa, Hale, Marengo, Clarke and Washington Counties, on the one hand, and, on the other, points in North Carolina, except Mecklenburg County, N.C. (3) Between points in Alabama on and west of a line beginning at the Georgia-Alabama State line, and extending along Interstate Highway 59, to junction U.S. Highway 31, thence south along U.S. Highway 31 (excluding Montgomery, Ala.), to the Gulf of Mexico, on the one hand, and, on the other, points in North Carolina except points in Mecklenburg, Union, Anson, Richmond, Scotland, and Robeson Counties. (4) Between points in Alabama on and north and west of a line beginning at the Alabama-Georgia State line, and extending along Interstate Highway 20, to junction U.S. Highway 31, thence west and south along U.S. Highway 31 (excluding Montgomery, Ala.) to the Gulf of Mexico, on the one hand, and, on the other, points in North Carolina except those on and south of Mecklenburg, Union, Anson, Richmond, Scotland, Robeson, Bladen, and Pender Counties. (5) Between points in Alabama on and north of a line beginning at the Alabama-Georgia State line and extending along Interstate Highway 20, to junction U.S. Highway 31, thence along U.S. Highway 31 (excluding Montgomery, Ala.), to the Gulf of Mexico, on the one hand, and, on the other, points in North Carolina excluding those in or south of Mecklenburg, Cabarrus, Stanley, Montgomery, Moore, Hoke, Cumberland, Sampson and Pender Counties.

(6) Between points in Alabama on and north and west of a line beginning at the Alabama-Georgia State line and extending along Interstate Highway 20 to junction Interstate Highway 65, thence along Interstate Highway 65 to junction U.S. Highway 31, thence along U.S. Highway 31 to the Florida-Alabama State line, on the one hand, and, on the other, points in North Carolina excluding those in or south of Mecklenburg, Cabarrus, Stanley, Montgomery, Moore, Harnett, Sampson, Wayne, Lenoir, Jones and Onslow Counties. (7) Between points in Alabama excluding those in or east of Barbour, Dale and Geneva Counties, on the one hand, and, on the other, points in North Carolina on and west of a line beginning at the North Carolina-Tennessee State line and extending along U.S. Highway 23 to junction Interstate Highway 26, thence along Blue Ridge Parkway to the Virginia-North Carolina State line, and those points on and north of a line beginning at the Tennessee-North Carolina State line and extending along U.S. Highway 321 to junction U.S. Highway 421, thence along U.S. Highway 421 to junction Interstate Highway 40, thence along Interstate Highway 40 to junction Interstate Highway 85, thence along Interstate Highway 85 to junction North Carolina Highway 98, thence along North Carolina Highway 98 to junction U.S. Highway 64, thence along U.S. Highway 64 to the Atlantic Ocean. (8) Between points in Alabama excluding those in Barbour County (Eufaula), on the one hand, and, on the other, points in North Carolina on and west of a line beginning at the North Carolina-Tennessee State line, and extending along U.S. Highway 23, to junction Interstate Highway 26, thence along Blue Ridge Parkway to the Virginia-North Carolina State line, and those points on and north of a line beginning at the Tennessee-North Carolina State line, and extending along U.S. Highway 321 to junction U.S. Highway 421, to junction Interstate Highway 40, to junction Interstate Highway 85, to junction North Carolina Highway 86, thence along North Carolina Highway 86 to the North Carolina-Virginia State line. (9) Between points in Alabama excluding those in or east of Henry, Dale, and Geneva Counties, on the one hand, and, on the other, points in North Carolina in or north of Watauga, Wilkes, Yadkin, Stokes, Rockingham, Caswell, Person, Granville, Vance and Warren Counties. (10) Between points in Alabama, on the one hand, and, on the other, points in North Carolina in or north of Watauga, Wilkes, Surry Counties. (B) (1) Between all points in Alabama, on the one hand, and, on the other, all points in Virginia. The purpose of this filing is to eliminate the gateway of Knoxville, Tenn.

No. MC 108676 (Sub-No. E4), filed June 4, 1974. (Part I—Sec. C and D) Applicant: A. J. METLER HAULING & RIGGING, 117 Chicamauga Avenue, Knoxville. Tennessee 37917. Applicant's representative: A. J. Metler (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel aticles*, consisting of *contractors' equipment and coal and coke mining equipment, iron and steel articles*, consisting of *construction equipment, and parts, accessories and attachments, therefor* (not including contractors' equipment), *maintenance equipment, and parts, accessories and attachments, therefor* (not including contractors' equipment), *power distribution equipment, and parts, accessories and attachment therefor* (not including contractors' equipment), *and plant equipment, and parts, accessories and attachments therefor* (not including contractors' equipment). *Iron and steel articles*, consisting of *signs, sign poles and parts and accessories*, (C) (1) Between points in Barbour County (Eufaula), Ala., on the one hand, and, on the other, points in Kentucky in or east of Daviess, Ohio, Butler, Edmonson, Barren and Monroe Counties. (2) Between points in Alabama in or east of Barbour, Dale, and Geneva Counties, on the one hand, and, on the other, points in Kentucky in or east of Hancock, Breckinridge, Grayson, Edmonson, Barren and Monroe Counties. (3) Between points in Alabama in or east of Covington, Crenshaw, Pike, and Barbour Counties, on the one hand, and, on the other, points in Kentucky in or east of Meade, Hardin, Larue, Green, Adair, and Cumberland Counties. (4) Between points in Alabama in or south of Leburne, Calhoun, Talladega, Coosa, Elmore, Montgomery, Butler, Covington, Escambia, Baldwin, and Mobile Counties, on the one hand, and, on the other, points in Kentucky in or east of Jefferson, Spencer, Nelson, Marion, Taylor, Adair, and Cumberland Counties. (5) Between points in Alabama in or south of Leburne, Calhoun, Talladega, Coosa, Chilton, Perry, Marengo, and Choctaw Counties, on the one hand, and, on the other, points in Kentucky on and east of a line beginning at the Tennessee-Kentucky State line, and extending along Kentucky Highway 61, to junction Kentucky Highway 55. thence along Kentucky Highway 55 to Kentucky-Indiana State line. (6) Between points in Alabama south of Franklin, Lawrence, Morgan, Marshall, and Dekalb Counties, on the one hand, and, on the other, points in Kentucky in or east of Gallatin, Owen, Franklin, Anderson, Mercer, Boyle, Lincoln, Pulaski, and Wayne Counties. (g) Between those points in Michigan on and west of a line beginning at Sault St. Marie, Mich., at the International Boundary line between United States and Canada, and extending along Interstate Highway 75 to junction U.S. Highway 31, thence along U.S. Highway 31 to junction U.S. Highway 131, thence along U.S. Highway 131 to the Michigan-Indiana State line, on the one hand, and, on the other, to those points in Kentucky on and west of a line beginning at Louisville, Ky., at or near the Indiana-Kentucky State line, and extending along U.S. Highway 150, thence along U.S. Highway 150 to Daniel Boone Parkway, thence along Daniel Boone Parkway to Kentucky Highway 80, thence along Kentucky Highway 80 to junction Kentucky Highway 15, thence along Kentucky Highway 15 to the Kentucky-Virginia State line; (h) between points in Berrien County, Mich., on the one hand, and, on the other, points in Massachusetts; (i) between those points in Michigan on and west of a line beginning at Marquette, Mich., on Lake Superior, and extending along Michigan Highway 28 to junction Michigan Highway 94, thence along Michigan Highway 94 to Lake Michigan, on the one hand, and, on the other, points in Massachusetts; (j) between those points in Michigan on and west of a line beginning at Marquette, Mich., on Lake Superior, and extending along Michigan Highway 28 to junction Michigan Highway 94 to Lake Michigan, on the one hand, and, on the other, points in Ohio; (k) between points in Michigan, on the one hand, and, on the other, to those points in Kentucky on and west of a line beginning at the Indiana-Kentucky State line, and extending along U.S. Highway 41 to the Kentucky-Tennessee State line; (l) between those points in Michigan on and west of a line beginning at Marquette, Mich., on Lake Superior, and extending along U.S. Highway 41 to Lake Michigan, on the one hand, and, on the other, points in Indiana; (m) between points in Michigan, on the one hand, and, on the other, points in Posey and Vanderburgh Counties, Ind.

(n) Between points in Chippewa, Mackinac, Luce, Alger, Schoolcraft, Delta, Menominee, Dickinson, Marquette, Iron, Baraga, Houghton, Keweenaw, Ontonagon, Gogebic Counties, Mich., and points on and west of a line beginning at Mackinaw City, Mich., and extending south along Interstate Highway 75 to junction Michigan State Highway 46, thence along Michigan State Highway 46 to junction U.S. Highway 131, thence along U.S. Highway 131 to junction Interstate Highway 94, thence along Interstate Highway 94 to the Michigan-Indiana State line, on the one hand, and, on the other, points in Connecticut on and east of a line beginning at the Massachusetts-Connecticut State line, and extending along Connecticut Highway 198, thence along Connecticut Highway 198 to junction Connecticut Highway 32, thence along Connecticut Highway 32 to Block Island Sound; (o) between points in Chippewa, Mackinac, Luce, Alger, Schoolcraft, Delta, Menominee, Dickinson, Marquette, Iron, Baraga, Houghton, Keweenaw, Ontonagon, Gogebic Counties, Mich., on the one hand, and, on the other, points in Connecticut; (p) between points in Michigan on and west of a line beginning at Little Traverse Bay, at or near Petoskey, Mich., and extending along U.S. Highway 131, thence along U.S. Highway 131 to junction Interstate Highway 94, thence along Interstate Highway 94 to Lake Michigan, on the one hand, and, on the other, those points in Indiana on and west of a line beginning at Lake Michigan, and extending along Interstate Highway 41, thence along Interstate Highway 41 to the Indiana-Kentucky State line; (q) between points in the Upper Peninsula of Michigan and points in Emmett, Charlevoix, Antrim, Kalkaska, Grand Traverse, and Benzie Counties, Mich., on the one hand, and, on the other, those points in Indiana on and west of a line beginning at Lake Michigan, and extending along Interstate Highway 65, thence along Interstate Highway 65 to the Indiana-Kentucky State line; (r) between points in Michigan on and west of a line beginning at Lake Superior, and extending along U.S. Highway 41 to Escanaba, Mich., on Lake Michigan, on the one hand, and, on the other, points in Kentucky. The purpose of this filing is to eliminate the gateway of points in Illinois.

No. MC 112070 (Sub-No. E95), filed June 4, 1974. Applicant: GRAY MOVING & STORAGE, INC., 1290 South Pearl, Denver, Colo. 80210. Applicant's representative: D. R. Gray (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Household goods*, as defined by the Commission, (a) Between points in Illinois on and north of a line beginning at the Illinois-Missouri State line, and extending along U.S. Highway 36, thence along U.S. Highway 36 to the Illinois-Indiana State line, on the one hand, and, on the other, those points in New Mexico on and west and north of a line beginning at or near the New Mexico-Oklahoma State line and extending along New Mexico Highway 325 to junction U.S. Highway 64, to junction Interstate Highway 25, thence south along Interstate Highway 25 to junction New Mexico Highway 90, thence along New Mexico Highway 90 to the New Mexico-Arizona State line; (b) Between points in Illinois, on the one hand, and, on the other, points in Utah, and points in San Juan County, N. Mex.; (c) Between points in Illinois on and north of a line beginning at the Illinois-Indiana State line, and extending along Interstate Highway 80, thence along Inter-

V 4263 APR 1 77 UMI

state Highway 80 to the Illinois-Iowa State line, on the one hand, and, on the other, to those points in New Mexico on and west of a line beginning at the New Mexico-Colorado State line, and extending along Interstate Highway 25, thence along Interstate Highway 25 to the New Mexico-Texas State line; (d) Between points in Illinois, on the one hand, and, on the other, those points in New Mexico on and west of a line beginning at the Colorado-New Mexico State line, and extending along U.S. Highway 285 to junction U.S. Highway 85, thence along U.S. Highway 85 to junction Interstate Highway 40, thence along Interstate Highway 40 to the New Mexico-Arizona State line; (e) Between points in Lake, Dupage, Cook, Winnebago, Boone and McHenry Counties, Ill., on the one hand, and, on the other, points in New Mexico. The purpose of this filing is to eliminate the gateways of points in Missouri, Iowa, Colorado, and Denver, Colo., and within 10 miles thereof.

No. MC 112070 (Sub-No. E96), filed June 4, 1974. Applicant: GRAY MOVING & STORAGE, INC., 1290 South Pearl, Denver, Colo. 80210. Applicant's representative: D. R. Gray (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Household goods*, as defined by the Commission, between points in Michigan on and west of a line beginning at Lake Superior, at Marquette, Mich., and extending along U.S. Highway 41, thence south on U.S. Highway 41 to Escanaba, Mich., at Lake Michigan, on the one hand, and, on the other, points in New Mexico. The purpose of this filing is to eliminate the gateways of points in Iowa, and Denver, Colo., and points within 10 miles thereof.

No. MC 112070 (Sub-No. E97), filed June 4, 1974. Applicant: GRAY MOVING & STORAGE, INC., 1290 South Pearl, Denver, Colo. 80210. Applicant's representative: D. R. Gray (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Household goods*, as defined by the Commission, (a) Between points in Pennsylvania, on the one hand, and, on the other, points in Utah; (b) Between points in Pennsylvania, on the one hand, and, on the other, those points in New Mexico on and west of a line beginning at the New Mexico-Colorado State line, and extending along U.S. Highway 85 to junction Interstate Highway 25, to junction U.S. Highway 84, to junction Interstate Highway 25, thence along Interstate Highway 25 to junction Interstate Highway 10, thence along Interstate Highway 10 to the New Mexico-Texas State line; (c) Between points in Pennsylvania on the one hand, and, on the other, those points in New Mexico on and west of a line beginning at the New Mexico-Colorado State line, and extending along Interstate Highway 25 to junction U.S. Highway 84, thence along U.S. Highway 84 to junction U.S. Highway 285, thence along U.S. Highway 285 to the New Mexico-Texas State line. The purpose of this filing is to eliminate the gateways of points in Illinois, Missouri, and Denver, Colo., and within 10 miles thereof.

No. MC 112070 (Sub-No. E98), filed June 4, 1974. APPLICANT: GRAY MOVING & STORAGE, INC., 1290 South Pearl, Denver, Colo. 80210, Applicant's representative: D. R. Gray (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Household goods*, as defined by the Commission, (a) Between points in Minnesota, on the one hand, and, on the other, points in New Mexico, and to those points in Utah on and south of a line beginning at the Wyoming-Utah State line, and extending along Interstate Highway 80 to junction U.S. Highway Alternate 50, to junction Utah Highway 36, to junction U.S. Highway 6–50, thence along U.S. Highway 6–50 to the Utah-Nevada State line; (b) Between points in Minnesota on and south of a line beginning at the Wisconsin-Minnesota State line, and extending along U.S. Highway 212 to the Minnesota-South Dakota State line, on the one hand, and, on the other, those points in Utah on and north of a line beginning at the Wyoming-Utah State line and extending along Interstate Highway 80 to the Utah-Nevada State line. The purpose of this filing is to eliminate the gateways of points in Iowa and Denver, Colo., and points within 10 miles thereof.

No. MC 112070 (Sub-No. E99), filed June 4, 1974. APPLICANT: GRAY MOVING & STORAGE, INC., 1290 South Pearl, Denver, Colo. 80210. Applicant's representative: D. R. Gray (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Household goods*, as defined by the Commission, between points in New Jersey, on the one hand, and, on the other, points in Utah, and those points in New Mexico on and west of a line beginning at the Colorado-New Mexico State line, and extending along Interstate Highway 25 to junction U.S. Highway 84, to junction U.S. Highway 66, east to junction U.S. Highway 54, to junction U.S. Highway 285, thence along U.S. Highway 285 to the New Mexico-Texas State line. The purpose of this filing is to eliminate the gateways of points in Illinois, Missouri, and Denver, Colo., and points within 10 miles thereof.

No. MC 114868 (Sub-No. E49), filed August 1, 1975. Applicant: NEWLON'S TRANSFER & STORAGE, 1511 N. Nelson Street, Arlington, Va. 22201. Applicant's representative: H. E. Newlon, Jr. (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Household goods*, (1) between points in Ohio within 10 miles north of the Ohio River, on the one hand, and, on the other, points in Indiana. The purpose of this filing is to eliminate the gateway of points in Kentucky within 125 miles of Nashville. (2) between points in Ohio within 10 miles north of the Ohio River, on the one hand, and, on the other, points in Kentucky. The purpose of this filing is to eliminate the gateway of points in Kentucky within 125 miles of Nashville. (3)(a) between points in Ohio, on the one hand, and, on the other, points in Maryland (except Garrett, Allegany, and Washington Counties). The purpose of this filing is to eliminate the gateway of Washington, D.C. (3)(b) between points in Ohio on and south of a line beginning at the Ohio-West Virginia State line and extending along Ohio Highway 160 to junction Ohio Highway 324, thence along Ohio Highway 324 to junction U.S. Highway 50, thence along U.S. Highway 50 to junction Ohio Highway 28, thence along Ohio Highway 28 to junction Ohio Highway 73, thence along Ohio Highway 73 to the Ohio-Indiana State line, on the one hand, and, on the other, points in Maryland (except Allegany and Garrett Counties). The purpose of this filing is to eliminate the gateway of Washington, D.C. (4) between points in Ohio within 10 miles north of the Ohio River, on the one hand, and, on the other, points in Michigan. The purpose of this filing is to eliminate the gateway of points in Kentucky within 125 miles of Nashville. (5) between points in Ohio within 10 miles north of the Ohio River, on the one hand, and, on the other, points in Minnesota. The purpose of this filing is to eliminate the gateway of points in Kentucky within 125 miles of Nashville.

(6) between points in Ohio within 10 miles north of the Ohio River, on the one hand, and, on the other, points in Missouri. The purpose of this filing is to eliminate the gateway of points in Kentucky within 125 miles of Nashville. (7) between points in Ohio within 10 miles north of the Ohio River, on the one hand, and, on the other, points in South Carolina. The purpose of this filing is to eliminate the gateway of points in Kentucky within 125 miles of Nashville (8)(a) between points in Ohio on and north of a line beginning at the Ohio-Indiana State line and extending along U.S. Highway 6 to junction Interstate Highway 75, thence along Interstate Highway 75 to junction U.S. Highway 68, then along U.S. Highway 68 to junction U.S. Highway 30N, thence along U.S. Highway 30N to junction U.S. Highway 30, thence along U.S. Highway 30 to the Ohio-Pennsylvania State line, on the one hand, and, on the other, points in South Carolina on, east, and north of a line beginning at the North Carolina-South Carolina State line and extending along Interstate Highway 95 to junction U.S. Highway 521, thence along U.S. Highway 521 to the Atlantic Ocean. The purpose of this filing s to eliminate the gateway of Washington, D.C.

(8)(b) between points in Ohio on and north of a line beginning at the Pennsylvania-Ohio State line and extending along U.S. Highway 250 to Lake Erie, on the one hand, and, on the other, points in South Carolina on and east of Interstate Highway 95. The purpose of this filing is to eliminate the gateway of Washington, D.C. (9) between points in Ohio within 10 miles north of the Ohio River, on the one hand, and, on the other

er, points in Wisconsin. The purpose of this filing is to eliminate the gateway of points in Kentucky within 125 miles of Nashville. (10) between points in Ohio within 10 miles north of the Ohio River, on the one hand, and, on the other, points in Illinois. The purpose of this filing is to eliminate the gateway of points in Kentucky within 125 miles of Nashville.

No. MC 116325 (Sub-No. E4) (Partial correction), filed June 4, 1974, published in the FEDERAL REGISTER issue of August 14, 1975, and republished, as corrected this issue. Applicant: BOND ENTERPRISES, P.O. Box 8, Lutesville, Mo. 63762. Applicant's representative: Jennings Bond (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Wooden poles, posts, piling, blocking, skids, squares, crating, wooden pallets, pallet bins, boxes, and pallet materials*, from points in Missouri on and east of U.S. Highway 67, to points in Kansas; and . . . The purpose of this filing is to eliminate the gateway of Bollinger and Wayne Counties, Mo.

NOTE.—The purpose of this partial correction is to state the correct territorial description. The remainder of this letter-notice remains as previously published.

No. MC 118831 (Sub-No. E42), filed April 2, 1976. Applicant: CENTRAL TRANSPORT, INC., P.O. Box 2608, High Point, N.C. Applicant's representative: E. Stephen Heisley, 666 Eleventh St., N.W., Washington, D.C. 20001. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Liquid chemicals*, in bulk, (except petrochemicals, anhydrous ammonia, fertilizer, and fertilizer materials), from points in North Carolina, on and north of a line beginning at the North Carolina-South Carolina State line, and extending along U.S. Highway 321, to junction North Carolina Highway 275, thence along North Carolina Highway 275 to junction North Carolina Highway 16, thence along North Carolina Highway 16 to junction North Carolina Highway 150, thence along North Carolina Highway 150 to junction U.S. Highways 29 and 70, thence along U.S. Highways 29 and 70 to junction Interstate Highway 85, thence along Interstate Highway 85 to junction U.S. Highway 15, thence along U.S. Highway 15 to junction U.S. Highway 158, thence along U.S. Highway 158 to junction Interstate Highway 85, thence along Interstate Highway 85 to junction U.S. Highway 1, thence along U.S. Highway 1 to junction U.S. Highway 401, thence along U.S. Highway 401 to junction North Carolina Highway 58, thence along North Carolina Highway 58 to junction U.S. Highway 64, thence along U.S. Highway 64 to junction North Carolina Highway 97, thence along North Carolina Highway 97 to junction North Carolina Highway 125, thence along North Carolina Highway 125, to junction U.S. Highway 17, thence along U.S. Highway 17 to junction U.S. Highway 264, thence along U.S. Highway 264 to the Atlantic Ocean, thence along the Atlantic Ocean Coast to the North Carolina-South Carolina State line and westward with the North Carolina-South Carolina State line to point of beginning, including all points on said boundary (except not applicable on caustic soda from Acme, N.C. and points within 5 miles thereof), to points in Missouri, (except points in the St. Louis, Mo., Commercial zone), points in Illinois (except points in the East St. Louis, Ill., Commercial zone), to points in Wisconsin, and to those points in Tennessee, on and west of a line beginning at the North Carolina-Tennessee State line, and extending along Tennessee Highway 123 to junction Tennessee Highway 68.

Thence along Tennessee Highway 68 to junction U.S. Highway 411, thence along U.S. Highway 411 to junction Tennessee Highway 33, thence along Tennessee Highway 33 to junction Interstate Highway 75, thence along Interstate Highway 75 to junction Tennessee Highway 61, thence along Tennessee Highway 61 to junction U.S. Highway 441, thence along U.S. Highway 441 to junction U.S. Highway 25W, thence along U.S. Highway 25W to junction Interstate Highway 75, thence along Interstate Highway 75 to junction Tennessee Highway 63, thence along Tennessee Highway 63 to junction U.S. Highway 27, thence along U.S. Highway 27 to the Tennessee-Kentucky State line, those points in Kentucky on and west of a line beginning at the Kentucky-Tennessee State line and extending along U.S. Highway 27 to junction Kentucky Highway 80, thence along Kentucky Highway 80 to junction Kentucky Highway 461, thence along Kentucky Highway 461 to junction U.S. Highway 25, thence along U.S. Highway 25 to junction Kentucky Highway 388, thence along Kentucky Highway 388 to junction Kentucky Highway 227, thence along Kentucky Highway 227 to junction U.S. Highway 27, thence along U.S. Highway 27 to the Kentucky-Ohio State line, to those points in Ohio, on and west of a line beginning at the Ohio-Kentucky State line, and extending along Ohio Highway 4, thence along Ohio Highway 4 to junction Ohio Highway 177, thence along Ohio Highway 177 to Ohio-Indiana State line, to those points in Indiana on and west of a line beginning at the Indiana-Ohio State line, and extending along Indiana Highway 227 to junction U.S. Highway 35, thence along U.S. Highway 35 to junction Indiana Highway 3, thence along Indiana Highway 3 to junction Indiana Highway 28, thence along Indiana Highway 28 to junction Indiana Highway 15, thence along Indiana Highway 15 to junction Indiana Highway 9, thence along Indiana Highway 9 to junction Indiana Highway 105, thence along Indiana Highway 105 to junction Indiana Highway 205, thence along Indiana Highway 205 to junction Indiana Highway 327, thence along Indiana Highway 327 to the Indiana-Michigan State line; to those points in Michigan, on and west of a line beginning at the Michigan-Indiana State line, and extending along unnumbered Michigan highway to Bronson, Mich., thence along U.S. Highway 12 to junction Interstate Highway 69, thence along Interstate Highway 69 to junction Michigan Highway 60, thence along Michigan Highway 60 to junction Interstate Highway 94, thence along Interstate Highway 94 to the International Boundary line between United States and Canada. The purpose of this filing is to eliminate the gateway of Charlotte, N.C.

No. MC 118831 (Sub-No. E43), filed April 2, 1976. Applicant: CENTRAL TRANSPORT, INC., P.O. Box 5388, High Point, N.C. Applicant's representative: E. Stephen Heisley, 666 Eleventh Street, N.W., Washington, D.C. 20001. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Liquid chemicals*, in bulk (except petrochemicals, anhydrous ammonia, fertilizer, and fertilizer materials), from points in North Carolina on and north of a line beginning at the North Carolina-South Carolina State line, and extending along Interstate Highway 85 to junction North Carolina Highway 49, thence along North Carolina Highway 49 to junction North Carolina Highway 73, thence along North Carolina Highway 73 to junction North Carolina Highway 24, thence along North Carolina Highway 24 to junction North Carolina Highway 50, thence southeastward along North Carolina Highway 50 to the Atlantic Ocean; thence southward and westward along the Atlantic Coast to the North Carolina-South Carolina State line; thence westward along the North Carolina-South Carolina State line to point of beginning (except not applicable on Caustic Soda from Acme, N.C. and points within five miles) to points in Illinois (except points in the East St. Louis, Ill., Commercial Zone), Indiana, Michigan, Missouri (except points in the St. Louis, Mo. Commercial zone), Tennessee, Wisconsin, and those points on and north and west of a line beginning at the Kentucky-Virginia State line, and extending along Kentucky Highway 80, thence north along Kentucky Highway 80 to junction U.S. Highway 460, thence along U.S. Highway 460 to junction U.S. Highway 23, thence along U.S. Highway 23 to junction Kentucky Highway 201, thence along Kentucky Highway 201 to junction Kentucky Highway 1, thence along Kentucky Highway 1 to junction U.S. Highway 23, thence along U.S. Highway 23 to the Kentucky-Ohio State line; to points in Ohio beginning at the Ohio-Kentucky State line, and extending along Ohio Highway 139 to junction Ohio Highway 124, thence along Ohio Highway 124 to junction Ohio Highway 346, thence along Ohio Highway 346 to junction U.S. Highway 50 to the Ohio-West Virginia State line. The purpose of this filing is to eliminate the gateway of Charlotte, N.C.

V 42 63 APR 1 77 7 UMI

No. MC 118831 (Sub-No. E44), filed April 2, 1976. Applicant: CENTRAL TRANSPORT, INC., P.O. Box 5388, High Point, N.C. Applicant's representative: E. Stephen Heisley, 666 Eleventh St. NW., Suite 805 McLachlen Bank Bldg., Washington, D.C. 20001. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Liquid chemicals* (except petrochemicals, anhydrous ammonia, fertilizer, and fertilizer materials), in bulk, in tank vehicles, (1) from Asheboro, N.C. to points in Missouri (except St. Louis Commercial zone), Illinois (except E. St. Louis Commercial zone), Wisconsin, Michigan, Indiana; (2) from Asheboro, N.C., to those points in Tennessee on and west of a line beginning at the North Carolina-Tennessee State line, and extending along Tennessee Highway 107 to junction U.S. Highway 23, thence along U.S. Highway 23 to junction Tennessee Highway 81, thence along Tennessee Highway 81 to junction Tennessee Highway 93, thence along Tennessee Highway 93 to junction U.S. Highway 23, thence along U.S. Highway 23 to the Tennessee-Virginia State line; (3) from Asheboro, N.C., to those points in Kentucky on and west of a line beginning at the Kentucky-Virginia State line and extending along Kentucky Highway 160, thence along Kentucky Highway 160 to junction Kentucky Highway 80, thence along Kentucky Highway 80 to junction U.S. Highway 460, thence along U.S. Highway 460 to junction Kentucky Highway 201, thence along Kentucky Highway 201 to junction Kentucky Highway 1, thence along Kentucky Highway 1 to junction U.S. Highway 60, thence along U.S. Highway 60 to junction Kentucky Highway 59, thence along Kentucky Highway 59 to junction Kentucky Highway 10, thence along Kentucky Highway 10 to the Kentucky-Ohio State line; (4) from Asheboro, N.C., to those points in Ohio on and west of a line beginning at the Kentucky-Ohio State line, and extending along U.S. Highway 62 to junction Ohio Highway 32, thence along Ohio Highway 32 to junction Ohio Highway 134, thence along Ohio Highway 134 to junction U.S. Highway 68, thence along U.S. Highway 68 to junction Ohio Highway 4, thence along Ohio Highway 4 to junction U.S. Highway 36, thence along U.S. Highway 36 to junction U.S. Highway 62, thence along U.S. Highway 62 to junction Ohio Highway 39, thence along Ohio Highway 39 to junction U.S. Highway 250, thence along U.S. Highway 250 to junction U.S. Highway 22, thence along U.S. Highway 22 to the Ohio-Pennsylvania State line. The purpose of this filing is to eliminate the gateways of points in South Carolina and Charlotte, N.C.

No. MC 118831 (Sub-No. E45), filed April 2, 1976. Applicant: CENTRAL TRANSPORT, INC., P.O. Box 5388, High Point, N.C. Applicant's representative: E. Stephen Heisley, Suite 805 McLachlen Bank Building, 666 Eleventh Street, N.W., Washington, D.C. 20001. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Liquid chemicals*, in bulk (except petrochemicals, anhydrous ammonia, fertilizer, and fertilizer materials), from points in North Carolina on and east of a line beginning at the North Carolina-Tennessee State line, and extending along U.S. Highway 25, thence along U.S. Highway 25 to the North Carolina-South Carolina State line, (a) to those points in Michigan on and north of a line beginning at Saginaw Bay and extending along unnumbered highway through Pinconning, Mich., to U.S. Highway 23, thence along U.S. Highway 23 to junction Michigan Highway 76, thence along Michigan Highway 76 to junction Michigan Highway 55, thence along Michigan Highway 55 to junction Michigan Highway 66, thence along Michigan Highway 66 to junction Michigan Highway 42, thence along Michigan Highway 42 to junction U.S. Highway 131, thence along U.S. Highway 131 to junction Michigan Highway 113, thence along Michigan Highway 113 to junction Michigan Highway 37, thence along Michigan Highway 37 to junction U.S. Highway 31, thence along U.S. Highway 31 to junction Michigan Highway 115, thence along Michigan Highway 115 to junction Michigan Highway 22, thence along Michigan Highway 22 to Empire, Mich., at Lake Michigan and, those points in Upper Peninsula of Michigan on and north of a line beginning at the Lake Michigan and extending along U.S. Highway 41 to unnumbered Michigan highway to junction Michigan Highway 95, thence along Michigan Highway 95 to junction Michigan Highway 69, thence along Michigan Highway 69 to junction Michigan Highway 73, thence along Michigan Highway 73 to Michigan-Wisconsin State line, (b) to those points in Wisconsin on and north and west of a line beginning at the Wisconsin-Michigan State line, and extending along Wisconsin Highway 55 to junction Wisconsin Highway 70, thence along Wisconsin Highway 70 to junction Wisconsin Highway 17, thence along Wisconsin Highway 17 to junction U.S. Highway 8, thence along U.S. Highway 8 to junction U.S. Highway 51, thence along U.S. Highway 51 to junction Wisconsin Highway 86, thence along Wisconsin Highway 86 to junction Wisconsin Highway 102, thence along Wisconsin Highway 102 to junction Wisconsin Highway 13, thence along Wisconsin Highway 13 to junction Wisconsin Highway 64, thence along Wisconsin Highway 64 to junction Wisconsin Highway 27, thence along Wisconsin Highway 27 to junction Wisconsin Highway 29, thence along Wisconsin Highway 29 to junction U.S. Highway 53, thence along U.S. Highway 53 to junction Wisconsin Highway 93, thence along Wisconsin Highway 93 to junction U.S. Highway 10, thence along U.S. Highway 10 to junction Wisconsin Highway 37, thence along Wisconsin Highway 37 to junction Wisconsin Highway 25, thence along Wisconsin Highway 25 to the Wisconsin-Iowa State line, (c) to those points in Missouri on and west of a line, beginning at the Missouri-Iowa State line, and extending along unnumbered paved road to junction Missouri Highway 46 and 246, thence along Missouri Highway 46 to junction Missouri Highway 113, thence along Missouri Highway 113 to junction Missouri Highway 118, thence along Missouri Highway 118 to junction U.S. Highway 159, thence along U.S. Highway 159 to the Missouri-Nebraska State line. The purpose of this filing is to eliminate the gateway of Charlotte, N.C.

No. MC 118331 (Sub-No. E46), filed April 2, 1976. Applicant: CENTRAL TRANSPORT, INC., P.O. Box 5388, High Point, N.C. Applicant's representative: E. Stephen Heisley, Suite 805 McLachlen Bank Bldg., 666 Eleventh Street, N.W., Washington, D.C. 20001. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Liquid chemicals* (except petrochemicals, anhydrous ammonia, fertilizer, and fertilizer materials), in bulk, in tank vehicles from points in North Carolina on and east of a line beginning at the North Carolina-South Carolina State line, and extending along U.S. Highway 321 to junction Interstate Highway 85, thence along Interstate Highway 85 to junction North Carolina Highway 49, thence along North Carolina Highway 49 to junction North Carolina Highway 73, thence along North Carolina Highway 73 to junction North Carolina Highway 211, thence along North Carolina Highway 211 to junction U.S. Highway 401, thence along U.S. Highway 401 to junction North Carolina Highway 24, thence along North Carolina Highway 24 to junction U.S. Highway 117, thence along U.S. Highway 117 to North Carolina Highway 132, thence along North Carolina Highway 132 to junction U.S. Highway 74, thence along U.S. Highway 74 to Wrightsville Beach, N.C. at Onslow Bay, to points in Illinois (except points in the East St. Louis, Ill., Commercial Zone), Indiana, Kentucky, Michigan, Missouri (except points in the St. Louis, Mo., Commercial Zone), Ohio, Tennessee, and Wisconsin (except not applicable on caustic soda from Acme, N.C. and points within five miles thereof). The purpose of this filing is to eliminate the gateway of Charlotte, N.C.

No. MC 129068 (Sub-No. E29), filed December 1, 1976. Applicant: GRIFFIN TRANSPORTATION, INC., 3002 South Douglas Blvd., Oklahoma City, Okla. 73150. Applicant's representative: I. E. Chenoweth, 420 South Main St., Tulsa, Okla. 74103. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Used mobile homes*, in secondary movements, in truckaway service, from points in Oklahoma bounded by a line beginning at Anadarko and extending west along Oklahoma Highway 9 to junction U.S. Highway 183, thence south along U.S. Highway 183 to Snyder to junction U.S. Highway 62, thence east along U.S. Highway 62 to junction Oklahoma Highway 54, thence north along Oklahoma Highway 54 to junction Oklahoma Highway 49, thence east along Oklahoma Highway 49 to junction Oklahoma Highway 58, thence north along Oklahoma Highway

58 to junction Oklahoma Highway 19, thence east along Oklahoma Highway 19 to junction Oklahoma Highway 8, thence north along Oklahoma Highway 8 to the point of beginning, to points in Kansas on and north of a line beginning at the Oklahoma-Kansas State line and extending along Kansas Highway 25 to junction U.S. Highway 40, thence along U.S. Highway 40 to junction Interstate Highway 70, thence along Interstate Highway 70 to junction Interstate Highway 35W, thence along Interstate Highway 35W to junction Kansas Highway 4, thence along Kansas Highway 4 to junction U.S. Highway 77, thence along U.S. Highway 77 to junction U.S. Highway 56, thence along U.S. Highway 56 to junction Kansas Highway 177, thence along Kansas Highway 177 to junction U.S. Highway 50, thence along U.S. Highway 50 to junction Kansas Highway 31, thence along Kansas Highway 31 to Garnett, thence east to Goodrich to junction unnumbered highway, thence north along unnumbered highway to Parker to junction Kansas Highway 135, thence along Kansas Highway 135 to junction U.S. Highway 69, thence along U.S. Highway 69 to junction Kansas Highway 52, thence along Kansas Highway 52 to the Kansas-Missouri State line. The purpose of this filing is to eliminate the gateway of Lawton, Okla.

By the Commission.

ROBERT L. OSWALD,
Secretary.

2

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

MEETING

MARCH 29, 1977.

Pursuant to the Government in the Sunshine Act, 5 U.S.C. 552b, notice is hereby given that the Equal Employment Opportunity Commission will meet on Tuesday, April 5, 1977, in the Chairman's Conference Room, Room No. 5240, on the fifth floor of the Columbia Plaza Office Building, 2401 E Street, N.W., Washington, D.C. 20506.

The first portion of the meeting, starting at 9:30 a.m. (Eastern Time) will be open to the public, and the Commission plans to consider the following matter during this open session:

Freedom of Information Act Appeal No. 76–12–FOIA–283. This appeal is for waiver of the fee charged by the Commission for its records search in connection with a Freedom of Information Act request by Syed I. Jafree.

Immediately after the open session and departure of the public observers, the Commission plans to consider the following matters in closed session:

(1) *Litigation Authorization; General Counsel Recommendations.* Six cases will be presented to the Commission by the General Counsel recommending authorization to bring suit.

(2) *Decision in Charge No. TIN3–0838.* A proposed decision is to be presented to the Commission for consideration.

(3) *Proposal to Establish a Subdistrict Office in Minneapolis/St. Paul, Minnesota.* The Commission will consider a proposal by the Director of its Milwaukee District Office, through the Director of the Chicago Regional Office, that a subdistrict office be established in the Minneapolis/St. Paul, Minnesota, area, for the purpose of processing charges of discrimination filed against respondents in the State of Minnesota.

If you have any questions concerning the agenda for the April 5, 1977 Commission meeting, please contact the Office of the Executive Secretariat at (202) 634–6748.

Issued March 29, 1977.

By order of the Commission.

ETHEL BENT WALSH,
Vice Chairman.

[S–67–77 Filed 3–30–77;8:59 am]

3

FEDERAL POWER COMMISSION

CHANGE OF MEETING SUBJECT MATTER

MARCH 28, 1977.

The following item is added to the Commission meeting of March 31, 1977, upon the affirmative vote of Chairman Dunham, and Commissioners Smith, Holloman, and Watt:

G–22. Docket No. CP77–106, Mississippi River Transmission Corporation, Docket No. CP77–131, Natural Gas Pipeline Company of America.

KENNETH F. PLUMB,
Secretary.

4

SECURITIES AND EXCHANGE COMMISSION

MEETINGS

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94–409, that the Securities and Exchange Commission will hold the following meetings during the month of April, 1977 in Room 825, 500 North Capitol Street, Washington, D.C. All meetings will begin at 10:00 a.m. unless otherwise stated:

Closed Meetings will be held on Tuesday, April 5; Wednesday, April 6; Tuesday, April 12; Wednesday, April 13; Tuesday, April 19; and Tuesday, April 26. A closed meeting will also be held on Wednesday, April 27 at the conclusion of the open meeting.

The Commissioners, their legal assistants, the Secretary of the Commission and recording secretaries will attend the meeting. Certain staff members who are responsible for the calendared matters may be present.

The General Counsel of the Commission has certified that the items to be considered at the closed meetings may be so considered pursuant to one or more of the exemptions set forth in 5 U.S.C. 552b (c) (4) (8) (9) A and (10).

The subject matter of the April 5th closed meeting will be:

1. Formal Orders of Investigation.
2. Institution of Injunctive Action.
3. Settlement of Administrative Proceedings.
4. Institution and Settlement of injunctive actions and/or Administrative Proceedings.
5. Transmittal of investigative information to other enforcement agencies.
6. Consideration of request for investigative documents.
7. Consideration of insider trading matter.
8. Advice concerning trading practices in dually traded options.
9. Application for exemption by company under investigation.
10. Consideration of exemption for specified distribution procedures.
11. Other litigation matters.

The subject matter of the April 6th closed meeting will be:

1. Institution of Injunctive Actions.
2. Opinions.
3. Freedom of Information Act Appeal.
4. Consideration of certain proposed payments to foreign investment advisers.

The subject matter of the April 12th closed meeting will be:

1. Formal Orders of Investigation.
2. Institution of Injunctive Actions.
3. Settlement of Injunctive Actions.
4. Institution of Administrative Proceedings.
5. Settlement of Administrative Proceedings.
6. Simultaneous institution and settlement of injunctive actions and/or Administrative Proceedings.
7. Transmittal of investigative information to other enforcement agencies.
8. Freedom of Information Act Appeals.
9. Other litigation matters.

The subject matter of the April 13th closed meeting will be:

1. Institution of Injunctive Actions.
2. Institution of Administrative Proceedings.
3. Institution and settlement of injunctive actions and/or Administrative Proceedings.
4. Freedom of Information Act Appeal.
5. Other Litigation matters.

The subject matter of the April 19th closed meeting will be:

1. Institution of Injunctive Actions.
2. Institution of Administrative Proceedings.
3. Settlement of Administrative Proceedings.
4. Contempt proceedings.
5. Report of Investigation.
6. Advice concerning Lost and Stolen Securities Program.
7. Exchange request regarding proposed trading practices.
8. Freedom of Information Act Appeals.
9. Other litigation matters.

The subject matter of the April 26th closed meeting will be:

1. Formal Orders of Investigation.
2. Institution of Injunctive Actions.
3. Settlement of Injunctive Actions.
4. Institution of Administrative Proceedings.
5. Settlement of Administrative Proceedings.
6. Opinions regarding options trading proposal.
7. Other litigation matters.

The subject matter of the April 27th closed meeting will be Opinions.

Meetings open to the public will be held on Tuesday, April 5 at 2:30 p.m.; Thursday, April 7; Thursday, April 14; Wednesday, April 20; Thursday, April 21; Wednesday, April 27 and Thursday, April 28.

The subject matters of the open meetings will be:

OPEN MEETING—TUESDAY, APRIL 5, 1977—2:30 P.M.

Oral Argument in appeal by Marshall Waddel from a decision of the National Association of Securities Dealers, Inc.

OPEN MEETING—THURSDAY, APRIL 7, 1977—10 A.M.

1. Request that the Commission review the Division of Corporation Finance's determination concerning two shareholder proposals Mr. Carl Olsen submitted to Reserve Oil and Gas Company for inclusion in the Company's proxy materials for the 1977 annual meeting of shareholders. The Division has recommended that the Commission not review the matter.

2. Recommendation that the Commission issue a release to: (1) Clarify an ambiguity by indicating that Form S–7 (and Form S–16) is not available for use by certain foreign private issuers; and (2) announce the adoption of a minor amendment relating to the use of summary prospectuses permitted by Form S–7.

3. Recommendation that the Commission affirm the action of Commissioner Evans, as duty officer, authorizing Commission counsel to advise the court that, with respect to the fee applications submitted in the *SEC* v. *First Securities Co. of Chicago:*

(1) The Commission has no objection to the award of fees requested by the receiver; and,

(2) Despite the fact that certain of the items listed on the fee schedule of the receiver's counsel may not be compensable, the Commission—in view of the low amount per hour being sought by counsel and in light of the fact that counsel is not seeking compensation for all of the hours listed on their schedule—has no objection to the award requested by counsel but suggests that any coverage which the court finds should instead be paid to the receiver.

4. Recommendation that the Commission send a letter and accompanying memorandum to the U.S. House of Representatives Committee on Government those provisions of the Department of Energy Reorganization Bill which would affect the Public Utility Holding Company Act of 1935. (H.R. 4263)

5. Recommendation that the Commission not object if the Office of General Counsel sends a letter to the General Accounting Office (1) stating that the Commission intends in the near future to reexamine the fees it charges under the Independent Offices Appropriations Act; (2) discussing the decision in *National Cable Television, Inc.* v. *Federal Communications Commission* (C.A.D.C. December 16, 1976); and (3) expressing the informal view of this Office that the decision in the case does not appear substantially to affect our prior analyses of the Commission fees.

6. Recommendation that the Commission send a proposed letter to the Chairman of the Administrative Conference of the United States describing the Commission's current procedure in soliciting public comments on interpretive rules and policy statements and expressing its intent to follow the Recommendations of the Conference where appropriate.

7. Recommendation that the Commission affirm the action of Commissioner Loomis, as Duty Officer on March 1, 1977, authorizing counsel for Howard Steven Strouth to use an original blueprint geological map from the Commission's investigatory files in an administrative proceeding before the Federal Communications Commission, but directing this Office to urge the Administrative Law Judge to accept a xerox copy of the map for the purposes of the proceeding's record.

8. Recommendation that the Commission send a letter to Honorable John M. Murphy, Chairman, Committee on Merchant Marine and Fisheries, House of Representatives, not objecting to the enactment of H.R. 1643 and pointing out that securities to be issued under the Bill by the Secretary of the Interior would be exempted from the registration requirements of the Securities Act of 1933 and the Securities Exchange Act of 1934, but that persons dealing in such securities would be subject to the anti-fraud provisions of those Acts.

9. Recommendation that the Commission send a letter expressing the Commission's support of H.R. 1767 to the House Committee on Interstate and Foreign Commerce.

10. Recommendation that the Commission affirm the extension, approved by Commissioner Loomis as Duty Officer, of the comment period for proposed Rule 17f–4 under the Investment Company Act of 1940 from March 15, 1977 to April 11, 1977, and approve the Federal Register release announcing the extension.

OPEN MEETING—THURSDAY, APRIL 14, 1977—10 a.m.

1. Proposed Amendment to Rule 146 under the Securities Act of 1933 to require reports of sales pursuant to the Rule.

2. Recommendation that the Commission send letters to the House and Senate Committees on Government Operations expressing the Commission's views on H.R. 1947 and S. 2, bills which would require, among other things, a review of Government programs and an authorization of new budget authority at least every five years.

3. Recommendation that the Commission send a letter to the House Committee on Government Operations, expressing the Commission's opposition to H.R. 930 and H.R. 963, "sunset" bills which propose the possible abolition of certain governmental agencies.

4. Recommendation that the Commission send a letter to the House Committee on Government Operations expressing the Commission's views on H.R. 2107, a bill which would require, among other things, a new budget authority for Government programs at least every five years.

5. Recommendation that the Commission send a letter to the House Committee on Government Operations, expressing the Commission's opposition to H.R. 3181, a "sunset" bill that proposes the possible abolition of certain governmental agencies.

6. Recommendation that the application for exemption from Section 15B of the Securities Exchange Act of 1934 concerning regulation of municipal securities dealers, be granted; request for exemption by the State of North Dakota doing business as the Bank of North Dakota.

7. Recommendation that proposed amendments to annual report Form U5S be adopted. If adopted, registered holding companies under the Public Utility Holding Company Act of 1935 and their subsidiaries which are public issuers would be required to file annual reports in conformity with Form 10–K under the Securities Exchange Act of 1934 as well as annual reports on Form U5S.

8. Recommendation for statutory changes in the beneficial ownership requirements which are designed generally to implement recommendations of the Street Name Study including:

(a) A requirement that any person owning beneficially more than five percent of any class of section 13(d) security who is not currently required to report under section 13(d) of the Securi-

V 42 63 APR 1 77 UMI

ties Exchange Act of 1934 (the "Act") file with the Commission a short statement detailing relevant ownership information and to transmit such ownership statement to the issuer and to any exchange on which the security in questions is listed; and

(b) That section 15(d) of the Act be amended to clarify the Commission's power to define "held of record" for purposes of that section.

9. Recommendation that the Commission consider the application by the Bank of America National Trust and Savings Association for concurrence in the opinion of the Division of Corporation Finance that the proposed offering of mortgage backed pass-through certificates are not exempt from the Securities Act under section 3(a)(2), and authorize the Division to so advise the Bank in a letter.

OPEN MEETING—WEDNESDAY, APRIL 20, 1977—10 A.M.

1. Many corporations frequently are billed for the distribution of communications by persons who are not shareholders of record and do not otherwise represent beneficial owners of the corporations' securities. The Division of Enforcement recommends that the Commission publish a Release advising issuers of this problem, requesting them to follow certain preventive measures, and warning firms who engage in questionable billing practices that they may be subject to enforcement actions.

2. Recommendation that the Commission authorize release stating its policies with respect to the release of Wells submissions under the Freedom of Information Act.

3. Recommendation that temporary Rule 206A-(T) under the Investment Advisers Act of 1940 ("Advisers Act") exempting until April 30, 1977 certain brokers and dealers from the Advisers Act and the rules thereunder be further extended.

4. Recommendation that the Commission propose certain revisions to Rule 19b-4 under the Exchange Act in order to simplify its operation.

5. Proposed rule change of the NYSE to redefine the term "percentage order" and prescribe procedures for the execution of such orders.

6. Chicago Board Options Exchange has proposed to adopt a rule prohibiting trading of options or their underlying stocks by persons having non-public information as to a block transaction in such options or underlying stock. The prohibition with respect to each block transaction would commence when the terms of the block transaction had been agreed to by all parties to the transaction and would end when information as to the transaction was available via a high-speed communications line or an exchange transaction tape.

7. Recommendation that the Commission publish a release announcing the adoption of an amendment to Rule 17a-3(a)(9) under the Securities Exchange Act relating to records with respect to beneficial owners of accounts to be maintained by brokers and dealers which would have an impact upon the investment activities of foreign persons in the United States.

8. The Municipal Securities Rulemaking Board intends to publish a new Exposure Draft of proposed rule G-11, to govern sales of municipal securities during the underwriting period. The Exposure Draft will have a thirty-day comment period which should expire sometime during the week of April 18, 1977. The Division of Market Regulation recommends that the Commission consider whether it wishes to authorize the staff to send a comment letter on Exposure Draft.

9. Proposed rule G-12 of the Municipal Securities Rulemaking Board, to provide for uniform practices for interdealer transactions in the municipal securities industry.

10. That the Division of Market Regulation is recommending the adoption of proposed Rule 10b-10 with certain revisions. Rule 10b-10 would establish new confirmation delivery and disclosure requirements.

OPEN MEETING—THURSDAY, APRIL 21, 1977—10 A.M.

1. Recommendation that proposed letter be sent to Municipal Securities Rulemaking Board suggesting that they adopt a program to monitor the effect of MSRB rules on the municipal securities markets and participants in those markets.

2. Recommendation that the National Association of Securities Dealers be granted access to financial and operational information (FOCUS data) for joint NASD/exchange members designated to another self-regulatory organization.

3. Proposed amendment of Rules 15b10-6 and 17a-4 under the Securities Exchange Act of 1934 to establish an orderly procedure for the disposition of broker-dealer books and records upon the liquidation of the broker-dealer. The proposed amendments would provide the appropriate judicial authority with the power to relieve a court-appointed trustee or receiver from the preservation requirements of Rules 15b10-6 and 17a-4: *Provided*, That an opportunity to secure any necessary books and records has been afforded to the Commission, Securities Investor Protection Corp. and the designated self-regulatory organization.

4. Recommended issuance by the Commission of a release, announcing the adoption of certain amendments to Rule 15c3-1, the uniform net capital rule, and Rule 15c3-3, the customer protection rule. The amendments are essentially those proposed in Securities Exchange Release No. 11969 (January 2, 1976), modified in light of suggestions received in response to the Commission's solicitation of public comment upon the proposals. The amendments are intended to require brokers and dealers to reflect in their capital computations, the exposure resulting from certain short security positions, to enable net capital computations to take into account more completely the risks associated with transactions in options and to effect certain technical adjustments to these rules.

5. Recommended issuance by the Commission of a release adopting amendments to the FOCUS Report and accompanying rules, and a release proposing amendments to certain statements and schedules on Form X-17A-5.

Exchange Act section 12(h) Applications.

6. Itel Computer Dimensions, Inc. File No. 81-253.

7. Gracious Estates Properties, Ltd. File No. 81-237.

8. American Brands Overseas, N.V. File No. 81-254.

9. American Tobacco International Corporation File No. 81-255.

10. Sherwood Medical Industries, Inc. File No. 81-251.

11. Recommendation that the Commission issue a release indicating that it will defer direct action regarding implementation of a nationwide system for complaint processing and resolution of investor disputes pending the outcome of a conference comprised of representatives of self-regulatory organizations, broker and dealers, and members of the public.

12. The staff will recommend legislation to (1) amend section 15(b)(6) of the Securities Exchange Act of 1934 to empower the Commission to name foreign financial institutions as subjects of its administrative proceedings and (2) to clarify the ancillary subpoena enforcement power which the Commission requires to compel cooperation in its investigations involving Swiss banks and other foreign entities not ordinarily subject to the jurisdiction of any U.S. courts.

The latter change will be accomplished by amending section 21(c) of the Securities Exchange Act of 1934 to expressly authorize the appropriate district courts to issue orders in cases where persons refuse to disclose information that is necessary for the Commission to complete its investigation expeditiously.

13. Proposal to replace the existing Article 9 of Regulation S-X with a new article to contain requirements as to form and content of consolidated and unconsolidated financial statements of bank holding companies and banks. The proposal includes requirements for balance sheets and income statements and also for disclosures concerning foreign operations.

OPEN MEETING—WEDNESDAY, APRIL 27, 1977—10 A.M.

1. Recommendation that the Commission authorize publication of a release announcing the scheduling of public hearings and soliciting public comments in connection with a broad reexamination of the proxy rules, to determine whether amendments are necessary or appropriate in the public interest or for the protection of investors to improve shareholder communications, participation in the corporate electoral process and shareholder democracy.

2. Recommendation that the Commission authorize publication for comment of proposed revisions to certain disclosure forms and guides. Forms S-1 and S-7 under the Securities Act of 1933 and Forms 10 and 10-K under the Securities Exchange Act of 1934 would be revised to require inclusion within the business discussion called for by each form of five year financial information by industry segment and by geographic area prepared pursuant to the statement on financial reporting for segments of a business enterprise which was released by the Financial Accounting Standards Board in December, 1976. Guides 1 and 22 of Release 33-4936 would be revised to require the management's discussion and analysis to be presented by and focused on this segmented information. The action will also deal with the recommendation of the Advisory Committee on Corporate Disclosure that Form 10-Q under the Exchange Act be revised to require the presentation of segment financial information on a quarterly basis.

3. Recommendation that the Commission authorize submission of a memorandum to the Subcommittee on Civil Rights and Constitutional Rights, House Committee on the Judiciary respecting H.R. 6 a recodification of the Bankruptcy Act.

OPEN MEETING—THURSDAY, APRIL 28, 1977—10 A.M.

1. Recommendation that comments be conveyed to the House Committee on Government Operations on H.R. 3222, a bill to amend the Defense Production Act of 1950, *inter alia*, to prohibit any government contracting officer during his employment from accepting any compensation from any government contractor; to bar, for two years following government employment, receipt of compensation from any contractor who received any funds under any procurement contract handled by the officer; prohibiting, during employment, stock ownership or other financial holding in any contractor affected by action taken by the contracting officer; and barring the granting of any prohibited compensation to the contracting officer.

2. Recommendation that comments be conveyed to the House Committee on Interstate and Foreign Commerce on H.R. 3518, a bill to establish bipartisan board with fifteen members, to submit to the President lists of nominees to regulatory agencies, including the Securities and Exchange Commission. It would prohibit persons from being appointed who, in the preceding three years have had any substantial connection with the industry regulated. The bill would also prohibit reappointments and would bar a former agency member from representing any person before the agency or accepting any employment in the regulated industry for two years.

3. Recommendation that the Commission affirm in part the FOIA Officer's denial of Mr. Norman F. Dacey's request for access to certain interagency memoranda (5 U.S.C. 552(b)(5)), but grant Mr. Dacey access to severable portions of the memoranda which contain factual information.

4. Proposed amendment to Regulation S-X which would modify an existing rule and add a new rule to require commercial and industrial companies to disclose investment concentrations in marketable securities and other security investments. This proposal is a revision of an earlier proposal which would have applied to all registrants rather than to commercial and industrial companies only.

5. Proposed amendments to Rule 10b-4 under the Securities Exchange Act of 1934 to prohibit certain practices in connection with partial tender and exchange offers which have the effect of discriminating against shareholders by distorting the calculation of the pro rata acceptance formula.

6. Proposed rule change of the American Stock Exchange, Inc. to establish alternate criteria for original listing of stocks.

7. Amendment of § 240.12a-6 (17 CFR 240.12a-6) in order to extend the exemption from registration, pursuant to section 12(a) of the Securities Exchange Act of 1934, to certain underlying securities which are traded solely in the over-the-counter market.

8. Amendments to the Uniform Net Capital Rule (Rule 15c3-1) pertaining to the treatment of transactions by market makers in listed options.

9. Amendments to Uniform Net Capital Rule (Rule 15c3-1) regarding the financial responsibility and reporting program pertaining to transactions in municipal securities.

10. Amendments to Form U-4, the Uniform Application for Securities Industry Representatives and/or Agents. These amendments to the form would require associated persons to disclose the existence of matters which may constitute a basis for disqualification from association with a broker-dealer. The proposed amendments also would require associated persons to provide information which a broker or dealer is required to collect and maintain pursuant to Rule 17a-3(a)(12).

11. Petition for rulemaking submitted to the Commission pursuant to 17 CFR 201.4(a) (1976) requesting an amendment to Rule 15c3-2 under the Securities Exchange Act of 1934.

12. Recommendation of the addition of subsection (f)(4) to Rule 15c2-11 which will extend certain exemptive provisions of that rule to market makers submitting quotations to an inter-dealer quotation system published weekly.

Requests for information concerning the meetings should be directed to the following persons:

Meetings in week of April 4—Sam Knight, (202) 755-1482.

Meetings in week of April 11—Julian T. Pierce, (202) 755-1271.

Meetings in week of April 18—Frank A. Wilson, (202) 755-4868.

Meetings in week of April 25—Edward B. Horahan, (202) 376-8072.

Dated: March 29, 1977.

GEORGE A. FITZSIMMONS,
Secretary.

V 42 63 APR 1 77 UMI

PRINCIPAL EXECUTIVE BRANCH OFFICIALS of the ADMINISTRATION OF JIMMY CARTER appointed January 20–March 30, 1977

PRESIDENT
Jimmy Carter
VICE PRESIDENT
Walter F. Mondale

MEMBERS OF THE CABINET

Secretary of Agriculture	Bob S. Bergland
Secretary of Commerce	Juanita M. Kreps
Secretary of Defense	Harold Brown
Secretary of Health, Education, and Welfare	Joseph A. Califano, Jr.
Secretary of Housing and Urban Development	Patricia Roberts Harris
Secretary of the Interior	Cecil D. Andrus
Attorney General	Griffin B. Bell
Secretary of Labor	Ray Marshall
Secretary of State	Cyrus Vance
Secretary of Transportation	Brockman Adams
Secretary of the Treasury	W. Michael Blumenthal
Assistant to the President for National Security Affairs	Zbigniew Brzezinski
Director, Office of Management and Budget	Thomas Bertram Lance
Assistant to the President	James R. Schlesinger
Chairman, Council of Economic Advisers	Charles L. Schultze
United States Representative to the United Nations and Representative in the Security Council	Andrew J. Young

The Cabinet, a creation of custom and tradition dating back to George Washington's administration, functions at the pleasure of the President. Its purpose is to advise the President upon any subject on which he requests information (pursuant to Article II, section 2, of the Constitution).

The Cabinet is composed of the eleven executive departments listed above and certain other officials of the executive branch to whom the President has accorded Cabinet rank. The Vice President participates in all Cabinet meetings. Also, from time to time, others are invited to participate in a discussion of particular subjects.

OVER-THE-COUNTER DRUGS

Establishment of Monograph for Topical Antibiotic Products

V42 63 APR 1 77 UMI

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[21 CFR Part 342]

[Docket No. 76N-0482]

OVER-THE-COUNTER DRUGS

Establishment of a Monograph for OTC Topical Antibiotic Products

AGENCY: Food and Drug Administration (FDA).

ACTION: Proposed Rulemaking.

SUMMARY: FDA proposes to establish conditions under which over-the-counter (OTC) topical antibiotic drugs are generally recognized as safe and effective and not misbranded, based on the recommendations of the FDA's Advisory Review Panel on OTC Antimicrobial (II) Drug Products.

DATES: Comments by June 30, 1977.

FOR FURTHER INFORMATION CONTACT:

William D. Gilbertson, Bureau of Drugs (HFD-510), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857, 301-443-4960.

SUPPLEMENTARY INFORMATION: Pursuant to Part 330 (21 CFR Part 330), the Commissioner of Food and Drugs received on October 29, 1976, a report of the Antimicrobial Panel on topical antibiotic drugs. In accordance with § 330.10 (a)(6) (21 CFR 330.10(a)(6)), the Comcissioner is issuing (1) a proposed regulation containing the monograph recommended by the Panel establishing conditions under which OTC topical antibiotic drugs are generally recognized as safe and effective and not misbranded; (2) a statement of the conditions excluded from the monograph on the basis of a determination by the Panel that they would result in the drugs not being generally recognized as safe and effective or would result in misbranding; (3) a statement of the conditions excluded from the monograph on the basis of a determination by the Panel that the available data are insufficient to classify such conditions under either (1) or (2) above; and (4) the conclusions of the Panel and recommendations to the Commissioner. The summary minutes of the Panel meetings are on public display in the office of the Hearing Clerk, Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

The purpose of issuing the unaltered conclusions and recommendations of the Panel is to stimulate discussion, evaluation, and comment on the full sweep of the Panel's deliberations. The Commissioner has not yet fully evaluated the Panel's report, but has concluded that it should first be issued as a formal proposal to obtain full public comment before any decision is made on the Panel's recommendations. The report represents the best scientific judgment of the members of the Panel. The report has been prepared independently of FDA and does not necessarily reflect the agency position on any particular matter addressed therein. After careful review of all comments submitted in response to this proposal, the Commissioner will issue a tentative final regulation in the FEDERAL REGISTER to establish a monograph for OTC topical antibiotic drug products.

In accordance with § 330.10(a)(2) (21 CFR 330.10(a)(2)), all data and information concerning OTC topical antibiotic drug products submitted for consideration by the Panel have been handled as confidential by the Panel and FDA. All such data and information shall be put on public display at the office of the Hearing Clerk, Food and Drug Administration, on or before May 2, 1977, except to the extent that the person submitting specific data demonstrates that they still fall within the confidentiality provisions of 18 U.S.C. 1905 or section 301(j) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 331(j)). Requests for confidentiality shall be submitted to FDA, Bureau of Drugs, Division of OTC Drug Products Evaluation (HFD-510), 5600 Fishers Lane, Rockville, MD 20857.

Based upon the conclusions and recommendations of the Panel, the Commissioner proposes, upon publication of the final regulation:

1. That the conditions included in the monograph on the basis of the Panel's determination that they are generally recognized as safe and effective and are not misbranded (Category I) be effective 30 days after the date of publication of the final monograph in the FEDERAL REGISTER.

2. That the conditions excluded from the monograph on the basis of the Panel's determination that they would result in the drug not being generally recognized as safe and effective or would result in misbranding (Category II) be eliminated from OTC drug products effective 6 months after the date of publication of the final monograph in the FEDERAL REGISTER, regardless of whether further testing is undertaken to justify their future use.

3. That the conditions excluded from the monograph on the basis of the Panel's determination that the available data are insufficient (Category III) to classify such conditions either as Category I—generally recognized as safe and effective and not misbranded, or as Category II—not being generally recognized as safe and effective or would result in misbranding, be permitted to remain in use for not longer than 2 years (for the specific conditions discussed in this document) after the date of publication of the final monograph in the FEDERAL REGISTER, provided studies adequate and appropriate to satisfy the questions raised with respect to the particular condition by the Panel are conducted. The period of time within which studies must be completed will be carefuly reviewed by the Commissioner after receipt of comments on this document and will probably be shortened.

The Commissioner has reviewed the conclusions and recommendations of the Panel regarding skin wound protectants. He notes that the Panel's definition and criteria are not identical to those previously proposed by the Antimicrobial I Panel as published in the FEDERAL REGISTER of September 13, 1974 (39 FR 33140). The Commissioner advises that he will respond, in a tentative final monograph (21 CFR Part 333) to be published in a later issue of the FEDERAL REGISTER, to the comments regarding the previous proposal made by the Antimcriobial I Panel, and clarify the definition, criteria, and testing procedures pertaining to skin wound protectants. He invites full public comment on this proposal, and on the tentative final monograph after it is published in the FEDERAL REGISTER.

The Commissioner has also reviewed the conclusions and recommendations of the Panel pertaining to finished dosage forms and the Panel's proposal in the monograph to limit dosage forms to the use of ointment preparations only. At this time, the Commissioner seeks comment on this proposal and on the agency's current limitation of cream preparations to prescription use only.

The Commissioner has reviewed the potential environmental impact of the recommendations and proposed monograph for OTC topical antibiotic products of the Panel on Review of Antimicrobial Agents and has concluded that the Panel's recommendations and proposed monograph will not significantly affect the quality of the human environment and that an environmental impact statement is not required.

The conclusions and recommendations in the report of the Antimicrobial Panel for topical antibiotic drugs follow:

In the FEDERAL REGISTER of January 5, 1972 (37 FR 85), the Commissioner announced a proposed review of the safety, effectiveness, and labeling of all OTC drugs by independent advisory review panels. On May 8, 1972, the Commissioner signed the final regulations providing for the OTC drug review under § 330.10, published in the FEDERAL REGISTER of May 11, 1972 (37 FR 9464), which were made effective immediately. Pursuant to these regulations, the Commissioner issued a request for data and information on antimicrobial active ingredients for the treatment or prophylaxis of specific disorders such as seborrhea, dandruff, acne, athletes foot, vaginitis, and otitis externa (swimmers ear), in the FEDERAL REGISTER of December 16, 1972 (37 FR 26842). A subsequent request for data and information was published in the FEDERAL REGISTER of September 7, 1973 (38 FR 24391) for topical antibiotic drugs used in OTC products for treatment and prevention of infections in minor skin wounds.

The Commissioner appointed the following panel to review the data and information submitted and to prepare a report on the safety, effectiveness, and labeling of the antimicrobial agents, including antibiotic ingredients, pursuant to § 330.10(a)(1):

Wallace Guess, Ph.D., Chairman
Frank B. Engley, Jr., Ph.D.
Paul D. Stolley, M.D., M.P.H.
William F. Schorr, M.D.
W. Kenneth Blaylock, M.D.
E. Dorinda Loeffel, M.D.
Margaret Hitchcock, Ph.D., who resigned from the Panel in September 1974 and was replaced by David R. Brown, Sc.D.; Dr. Brown resigned in March 1976 and was replaced by Eula Bingham, Ph.D.

The Panel was first convened on July 26 and 27, 1974, in an organizational meeting. Working meetings have been held :(1) In 1974 on September 13, 14, and 15; October 18, 19, 20; (2) in 1975 on January 10, 11, and 12; February 21, 22, and 23; March 21, 22, and 23; April 18, 19, and 20; May 16, 17, and 18; June 27, 28, and 29; July 24, 25, and 26; September 5, 6, and 7; October 3, 4, 5, and 31; November 1 and 2; (3) in 1976 on January 9, 10, and 11; February 13, 14, and 15; March 12, 13, and 14; May 14, 15, and 16; June 25, 26, and 27; July 23, 24, and 25; August 20, 21, and 22; October 29. Portions of the meetings from October 1975 were devoted to the review of ingredients for treating athletes foot.

Three nonvoting liaison representatives served on the Panel. Ms. Sarah Newman, nominated by an ad hoc group of consumer organizations, served as the consumer liaison. James Lawrence, M.D., Ph.D., nominated by the Proprietary Association, and Gavin Hildick-Smith, M.D., nominated by the Cosmetic, Toiletry and Fragrance Association, served as the industry liaisons .

The following employees of the Food and Drug Administration served: Mary K. Bruch, Executive Secretary; Michael Kennedy, Panel Administrator until July, 1974, followed by Armond Welch, R.Ph.; Melvin Lessing, R.Ph., M.S., Drug Information Analyst until October, 1974, followed by Joseph Hussion, R.Ph., until July, 1976, and Mary Ann Bukovinsky until August, 1976.

The following individuals were given an opportunity to appear before the Panel to express their views either at their own or at the Panel's request:

Violet Anderson, Ph.D.
Cleland F. Baker
Stanley Bushby, Ph.D.
Hugh Dillon, M.D.
Maxwell Findland, M.D.
James Leyden, M.D.
David Rovee, Ph.D.
Robert Scheuplein, Ph.D.
Alex Steigman, M.D.
Frances Storrs, M.D.
Marion Sulzberger, M.D.
David Taplin

No person was denied an opportunity to appear before the Panel.

The Panel thoroughly reviewed the various data submissions and available literature; listened to additional testimony from interested parties, including invited consultants; and considered all pertinent data and information submitted in arriving at its conclusions and recommendations

In accordance with the OTC drug review regulations (21 CFR 330.10), the Panel's findings with respect to these classes of drugs are set out in three categories:

Category I. Conditions under which topical antibiotic products are generally recognized as safe and effective and are not misbranded.

Category II. Conditions under which topical antibiotic products are not generally recognized as safe and effective or are misbranded.

Category III. Conditions for which the available data are insufficient to permit final classification at this time.

The Panel recommends the following for each category of drugs:

1. That the conditions included in the monograph on the basis of the Panel's determination that they are generally recognized as safe and effective and are not misbranded (Category I) be effective 30 days after the date of publication of the final monograph in the FEDERAL REGISTER.

2. That the conditions excluded from the monograph on the basis of the Panel's determination that they would result in the drug not being generally recognized as safe and effective or would result in misbranding (Category II) be eliminated from OTC drug products effective 6 months after the date of publication of the final monograph in the FEDERAL REGISTER, regardless of whether further testing is undertaken to justify their future use.

3. That the conditions excluded from the monograph on the basis of the Panel's determination that the available data are insufficient (Category III) to classify them either as Category I—generally recognized as safe and effective and not misbranded; or as Category II—not being generally recognized as safe and effective or would result in misbranding, be permitted to remain in use for 2 years after the date of publication of the final monograph in the FEDERAL REGISTER, if the manufacturer or distributor of any such drug utilizing such conditions in the interim conducts tests and studies adequate and appropriate to satisfy the questions raised by the Panel.

I. SUBMISSION OF DATA AND INFORMATION

Pursuant to the notice published in the FEDERAL REGISTER of September 7, 1973 (38 FR 24391) requesting the submission of data and information on OTC topical antibiotic drugs, the following firms made submissions relating to marketed products:

A. SUBMISSION BY FIRMS

Firm:	*Marketed products*
Burroughs-Wellcome Co., Research Triangle Pk., NC 27709.	Neosporin Ointment.
Day-Baldwin, Inc., Hillside, NJ 07256.	Bacitracin Ointment, Bacitracin-Neomycin Ointment, "3" Antibiotic Ointment, Neomycin Ointment.
The Dow Chemical Co., Zionsville, IN 46077.	Neo-Polycin.
Lederle Laboratories, Pear River, NY 10965.	Achromycin Ointment, Aureomycin Ointment.
Merrell-National Laboratories, Cincinnati, OH 45215.	Bacimycin Ointment.
Pfizer Pharmaceuticals, New York, NY 10017.	Bacitracin Antibiotic Ointment, Terramycin Ointment with Polymyxin B Sulfate, Terramycin with Polymyxin B Sulfate Topical Powder.
E. R. Squibb & Sonth, Inc., New Brunswick, NJ 08903.	Spectrocin Ointment.
The Upjohn Co., Kalamazoo, MI 49001.	Baciguent Ointment, Myciguent Cream, Myciguent Ointment, Mycitracin Ointment.

B. LABELED INGREDIENTS CONTAINED IN MARKETED PRODUCTS SUBMITTED TO THE PANEL

Bacitracin
Chlortetracycline hydrochloride
Fuzene base
Glyceride wax
Gramicidin
Lactose
Lanolin
Mineral oil
Neomycin sulfate
Oxtetracycline hydrochloride
Petrolatum
Polyethylene glycol
Polymyxin B sulfate
Tetracycline hydrochloride
Zinc bacitracin

C. CLASSIFICATION OF INGREDIENTS.

The Panel has classified the following ingredients submitted to the Panel into groups identified below:

1. *Ingredients identified as active antibiotic ingredients.*

Bacitracin
Chlortetracycline hydrochloride
Gramicidin
Neomycin sulfate
Oxytetracycline hydrochloride
Polymyxin B sulfate
Tetracyline hydrochloride
Zinc bacitracin

2. *Ingredients submitted to the Panel and identified as inactive and/or pharmaceutically necessary ingredients.* Inactive ingredients are useful in the manufacturing of pharmaceutical preparations or in enhancing the quality and/or appearance of the product. The Panel advocates the listing of all inactive ingredients on the product label. In topical medications, many of the labeled inactive ingredients are vehicles into which the active ingredients are incorporated. These vehicles, including ointment and cream bases, play a vital role in release and delivery of active ingredients into the skin. The other inactive substances are added to enhance product appearance and/or quality.

V 4263 APR 1 77 UMI

The list below reflects only those inactive ingredients contained in the labeled ingredients submitted to the Panel and is not intended to be an exhaustive list.

Fuzene base
Lactose
Lanolin
Mineral oil
Petrolatum
Polyethylene glycol

3. Antibiotic ingredients combined with nonantibiotic active ingredients. The Panel has neither received nor reviewed any data concerning combinations of antibiotic ingredients with active nonantibiotic ingredients.

The Panel is aware that future topical products may be developed combining the above antibiotics with active ingredients such as corticosteroids, antihistamines, anesthetics, antifungal agents, and other antibiotics not reviewed by the Panel. The Panel concludes that such combinations should be subject to appropriate FDA review procedures prior to OTC marketing.

II. General Statements and Recommendations

A. General Comment

The Panel was charged with the review and evaluation of safety and effectiveness data on antimicrobil and antibiotic agents and combinations in topically applied OTC drug products. This charge included recommendations about appropriate permitted labeling, with guidelines for warnings, precautions, contraindications, and directions for use.

The Panel has defined an "antimicrobial ingredient" as an agent that kills or inhibits the growth and reproduction of microorganisms. A chemical substance produced by a microorganism and having the capacity, in dilute solutions, to kill or inhibit the growth of other microorganisms is called an "antibiotic." Antibiotics kill at different rates. Whether one considers it bacteriostatic (to inhibit the growth or reproduction of bacteria) or bactericidal (to kill bacteria) may depend entirely on the rate of kill because the definition is based on different rates of kill. As with most biological/chemical phenomena, there is a gradation between physical or chemical factors that kill organisms rapidly and those that prevent organisms from growing or multiplying without their rapid destruction. Factors such as concentration of chemical, temperature, presence of organic matter, and the inherent susceptibility of the type of organism or strain of organism can affect the rate of kill. Thus, chemicals that kill organisms rapidly under the conditions of test or study are called "cidal," and those that kill the organisms very slowly or suppress reproduction are referred to as "static". The final descriptive term used may reflect the actual rate of kill or the adequacy of the procedure used to test for killing ability. In the in vivo or clinical situation, static antibiotics may prevent organisms from growing or reproducing so that the body defense mechanism are able to destroy the organisms. Under such conditions, clinical effectiveness may be found with static types of drugs.

The definition of an antibiotic drug stated in section 507 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 357) is as follows:

> • • • the term "antibiotic drug" means any drug intended for use by man containing any quantity of any chemical substance which is produced by a microorganism and which has the capacity to inhibit or destroy micro-organisms in dilute solution (including the chemically synthesized equivalent of any such substance).

"Pathogenic" bacteria are microorganisms capable of causing infection, particularly when introduced into an area of injured or abnormal skin. There are microorganisms in, on, and all around the human body. Most of these organisms are nonpathogenic residents on the skin and are referred to as "normal flora."

Of interest to the Panel are skin infections that are frequently grouped together under the term "pyoderma," which indicates the presence of pus in the skin. In addition to containing pus, infected skin is usually red, warm, and sore (painful or tender). Pyoderma includes both "primary infections" which develop on previously normal or uninjured skin, and "secondary infections" which develop in preexisting skin lesions such as poison ivy dermatitis, chronic leg ulcers, or burns.

Primary skin infections include such common conditions as impetigo and boils, caused predominantly by the gram-positive bacteria, Staphylococcus aureus and/or Streptococcus pyogenes (Group A beta-hemolytic streptococcus). "Impetigo" is a contagious, superficial pyoderma, common in children, which is caused by either staphylococci and/or streptococci and begins with blisters, which rupture to form thick, yellowish-red scabs (crusts). "Ecthymas", usually caused by streptococci, are another type of superficial pyoderma, with scabs overlying shallow, purulent ulcers that develop most commonly on the legs following insect bites. Primary infections, which develop around hair follicles, are caused by staphylococci. This type of skin lesion is called "folliculitis" when only small superficial pustules are present, but is called a "boil" or "furuncle" if a deep, red, tender swelling with a core of pus develops. A furuncle is a specialized type of skin abscess or a well-circumscribed collection of pus. Another type of staphylococcal abscess, known as acute paronychia, develops around a fingernail or toenail and consists of a red, tender swelling containing pus.

Secondary infections develop in skin that is damaged by factors such as vigorous scratching, excessive moisture, or poor circulation. Pathogenic staphylococci and streptococci presumably penetrate the skin through the scratching of insect bites, poison ivy dermatitis, or other itchy eruptions. People with "atopic eczema," an inherited itchy dermatitis that usually begins in infancy, frequently develop secondary infections similar to impetigo. Older patients with atopic eczema confined to the hands also develop recurrent secondary infections on the hands, known as infected "hand eczema." Ear piercing also predisposes to secondary infection, particularly if complicated by simultaneous allergy to the nickel component of metal earrings touching the ear lobes.

Secondary infections involving microorganisms other than staphylococci or streptococci develop in certain predisposed skin areas. Pseudomonas aeruginosa, a type of gram-negative bacteria, thrives on warm, moist skin surfaces such as the groin, ear canal, underarm areas and toewebs. Although its role in causing secondary infection in these areas is controversial, Pseudomonas is a pathogen capable of causing death in patients with extensive and deep burns. Pseudomonas species as well as other microorganims may be found in chronic leg ulcers due to varicose veins or poor arterial circulation. The role of microorganisms in delay of healing of these deep, rounded ulcerations above the ankle, remains uncertain. The role of microorganisms is also unclear in "bed sores" or "decubitus ulcers" in bedridden patients.

Organisms, other than those discussed above, may also be invovived in wound infection but are not common in minor wounds.

While some the aforementioned antibiotics are used extensively for serious injuries and burns on the advice of physicians, the Panel will deal only with the limited OTC uses of these ingredients. The Panel will, therefore, limit its review in this document to those topical antibiotic ingredients that are generally promoted to help prevent infection and aid healing when applied to minor skin cuts, abrasions, and burns.

B. Introduction, History and Development of Regulation of Antibiotics by FDA

The antibiotic era of chemotherapy was launched in the 1930's with the work of Dubos on tyrothricin; Waksman on streptomycin; and Fleming, Chain, and Florey on penicillin. Historically, the regulation of antibiotic drugs began when the Federal Food, Drug, and Cosmetic Act was passed in 1938, requiring that drugs be precleared by FDA and that proof of safety be shown prior to marketing. Between 1938 and 1962, approximately 10,000 new drug applications (NDA's) were approved for drug formulations. Among this total were several NDA's for antibiotics.

The therapeutic application of antibiotic substances developed during the World War II era. When these new antibiotic drugs suddenly became generally available for use against both bacterial and fungal infections, physicians focused new attention on specific etiologic agents of infectious diseases and their relative susceptibilities to new antimicrobial agents. The search for antibiotic drugs with broad antimicrobial spectra and minimal toxicity to the patient continued. Instead of abandoning use of a drug when toxicity became

apparent, efforts were made to alter drug toxicity while preserving antimicrobial activity.

Some antibiotics that were found to be too toxic in systemic use were tested, studied, and approved for topical therapy. Because of the limited antimicrobial spectrum of each antibiotic, several were often combined in commercial preparations to cover the spectrum of organisms usually found in infections of the skin.

As antibiotics came into use, it was realized that their potency and purity were quite variable because they were manufactured through a biological fermentation process. Pharmaceutical control of potency and purity of fermentation products developed slowly and was not as exact as that of chemically synthesized drugs. Consequently, beginning in 1945 with penicillin, and later extending to four other antibiotics, section 507 of the act (21 U.S.C. 357) was modified to require certification of each production batch of these antibiotics under a specific monograph published in the Code of Federal Regulations. Included among the four antibiotics were bacitracin, which was certified for topical OTC use in 1948, and chlortetracycline, which was certified for prescription use, also in 1948. Thus, in addition to submitting a new drug application, the manufacturer was required to supply FDA with batches of the antibiotic for certification prior to marketing. The specific monograph for each antibiotic delineated the tests required and limits to be met prior to marketing (21 CFR Part 436).

By 1953, several NDA's were approved for topical antibiotics. After a few years, firms proposing to market these antibiotics were informed by FDA that these drugs were no longer considered "new" drugs and therefore did not require the submission of a new drug application prior to marketing. However, the removal of the NDA requirement did not change the firms' need to obtain certification of each antibiotic batch. Numerous products containing antibiotics then appeared on the market without NDA's.

In 1962, Congress passed the Kefauver-Harris Amendments to the act. In general, these amendments required that substantial evidence of effectiveness as well as safety be submitted to FDA for any drug, and they also expanded the requirement of certification to all antibiotics intended for human use.

A notice of proposed rule making for certification procedures of specific antibiotics was adopted (21 CFR Part 431). To implement this procedure, an Antibiotic Task Force was formed within FDA. Over a period of approximately 6 months, this group reviewed specific drug products and made recommendations as to their safety and effectiveness. In this review, some antibiotics were not recognized as safe or effective and letters were sent to the manufacturers informing them to the task force's stand. A final order stating definitions and certification procedures for these antibiotics not recognized as safe and effective was published in the FEDERAL REGISTER of March 9, 1966 (31 FR 4129). Only after implementation of the recommendations of the task force were the affected antibiotics again certified.

Also as a consequence of the mandate of the 1962 amendments to the act, the Commissioner requested assistance from The National Academy of Sciences and The National Research Council (NAS/NRC) in evaluating the effectiveness of all drug products approved for safety between 1938 and 1962. This review included topical antibiotic products. The resulting Drug Efficacy Study Implementation (DESI) reports of the NAS/NRC provided recommendations to help the Commissioner in making a decision about the effectiveness of individual drug products.

Both OTC and prescription antibiotics and antibiotic combinations were evaluated in the DESI review. The overall conclusions were made for each product rather than for the class or the ingredients. Many topical antibiotic formulations were declared less than effective on the basis of lack of controlled clinical studies to show effectiveness. However, certain combinations of prescription antibiotics were declared effective. Studies to demonstrate the effectiveness of some other combinations are currently being designed and executed to satisfy DESI requirements (particularly the anti-infective/steroid combinations as published in the FEDERAL REGISTER of October 9, 1974 (39 FR 36365)). Time has elapsed since the NAS/NRC review and additional data have become available for topical antibiotics. In order to have a comprehensive OTC review, the Commissioner requested that the Panel review all topical antibiotic ingredients marketed as OTC for both safety and effectiveness.

C. Definitions of Product Categories

The panel concludes that OTC topical antibiotic products should be used only as part of the first-aid treatment of small superficial wounds such as cuts, abrasions, and burns. The Panel considered the first-aid treatment of small superficial wounds as a process that includes initial adequate cleansing that may or may not be followed by application, of a safe, nonirritating product that does not interfere with normal wound healing and may reduce bacterial numbers and help prevent infections.

The following definitions of topical antibotic categories have been developed by the Panel in an attempt to simplify categorization of ingredients and eliminate labeling confusion.

1. Skin wound protectant. A safe, nonirritating preparation applied to small cleansed wounds that provides a protective physical barrier, conforming to the barrier testing for skin wound protectants as published in the FEDERAL REGISTER of September 13, 1974 (39 FR 33140), and may also include a chemical (antibiotic), which neither delays healing nor favors the growth of microorganisms.

2. Skin wound antibiotic. A safe, nonirritating antibiotic-containing preparation that prevents or treats overt skin infection. Claims stating or implying an effect against microorganisms must be supported by controlled human studies that demonstrate prevention or effectiveness in the treatment of infection.

D. Advertising and Consumer Use of Topical Antibiotics

The Panel recognizes that topical medications for treatment of minor cuts, burns, and abrasions are useful to the general public. It believes that such medications should be available "over-the-counter," provided they are safe and effective. The Panel is concerned, however, that little information is available about consumer habits of self-medication with topical salves, ointments, creams, and powders, and, in particular, that the potential for misuse in acute and chronic skin conditions poses a problem. The Panel is also concerned about the possible use of inappropriate or harmful substances on skin wounds if safe OTC medications are not available for first-aid use.

Even though no information was submitted concerning the factors influencing the consumer's choice of a topical antibiotic, the Panel considered the following as possible factors:

(1) Physician availability or cost of physician visit;

(2) Media advertising such as in magazines, on the radio, or television;

(3) Suggestions from friends and acquaintances; and

(4) Satisfactory previous personal experience following advice of a physician or pharmacist.

Each of the above factors may lead to self-diagnosis and treatment that may not always be appropriate. One inappropriate use of a topical antibiotic preparation is prolonged application to a chronic, persistent skin lesion. This could produce skin sensitization and/or delay the consumer in obtaining more appropriate treatment. Another possible inappropriate use is the continued application of the antibiotic after a sensitization reaction has occurred. It is also possible that application of the antibiotic product over a broad area of the skin may alter the resident bacterial flora, leading to emergence of antibiotic-resistant strains of bacteria. Unfortunately, no data on consumer use of topical antibiotics are available from which to determine the relative importance of each of these concerns. Such data may not be relevant when topical antibiotics are used on minor cuts and wounds. However, the Panel concludes that product labeling must take into account, and attempt to eliminate, these problems.

The Panel is also concerned that the promotion of antibiotic products to physicians, for purposes other than those recommended for OTC use, may lead to confusion and misuse by the public. It is possible that the physician's use of topical antibiotics to treat certain skin infections may lead consumers to self-diagnosis of other skin conditions leading to treatment with inappropriate topical antibiotics. Labeling of the

V 42 63 APR 1 77 UMI

topical antibiotics, for both OTC and prescription uses, should be designed to minimize this possibility.

The Panel considers that thorough, gentle cleansing of a minor skin wound to remove foreign material is the proper first step. The OTC antibiotic may then be applied to protect the wound or prevent infection, provided that benefit from its use has been demonstrated.

Suggestions were made to the Panel by Dr. Dillon (Ref. 1) that certain topical antibiotics might prove to be more useful in treating certain skin diseases than no treatment at all. Some skin diseases, such as impetigo and folliculitis, are recognized by the lay public as infections of the skin. The Panel agrees that such skin infections may be treated by the lay public with topical antibiotics if such have been proven to be effective.

E. EFFECTIVENESS OF TOPICAL ANTIBIOTICS

The OTC drug review regulations (21 CFR 330.10(a)(4)(ii)) contain the following definition of standards for effectiveness:

Effectiveness means a reasonable expectation that, in a significant proportion of the target population, the pharmacological effect of the drug, when used under adequate directions for use and warnings against unsafe use, will provide clinically significant relief of the type claimed. • • •

The Panel concludes that a "reasonable expectation • • • [of] clinically significant relief" has not been conclusively demonstrated for the OTC use of topical antibiotic products.

No data from well-controlled studies were presented to the Panel concerning either the therapeutic or prophylactic effects of OTC use of topical antibiotics on minor cuts, abrasions, or burns. The Panel concludes that no such data presently exist on the OTC use of these products.

In an effort to evaluate the clinical effectiveness of topical antibiotics, the Panel has relied on data generated by supervised use of topical antibiotics in hospitals and medical offices and by prescription use of topical antibiotics in outpatient home settings.

Most studies reviewed by the Panel dealt with professional medical treatment of acute skin infections, postoperative wound infections, and chronic skin diseases with secondary infections. While inferences concerning clinical effectiveness of topical antibiotics for OTC use on minor cuts, abrasions, and burns have been made from available studies (Ref. 1), the Panel concludes that such inferences may be unwarranted for the following reasons: The degree of wound contamination differs; the wounds differ in depth and amount of tissue destruction; the microorganisms likely to be introduced differ between hospital or office settings and "natural" settings; and patient characteristics differ with respect to hygiene, age, race, and ability to follow directions for product use.

1. Therapeutic effectiveness. Standards of medical practice regarding use of antibiotics in the treatment of skin infections have changed considerably during the past 30 years. In the 1940's and 1950's, when the topical antibiotics presently under review were developed and evaluated, many physicians were enthusiastic about their use in both the hospital and on an outpatient basis. However, reports from this period were largely of a testimonial nature, with no consistent attempt to document clinical diagonses, culture skin lesions, or demonstrate that formulated products with active ingredients were better in treating skin infections than their vehicles alone.

Because it is virtually impossible to look at a variety of skin lesions and assess exactly which bacteria are present, the Panel is unable to accept studies without cultures as proof of clinical effectiveness. The Panel is aware of the practical argument that cultures are time consuming and expensive, but concludes that such argument is not acceptable in studies purporting to demonstrate clinical effectiveness of topical antibiotic preparations.

The Panel has made a diligent effort to review all submitted material in order to arrive at its judgment concerning clinical effectiveness. It recognizes that honest differences of opinion may exist or the relative merits of different studies. The Panel also recognizes the inherent technical difficulties in attempting to scientifically document clinical effectiveness.

Many different dosage forms (i.e. creams, lotions, ointments, etc.) of these antibiotics are available, either as OTC or prescription, and it appears that there are relative differences in their effectiveness based upon the dosage forms used. It is a continuing concern of the Panel that many of the better designed studies (controlled) utilized an ointment vehicle for the antibiotic, and the results of these clinical studies show a lack of effectiveness in this vehicle. On the other hand, some studies (controlled and uncontrolled) suggested strongly that the antibiotics in solution or cream forms may have been effective in treating some skin conditions.

The Panel recommends OTC marketing of certain topical antibiotic formulations currently labelled as prescription products (primarily, cream formulations). This recommendation is based partly on theoretical considerations and partly on the effectiveness data discussed above. In any event, clinical studies with such dosage forms would still be required to establish effectiveness in the prevention and treatment of skin infections.

Since the early days of topical antibiotics, newer systemic antibiotics have largely replaced topical antibiotics for treating many skin infections. Several studies have shown that systemic antibiotics are superior to topical antibiotics in treatment of impetigo, with more rapid reduction of pathogenic bacteria from skin lesions and more rapid healing time (Refs. 2 through 7).

In addition, treatment of impetigo with systemic antibiotics rather than with topical antibiotics is accepted medical practice for prevention of possible glomerulonephritis (Refs. 2 through 7). Acute glomerulonephritis is a serious kidney disease that may follow streptococcal infections of either the skin or the throat (Refs. 8 and 9). While not all strains of streptococci are nephritogenic (capable of inducing nephritis), epidemics of nephritis may occur in populations exposed to impetigo caused by nephritogenic strains (Refs. 10 through 15). The risk of developing nephritis following impetigo caused by such a strain is significant, especially in children less than 6 years of age (Refs. 16 through 19). Indigent children and children in warm, humid climates have a higher incidence of streptococcal sores and subsequent nephritis than children in colder climates. Although nephritis is predominantly a disease of children, adults may also be affected, especially in epidemic situations or following insect bites that become infected with nephritogenic streptococci (Refs. 20 and 21).

The Panel recognizes that the overall risk of developing nephritis following impetigo is not very great if patients are over 6 years of age and nephritogenic strains of streptococci are not prevalent (Refs. 22 and 23). There is concern that some children may develop nephritis because of lack of early treatment with systemic antibiotics. However, there is no conclusive proof at this time that treatment of streptococcal impetigo with topical or systemic antibiotics will prevent nephritis (Refs. 2, 8, 10, 13, and 24). Systemic treatment is presently preferred in cases of diagnosed impetigo because of more effective elimination of pathogenic streptococci from the skin.

The Panel is particularly concerned that indigent persons, unable to seek the treatment of choice (systemic antibiotics under proper medical supervision), may develop glomerulonephritis. In the Panel's opinion, this disease condition is extremely serious and may even be life threatening. The Panel believes that a significant population of indigent individuals exists in the United States who contact impetigo but seek no medical intervention and, therefore, risk developing glomerulonephritis. Although the use of topical antibiotics is not the treatment of choice for streptococcal impetigo, the potential risk is serious enough to suggest that this claim be seriously considered and evaluated as an added OTC indication for these products.

The Panel received communications from some organizations and individuals that presented their own recommendations on the safety and effectiveness of certain OTC topical antibiotics (Ref. 25). These recommendations were not supported with new or adequate data for objective evaluation. As a consequence of these comments, the Panel also met with a representative of the American Academy of Pediatrics and determined that the American Academy of Pediatrics' recommendations to the Panel were based on members' clinical impressions rather than on a comprehensive review of the extensive data which was reviewed by the Panel (Ref. 26).

2. *Prophylactic effectiveness.* The Panel is concerned that little data from controlled studies have been submitted documenting clinical effectiveness of topical antibiotics for preventing infection in minor skin wounds such as cuts, abrasions, and burns. Most studies reviewed by the Panel dealt with professional medical treatment of diagnosed acute skin infections, postoperative wound infections, or chronic skin diseases with secondary infections. Prophylactic use of topical antibiotics has been reported in postoperative surgical wounds, on extensive burns, and with intravenous cutdown catheters. These reports suggest that prophylactic use of topically applied antibiotics may be efficacious in the prevention of wound infections following surgery, but do not permit any inferences concerning prophylactic effectiveness following minor cuts, wounds, and abrasions occurring outside the hospital setting. Furthermore, in some cases, formulations different from those currently marketed were tested, and in other cases conflicting results were obtained from these hospital studies. These reports do suggest that a controlled clinical trial of topically applied antibiotics in minor cuts, abrasions, or burns might be worthwhile to answer the question of prophylactic effectiveness.

In the opinion of the Panel, controlled clinical trials of topically applied antibiotics would not be as difficult as is often claimed. A prospective, randomized, double-blinded, controlled trial would have logistic difficulties, but is feasible. Of course, in any clinical trial, the group receiving a placebo should not be permitted to experience a deteriorating disease state, and the protocol should allow for active treatment intervention should this occur. The size of the groups needed in both the experimental and the control groups is dependent upon: (1) The expected difference between the experimental and control group (i.e., the probable effectiveness); (2) the expected incidence of the condition to be prevented—infected wounds cuts, burns, and abrasions; and (3) the chosen significance level and power of the statistical tests employed (Ref. 27).

Since it is thought that the incidence of such infections is low, this would enlarge the size of the groups required for entry into the trial. On the other hand, if the effectiveness (expected benefit or difference between treated and untreated groups) is high, this would correspondingly reduce the numbers required. It would be desirable to investigate the effectiveness of a heterogeneous group of infections such as small cuts, burns, and abrasions. This would still permit pooling of effectiveness data for these lesions as well as analysis by type of lesion (subgroup analysis).

The Panel believes that a single study of adequate size and design may provide sufficient evidence to make a judgment as to effectiveness.

3. Summary. The Panel finds an important deficiency in the data submitted concerning the effectiveness of topically applied antibiotics, i.e., the absence of randomized, prospective, double-blinded, controlled, clinical trials. Such trials would randomly allocate patients with cuts, wounds, burns, and abrasions to an experimental and a control group. The experimental group would receive the medication (for example, an ointment) with the active ingredients, and the control group would receive the vehicle (placebo) without the active ingredients. Neither the investigators nor subjects would know whether they were receiving active drug or placebo (a procedure called double-blinding). Both groups would be followed forward in time prospective design) and the incidence of infection ascertained.

The Panel is not willing to waive the requirement of double-blinded, controlled studies for clinical evaluation of topical antibiotic ingredients, despite the provision of the OTC drug review regulations pertaining to standards of effectiveness (21 CFR 330.10(a)(4)(ii) which states:

• • • Proof of effectiveness shall consist of controlled clinical investigations as defined in § 314.111(a)(5)(ii) of this chapter, unless this requirement is waived on the basis of a showing that it is not reasonably applicable to the drug or essential to the validity of the investigation and that an alternative method of investigation is adequate to substantiate effectiveness. • • •

The Panel concludes that a single, well-controlled study of adequate size and design may provide sufficient evidence to make a judgement of effectiveness.

F. DRUG RELEASE FROM TOPICAL PREPARATIONS

The Panel reviewed data from several sources and heard a presentation from Robert Scheuplein, Ph. D., a recognized expert in the area of drug release from topical preparations. The vehicle currently employed most widely in topical antibiotic formulations for OTC sale is an ointment composed mainly of white petrolatum. White petrolatum is often formulated with other hydrophobic (insoluble in water) materials such as waxes or high molecular weight alcohols. In contrast to an ointment, a cream ve-

V42163 APR 1 77 UMI

hicle is usually composed of a water miscible base such as an oil-in-water emulsion or a totally water-soluble base, such as the polyethylene glycols. The Panel is aware of other topically applied dosage forms for antibiotics, such as powders, but little data were provided on the bioavailability of the antibiotics from such dosage forms. It is essential to consider the influence of the vehicle on the effectiveness of a topical antibiotic preparation. The vehicle may be the controlling factor in the release of the active ingredient from the preparation. The following discussion attempts to clarify some of the problems facing the Panel in trying to assess drug release and the resulting effectiveness.

Drug release from any dosage form occurs at the interface between the vehicle and the tissue to which it is applied. The drug must leave the vehicle and enter the enyironment of the tissue before it can exért any biological activity. There are many factors that influence the rate and extent of this drug release. Some of these factors are: concentration of the drug in the vehicle; solubility of the drug in the vehicle; diffusion coefficient of the drug in the vehicle; partition coefficient of the drug between the vehicle and the tissue. Influencing each of these factors are other conditions such as the pH of the vehicle, drug or tissue; temperature; degree of hydration of skin, etc. Obviously, drug release from a dosage form is not merely a simple matter of smearing on a product and obtaining instantaneous results. Many physico-chemical interactions eventually determine success or failure of a product, apart from any activity of the antibiotic itself.

The Panel received limited data on release of certain antibiotics from the ointment dosage form. The ointment is the most widely used drug dosage form for OTC use at the present time, while the cream dosage form is almost exclusively limited to prescription sale. Some data presented to the Panel suggested that an ointment was better than a cream. Other data suggested that a cream was better than an ointment. The Panel concludes that inadequate research has been undertaken to design the most effective vehicle for a given topical antibiotic product. The Panel also is concerned that the existing OTC ointment dosage form may indeed be much less than ideal for the reasons discussed below.

It is recognized by the Panel that an occlusive vehicle (one that acts as a physical barrier), such as an ointment, has certain advantages in treating small wounds. Dr. Rovee pointed out that an occlusive dressing may aid wound healing (Reference 1). Dr. Scheuplein suggested that it was possible to formulate an ointment that would be as effective as a cream or vice-versa (Reference 2). Some of the effectiveness studies presented by the industrial representatives suggested that in some cases the ointment dosage form resulted in failures, while other studies reported success of treatment (Reference 3). Once again, conflicting data on drug release were presented to the Panel.

The Panel has determined that the topical antibiotics being reviewed are all water soluble with the exception of gramicidin, which is practically insoluble in water (Reference 4). These antibiotics exist in ointment dosage form as insoluble, suspended particles. From a physicochemical viewpoint, an insoluble particle in a fairly viscous, greasy vehicle would not be an ideal dosage form. If little or no diffusion through the vehicle takes place, then the only portion of antibiotic available for biologic activity is that which exists at the tissue interface at the time of application or that which then comes in contact from the receding boundary of the ointment (Reference 5). Perhaps it is for this reason that demonstration of effectiveness of antibiotic ointment has been difficult in some well-controlled studies.

In contrast, a cream dosage form has antibiotic in solution in the aqueous phase so that the antibiotic is more readily available for diffusion to the interface between the cream and tissue. In other words, a higher concentration of antibiotic can be made available to the tissue site over a short period of time from a cream formulation than from an ointment formulation.

The Panel is aware that in the early days of antibiotic formulation in topical products, technology to evaluate these dosage forms was not so sophisticated as it is at present. The Panel would urge a thorough study to determine all of the characteristics described above in light of the new technology to design a more favorable dosage form. If the cream or any other dosage form currently marketed for prescriptions use is determined to be both safe and effective, consideration should be given to marketing these dosage forms OTC.

The release of drugs from various vehicles has been the subject of many reviews and research papers. Consistently, these papers indicate that a formulation or vehicle for a given chemical must be specifically designed for that chemical to obtain maximum drug release. In formulating a cream or ointment, the physical properties of the drug and vehicle must be balanced in such a way as to provide optimum release. Specific additives may enhance or retard release of a chemical from the vehicle. Gandhji and Mithal (Reference 6) have shown that by simply incorporating a surfactant, release of chloramphenicol and tetracycline from an ointment formulation was enhanced. It appears to be the Panel that proper formulation of vehicles for the various antibiotics, based on such current information, could very likely result in significant improvement in antibiotic effectiveness.

A recent review of the broad problem of release of drugs from topically applied dosage forms has been published by Grasso and Lansdown (Reference 7). The Panel also studied the reviews by Poulsen (Reference 8), Katz and Poulsen (Reference 9), and Idson (Reference 5). These comprehensive reports focus on percutaneous absorption, but the basic problem of drug release from topical preparations is also discussed. The discussion above is not intended to be an exhaustive summary of these reviews, but it does form the basis for the recommendation presented in this report.

The Panel is certain that manufacturers of topical antibiotic ointments are aware of the voluminous literature concerning percutaneous absorption of drugs, influence of a vehicle on the release of drugs, and physiological factors influencing release of drugs (high or low sebum content, or denuded verus intact skin). The Panel believes that the previous arbitrary distinction between OTC and prescription topical antibiotic products is not rational. It strongly urges testing of other topical dosage forms (gels, solutions, creams, lotions) for possible OTC use. However, such testing should take into consideration the pharmacokinetic factors discussed above.

G. WOUND HEALING

Wound healing may be altered by excessive bacterial growth in the damaged tissues (Ref. 1). The manufacturers state that topical antibiotics speed wound healing, presumably by reducing bacterial growth. It is recognized that these terms (such as "speeds healing", or other similar terms) are meant to imply that by reducing excessive bacterial growth in a wound, normal healing is enhanced. It also implies that large numbers of bacteria, or their products in a wound, slow or impede wound healing. There are no good data to indicate that the normal healing time of a clean wound can be altered by an antibiotic cream or ointment. Scientific evidence currently available to the Panel does not sufficiently answer the question of the role of bacteria in minor skin wounds in the normal individual. There is little evidence to support the claims that reduction of the number of bacteria in wounds will shorten dermal and epithelial healing times.

Wound repair rates may vary depending on the number and types of bacteria or their metabolites present in the wound. Some wounds do not heal normally in the presence of some bacteria or bacterial metabolites as demonstrated by Rovee (Ref. 1).

Several studies in the past 10 years have demonstrated the influence of the local wound environment on wound healing in the skin. One of the important variables in epidermal wound healing is the amount of moisture or degree of hydration of the skin. Several investigators have shown that maintaining tissue hydration by the application of plastic film, or other slightly less occlusive dressings, increases epithelial migration and shortens the time necessary for the epidermis to cover the wound when compared with open wounds (Refs. 2 through 5). It appears that ointments that are semiocclusive might also enhance epidermal repair by creating a moist environment in the wound. Whether or not this actually occurs could not be determined from that data submitted.

The panel concludes that the role of an antibiotic ointment in wound repair is still largely unknown.

H. ANIMAL AND HUMAN MODELS

The study of experimental infections in humans is often impossible, impractical, or dangerous. Therefore, various animal and human models have been developed to study the infection process. Information that can be obtained from models is often useful, particularly in regard to: (1) obtaining information that cannot be derived ethically or practically from clinical trials; (2) predicting appropriate dosage levels for desired responses in clinical trials; (3) determining toxicologic hazards; and (4) performing controlled studies on adequate numbers of subjects to enable significant statistical analysis.

Controlled clinical trials to determine the therapeutic and prophylactic effectiveness of topical antibiotic agents may be difficult for the following reasons: ethical considerations; large size of the study required; cost; logistics; time commitment; and difficulty in patient compliance. Although models have been used historically to determine clinical effectiveness, a careful analysis of limitations associated with models must be made. There are great difficulties involved in drawing inferences from animal models and applying conclusions to human populations. It is necessary to validate model systems and demonstrate that they have predictive ability for human clinical conditions.

In dealing with the use of models of the infection of minor wounds, burns, and abrasions, the differences and similarities of a specific model to the normal infection process can be examined.

1. *Normal human infection process.* a. Streptococci and/or staphylococci occur on the skin at the time of injury, or are often carried there or transmitted from an infected source, such as a biting insect.

b. A lesion occurs on the skin.

c. The lesion provides the environmental situation required to allow the organisms that are present, or have been applied as the lesion is made, to reproduce and invade.

d. An infected lesion results.

e. The organisms causing the infection are present at the time of injury.

2. *Human model as described by Kligman and Marples.* a. The lesion is artificially made on the skin. Time is allowed for healing of the lesion (24 hours).

b. Pathogenic staphylococcal organisms are added to the lesion and allowed to remain for 6 hours before application of antibiotic agents.

c. In some testing situations, the normally occurring flora are allowed to expand for varying times, producing the successive replacement populations before the antibiotic is applied. In some instances, the antibiotic is added after 24-hour healing of the lesion to prevent expansion of the flora (Refs. 1 and 2).

3. *Differences and similarities between natural and induced skin infection.* a. In the natural human infection, there is often a mixed population of pathogens; in the model, only staphylococci or coliforms have been used since the streptococci would be a risk to the subjects.

b. In the model, since there will be residual antibiotic, attempts must be made to neutralize the residual agent.

c. In the model system, the organisms against which the antibiotic is acting are often the normal skin flora consisting of coagulase-negative staphylococci, diphtheroids, and some gram-negatives. In the natural infection, in addition to the normal skin flora, other organisms (from exogenous sources) will likely be the infecting agents. These agents are the specific target of the applied antibiotic.

d. In the model system, organisms and active formulations may be inadvertently transmitted from one lesion to another, since artificially produced lesions may be made at close intervals on the forearm.

4. *Animal models for skin infection.* Several animal models have been used to demonstrate the therapeutic and prophylactic effectiveness of topical antibiotics. In an extensive review of such animal models, Miller (Ref. 3) describes some of these models, including: the production of abscesses in inoculated suture stitches in rats and guinea pigs; a rabbit ear-wound model; infection in inoculated and depilated rat skin; surgical wounds in the rat; a burn model inoculated with *Pseudomonas* in the rat. In addition to rats, guinea pigs, and rabbits, other test animals have included hamsters, mice, dogs, and goats (Refs. 4 through 18). Mice and rats are apparently not particularly good test animals, due to their general resistance to superficial infections.

Work with these animals has not been standardized, and has included a variety of topical antibiotics, dosage forms, experimental techniques, and experimental models. Antibiotic creams, powders, ointments, sprays and solutions have each been tested in only a few of the models. The Panel concludes that no generalizations about effectiveness of topical antibiotics can be made from currently available animal model data.

The Panel also concluded that, of all the animal models reviewed, the impetigo model in hamsters and the wound infection models in guinea pigs appear to be the most promising for testing some aspects of effectiveness of topical antibiotics for OTC use. In the hamster model, impetigo is induced by injecting cultures of *Staphylococcus aureus* or hemolytic streptococci into the dermal layer of the skin (Refs. 4 through 6). This is the only animal model known to the Panel that produces a superficial bacterial infection similar to naturally acquired impetigo in humans. In guinea pigs, wound infections have been produced by inoculating various types of bacteria into surgical incisions in the dorsal interscapular regions (Refs. 7 through 11). The guinea pig wound infection model appears to mimic superficial wound infections in humans (Ref. 9).

The Panel encourages further development of other animal models that may be useful in evaluating topical antibiotics.

5. *Human models for skin infection.* Some studies with human models involve normal skin. Many investigators have observed that normal human skin is very difficult to infect (Ref. 19). Since 1959, numerous investigators have searched for a method that will consistently produce superficial skin infection in humans (Ref. 20). Application of 5 million pathogenic microrganisms to normal intact skin or intact skin previously exposed to ultraviolent light, high humidity, cutting oils, or crude coal tar have failed to induce infection, even when the skin was tightly occluded with polyethylene wrap which favors proliferation of bacteria (Ref. 20). Intradermal injection of pathogenic organisms will also usually fail to induce infection (Ref. 20).

Disruption of the uppermost layers of the skin (stratum corneum and epidermis) through physical or chemical trauma seems to be a necessary prerequisite for producing skin infection in human skin. Many methods of producing trauma have been tried, including sandpapering, scraping with a scalpel, abrasive scrubbing with a pot cleaner, hair plucking, puncturing with a blood lancet, sequential stripping with cellophane tape, and production of blisters with cantharidin or ammonium hydroxide (Refs. 19 through 22). While a physical break in the skin is necessary to establish skin infection, it is obviously not the only factor necessary since many of the above

V 4263 APR 1 77 UMI

techniques have failed to consistently produce infection. Search is still underway to create a model in which a small number of pathogenic organisms will multiply and consistently produce clinical infection (Ref. 21).

In 1970 it was reported that some regions of human skin, particularly the legs, are easier to infect than other regions such as the arms or back. These differences are possibly due to circulatory changes (Ref. 19). The technique used involved stabbing the skin with a blood lancet that contained a drop of pathogenic inoculum of staphylococci or streptococci followed by occlusion of the skin with plastic tape. Superficial infection could be induced 38 percent of the time on the legs but only 15 percent of the time on the back and 13 percent of the time on the arms. Attainment of a 38 percent infection rate on the legs was considered to be highly successful in comparison to that obtained in earlier studies.

In 1972 a human model for superficial infection with *Staphylococcus aureus* was reported by Marples and Kligman using the technique of stripping superficial layers of the skin with cellophane prior to inoculation of organisms (Ref. 21). Repeated stripping removed the stratum corneum completely, revealing a moist glistening surface. A rest period of 24 hours was then allowed, to enable the skin to reestablish some barrier and to prevent bacteria from entering the blood stream. Following this period, staphylococci were applied and the region occluded with plastic film for 24 hours. A bright red, tender, moist area with serosanguineous (blood-tinged) exudate resulted. Simulation of a wound in this way was thought to produce several conditions favoring rapid proliferation of microorganisms: moisture, serum for nutrient, protection from white blood cells by the underlying intact epidermis, and removal of competing microorganisms present in the superficial stratum corneum of the normal skin (Ref. 21). When this model is used, the flora of the skin changes after the occlusive wrap is applied to a lesion. The model could well be used to compare antibiotic agents. However, effectiveness must necessarily be demonstrated in clinical trials because this model system uses normal skin bacteria to demonstrate the activity of the antibiotic. Something more is necessary to make pathogens grow on normal skin than is required to make normal skin bacteria grow (Ref. 23).

The type and number of organisms developing successively after the hydrating occlusive wrap is applied generally proceeds as follows: The coagulase-negative staphylococci grow in the first 48 hours expanding from 10^4 to 10^7 per square cm; by 1 week, the flora has become predominately diphtheroids. Some gram-negatives occur at the end of 1 week but do not usually predominate.

6. *Uses of the human model.* The human model has been used in several ways to study antimicrobial agents such as:

a. *Expanded flora test.* The test can evaluate broad spectrum antibiotic activity against large numbers of both gram-positive and gram-negative organisms induced by pretreatment occlusion. The expansion of flora that normally occurs when an occlusive wrap is applied to the skin is inhibited. This test differs from the occlusion test only in that plastic wrap is applied for 48 hours prior to application of antibiotic solutions. To be considered effective, a test material must destroy 99 percent of microorganisms. Bacterial counts will be consistently low only if the antibiotic is active against both gram-positive and gram-negative organisms. Only bacitracin and chloramphenicol were found to be effective at the 0.01 percent concentration level, while neomycin was effective at 0.1 percent and chlortetracycline was effective at 1.0 percent concentrations (Ref. 22).

b. *Occlusion test.* The test primarily estimates the bacteriostatic activity of an antibiotic against gram-positive microorganisms found on normal skin, showing how well the agent prevents a small number of bacteria from rapidly proliferating. Lesions are produced either by stripping with cellophane tape or by application of ammonium hydroxide, followed by inoculation with pathogenic organisms (usually staphylococci) and then covered with occlusive wrap. Lesions may be treated with a test compound after inoculation, and then inhibition of growth is observed or rapidity of healing is judged. In this test, solutions of antibiotics in water or alcohol were applied to 5-cm skin squares which were then occluded for 48 hours. Bacitracin, neomycin, and chloramphenicol were found to be markedly inhibiting at the 0.01 percent concentration (Ref. 22).

c. *Persistence test.* The test determines the reservoir effect of the antibiotic, or its ability to bind to the stratum corneum to give a prolonged effect (Ref. 22). In this test, 1 percent solutions of antibiotics were applied 3 times daily for 3 days to a 5-cm square on the forearm. After 3 days, these areas were occluded for 24 hours and then sampled for bacteria. Occlusion allows bacterial growth in the presence of the specific antibiotic being tested. The persistence of antimicrobial activity after application on the skin extends the time over which an antibiotic can exert an effect on a bacterial cell. This test is one means of measuring this characteristic in a human model.

d. *Reduction of expanded flora produced by occlusive wrapping of the site.* The inhibition of the expanded flora can be observed by application of antibiotics after sufficient time period of occlusion with the wrap. Prevention of expansion of the flora can also be used to test antibiotic activity. Antibiotic is applied to the wound or test site, and after continued occlusion, the inhibition of expansion of the flora is observed (Ref. 21). A cream containing neomycin and gramicidin was found to have eliminated staphylococci from most lesions when cultures of lesions were done 18 hours after the antibiotics was applied. Similar studies using this model have been performed with polymyxin, bacitracin, and a mixture of polymyxin and bacitracin showing that the combination polymyxin-bacitracin ointment was much more effective than either ingredient alone in preventing infections with mixed inoculum containing *Staphylococcus aureaus* and *Escherichia coli* (Ref. 24). A similar model, in which the stratum corneum was removed by producing blisters with ammonium hydroxide rather than by stripping, was described to the Panel (Ref. 24).

The method has been applied to the preliminary testing of topical antibiotics for prophylaxis, using the intact human skin of the forearm (Ref. 22). The forearm was wrapped with occlusive plastic film for 48 hours either before, during, or following application of topical antibiotic to determine the ability of the antibiotic to supress bacterial proliferation stimulated by the moist, warm environment of occlusion. Various concentrations of antibiotics were used, including 0.01, 0.1, and 1.0 percent concentrations of bacitracin, neomycin, chloramphenicol, and chlortetracycline. Immediately after removal of the plastic film, bacterial sampling of test areas was performed using the cup-scrubbing method with a detergent scrub to facilitate sampling.

To be useful and to draw valid conclusions, the similarities and dissimilarities of this or any model to the human infection must be examined.

7. *Summary.* The Panel believes that the results of studies with both animal and human models can serve useful and important purposes. However, they have also concluded that careful attention should be paid to the variables that may dramatically influence the results and therefore their applicability to clinical conclusions.

a. *Animal models.* Review of the current literature suggests, and the Panel concurs, that hamsters and guinea pigs are satisfactory experimental animals in which to consistently produce skin infection. The models discussed above appear to provide reliable test systems for evaluating both therapeutic and prophylactic effectiveness of topical antibiotics. Care must be taken, however, in comparing test results obtained in different species.

The Panel recommends that attempts be made to standardize the following variables in animal models:

(1) Location of contaminated wounds.
(2) Depth of incision.
(3) Type and quantity of inoculum.
(4) Method of inoculation.
(5) Time between inoculation and treatment.
(6) Method of culturing.
(7) Technique of treatment.
(8) Method of wound closure.
(9) System of grading infections.

The above are suggestions that should be considered. See sections under individual antibiotics and/or combinations thereof for required testing described elsewhere in this document.

In working with prophylactic surgical wound models, effort should also be made to avoid leaving necrotic tissue, foreign bodies, dead space, or hematomas that might interfere with wound healing.

b. *Human models for treatment and prophylaxis.* Review of the current literature and of unpublished data presented to the Panel leads the Panel to believe that a few satisfactory and safe model systems presently exist for producing experimental superficial infection in human skin. Successful models require disruption of the uppermost layers of the skin through either cellophane tape stripping or ammonium hydroxide blister formation.

Prophylactic effectiveness can also be evaluated using the same model by inserting a topical antibiotic into the test system between the time of bacterial inoculation and the usual appearance of clinical lesions.

A second model for testing prophylactic effectiveness includes the use of plastic wrap occlusion on normal forearm skin to induce bacterial proliferation. Application of various concentrations of antibiotic before, during, or after occlusion helps indicate the bacteriostatic and bactericidal effectiveness of a test product against both gram-positive and gram-negative microorganisms.

The Panel recognizes that no single test system can possibly encompass all therapeutic and prophylatic applications for which OTC topical antibotics are designed. Separate protocols will have to be designed to consider such variables as antibacterial spectrum and duration of antibiotic action. The Panel concludes, however, that existing or comparable model test systems in humans might be utilized in such a way that they will help to screen and validate the effectiveness of those antibiotic agents that might usefully be further tested in clinical studies.

c. *Clinical studies.* The final appraisal of topical antibiotic effectiveness must take place in a clinical setting under circumstances conforming as closely as feasible to actual circumstances in the community, and must adhere to accepted ethical standards. Animal and human models may lessen the need for extensive, time-consuming, expensive clinical trials on agents that are found to be ineffective in the model system. The Panel expects that, at a minimum, adequate clinical studies would be conducted to confirm and validate the results of model studies (if performed). For example, a small, closed population could probably be found in which the infection rate of small wounds could be determined. With adequate controls and experimental design, it could then be demonstrated whether the application of a topical antibiotic alters the normal infection rate.

A variety of strategies is available to limit the number of subjects in these clinical studies, including sequential designs and use of artificially induced wounds in volunteers (Ref. 25). It is suggested that prophylactic clinical trails in humans not be initiated unless there is sufficient evidence to suggest that they will show a beneficial effect from the tested products.

I. SAFETY OF TOPICAL ANTIBIOTICS

1. *Rationale for determination of safety factors.* Data necessary to fully assess either benefit or risk were not provided to the Panel. However, with the possible exception of neomycin, the Panel believes topical antibiotics would provide a minimal risk to the user when applied to small wounds. The Panel is aware that these preparations are intended by the manufacturer for use on small cuts, burns, and abrasions. If use in actual practice were restricted to such application, the risk from application of topical antibiotics would be minimal. However, the Panel is concerned about the misuse of OTC topical antibiotics, such as application to diaper rashes, extensive heat rashes, burns, and stasis ulcers. The absorption of significant amounts of antibiotics from certain formulations on large burns is known to occur (Ref. 1). Misuse of these products increases the risk to the patient.

Even if one assumes the risk is small, the assessment of benefit of the submitted topical antibiotic preparations is a difficult task. The Panel recognizes that topical antibiotics are often used for treatment, rather than prevention, of infection by the lay public. Therefore, the Panel divided its assessment of benefit into two categories of use: prophylactic and therapeutic.

In considering the concept of a benefit-to-risk judgment, the Panel discussed safety factors as a desirable means of arriving at an assessment of the risk. In general, the Panel endorses the statement on safety factors for topically applied antimicrobial agents as recommended by the OTC Antimicrobial I Drug Review Panel published in the FEDERAL REGISTER of September 13, 1974 (39 FR 33112). This proposal recommends a 100-fold safety factor in the applied dose.

The Panel considered the problem of testing the safety of topical preparations in animals and extrapolating the results to human use. It is difficult to obtain comparable absorption characteristics or tissue drug levels from topical studies

V42163 APR 1 77 UMI

in animals and man. The use of the blood level of the drug or its metabolite(s) may simplify this evaluation. Toxic responses can be obtained by systemic dosing that produces relatively high blood levels. If necessary, the range of blood levels produced after topical application should be determined experimentally in man and animal. The Panel expects that in most cases the lowest drug or metabolite blood level and the highest blood level found after topical application will differ and thus help establish the safety of the product.

Blood levels of antibiotics in animals can be used in the overall evaluations of "effect levels" (lowest dose that produces a toxic effect) /"no-effect levels" (highest dose that produces no toxic effect). The effect/no-effect dose levels are the result of several interrelated mechanisms: (1) absorption rate from the site of application, (2) metabolism by enzymes, (3) distribution and storage in the tissues and (4) excretion.

The Panel has concluded that it is imperative to determine safety factors from the "effect" and "no-effect" blood levels in appropriate species of animals. This may be done by direct administration of antibiotics into the blood where feasible, or by determination of blood levels after administration by another route. Following such a direct determination, blood levels after topical application should be determined in order to assess absorption factors and rates, metabolism rates, and excretion rates in case there are wide variations between topical absorption and absorption from other routes of administration in animals.

Extrapolation of the animal safety data into realistic terms for determining safe human use is one of the most complex and inexact procedures. One purpose in obtaining animal safety data is to determine the lowest concentration causing toxic effects. Studies should be conducted to determine the highest blood levels achievable in man from maximum exposure to topical application. If the blood level in man is significantly less than the toxic levels in animals, the antibiotic product may be judged safe. The Panel recognizes that the term "significantly less than the toxic blood level" is not definitive, but a meaningful, numerical factor cannot be assigned for an antibiotic or any other chemical until a complete toxicological profile has been established for that chemical. There are many factors that go into a toxicological response to a chemical that may prevent adequate definition of "significant", including metabolic rates, whether damage to a tissue is cumulative, repair rates of any damage, rate of exposure, and others. Therefore, the Panel would only recommend that the blood level of an antibiotic be significantly less than the toxic blood level and, at the time the judgment is made, all available factors be used to assess the significance in the difference in blood level.

REFERENCE

(1) Stone, H. H., L. D. Kolb, J. Pettit, and R. B. Smith, "The Systemic Absorption of an Antibiotic from the Burn Wound Surface." *The American Surgeon*, 34:639–643, 1968.

2. *Additional safety factors.* It is recognized that in some cases the blood concentrations resulting from short term topical application of a product may be far less than that which produces overt toxicity. However, blood levels are affected both by concentration and length of exposure. Therefore, all that is needed is a study that will clearly define the order of magnitude of the differences in blood levels and durations of exposure.

In those cases where there appears to be a problem, as for example, neomycin, the following tests would be recommended: appropriate dose response studies in animals, designed to determine the lowest blood level and minimum duration of exposure to an antibiotic that will cause a toxic reaction. These studies should determine both the LD_{50} and slope characteristics of a dose response curve for the most sensitive toxic effect. Parenteral administration of the antibiotic is appropriate for these studies. Both the release of the antibiotic from the topical formulation proposed, and the amount absorbed, should be determined in animals and humans.

From the tests mentioned above, the "effect levels" (lowest dose that produces a toxic effect) and the "no-effect levels" (highest dose that produces no toxic effect) in animals, can be determined as well as the blood level associated with normal human exposure. Comparison of these values allows estimation of any potential risk.

In vitro susceptibility testing. When an antibiotic is prescribed for parenteral or oral administration, a clinical specimen, e.g., urine, blood, or other specimen is taken and cultured to isolate bacteria and perform a series of susceptibility tests to determine what antibiotic is appropriate. As the use of topical antibiotics has developed, attempts to cover most types of organisms that may cause topical or superficial infections have been made. Frequently, this is done by combining more than one antibiotic in a formulation. As a consequence, when a topical infection is diagnosed, the assumption is made that one of the antibiotics is active against the infecting organism. The result of this procedure is that cultures and susceptibility testing are rarely done by the clinician. However, adequate testing procedures are necessary if controlled clinical studies are performed. One essential requisite of a controlled study of topically applied antibiotics is the proper performance of susceptibility testing.

In vitro susceptibility testing of clinical isolates from infected tissues to antibiotics is commonly performed on specimens from systemic infections and more rarely on specimens from superficial or topical infections.

This testing procedure most often determines, in a tube of liquid agar medium or an agar plate, whether the organism from the site of infection (clinical isolate) is susceptible to (can be killed or inhibited by) the concentration of antibiotic that is found in the blood or in the specific tissue being treated. after administration of the dose of the antibiotic drug. Organisms that are not susceptible to this specified concentration are said to be resistant.

As it became obvious that some organisms were resistant or became resistant to antibiotics, mechanisms for determining the degree of resistance were developed. The basic procedure is to use a standardized inoculum against serial dilutions of the antibiotic. This is often time-consuming so it has been simplified by using a standardized inoculum seeded on the petri plate onto which is placed a paper disc containing a specific quantity of antibiotic. A specific zone diameter measured on the plate can be used as a predictor of the minimal inhibitory concentration.

As the procedures for performing susceptibility tests were widely adopted, both the dilution and the disc procedures were increasingly used to predict susceptibility to specific antibiotics. As the number of antibiotics to be tested expanded greatly, not only did the number of discs greatly increase, but in some cases, both high and low content discs were used.

As a result of several collaborative studies, to avoid the confusion of previous methods, a uniform disc procedure was adopted. This currently accepted procedure is referred to as the Official Susceptibility Testing Procedure and is identified in the regulations as the certification procedure for antibiotic sensitivity discs (21 CFR 460.1).

The central concept of this proposal is that only one disc is chosen to represent, and therefore predict, the susceptibility of a specific isolate to a family of antibiotics. The selection of the specific disc and content of antibiotic was carefully done and was based on large amounts of computer-generated data.

The Panel has recognized that cultures are not routinely taken, identified, or tested for susceptibility in superficial infections. If they are performed, the Panel concludes that the official susceptibility testing procedure mentioned above should be utilized.

The Panel also recognizes that other procedures—including automated tube dilution (serial) determination of minimal inhibitory concentrations, the use of laser beams, or use of radioactive substrates—are being developed for susceptibility testing.

3. *Incidence of complaints.* It has been argued that because of the low incidence of consumer complaints, it can be concluded that OTC topical antibiotics are safe and effective. Consumer complaints reaching pharmaceutical manufacturers concerning adverse reactions or lack of effectiveness of a product are often collected and studied. The number of such complaints, compared to the total number of product units sold, is reported as a ratio of adverse reactions per million product units sold. Industry traditionally regards the "incidence" of complaints as a sensitive index of both product safety and consumer acceptance of a product. If complaints about a product become too numerous, the product may be withdrawn from the market.

However, although adverse reactions voluntarily reported to manufacturers have some utility, they suffer from the following deficiencies:

a. The actual number of adverse drug reactions occurring is not known, i.e., the amount not reported is not available.

b. It is not always clear if the reaction is linked to the agent by the user, particularly if the reaction is delayed or unusual.

c. Persons may not be motivated to write letters of complaint, or may not know where to write.

d. No central registry combining reports of all manufacturers has been established:

e. In addition to incomplete ascertainment of the incidence of complaints, there is also lack of knowledge of the size of the population at risk, which often can only be estimated using sales data.

f. Validation of the reports is usually not carried out.

Nevertheless, serious and very frequent adverse drug reactions may be recognized by these systems although accurate quantification by means of incidence rates is impossible.

For topical antibiotics, the overall "incidence" of adverse reaction complaints recieved by industry is extremely low, calculated to be 0.68 per million units sold, with variation between products of 0.11 to 1.75 per million. The overall incidence of complaints concerning lack of effectiveness is 0.12 per million, ranging from 0.07 to 0.28 per million. Most complaints have referred to a "stinging" or "irritation." Poison control statistics for the years 1968–1973 have revealed 1,841 inquiries per year concerning ingestion of topical antibiotic products by children, with no serious injury or need of hospitalization (Ref. 1). Although pharmaceutical manufacturers realize that not all consumer complaints are reported, they still consider topical antibiotics to have a remarkably good record of safety and effectiveness.

However, the Panel suspects that most consumers and physicians do not take either the time or effort to report adverse reactions or treatment failures from OTC drug products to the manufacturers.

J. LABELING OF OTC TOPICAL ANTIBIOTIC PRODUCTS

The Panel reviewed the general and specific labeling requirements previously adopted by FDA for OTC topical antibiotic preparations (21 CFR 369.20). These requirements provide for labeling information concerning the identity of ingredients, directions for use, and general and specific warnings. The Panel concurs that these requirements are appropriate for OTC topical antibiotic preparations and the labeling is discussed below.

After review of all labels of OTC topical antibiotic preparations submitted, the Panel recommends the following:

1. *Indications.* The indications for use of a topical antibiotic preparation should be simple and clearly stated. If the product is used for specific indications, such as first-aid in small superficial skin wounds including cuts, abrasions, and burns, the label should so state. The directions for use should provide the user with a reasonable expectation of the results anticipated from use of the product. Statements of indications for use should be specific and confined to the conditions the product is recommended for, such as small and superficial skin wounds, cuts, or abrasions. No reference should be made, or implied, regarding the alleviation or relief of symptoms unrelated to the indication (condition) for use of the product, e.g., hand eczema, leg ulcers, diaper rash, and extensive burns.

Effectiveness must be defined without vague or unsupported claims. Phrasing that promises general benefits such as improved healing, or warns against the hazards of superficial skin wounds, is unproven and thus unacceptable. Undocumented claims that topical antibiotics aid or hasten healing are not supported by present scientific evidence and thus are not acceptable.

The Panel recognizes that certain treatment claims for skin wound antibiotics may be proposed for labeling, following completion of studies to establish prophylactic and therapeutic effectiveness. One such conceivable claim would be "for the prevention and treatment of impetigo." The Panel concludes that such a claim would be acceptable, but only after the effectiveness of a topical antibiotic for this claim has been conclusively established in controlled, double-blinded studies, as outlined elsewhere in this document.

2. *Ingredients.* Topical antibiotic products should contain only active ingredient(s), plus such inactive ingredients as are necessary for formulation. While the label should state in metric units the quantity of each active ingredient, this is not always a simple task with topical antibiotics. References are made in this document to activity or potency in terms of units and micrograms (mcg). The activity assigned to each unit or mcg is equivalent to an International Unit if such has been defined by the World Health Organization. The units of potency set forth in the United States Pharmacopeia, except in a few instances, are identical to the International Units. The terms applied to the antibiotics reviewed in this document, as to the activity (potency) assigned or contained in a specific amount of a standard, are defined in the discussion of specific antibiotics. In some cases, the FDA units have been equivalent to an International Unit for the same antibiotic and in others, not. Both bacitracin and polymyxin B are defined in terms of units, while most other antibiotics are defined in terms of micrograms.

The Panel strongly recommends that all inactive ingredients be listed since the consumer may need this information for a variety of reasons. However, the product should not be promoted for therapeutic claims on the basis of its inactive ingredients. The label should indicate which ingredients are the inactive ones.

3. *Directions for use.* The label should read: "After gentle washing, apply a small amount (an amount equal to the surface area of the tip of a finger) directly to the affected area and cover with sterile gauze if desired. May be applied 1 to 3 times daily."

4. *Warnings.* The Panel has reviewed the current regulation (21 CFR 369.20) regarding labeling of antibiotics for external use for prevention of infection which states:

Caution—In case of deep or puncture wounds or serious burns consult physician. If redness, irritation, swelling, or pain persists or increases or if infection occurs, discontinue use and consult physician. Do not use in the eyes.

The use of topical antibiotic preparations "in deep puncture wounds" is of special concern to the Panel. Therefore, the Panel endorses this warning and the prohibition of use. The reason for this is that it is extremely difficult to place the antibiotic into the recesses of such a wound. In fact, it would be strictly a topical application and the patient may be lulled into a false sense of security. Additionally, the Panel strongly recommends that deep puncture wounds should be treated by a physician so that adequate protection against tetanus may be achieved.

Labels of topical antibiotic preparations should also specifically state:

a. "Do not use on long-standing skin conditions such as leg ulcers, diaper rash or hand eczema."

b. "If itching, redness, swelling, or pain develops or increases, it may be a sign of infection or alergy. Stop use and see a physician." To avoid redundancy, this phrase may be merged with the broader caution set forth above under item a.

c. "Do not use longer than 1 week."

The reason for this last recommendation is that most small, superficial skin wounds including burns, cuts, and abrasions will heal almost completely within 1 week. The Panel is concerned that continued use of a topical antibiotic preparation on an unhealed lesion may delay diagnosis and treatment of a more serious skin disease, e.g., a spreading deep bacterial infection, or a wound contaminated with foreign debris such as glass.

5. *Category II labeling.* The Panel concludes that the use of some labeling claims are unsupported by scientific data and, in some instances, by sound theoretical reasoning. The following phrases are misleading and confusing to the consumer and unacceptable for labeling of skin wound protectants and antibiotics for skin wound treatment:

V42163 APR 1 77 UMI

a. *"Helps kill bacteria."* Unless determination of the antibacterial properties of the specific antibiotic are made with obective in vitro or in vivo testing, claims of activity must not be made. Qualification of whether the activity is helped or not is misleading.

b. *"Is not an uncommon sensitizer."* The Panel believes the phraseology used in the above claim is extremely confusing. Due to the use of a double negative, the average consumer could possibly interpret this statement to mean a drug that commonly sensitizes or, conversely, one that never sensitizes.

Since the intent of this Panel is to assure clarity in the meaning of these claims and since the phrase mentioned above is confusing and vague, the above claim will be considered misleading.

c. *"Antiseptic."* Within the scientific community, and also as set forth and published in the FEDERAL REGISTER of September 13, 1974 (39 FR 33114), the term "antiseptic" is defined. These are often synthetic chemicals, often used in fairly high concentration, which have antimicrobial activity and in use prevent infection. In contrast, an antibiotic is defined as a chemical derived from a microorganism that has antimicrobial activity in low concentrations and may be used to prevent or treat infection. The Panel is concerned, as it attempts to set standards in this area, that terms and claims not be ambiguous or have dual meanings. This is the case with the term antiseptic, which should refer only to synthetic chemicals and should not be used to refer to antibiotics.

d. *"Aids, speeds, helps, augments, or hastens healing" (or any term or phrase that suggests that there can be decreased healing time from application of an antibiotic-containing product on various cuts, wounds, or abrasions).* These claims imply to the consumer that antibacterial products may play a primary role in the healing process and can shorten healing time. However, they generally act only to remove high numbers of pathogenic microorganisms from the wound that might slow the healing process. This action allows the body's healing processes to follow their normal course. Probably no ingredients reviewed directly improve healing as the claims imply; therefore, the Panel concludes these or similar phrases are not only false but also misleading.

6. *Classification of topical antibiotics.* The Panel reviewed all active ingredients that were the subject of submissions made to the Panel pursuant to the standards for safety, effectiveness, and truthful labeling set out in the OTC drug review regulations (21 CFR 330.10).

In accordance with the regulations, the Panel's findings with respect to these ingredients are set forth in three categories:

Category I. Conditions under which topical antibiotic products are generally recognized as safe and effective and are not misbranded.

Category II. Conditions under which topical antibiotic products are not generally recognized as safe and effective or are misbranded.

Category III. Conditions for which the available data are insufficient to permit final classification at this time.

The following classification of topical antibiotic ingredients as skin wound protectants or skin wound antibiotic preparations (see table below) was developed by the Panel in an attempt to simplify categorization of ingredients and eliminate labeling confusion:

Summary of findings for topical antibiotics—Categorization

Antibiotic ingredient (used alone)	Skin wound protectant	Skin wound antibiotics	Susceptible bacteria
Bacitracin	I	III	Gram-positive.
Gramicidin [1]	III	III	Do.
Neomycin [2]	III	III	Gram-positive and some gram-negative.
Polymyxin B [1]	I	III	Gram-negative.
Tetracyclines.	I	III	Gram-positive and some gram-negative.

[1] Toxicological data are insufficient to permit final classification.
[2] Sensitization data are insufficient to permit final classification.
[3] Only to be allowed in combination products containing other antibiotics since, when used alone, may provide selective growth of gram-positive bacteria.

III. SKIN WOUND PROTECTANTS

A. GENERAL DISCUSSION

The Panel has determined that a given antibiotic ingredient may be in Category I for one set of conditions or label claims and in Category III for another set of conditions or label claims.

The antibiotics specified as Category I for use as a skin wound protectant are generally recognized to be safe and effective for this use. A skin wound protectant is a safe, nonirritating preparation applied to small cleansed wounds which provides a protective physical barrier, conforming to the barrier testing for skin wound protectants described in the FEDERAL REGISTER of September 13, 1974 (39 FR 33140), and may also include a chemical (antibiotic), which neither delays healing nor favors the growth of microorganisms. For example, the Panel visualizes that a skin wound should be gently cleansed as the initial treatment by the patient as soon after the wound occurs as possible. Following this, an antibiotic preparation in ointment form may be placed on the wound to prevent contamination with extraneous matter, including bacteria. The action of the preparation is one of a physical barrier. The role of the antibiotic in such a preparation is to aid the vehicle in its protective function. If extraneous matter contacting the protectant antibiotic preparation contains bacteria, the product will protect from further contamination of the wound and help prevent microbial proliferation. Such a preparation should not encourage the growth of organisms.

The Panel believes that claims for prevention of infection or treatment of infection have not been adequately demonstrated. Note that in the use described as skin wound protectant, the Panel attempted to differentiate between protection against bacterial contamination and infection. The Panel agrees that infection cannot occur without bacterial contamination, but the latter may occur without the former.

An antibiotic added to a product labeled as a skin wound protectant may contribute to the effectiveness by preventing the contamination of a wound with organisms introduced from the environment or by preventing the growth of organisms in the formulations. The Panel recognizes that the same antibiotic in a formulation labeled for prophylaxis or treatment of skin wounds would also have these attributes, but in addition, clinical effectiveness for these indications must be demonstrated prior to labeling of these products for Category I.

B. CATEGORIZATION OF DATA

1. *Category I conditions under which topical antibiotic ingredients are generally recognized as safe and effective as skin wound protectants and are not misbranded.*

Category I active ingredients. The active ingredients generally recognized as safe and effective for use as skin wound protectants and not misbranded are:

Bacitracin
Polymyxin B sulfate
Tetracyclines:
- Chlortetracycline hydrochloride
- Oxytetracycline hydrochloride
- Tetracycline hydrochloride

a. *Bacitracin.* The Panel concludes from its review of the toxicity data in the literature and the submissions to the Panel that bacitracin is safe and effective for topical use in small superficial wounds as a skin wound protectant. Potency (activity) of bacitracin consists of three parts: the unit of potency, which is contained in 13.51 mcg of the bacitracin master standard as specified in 21 CFR 430.6(a)(2); the potency of the bulk antibiotic, which is not less than 40 units of bacitracin per mg as specified in 21 CFR 448.10a(a)(1)(i) (a proposal has been published in the FEDERAL REGISTER of July 16, 1976 (41 FR 29413) raising the potency for topical use to 50 units per mgm); and at least one example of the potency in a finished ointment dosage form, which in this case is 500 units of bacitracin per gm of finished dosage form when formulated into a topical dosage form, as specified in 21 CFR 448.510a(a)(1). The reader is referred to the discussion of bacitracin as a skin wound antibiotic under Category III. (See part IV. paragraph B.3.a. below—Bacitracin.)

(1) *Dosage.* Topical ointment dosage, for both adults and children, should be not less than 500 units of bacitracin per gm of finished ointment dosage form. The amount applied should be sufficient to cover the affected area with a thin layer, not more than 0.5 gm (an amount equal to the surface area of the tip of a finger), 1 to 3 times daily with no maximum daily dosage.

(2) *Labeling.* The Panel recommends the Category I labeling for skin wound protectant ingredients. (See part III. paragraph B.1. below—Category I Labeling.)

b. *Polymyxin B sulfate.* The Panel concludes from its review of the toxicity data in the literature and the submissions to the Panel that polymyxin B sulfate is safe and effective when used in combination with other Category I OTC topical antibiotics for topical use in small superficial wounds as a skin wound protectant. Potency (activity) of polymyxin B consists of three parts: the unit of potency, which is contained in 0.1274 mcg of the polymyxin B master standard as specified in 21 CFR 430.6(a)(4); the potency of the bulk antibiotic, which is not less than 6,000 units of polymyxin B per mg of polymyxin B sulfate on an anhydrous basis, as specified in 21 CFR 448.30a(a)(1); and at least one example of the potency in a finished ointment dosage form in combination with other antibiotics, as specified in 21 CFR 444.542e, which contains polymyxin B sulfate at a variety of potency levels, but generally in the 4,000 to 5,000 unit per gm range (there are no dosage forms certified for polymyxin B sulfate as a single ingredient other than as a urethral irrigant).

It must be recognized that polymyxin B sulfate has a very limited antimicrobial spectrum, which does not include the gram-positive staphylococci or streptococci which commonly infect superficial skin wounds. It should be fully understood that the Panel concludes that polymyxin B sulfate should not be used alone as a single ingredient in a topical preparation for skin wounds, since it may allow selective growth of gram-positive bacteria. This is discussed in the combination section elsewhere in this document. (See part V. paragraph B. below—Classification of Combination Products.) When combined with other antibiotics, polymyxin B sulfate may significantly broaden the spectrum of antimicrobial activity of the product and increase the barrier effect against microorganisms. Despite reports of renal toxicity resulting from injections of polymyxin B sulfate (Ref. 1), the Panel can find no evidence to suggest toxicity from absorption of polymyxin B sulfate through the skin. The reader is referred to the discussion of polymyxin B sulfate as a skin wound antibiotic under Category III. (See part IV. paragraph B.3.d. below—Polymyxin B.).

(1) *Dosage.* Topical ointment dosage, for both adults and children, should be 4,000 to 5,000 units of polymyxin B per gm of finished ointment dosage form when used in combination. The amount applied should be sufficient to cover the affected area with a thin layer, not more than 0.5 gm (an amount equal to the surface area of the tip of a finger), 1 to 3 times daily with no maximum daily dosage.

(2) *Labeling.* The Panel recommends the Category I labeling for skin wound protectant ingredients. (See part III. paragraph B.1. below—Category I Labeling.)

c. *Tetracycline preparations (chlortetracycline hydrochloride, oxytetracycline hydrochloride, tetracycline hydrochloride).* The Panel concludes fom its review of the literature and submissions to the Panel that tetracycline preparations are safe and effective for topical use as a skin wound protectant for small, superficial wounds.

Potency (activity) of chlortetracycline hydrochloride consists of three parts: the unit of potency, which is contained in 1.0 mcg of the chlortetracycline master standard as specified in 21 CFR 430.6(b)(3); the potency of the bulk antibiotic, which is not less than 900 mcg chlortetracycline per mg of chlortetracycline hydrochloride as specified in 21 CFR 446.10a(a)(1); and at least one example of the potency in a finished ointment dosage form in combination with other antibiotics, as specified in 21 CFR 444.542e, which contains polymyxin B sulfate at a variety of potency levels, but generally in the 4,000 to 5,000 unit per gm range (there are no dosage forms certified for polymyxin B sulfate as a single ingredient other than as a urethral irrigant).

It must be recognized that polymyxin B sulfate has a very limited antimicrobial spectrum, which does not include the gram-positive staphylococci or streptococci which commonly infect superficial skin wounds. It should be fully understood that the Panel concludes that polymyxin B sulfate should not be used alone as a single ingredient in a topical preparation for skin wounds, since it may allow selective growth of gram-positive bacteria. This is discussed in the combination section elsewhere in this document. (See part V. paragraph B. below—Classification of Combination Products.) When combined with other antibiotics, polymyxin B sulfate may significantly broaden the spectrum of antimicrobial activity of the product and increase the barrier effect against microorganisms. Despite reports of renal toxicity resulting from injections of polymyxin B sulfate (Ref. 1), the Panel can find no evidence to suggest toxicity from absorption of polymyxin B sulfate through the skin. The reader is referred to the discussion of polymyxin B sulfate as a skin wound antibiotic under Category III. (See part IV. paragraph B.3.d. below—Polymyxin B.).

(1) *Dosage.* Topical ointment dosage, for both adults and children, should be 4,000 to 5,000 units of polymyxin B per gm of finished ointment dosage form when used in combination. The amount applied should be sufficient to cover the affected area with a thin layer, not more than 0.5 gm (an amount equal to the surface area of the tip of a finger), 1 to 3 times daily with no maximum daily dosage.

(2) *Labeling.* The Panel recommends the Category I labeling for skin wound protectant ingredients. (See part III. paragraph B.1. below—Category I Labeling.)

c. *Tetracycline preparations (chlortetracycline hydrochloride, oxytetracycline hydrochloride, tetracycline hydrochloride).* The Panel concludes fom its review of the literature and submissions to the Panel that tetracycline preparations are safe and effective for topical use as a skin wound protectant for small, superficial wounds.

Potency (activity) of chlortetracycline hydrochloride consists of three parts: the unit of potency, which is contained in 1.0 mcg of the chlortetracycline master standard as specified in 21 CFR 430.6(b)(3); the potency of the bulk antibiotic, which is not less than 900 mcg chlortetracycline per mg of chlortetracycline hydrochloride as specified in 21 CFR 446.10a(a)(1); and at least one example of the potency in a finished ointment dosage form, which in this case is not less than 1 mg of chlortetracycline hydrochloride per gm of finished ointment, as specified in 21 CFR 446.510a(a)(1).

Potency (activity) of oxytetracycline hydrochloride consists of three parts: the unit of potency, which is contained in 1.13 mcg of the oxytetracycline master standard as specified in 21 CFR 430.6(b)(24); the potency of the bulk antibiotic, which is not less than 835 mcg of oxytetracycline per mg of oxytetracycline hydrochloride on an anhydrous basis as specified in 21 CFR 446.67a(a)(1); and at least one example of the potency in a finished ointment dosage form, which in this case is not less than 30 mg of oxytetracycline per gm of finished ointment, as specified in 21 CFR 446.567b(a)(1).

Potency (activity) of tetracycline hydrochloride consists of three parts: the unit of potency, which is contained in 1.0 mcg of the tetracycline master standard as specified in 21 CFR 430.6(b)(5); the potency of bulk antibiotic which is not less than 975 mcg of tetracycline per mg of tetracycline hydrochloride as specified in 21 CFR 446.80(a)(1); and at least one example of the potency in a finished ointment dosage form, which in this case is not less than 15 mg of tetracycline hydrochloride per gm of an ointment as specified in 21 CFR 446.581a(a)(1).

The reader is referred to the discussion of tetracycline preparations as antibiotics for skin wound treatment under Category III. (See part IV. paragraph B.3.e. below—Tetracyclines (chlortetracycline hydrochloride, oxytetracycline hydrochloride, tetracycline hydrochloride).)

(1) *Dosage.* Topical ointment dosage, for both adults and children, should be not less than 1 mg of chlortetracycline hydrochloride per gm of finished ointment dosage form, not less than 30 mg of oxytetracycline per gm of finished ointment dosage form and not less than 15 mg of tetracycline hydrochloride per gm of finished ointment dosage form. The amount applied should be sufficient to cover the affected area with a thin layer, not more than 0.5 gm (an amount equal to the surface area of the tip of a finger), 1 to 3 times daily with no maximum daily dosage.

(2) *Labeling.* The Panel recommends the Category I labeling for skin wound protectant ingredients. (See part III. paragraph B.1. below—Category I Labeling.)

Category I labeling. The Panel recommends the following Category I labeling for topical skin wound protectant active ingredients to be generally recognized as safe and effective and not misbranded. Any phrase that is in the definition for that product category or any of the following additional terms may be used:

a. *Indications.* (1) "First-aid product."
(2) "First-aid for small (minor) cuts, abrasions, and burns."
(3) "Protects wounds."
(4) "Protectant."
(5) "Protectant for small (minor) cuts, abrasions, and burns."
(6) "Protects against wound contamination."

b. *Directions for use.* The labeling shall state: "After gentle washing, apply a small amount (an amount equal to the surface area of the tip of a finger) directly to the affected area and cover with sterile gauze if desired. May be applied 1 to 3 times daily."

c. *Warnings.* (1) *"Caution:* In case of deep or puncture wounds or serious burns see a physician."
(2) "Do not use longer than 1 week."
(3) "If itching, redness, swelling, or pain develops or increases, it may be a sign of infection or allergy. Stop use and see a physician."
(4) "Do not use in the eyes."
(5) "Do not use on long-standing skin conditions such as leg ulcers, diaper rash, or hand eczema."

2. *Category II conditions under which topical antibiotic products are not generally recognized as safe and effective or are misbranded.*

Category II active ingredients. None listed.

Category II labeling. The Panel concludes that the use of some labeling claims are unsupported by scientific data, nor in some instances by sound theoretical reasoning, and are discussed elsewhere in this document. (See part II. paragraph J.5. above—Category II Labeling.) The Panel classifies the following as Category II labeling claims for skin wound protectant ingredients:

a. "Helps kill bacteria."
b. "Is not an uncommon sensitizer."
c. "Antiseptic."
d. "Aids, speeds, helps, augments, or hastens healing" (or any term or phrase which suggests that there can be decreased healing time resulting from application of an antibiotic-containing product on various cuts, wounds, or abrasions).

3. *Category III conditions for which the available data are insufficient to permit final classification at this time.*

Category III active ingredients. The Panel concludes that available data are

V42163 APR 1 77 UMI

insufficient to permit final classification of the following claimed topical skin wound protection ingredients:

Gramicidin D
Neomycin sulfate

a. *Gramicidin.* The Panel concludes that it has insufficient data to determine whether gramicidin is safe for use in small superficial wounds as a skin wound protectant.

Potency (activity) of gramicidin consists of three parts: the unit of potency, which is contained in 1.0 mcg of the gramicidin master standard as specified in 21 CFR 430.6(b)(17); the potency of the bulk antibiotic, which is not less than 900 mcg of gramicidin per mg as specified in 21 CFR 448.25(a)(1); and at least one example of the potency in a finished ointment dosage form, which in this case is certified only for combinations at 0.25 mg of gramicidin per gm of ointment, as specified in 21 CFR 444.542f (a)(1). Reference is made to the discussion of gramicidin as a skin wound antibiotic under Category III. (See part IV. paragraph B.3.b. below—Gramicidin.)

(1) *Dosage.* Topical ointment dosage for both adults and children should be 0.25 mg of gramicidin per gm of finished ointment dosage form when used in combination. The amount applied should be sufficient to cover the affected area with a thin layer, not more than 0.5 gm (an amount equal to the surface area of the tip of a finger), 1 to 3 times daily with no maximum daily dosage.

(2) *Labeling.* The Panel recommends the Category I labeling for skin wound protectant ingredients. (See part III. paragraph B.1. above—Category I Labeling).

b. *Neomycin sulfate.* After careful review of all data submitted, as well as additional evidence provided by the Food and Drug Administration, consultants to the Panel, and an extensive literature search, the Panel concludes that it has insufficient data to determine whether neomycin sulfate is safe for use in small, superficial wounds as a skin wound protectant. These questions include a concern for sensitization and cross-sensitivity and the development of resistance and cross-resistance. This will be discussed in the section on neomycin sulfate as a topical skin wound antibiotic elsewhere in this document. (See part IV. paragraph B.3. below—Neomycin.)

Potency (activity) of neomycin consists of three parts: the unit of potency, which is contained in 1.429 mcg of the neomycin master standard as specified in 21 CFR 430.6(b)(20); the potency of the bulk antibiotic, which is not less than 600 mcg of neomycin per mg of neomycin sulfate as specified in 21 CFR 444.42a(a)(1); and at least one example of the potency of a finished ointment dosage form, which in this case is not less than 5 mg neomycin sulfate (equivalent to 3.5 mg neomycin base) per gm of neomycin sulfate ointment as specified in 21 CFR 444.542a(a)(1). Data for neomycin sulfate are lacking in two areas: (1) the allergic sensitizing potential and the possibility of cross-sensitivity of neomycin sulfate during short-term use on small cuts, burns, abrasions and (2) development of resistance and cross-resistance. (See part IV. paragraph B.3.c.—Neomycin sulfate.)

(1) *Dosage.* Topical ointment dosage for both adults and children should be not less than 5 mg neomycin sulfate (equivalent to 3.5 mgm neomycin base) per gm of finished ointment dosage form. The amount applied should be sufficient to cover the affected area with a thin layer, not more than 0.5 gm (an amount equal to the surface area of the tip of a finger), 1 to 3 times daily, with no maximum daily dosage.

(2) *Labeling.* The Panel recommends the Category I labeling for skin wound protectant ingredients. (See part III. paragraph B.1. above—Category I Labeling.)

Category III labeling. None listed.

IV. Skin Wound Antibiotics

A. General Discussion

The Panel recognizes that topical antibiotics are often used for treatment rather than prevention of infection by the lay public.

The Panel has defined the product category, Skin Wound Antibiotic to be "a safe non-irritating antibiotic-containing preparation which prevents or treats overt skin infection." The role of the antibiotic in such a preparation is to prevent or treat an infection in a small cut, wound, or abrasion. Claims stating or implying these effects against microorganisms must be supported by controlled human studies that demonstrate effectiveness in such treatment.

Sufficient data to prove effectiveness of topical antibiotics for treatment of infected wounds or prevention of such infections are lacking and the Panel has placed these ingredients in Category III. The type of studies to prove effectiveness are discussed below. (See part VI. below—General Guidelines for Safety and Effectiveness Evaluation of Topical Antibiotics.)

B. Categorization of Data

1. *Category I conditions under which antibiotic ingredients for skin wound antibiotics are generally recognized as safe and effective and are not misbranded.*

Category I active ingredients. None listed.

Category I labeling. The Panel recommends the following Category I labeling for topical skin wound antibiotic active ingredients to be generally recognized as safe and effective and not misbranded. Any phrase that is in the definition for that product category or any of the following additional terms may be used:

a. *Indications.* (1) "Decreases bacteria".

(2) "Helps prevent or guard against skin infection".

(3) "Helps reduce the risk (and/or chance) of infection".

(4) "Helps reduce the number of bacteria on the treated area".

(5) "Helps protect wounds against infection".

(6) "First-aid product".

(7) "Broad spectrum (if applicable)".

(8) "Treats infection".

(9) "Antibiotic medication for skin wounds".

(10) Any phrase in the definition of a skin wound protectant.

The Panel believes that the terms listed above are necessary so that OTC drugs will have labeling that is truthful and can be easily understood by consumers.

b. *Directions for use.* The labeling shall state: "After gentle washing, apply a small amount (an amount equal to the surface area of the tip of a finger), directly to the affected area and cover with sterile gauze if desired. May be applied 1 to 3 times daily".

c. *Warnings.* (1) "*Caution:* In case of deep or puncture wounds or serious burns see a physician".

(2) "Do not use longer than 1 week".

(3) "If itching, redness, swelling or pain develops or increases, it may be a sign of infection or allergy. Stop use and see a physician".

(4) "Do not use in the eyes".

(5) "Do not use on long-standing skin conditions such as leg ulcers, diaper rash, or hand eczema".

2. *Category II conditions under which antibiotic ingredients for skin wound antibiotics are not generally recognized as safe and effective and are misbranded.*

Category II active ingredients. None listed.

Category II labeling. The Panel concludes that the use of certain labeling claims are unsupported by scientific data, nor in some instances by sound theoretical reasoning, and are discussed elsewhere in this document. (See part II. paragraph J.5. above—Category II Labeling.)

The Panel classifies the following as Category II labeling claims for skin wound antibiotic ingredients:

a. "Helps kill bacteria."

b. "Is not an uncommon sensitizer."

c. "Antiseptic."

d. "Aids, speeds, helps, augments, or hastens healing" (or any term or phrase which suggests that there can be decreased healing time resulting from application of any skin wound antibiotic product on various cuts, wounds, or abrasions).

3. *Category III conditions for which the available data are insufficient to permit final classification for skin wound antibiotics at this time.*

Category II active ingredients. The Panel concludes that available data are insufficient to permit final classification of the following claimed topical skin wound antibiotic ingredients:

Bacitracin;
Gramicidin D;
Neomycin sulfate;
Polymyxin B sulfate; and
Tetracyclines (chlortetracycline hydrochloride, oxytetracycline hydrochloride, tetracycline hydrochloride).

a. *Bacitracin.* The Panel concludes that while bacitracin is safe in the potency used as a skin wound antibiotic for application on small areas of the body, there are insufficient data to permit final classification of its effectiveness for use as an OTC skin wound antibiotic. Details of the deficiencies are explained below.

The antibiotic, bacitracin, was first isolated in 1943 by Johnson, Anker, and Meleney. It is produced by a strain of *Bacillus subtilis.*

Chemically, bacitracin is a mixture of polypeptides and has a molecular weight of approximately 1,460. As produced, bacitracin approaches 80 percent purity, with a potency between 40 and 50 units/mgm. Bacitracin, prepared as a zinc salt in petrolatum base, is stable (Ref. 1). The zinc apparently potentiates the action of this antibiotic (Ref. 2). It is unstable in water-containing preparations, and this should be considered when formulating products (Ref. 1).

The mode of action of bacitracin is to interfere with cell wall synthesis of the infecting organism. Mucopeptide linkage is prevented, there is accumulation of nucleotides, and no cell wall formation occurs. The activity is bactericidal. Susceptible organisms are gram-positive cocci, bacilli and corynebacteria. The beta-hemolytic Group A *Streptococcus* is extremely susceptible. Bacitracin is active against penicillin-resistant staphylococci. Gram-negative rods are not affected.

Although bacitracin demonstrates a mode of action like vancomycin and ristocetin, there is no cross reaction with these compounds. Synergism has been observed with penicillin, streptomycin, and neomycin, and occasionally, with tetracyclines and chloramphenicol (Ref. 3).

The development of resistance is poorly identified since laboratory determination of resistance is not normally performed for localized topical infections. There is no known cross resistance to other antibiotics.

The development of resistance to bacitracin is rare and poses no problem for OTC use.

(1) *Safety.* There was only a limited amount of basic toxicological data on bacitracin presented to the Panel. The drug, when administered parenterally to humans, in fairly high doses (200,000 units) for several days, does have nephrotoxic effects (Ref. 3). The evidence in experimental animals to date indicates nephrotoxicity from high doses, but the degree, type, and reversibility of the effect varies greatly with animal species and perhaps with the lot or batch of drug (Ref. 3). Oral administration of bacitracin in doses up to 240,000 units daily in adult humans was not accompanied by side effects or local irritation of gastrointestinal mucosa, and showed virtually no absorption (Ref. 3). Local application to the eyes in solution or ointment form caused no irritation (Ref. 3). It was reported that 5,000 units of bacitracin per ml caused retardation of epithelial regeneration in the eye, but no confirming data were presented (Ref. 4).

It is the Panel's opinion that no potential for harm exists when bacitracin is used on small wounds such as small cuts, abrasions, or burns. When bacitracin is used on large wounds or on large occluded areas there are no data to show the extent of absorption. The Panel recommends no further toxicological work if use is restricted to small areas of application.

BACITRACIN ALLERGY

Literature available to this Panel regarding bacitracin allergy comes predominantly from Europe and relates chiefly to the question of cosensitization with neomycin.

Scandinavian authors, Pirila and coworkers (Refs. 5 through 8) and Hjorth (Ref. 9) have reported frequent cross-sensitivity between neomycin and bacitracin. The concept of cross-sensitivity was defined in the section under neomycin. (See part IV. paragraph B.3.c.—Neomycin sulfate).

Derzavis, Rice, and Leland (Ref. 10) observed one case of dermatitis from bacitracin among 138 patients treated with bacitracin ointment.

In 1959, Pirila and Rouhunkoski (Ref. 6) reported 96 patients allergic to a 10 percent solution of bacitracin.

While combined sensitivity (occurring to both drugs at the same time) has been reported as a frequent experience in Europe, it was noted in 1963 by Epstein and Wenzel (Ref. 11), that only seven out of 173 North American dermatologists reported that they had observed sensitivity to bacitracin in neomycin-allergic patients. Epstein and Wenzel note that combined sensitivity to neomycin and bacitracin was often observed in Finland, Denmark, and Norway, but not in Sweden and other countries (Ref. 11). These authors, quoting Danbolt and Hellerstrom (Ref. 11), suggest that the differences are due to the fact that these antibiotics were sold over-the-counter in Norway, Denmark, and Finland, but not in Sweden. The antibiotic ointments most commonly used in Finland and Denmark contained both neomycin and bacitracin. Epstein and Wenzel believed that independent sensitization to both neomycin and bacitracin was a more plausible explanation for this discrepency than cross-sensitivity.

Coumaish (Ref. 12) presented a patient who developed an anaphylactoid systemic reaction (very serious allergic or sensitization type reaction) on three occasions following the topical application of neomycin and bacitracin (without enzymes) to a varicose ulcer.

Roupe and Strannegard (Ref. 13) reported a case of anaphylactic shock following topical application of an ointment containing bacitracin and neomycin in a 14-year-old girl. Anti-bacitracin antibodies were demonstrated in the patient's serum. Both cases involved large areas of skin that were particularly raw or ulcerated, which facilitated the absorption of large quantities of neomycin and bacitracin. These are the only cases reported in the literature and are not of concern in OTC use of bacitracin.

The North American Contact Dermatitis Research Group (Ref. 14) did not feel that bacitracin was a sufficiently frequent cause of skin allergy to include it in their 1972 study on the most common causes of allergy skin disease in North America.

(2) *Effectiveness.* Bacitracin for topical use was evaluated originally in clinical trials performed between 1947 and 1954 (Refs. 15 through 21).

These studies lacked controls and involved a wide variety of superficial skin infections. The dosage forms tested included bacitracin ointment and bacitracin aqueous solution. The later is not available commercially (either OTC or through prescription) for topical use.

In 1947, Meleney and Johnson (Ref. 15) reported on the use of bacitracin ointment and bacitracin aqueous solution in 100 patients with assorted minor surgical infections. Results were good in 31 percent, moderate in 57 percent, and poor in 12 percent. No controls were included, and results using bacitracin ointment alone could not be extracted from the report.

In 1948 and 1949 Miller et al. (Refs. 16 and 17) reported uncontrolled studies using bacitracin ointment in 87 and 68 adequately followed patients with several types of superficial skin infections. Impetigo cases responded particularly well to treatment, with a median healing time of 8 days among 42 of 44 patients cured with bacitracin ointment. However, no cases were treated with the ointment base alone.
